*Bhagulpore.*—A second-class dispensary, transferred to the municipality in July last. Visited once by the sanitary commissioner, and daily by the civil surgeon. There were treated 276 in and 4,094 out-patients, against 272 and 3,492, with a daily average of 13 and 48, against 10 and 38 respectively. The civil surgeon reports favorably on assistant surgeon Nemy Churn Chatterjee, and states that since he took over charge of the dispensary, a considerable increase in the daily attendance has taken place. The total number of deaths was 66, against 50 in 1880. About half of these were moribund cases picked off the streets by the police. 27 major and 462 minor operations were performed, against 25 and 239 respectively in 1880. Government contribution is confined to Rs. 1,200 a year, or the full pay of a third-grade assistant surgeon. The income during the year was Rs. 3,282, of which government paid Rs. 1,218. The total expenditure was Rs. 3,618, whereof Rs. 1,819 was expended on establishment, and Rs. 509 on buildings. The amount expended for European medicines was Rs. 439, which represents the cost of medical stores in 1880 and 1881. A highly-paid compounder on Rs. 15, and a dresser on Rs. 16 per mensem, are employed in the dispensary.

*Nauthnuggur.*—A dispensary in class II, under the Bhagulpore municipality. A second-class hospital assistant is in charge, who receives Rs. 240 a year towards his salary from government. It is an out-door institution, and the number of patients treated was 2,320,

against 2,618 in 1880, the daily average being 25 and 27. Nothing stated about operative surgery. The total income was Rs. 626, viz. Rs. 378 from the municipality, and Rs. 248 from government. The amount expended was Rs. 626, whereof Rs. 432 was expended on establishment, and Rs. 109 on Europe medicines purchased in 1880 and 1881.

*Banka.*—A second-class dispensary, under the management of a committee, who met four times during the year. Visited twice by the civil surgeon, and frequently by the sub-divisional officer, who is said to take much interest in the dispensary. It was also inspected by the commissioner, magistrate, and the district superintendent of police. Government contributes the full salary of the hospital assistant, viz. Rs. 360, besides an extra allowance of Rs. 10 for the charge of the sub-division. 69 in and 1,131 out-patients were treated, against 58 and 1,014 in 1880; the daily average being 2 and 12, against 1 and 10. There were 8 deaths. Minor operations numbered 39; no major operation. The income from local sources was Rs. 563, and from government Rs. 365. The total expenditure was Rs. 723, of which Rs. 554 was expended on establishment. The dispensary should be made a first-class sub-divisional institution, for which there are more than ample funds for legitimate expenses.

*Colgong.*—A second-class dispensary, under a local committee, who met twice during the year. Visited once each by the magistrate and district superintendent of police, and twice by the civil surgeon. Government contributes Rs. 180 a year, or half the salary of the hospital assistant, and Rs. 50 in lieu of medicines. 2,731 out-patients were treated with a daily average of 28, against 2,836 and 26 in 1880. 189 minor operations were performed. The income from local sources was Rs. 470, and from government Rs 188. The total expenditure was Rs. 516, of which Rs. 432 was expended on establishment. Rs. 260 was paid from municipal funds.

*Muddepoorah.*—Transferred to class I from 1st July last. It is managed by a local committee, who met only once during the year. The civil surgeon inspected once. At the time when the civil surgeon usually visits this and the Soopole and Pertabgunge dispensaries, which are remotely situated and very difficult of access, he was placed in additional medical charge of the 16th Regiment, Native Infantry, when cholera broke out amongst the men. An assistant surgeon is in charge. 172 in and 3,267 out-patients were treated, against 143 and 2,714 in 1880; the daily average being 4 and 22, against 5 and 26. The number of deaths was 6, against 7 in 1880. 29 major and 222 minor operations were performed, with no death. The total expenditure was Rs. 2,141, whereof Rs. 424 was paid by government.

*Soopole.*—A second-class dispensary, under the management of the sub-divisional officer. Inspected once each by the magistrate and the civil surgeon, and eight times by the sub-divisional officer. There were treated 55 in and 1,894 out-patients, against 65 and 1,006 in 1880; the daily average being 2 and 8, against 3 and 4. The record of attendance does not appear to be trustworthy. 53 minor operations were performed. The total expenditure was Rs. 1,212, whereof government paid Rs. 480. Orders were issued to withdraw the government aid to, and connection with, this dispensary from 1st January 1882. The dispensary has therefore been regarded as closed during the year under review.

*Pertabgunge.*—A first-class dispensary, entirely supported by Rai Dhunput Singh Bahadoor. There is no committee. 1,860 out-patients were treated, against 2,170 in 1880, the daily average being 20 and 28 respectively. The general public health appears to have been good. 15 minor operations were performed. The total expenditure was Rs. 696. The dispensary was visited once by the civil surgeon.

Purneah district.

The public health of the district in 1881 was not so good as in the preceding year. The district suffered generally from the prevalence of fever. The mortality from cholera, small-pox, and bowel-complaints, was ordinary. There are three dispensaries in the district, all of which receive in patients, and are in class II. The total daily attendance was 8 in and 35 out patients, against 8 and 45 in 1880. The civil surgeon distrusts the figures of the Kishengunge dispensary, but the others may on the whole be regarded as reliable. All the dispensaries are in charge of civil hospital assistants. Two are under local municipalities, and one under a committee. The managers, it is said, do not take much interest in dispensaries, which are said to be appreciated by the poor. The attendance, however, does not justify the latter conclusion.

*Purneah.*—A second-class dispensary, under municipal management. It was visited once each by the commissioner of the division and the sanitary commissioner. The civil surgeon visited almost daily. Government contribution is confined to Rs. 360 year, or half the salary of the hospital assistant. There were treated 152 in and 2,877 out-patients, against 170 and 2,500 in 1880; the daily average being 6 and 20, against 6 and 21. The death-rate was 17·6 per cent., against 25·2. 21 major and 62 minor operations were performed The income from local sources was Rs. 1,120, of which Rs 120 was paid by the municipality. The amount paid by government was Rs. 364. The total expenditure was Rs 1,530, of which Rs. 1,064 was expended on establishment.

*Bussuntpore.*—A second-class dispensary, managed by a committee, consisting of five official and six non-official members under the sub-divisional officer. Two meetings only were held. Visited twice by the magistrate, and twice by the civil surgeon. Bussuntpore is a sub-division. Government contributes Rs. 180 a year towards the salary of the hospital

assistant of the sub-division. 46 in and 1,531 out-patients were treated, aganist 29 and 1,299 in 1880; the daily average being 1 and 8, against 1 and 7. The work is insignificant. A compounder and collecting-peon, costing Rs. 13 per mensem, are needlessly maintained. The death-rate was 8·6 against 10·3 in 1880. 4 major—all setting of fractures and dislocations—and 6 minor operations were performed. The income from local sources was Rs. 659, and Rs. 182 from government. The total expenditure was Rs. 818, of which Rs. 581 was expended on establishment, and Rs. 100 on building. The in-door ward is useless. The dispensary should be made a first-class sub-divisional institution, if not closed. There are ample private funds for legitimate expenses.

*Kishengunge.*—A second-class dispensary, under the local municipality. It was visited once each by the commissioner and the magistrate, and twice by the civil surgeon. Government contributes Rs 120 a year, as extra allowance to the hospital assistant of the sub-division. There were treated 16 in and 1,674 out-patients, against 28 and 1,201; the daily average being ·39 and 7, against ·97 and 16. 5 major and 40 minor operations were performed. The attendance is insignificant, and the dispensary is useless to the people. The total expenditure was Rs. 378, of which the municipality paid Rs 75, and Rs. 132 was paid by government. There was an accumulated cash balance of Rs. 1,683 in the savings bank at the end of the year.

**Maldah district.** The public health of the district was much worse than it was in 1880. There were three dispensaries in the district, of which one was closed on 20th December last. Two of the remaining institutions were placed in class I during the year. The dispensary in the sudder station only receives in-patients. The total daily attendance of in and out patients in the three dispensaries was 84, against 86 in 1880. The figures of the sudder dispensary the civil surgeon regards with confidence, but the figures of the other two dispensaries, he believes, are over stated. The managing bodies do not appear to take much interest in the dispensaries.

*English Bazar Dispensary.*—Transferred to class I in December last. The dispensary is under the management of the municipality. Visited once by the commissioner, and six times by the magistrate. The civil surgeon paid daily visits. 117 in and 5,859 out-patients were treated, against 128 and 5,800 in 1880; the daily average being 4 and 43, against 5 and 41. The death-rate was 32·4 per cent., against 23·4. 18 major operations were performed. The total expenditure was Rs. 995, whereof government paid Rs. 328.

*Maldah Town.*—Placed in class I in December last. The dispensary is governed by the local municipality. It was visited by the commissioner of the division, by the sanitary commissioner, and the district magistrate. The civil surgeon paid four regular visits. Eight meetings were held. There were treated 3,393 out-patients, against 3,173 in 1880, the daily average attendance being 19 and 18 respectively. 79 minor operations were performed. The total expenditure was Rs. 522, of which government paid Rs. 184.

*Chanchal.*—The dispensary was closed on 20th December last by order of government. There were treated 2,047 out-patients, against 1,980 in 1880, the daily average being 17 against 16. Minor operations numbered 82; no major operation. The total expenditure was Rs. 903, of which government paid Rs. 300.

**Sonthal Pergunnahs.** The general health of the district was worse than that of 1880. Malarial fever was very prevalent, the mortality being greater than any of the eight preceding years. There were outbreaks of cholera and small-pox, but not in a severe form. The unhealthiness of the district has not, however, affected the attendance at the dispensary. There are six dispensaries in the district, excluding the mission dispensary at Taljhari, which is not under government supervision, and including the mission dispensary at Benagaria, which is supervised by government. Four of these receive in-door patients. Of the six dispensaries, 4 are in class I, including the Benagaria dispensary, and two in class II. The total daily attendance in all the dispensaries was 18 in and 63 out-patients, against 15 and 72 in 1880. The civil surgeon considers that the figures of attendance in 1881 may be regarded with confidence, but returns are the only basis. One assistant surgeon and five native doctors are in charge. The management of one of the dispensaries is under the municipality, 4 under committees, and one, a mission dispensary, is under private management. The civil surgeon says that the members of all the dispensaries take a lively interest in them, which are also appreciated very much by the people, but the record of meetings does not show this. The scanty attendance is attributed to sparse population, there being no villages of any size in the neighbourhood, and to the comparative healthiness of the district.

*Doomka.*—A second-class dispensary, managed by a committee, who held two meetings only during the year. It was visited once by the commissioner, twice by the deputy commissioner, and occasionally by the sub-divisional magistrate. The civil surgeon paid almost daily visits. A first-grade hospital assistant is in charge, who is very favorably reported on. Government contributes Rs. 360 a year towards the salary of the hospital assistant. There were treated 173 in and 2,092 out-patients, against 130 and 2,048 in 1880; the daily average being 7 and 17, against 5 and 18. There were 18 deaths, against 9, the increase being due to larger number of moribund cases sent by the police. Two major and 137 minor operations only were performed, a result which is highly unsatisfactory for a dispensary daily attended by a civil surgeon. The total expenditure was Rs. 1,909, whereof government paid Rs. 412. Rs. 1,064 was expended on establishment,

and Rs. 513 on buildings. One shop-cooly and assistant sweeper, costing Rs. 6 per mensem, are needlessly maintained.

*Deoghur.*—A second-class dispensary, managed by the local municipality. Twelve meetings were held. Visited once by the commissioner, twice by the deputy commissioner, and thrice by the civil surgeon. A second-grade assistant surgeon is in charge, who receives Rs. 90 from government, and Rs. 60 per mensem from dispensary funds. There were treated 153 in and 1,823 out-patients, against 159 and 2,228 in 1880; the daily average being 4 and 10, against 4 and 14. The decrease in attendance is attributed to the healthiness of the place. 46 deaths occurred, against 52 in 1880. The pilgrims in their last stage of disease form the largest number of patients in the dispensary. 3 major and 75 minor operations were performed. The total expenditure was Rs. 2,277, of which Rs. 1,999 was expended on establishment. Government contributed Rs. 999, and Rs. 72 was paid by the municipality.

*Rajmehal.*—The status of the dispensary was changed during the year It is now a first-class sub-divisional dispensary. The assistant surgeon was replaced by a hospital assistant. Government pays the grade pay to the hospital assistant of the sub-division, and the dispensary pays him an extra allowance of Rs. 10 per mensem. It is under the management of a committee, who met ten times during the year. Inspected twice by the commissioner, once by the deputy commissioner, and thrice by the civil surgeon. There were treated 100 in and 1,160 out-patients, against 86 and 1,172 in 1880. The daily average attendance was 3 and 7, against [illegible] and 10 respectively. There were 32 deaths, against 17 in 1880. Diarrhœa, dysentery, dropsy, and cholera, contributed the largest number of deaths. The high rate of mortality was due to the large number of patients admitted in a moribund state. One major and [illegible] minor operations were performed. There was a marked decrease in the income of the dispensary. It is said that the people show a general disinclination to subscribe owing to the status of the dispensary being changed during the year, and the civil surgeon anticipates closure as soon as the funds are exhausted. The dispensary is useless to the people. The total expenditure was Rs. 1,067, of which Rs. 860 was expended on establishment. Government paid Rs. 655.

*Godda.*—It is a sub-divisional dispensary in class I. This dispensary was heretofore regarded as a sub-divisional institution under rule VII of the old rules. It appears that no contribution is made by government towards the maintenance of this dispensary. The extra allowance of Rs. 10 per mensem to the civil hospital assistant is being paid from the dispensary fund. The dispensary is managed by a committee presided over by the sub-divisional officer. Two meetings were held. Visited once each by the commissioner, deputy commissioner, and the sub-divisional officer; the civil surgeon paid three visits. The total number of in-door patients treated was 54, and out-door 1,043, against 39 and 1,006 in 1880; the daily average being 2 and 12, against 1 and 12. The death-rate was 5·5 per cent., against 10·2 per cent. in 1880. 2 major and 46 minor operations were performed. The total expenditure was Rs. 601, inclusive of Rs. 10, being the cost of forms supplied by government. The invested capital at the end of the year amounted to Rs. 1,795 in the savings bank.

*Jamtarrah.*—A sub-divisional dispensary in class I. This dispensary was also treated as a sub-divisional institution under rule VII of the old rules, as in the case of the Godda dispensary. The hospital assistant of the sub-division is in charge, who receives Rs. 10 per mensem from the dispensary fund. It is under the management of a committee, which met only once during the year. Visited thrice by the civil surgeon. 874 out-patients were treated, against 839 in 1880, the daily average being 5 in both the years. 2 major and 43 minor operations were performed. The total expenditure was Rs. 234, of which Rs. 153 was expended on establishment.

*Benagaria.*—It is a mission dispensary in class I, under the management of missionary gentlemen. A private native doctor is in charge, who is paid Rs. 40 a month from the mission fund. Government contributes nothing except an annual subscription of Rs. 120 as zemindar of the government estate of Damin-i-koh. Visited thrice by the civil surgeon. 813 out-patients were treated, against 1,005 in 1880, the daily average being 10 in both the years. 13 minor operations were performed. The total expenditure was Rs. 734, of which Rs. 480 was expended on establishment.

## ORISSA DIVISION.

Cuttack district.

The general health of the district is said to be good, but the rate of mortality in 1881 was higher than the two preceding years. Fevers and cholera show some increase. There are eight dispensaries in the Cuttack district and in tributary mehal estates. Of these one is in class I, five in class II, and two in class III of the new rules. There were no changes during the year. Except the Cuttack branch and Bissiparrah, all the dispensaries receive both in and out patients. The total number of patients treated in 1881 shows some increase over the previous year. The civil surgeon seems satisfied with the figures returned from dispensaries, but the evidence does not justify much confidence. The civil surgeon's reason for believing that exaggerated numbers were not recorded, viz., that their average is much the same as previous years, is a fact which rather leads to suspicion than otherwise. Two assistant surgeons and six civil hospital assistants are in charge. Three of these dispensaries are in charge of municipalities, three under local committees, and two are entirely maintained by government. The civil surgeon states that the appreciation of these institutions by the

people as regards medical cases cannot be said to be great, but for surgical relief the hospital is more readily resorted to. The wards are chiefly occupied by pilgrims, hence the death-rates.

*Cuttack General Hospital.*—This is a hospital and a school. It is a second-class institution, supported by government and the unnochutter fund. It is managed by a special committee appointed by government by whom three meetings were held during the year. No formal visit was paid by civil officers, the civil surgeon visiting it twice a day or oftener. There were treated 653 in and 5,579 out-patients, against 631 and 5,138 in 1880, the daily average being 41 and 37, against 39 and 33. The number of deaths was 117 against 95, or 17 per cent The mortality was among pilgrims brought into the hospital in a hopeless condition The most common diseases were malarious fever, dysentery, and syphilitic and respiratory affections. 49 major operations were performed; several were important ones. Ten scrotal tumours were removed, with one death. 263 minor operations were performed. The income during the year amounted to Rs. 9,502, of which government paid Rs. 2,405. The total expenditure was Rs. 9,719. At the end of the year there was an invested capital of Rs. 2,500, and a floating balance of Rs. 280.

*Cuttack Branch Dispensary.*—A second-class institution, under the local municipality. It is situated in the centre of the town of Cuttack, and out-patients only are treated. Cases requiring in-door treatment are transferred to the general hospital. Government contributes Rs. 180 a year, or half the salary of the hospital assistant. The district magistrate visited the dispensary frequently; the civil surgeon paid daily visits. It is a useful institution. The number of patients treated was 10,601, with a daily average of 150, against 10,901, and 151 in 1880. For this work the subordinate establishment cost Rs. 18 per mensem only, viz., compounder at Rs. 10, bearer Rs. 4, and sweeper the same. 26 major and 425 minor operations were performed. The income during the year was Rs. 998, of which government contributed Rs. 186; the total expenditure was Rs. 894. The civil hospital assistant attached to the dispensary is also the teacher of anatomy of the medical school, for which he is paid Rs. 25 a month from government.

*Jajepore.*—The dispensary is in class II. It is governed by the municipality of the sub-divisonal town in which it is situated. Visited several times by the sub-divisonal officer, once by the magistrate, and twice by the civil surgeon. 59 in and 2,443 out-patients were treated in 1881, against 34 and 2,128 in the previous year, the daily average being 1·8 and 26, against 1·1 and 23. The civil surgeon remarks that no satisfactory conclusion can be drawn between the above figures and public health returns. There were 13 deaths among in-patients against 10 in 1880, and were due to greater number of pilgrims, who were under treatment for cholera and in the last stages of illness following exposure and fatigue. Nine major and 164 minor operations were performed. The dispensary is chiefly used by the pilgrims The income during the year was Rs. 966, of which government contributed Rs. 268. The amount expended during the year was Rs. 1,032.

*Kendraparah.*—A dispensary in class II, under the local municipality Four meetings were held. Visited seven times by the sub-divisional officer, thrice by the civil surgeon, and once by the magistrate. There were treated 44 in and 2,476 out-patients, with a daily average of ·11 and 6, against 33 and 1,802, with a daily average of 1·9 and 27 respectively in 1880. Kendraparah is a sub-division. There were 4 deaths: three were in pilgrims. Seven major and 70 minor operations were performed. The local income of the dispensary, which was Rs. 676, is enough for its legitimate wants. Government paid Rs. 184, and the total expenditure was Rs. 870, of which Rs. 553 was expended on establishment, and Rs. 102 on building.

*Dhurmasala.*—A second-class dispensary, under a committee, which composed of the same members as that of the Cuttack general dispensary, with the addition of the manager of the Durpan estate, in which the dispensary is situated. It is a halting place for pilgrims. The dispensary was founded by Rai Boidonath Bahadoor for the benefit of his tenantry. Government contributes Rs. 300 towards the pay of the hospital assistant. 168 in and 3,837 out-patients were treated, against 119 and 3,582 in 1880. The daily average attendance was 4·8 and 31, against 3·5 and 30. Most of the patients were pilgrims travelling to Puri or returning to their homes. The dispensary is not largely resorted to by the local residents. 24 deaths occurred among in-patients—all pilgrims admitted in the last stages of illness. 24 major operations of an unimportant nature were recorded. The income from private sources amounted to Rs. 1,000. Government paid Rs. 304. The total expenditure was Rs. 1,318. Three meetings were held, and the dispensary was visited twice each by the magistrate and the civil surgeon.

*Dhenkanal*—A first-class dispensary established by the late Maharajah in 1866. It is entirely supported by the Dhenkanal estate. The dispensary committee consist of the superintendent, Tributary mehals, the Raja, who is now a minor under the court of wards, and his dewan. No formal meeting was held during the year, all questions affecting the dispensary being submitted by the manager for the orders of the superintendent, Tributary mehals. It was inspected thrice by the civil surgeon. An assistant surgeon is in charge, who receives Rs. 175 per mensem. A hospital assistant is also attached to the institution, but is at present in attendance on the Rajah, who resides at Cuttack, attending the government college. 176 in and 9,045 out-patients were treated, with a daily average of 5 and 45. In 1880 the numbers were 135, 8,233, 5, and 45 respectively. Seven deaths

occurred. The total expenditure was Rs. 3,259, of which Rs. 2,748 was expended on establishment.

*Ungool*—A dispensary in class III, entirely supported by government. It is in the government estate of that name, and is under the direct management of government. It is remotely situated in the Hill Tracts, and no residents are available to form a committee. The place is not readily accessible, and a journey to and from it cannot, it is said, be accomplished within a week. It was on this account that the civil surgeon paid no visit during the year, but the commissioner remarks, with truth, that "Ungool is only 67 miles from Cuttack and the road is fair. I think it might at times be visited." 37 in and 2,359 out-patients were treated, against 25 and 1,235 in 1880, the daily average being 1 and 18 against 2 and 15. There was one death only. One major and 11 minor operations were performed. The total expenditure was Rs. 580, of which Rs. 494 represents the cost of establishment.

*Bissiparah.*—This is also a dispensary in class III, entirely supported by government. It is situated in the Kond Mehal government estate, bordering on Rasoolcondah, in the Ganjam district of the Madras Presidency. The country is very difficult of access The civil surgeon paid no visit On this the commissioner remarks that "Bissiparah is really so distant that the visit could not be made without serious interference with other duties. There is not even a tradition of any civil surgeon ever having visited Bissiparah." The place is said to be very unhealthy, and a large supply of medicines is recommended. Their use, however, is very doubtful. There were recorded 2,101 out-patients with a daily average of 5, against 1,802 and 6 in 1880. The figures prove their own absurdity. No particular operations were performed during the year. The total expenditure was Rs. 456, of which Rs. 393 was expended on establishment.

**Balasore district.**

The report is wanting in details in several places, and is of a roseate colour. The public health of the district was good. There was no severe epidemic during the year. There are three dispensaries in the district; two in class II, and one was transferred to class I during the year. Two of these receive in-patients. The total daily average attendance in all the dispensaries was 10 in and 44 out-patients. All the institutions are in charge of civil hospital assistants. The civil surgeon examined the registers, and made private enquiry in order to test the accuracy of the figures of attendance, but he does not say what was the result of his examination and enquiry. The civil surgeon states that both the Balasore and Bhuddruck dispensaries receive every attention at the hands of the managing bodies.

*Balasore Pilgrim Hospital.*—A second-class dispensary. There is no committee, the dispensary being governed by the civil surgeon, by whom all bills and accounts are checked. There were a good many superfluous servants attached to the dispensary, who, it appears, have been discharged during the year. 285 in and 2,089 out-patients were treated in 1881, against 241 and 1,918 in 1880, the daily average being 5 and 10, against 7 and 10. The total attendance does not bear relation to public health, as the dispensary is largely attended by pilgrims. The percentage of mortality was higher in 1881 than the two preceding years, owing chiefly to the deaths from cholera, which proved fatal to 28 persons in 40 cases treated. Seven major operations were recorded, but none of any importance. The dispensary is chiefly maintained from the unnochutter fund, government contributing Rs. 55 a month, or the full salary of a first-grade hospital assistant. The income from local sources was Rs 1,498, and Rs. 676 was paid by government. The total expenditure was Rs. 2,495, of which Rs. 1,104 was expended on buildings. The local income of the institution is quite sufficient for its maintenance in class I without government aid. At the end of the year there was a cash balance of Rs. 1,746, and Rs. 4,242 as invested, the latter being the balance of the amount paid by the Maharajah of Mohurbhunge towards the erection of a new building.

*Bhuddruck.*—A sub-divisional dispensary in class II, under a committee, of which the sub-divisional officer is the chairman. Nine meetings were held, and four visits were paid by the civil surgeon. 159 in and 2,493 out-patients were treated, against 187 and 2,341 in 1880. The daily average attendance was 4 and 17, against 6 and 15. The death-rate was higher than 1880. It is a pilgrim hospital. 20 major operations were performed. Government payment was confined to Rs. 720 a year, or the full salary of the hospital assistant, and to a special allowance of Rs. 100 in lieu of medicines. The private income is very small. The total expenditure was Rs. 1,779, which is too high for the work done. Government paid Rs. 1,131. At the end of the year there was a cash balance of Rs. 652, and an invested capital of Rs. 5,300.

*Shamanund De dispensary.*—Transferred to class I during the year. It is managed by a committee, by whom two meetings were held. The civil surgeon paid frequent visits. The first-grade hospital assistant who was in charge was replaced by a second-grade man under the orders of government. The number of out-patients treated was 2,348 with a daily average of 16. No major operations were performed; minor operations numbered 124. The total expenditure was Rs. 900, of which Rs. 4 represents the cost of forms supplied by government.

**Pooree district.**

The civil surgeon has submitted an excellent report. It is clear and complete. The general health of the district was as bad as in 1880. Dr. Gupta submits an interesting analysis of mortality in 1881 as compared with the preceding years. There were three dispensaries working at the end of the year under report. No new dispensary was opened or closed during the year. All of these receive both in-door and out-door patients. The total

daily average attendance in all the dispensaries was 19 in and 66 out-patients. The civil surgeon did his utmost to check returns, but does not give full credence to any but those which he personally watched. All the dispensaries are in charge of civil hospital assistants, and are in class II of the new rules. Two of these are under the management of the Pooree lodging house committee, and one under a local committee, who are said to take a fair amount of interest in them. The better classes of the resident population do not, the civil surgeon says, appear to appreciate the services rendered by the dispensaries to their poorer neighbours. The out-door treatment is said to be appreciated by the poorer classes, but the Uriyas, as a general rule, cannot be induced to take admission in the hospital unless they are reduced to extremity for fear of losing caste. The case is, however, different with the foreigners and pilgrims, who compose almost all the house-patients in the dispensaries.

*Pooree.*—A second-class dispensary, managed by the Pooree lodging house committee, of which the district magistrage is the president, and the civil surgeon is the secretary. Four meetings were held during the year. The dispensary was visited once by the commissioner, four times by the magistrate, and daily by the civil surgeon when in town. Government contribution is confined to Rs. 360, or half the salary of the hospital assistant. There were treated 375 in and 4,117 out-patients, with a daily average of 12 and 31, against 313 and 4,165 and a daily average of 12 and 34 respectively in 1880. There were 127 deaths, against 92 in 1880 among house-patients, the percentage to total admissions being 33·8 and 29·3. The civil surgeon remarks that "the town was visited by a larger number of pilgrims, and when such is the case, admissions and deaths from cholera and long-standing chronic dysentery and diarrhœa invariably increase; this was the case in 1881." 15 major and 426 minor operations were performed. It is stated that the people of this place are extremely unwilling to come to hospital for operations. and this circumstance explains the smallness of their number. The income of the dispensary during the year was Rs. 3,734, of which government contributed Rs. 1,988, viz., Rs 360 as salaries, Rs. 1,624 expended by the public works department in repairing the dispensary building, and Rs. 4 as the cost of forms. The total expenditure was Rs. 3,504, which includes the charges specified above.

*Pipli.*—A second-class dispensary, under the management of the Pooree lodging house committee, who met ten times during the year. It was visited once by the magistrate, and twice by the civil surgeon. Government contribution is confined to Rs. 300, or half the salary of the hospital assistant. There were treated 108 in and 1,782 out-patients, against 119 and 1,947 in 1880, the daily average being 2 and 17, against 2 and 18. There were 19 deaths, or 17·5 per cent., against 16·8 in 1880. Fever cases as usual head the list. Three major and 134 minor operations were performed. The income during the year was Rs. 1,348, of which government paid Rs. 303. The total expenditure was Rs. 1,348, of which Rs. 340 was expended on buildings, and Rs. 848 on establishment. The special grant of Rs. 75 in lieu of medical stores was withdrawn during the year.

*Khoorda.*—A second-class dispensary, situated within the government estate of Khoorda. It is entirely maintained by government as a zemindar, the expenses being defrayed from the estate improvement fund. The dispensary is managed by a local committee under the presidency of the district magistrate. Visited once each by the commissioner and magistrate, nine times by the sub-divisional officer, and twice by the civil surgeon. The sub-divisional hospital assistant is in charge, who receives an allowance of Rs. 10 from the improvement fund. 141 in and 3,523 out-patients were treated, against 38 and 2,989 in 1880, the daily average being 3 and 18, against 5 and 20. There were 11 deaths against 10 in 1880, or a rate per cent. of 7·8 against 11·3. One major and 43 minor operations were performed. The total expenditure was Rs. 776, of which Rs. 336 was expended on establishment, and Rs. 120 on buildings.

## CHOTA NAGPORE DIVISION.

**Maunbhoom district.**

The year under report was less healthy than the previous year, fever having prevailed to a greater extent. There are three dispensaries in the district; all of these receive in-door patients. One of these institutions is in class I, and two in class II. The daily average attendance in all the dispensaries was 22 in and 58 out-patients, against 16 and 46 in 1880, the increase being ascribed to the unhealthiness of the year. The civil surgeon has confidence in the accuracy of the figures, but the evidence on which he based his opinion is not sufficient. All the dispensaries are in charge of hospital assistants. The civil surgeon does not say what interest is taken by the managing bodies.

*Purulia.*—A second-class dispensary, transferred to the municipality during the year. Visited 12 times by the deputy commissioner, once by the sanitary commissioner, and daily by the civil surgeon. A second-grade hospital assistant is in charge, who receives Rs. 50 per mensem, half of which is paid by government. 250 in and 3,422 out-patients were treated, against 247 and 2,596 in 1880; the daily average being 14 and 32, against 11 and 30. The death-rate was 9·2 per cent., against 13·7. 18 major and 229 minor operations were performed. The total expenditure was Rs. 1,491, whereof government paid Rs. 370, and Rs. 180 was paid by the municipality. The income from local sources was Rs. 1,337.

*Pandra.*—A first-class dispensary, entirely supported by Maharani Hingar Kumari of Pandra, who died during the year. The deputy commissioner remarks, that her death "makes the future of the dispensary doubtful. The estate is at present under attachment,

and for the present the charitable institutions are maintained as before." The dispensary is managed by a committee, who held three meetings. It was inspected by the deputy commissioner, assistant commissioner, and the civil surgeon. A private native doctor is in charge, who receives Rs. 35 a month. There were treated 130 in and 1,380 out-patients, against 90 and 1,067; the daily average being 4 and 15, against 2 and 8. The cause of the increase has not been explained. 13 per cent. died among in-patients, against 18 per per cent. in 1880. Three major and 66 minor operations were performed. The total outlay was Rs. 1,035, of which Rs. 727 was expended on establishment, and Rs. 187 on Europe medicines. The latter charge is too high for the work done. The civil surgeon says that "it had been the custom for the native doctor to purchase the Europe medicines himself from Calcutta or elsewhere," and that this practice has of late been discontinued.

*Govindpore.*—A sub-divisional dispensary in class II, under the management of a committee, which met three times during the year. Visited three times each by the deputy commissioner and the civil surgeon, and five times by the sub-divisional officer. Government contributes Rs. 10 as an extra allowance to the civil hospital assistant of the sub-division. 91 in and 956 out-patients were treated, with a daily average of 2 and 10. The corresponding figures in 1880 were 57 and 563, and a daily average of 1 and 7 for ten months. 1 major and 36 minor operations were performed. The dispensary is of very little use to the people. For this insignificant work, an establishment costing Rs. 16 per mensem, excluding the allowance paid to the hospital assistant, is maintained. The total expenditure was Rs. 423, of which Rs. 126 was paid by government. The income from local sources was Rs. 435. If the existence of the dispensary be allowed, it should pass into class I sub-divisional institution, for which there are ample private funds.

Hazaribagh district.

The officiating civil surgeon, Dr. Lewtas, has submitted an excellent report which shows that he takes a warm interest in the dispensary. The total number of deaths registered in the district shows an increase of 8,245 over that of 1880, when it was 11,323. From this it would appear that the health of the district was worse in 1881; but such, however, the civil surgeon says, was not the case, as proved by the testimony of the inhabitants and the absence of epidemics. The increase is attributed to improved registration. There are three dispensaries in the district, all in class II. The sudder dispensary receives in-door patients. The in-door ward in the Burhee dispensary was closed during the year. Pilgrims mainly compose the in-door admissions, being deposited there by the police in the last stage of disease, or with a chronic or incurable disease. The civil surgeon reports "that when once pilgrims are admitted, it is frequently a difficult matter to get rid of them again." Among the residents a distinct aversion exists to becoming in-patients. The total daily attendance of patients was 86, against 75 in 1880. The civil surgeon says that the returns of the sudder dispensary may be accepted as substantially correct, but he gives no opinion on the figures of the other dispensaries. All the dispensaries are in charge of hospital assistants. The civil surgeon says that the native members of the managing committees have begun to take a slight interest in their duties.

*Hazaribagh.*—A second-class dispensary, managed by the municipality. Seven meetings were held. The civil surgeon visited the dispensary almost daily. The assistant commissioner inspected it when he attended the monthly meetings. Government contributes Rs. 180 a year, or half the salary of the hospital assistant. There were treated 168 in and 4,099 out-patients, against 189 and 3,947 in 1880. The daily average attendance was 9 and 44, against 6 and 46. The death-rate was 17·8 per cent., against 19 in 1880. Fifty per cent. of the mortality is said to have been caused by dysentery and diarrhœa. Four major and 102 minor operations were performed. The total expenditure was Rs. 1,300, whereof government paid Rs. 221. The income from local sources, including Rs. 342 contributed by the municipality, was Rs 997. The amount expended on diet was Rs. 260. The civil surgeon suggests that the in-door ward be closed. He states that "the in-door department is not appreciated by the sick-poor of Hazaribagh. Those who make use of it, do so in a number of cases, not on account of the severity of their diseases or injuries, but because it suits their convenience to do so. I have had people come saying they intended to stay as in-door patients, without waiting to hear whether I consider them suitable cases for admission." Thus the dispensary is used as a poor-house, and not as a hospital.

*Chuttra.*—A second-class dispensary, governed by the municipality. Four meetings were held. The civil surgeon paid one visit. A hospital assistant is in charge, who is paid Rs. 180 a year by government. 5 in and 2,168 out-patients were treated, against 21 and 1,991 in 1880; the daily average being ·13 and 20, against ·75 and 13. There was one death among the in-patients. The in-door ward is useless. The total outlay was Rs. 707, of which Rs. 453 was expended on establishment. Rs. 195 was paid by government, and Rs. 258 by the municipality. The income from local sources was Rs. 515, which is sufficient for a first-class dispensary. In government letter No. 1151, dated 12th September last, it was said that "the Lieutenant-Governor will await a further report early next year on the proposal of the surgeon-general that the dispensary should be brought under class I."

*Burhee.*—A second-class dispensary, under a committee, which met five times during the year. Visited once by the deputy commissioner, and twice by the civil surgeon. The in-door ward was ordered to be closed, but the civil surgeon does not say whether it has been done. Establishment was reduced. Government contributes Rs. 180 a year, or half the salary of the hospital assistant. There were treated 48 in and 1,057 out-patients, against

61 and 701 in 1880; the daily average being 1 and 10, against 2 and 6. The death-rate was 6·2 per cent. More than half the deaths was caused by dysentery. The dispensary is of nominal usefulness. Government aid to this dispensary was continued on the representation of the local authorities, but a report on its financial condition was awaited at the close of the year under report. The income in 1881 was Rs. 596 from local sources. This amount is quite sufficient for its maintenance in class I without government aid, as per estimate given below:—

| | | | Rs. |
|---|---|---|---|
| Civil hospital assistant | ... | ... | 360 or 300 grade pay. |
| Sweeper ... ... | ... | ... | 36 |
| Bazar medicines ... | ... | ... | 9 |
| Europe do. ... | ... | ... | 50 |
| Miscellaneous charges | ... | ... | 30 |
| Building do. | ... | ... | 10 |
| | Total | ... | 495 |

Ample balance is left for extraordinary wants. The total outlay in 1881 was Rs. 656, of which Rs. 514 was expended on establishment, which includes the cost of superfluous servants maintained for some time during the year. Rs. 40 represents the cost of diet, a charge which will not recur. Rs. 16 was also included in the expenditure as the cost of forms supplied by government. The total government contribution was Rs. 196 in 1881.

**Lohardugga district.**

The public health of the district was not so good as it was in 1880. Fevers prevailed in all parts of the district, and no locality showed any special immunity. There were three dispensaries working at the end of the year. The dispensary at Lohardugga was opened on the 21st September 1881. Two of these dispensaries receive in-door patients. The total daily average attendance was 15 in and 48 out-patients, against 11 and 36 in 1880. The civil surgeon has no reason to believe that the figures are not reliable, but the evidence on which he bases his opinion is insufficient. All the dispensaries are in class II. One of these was in charge of an assistant surgeon, and two under civil hospital assistants. The management of the Ranchee dispensary was transferred to the municipality during the year; the rest are managed by local committees. The managing bodies, on the whole, are said to take an active interest in the dispensaries, which are much appreciated by the people of the neighbourhood. The attendance, however, does not verify the latter conclusion, nor do the committee meetings support the former.

*Ranchee.*—A second-class dispensary, transferred to the municipality in November 1881. Three meetings were held. Inspected once by the sanitary commissioner, and occasionally by the district officers. The civil surgeon visited daily. Government contribution is confined to Rs. 240 a year, or half the salary of the hospital assistant. There were treated 156 in and 2,532 out-patients, against 139 and 2,411 in 1880; the daily average being 7 and 28, against 6 and 27. The number of deaths in 1881 was 32, against 40 in the previous year, 13 of which died of chronic dysentery. 7 major and 81 minor operations were performed. The income of the dispensary from local sources was Rs. 1,069, exclusive of Rs. 705 drawn from deposits in the government savings bank, and inclusive of Rs. 100 paid by the municipality. The total expenditure was Rs. 1,351, of which Rs. 754 represents the cost of establishment. The cost of bazar medicines, viz., Rs. 80, besides Rs. 162 expended on Europe medicines, was too high for the recorded work. The charges on miscellaneous items were also too high. In government letter No. 1272, dated 27th September last, it is said that the municipality increased their annual contribution from Rs. 100 to Rs. 240. At the end of the year there was a cash balance of Rs. 874. The funds of the dispensary are ample for legitimate expenses, and the government aid is not required.

*Palamow (Daltongunge).*—A sub-divisional dispensary in class II, under the management of a committee, which met twice during the year. Visited frequently by the sub-divisional officer, and by the commissioner and deputy commissioner when in town. The civil surgeon inspected twice. There were treated 96 in and 1,111 out-patients, against 99 and 981 in 1880. The daily average attendance was 8 and 11, against 5 and 9 respectively. In government letter No. 665, dated 13th June 1881, the civil hospital assistant, who was in charge of the sub-division and jail, was withdrawn, and the assistant surgeon of the dispensary was put in charge, who was to receive an extra allowance of Rs. 25 per mensem from the dispensary fund, and his grade pay from the sub-division. Having regard to the position of government as a zemindar, this order was cancelled in letter No. 1275, dated 27th September 1881, as regards the payment of the extra allowance from dispensary funds, and a report was awaited a year later as to whether it should be possible to reduce the expenditure, and ultimately perhaps to increase the income of the dispensary from private sources, with a view to ascertain if the dispensary funds could bear the allowance of Rs. 25 a month to the assistant surgeon, which is now paid by government. The entire grade pay of the assistant surgeon was included in the accounts of the dispensary; but as the medical subordinate, under the recent orders of government, is in substantive charge of the sub-division, the extra allowance, which should have been paid from dispensary

funds, had only been shown in the accounts as payment by government on account of salaries. The income from local sources was Rs. 820; in 1880 it was Rs. 938. The total expenditure was Rs. 1,048, whereof government paid Rs. 322. Rs. 165 was expended on buildings.

*Loharduyga.*—This dispensary was opened on the 21st September 1881. It is in class II, and government contributes Rs. 180 a year, or half the salary of the hospital assistant. The deputy commissioner suggests that the present hospital assistant, who is by caste a *teli,* be replaced by a Hindoo of higher caste. It is said that his relations with the moonsiff of Lahardugga, who is also the secretary to the dispensary, are by no means satisfactory. The civil surgeon had, however, no fault to find with him. Visited once by the deputy commissioner, and once by the civil surgeon. 202 out-patients were treated, with a daily average of 8. The total expenditure was Rs. 734, of which Rs. 524 was expended on buildings. Government paid Rs. 57. The income from local sources was Rs. 731.

**Singhbhoom district.**

The general health of the district was not so good as it was in 1880. There is only one dispensary in the district, viz. at Chybassa.

*Chybassa.*—A dispensary in class II, managed by a local committee. The in-door ward was closed under the orders of government, from 1st July 1881, and government contribution is now confined to Rs. 10 per mensem to the hospital assistant of the jail. Seven meetings were held. The civil surgeon paid daily visits. The visits paid by civil officers have not been recorded. 43 in and 1,771 out-patients were treated; the daily average among out-patients being 18, against 13 in 1880. The number of out-patients treated in 1880 was 1,220. Of the 1,771 out-patients, 39 per cent. were treated for ophthalmic diseases. The income from local sources was Rs. 752, and the total expenditure was Rs. 617, which includes charges which will not recur owing to the closure of the in-door ward. Government paid Rs. 316. The private funds of the institution are more than enough for its maintenance independently of government aid. The dispensary had an invested capital in the savings bank at the end of the year amounting to Rs. 1,636.

I have the honour to be,

SIR,

Your most obedient servant,

A. J. PAYNE, M.D.,

*Surgeon-General for Bengal.*

# STATISTICAL TABLES.

## STATEMENT No. I.

*Showing the number of Dispensaries in Bengal during the year* 1881.

| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
|---|---|---|---|---|---|---|
| POPULATION OF THE PROVINCE. | Dispensaries. | Number open on 31st December 1880. | Number opened during the year. | Number closed during the year. | Number open on the last day of the year. | REMARKS. |
| 69,535,344 | I Class ... ... ... ... ... ... | 33 | ...... | ...... | 81 | The transfer of dispensaries from one class to another caused the differences in the total under each class. There is no column to indicate these in the statement. |

* Among the securities representing Rs. 39,800 shown as the capital in the return for 1880, there were included some *sicca* rupees which were converted into current coin by the Accountant-General during the year, and the result was an investment of Rs. 42,000 in Government securities of 4 per cent. Rs. 2,200 was therefore added to the amount Rs. 4,387-8-5 actually invested during the year in order to make the balance at the close of the year correspond with the present amount of investment.

## MEDICAL & MUNICIPAL DEPT.

### MEDICAL.

CALCUTTA, THE 17TH JULY 1882.

## RESOLUTION.

READ—

The Report on the Charitable Dispensaries under the Government of Bengal for 1881.

The policy of Government in relation to the administration of medical charity in Bengal was fully explained in the Resolution on the last Report. The work of reorganization, which was begun in 1878 and continued in 1879 and 1880, has been vigorously pushed forward in 1881; and it is satisfactory to find from the present Report that material progress has now been made. Searching enquiries have been instituted into the financial condition and public usefulness of every medical institution in the mofussil, with the result of establishing that, while many were perfectly able to stand alone without Government aid, on the other hand many were useless as public charities, regarded with indifference by the people, and existing solely by means of grants from the State. It is manifest that neither of these classes could have any valid claim upon the public purse, and the enforcement of this principle has carried with it its own demonstration. Where a dispensary had firmly taken root, and had become widely used and appreciated by the public, the subscribers readily came forward on the withdrawal of Government aid, and undertook the management and maintenance of the institution; but where, as was too often the case, the results of the investigation indicated that, while the cost to Government was heavy, the benefit to the public was inconsiderable, and the chief gainers were the medical officer in charge and a few well-to-do supporters, the stoppage of the Government grant was generally followed by the withdrawal of private subscriptions and the collapse and closure of the dispensary. During the year under review, Government aid was withdrawn from 64 mofussil dispensaries, with the result that in 48 cases the subscribers undertook to make good the deficiency themselves; while in 16 cases the dispensary was closed.

2. During 1881 an important step was taken in the right direction by the abrogation of the old Dispensary Rules, and the substitution for them of a Code conceived more in the spirit of the principles laid down by the Government of India in 1849. In place of the former complicated classification, the new Rules prescribe a simple and clearly-defined system, by which all dispensaries are divided into three classes, viz., the first, or unaided class; the second, or aided class; and the third class which consists of institutions supported entirely by Government. The Rules liberate Government from the obligation of establishing or continuing to support any dispensary which cannot be shown to be necessary or useful as a medical charity, and Government is no longer bound as before to supply medical officers and European drugs and instruments in every case in which a moderate local subscription may be raised.

3. Great attention has been paid during the last few years to the training of the students in the Campbell Medical School, and the reports of the Examiners during the past year show that this institution has now begun to turn out a valuable and well-trained class of men, "who are really able to do with their own hands all that is expected or desired from them." Dr. Raye, Examiner in Anatomy, writes: "I was satisfied with the general result of the practical examination of the students at Sealdah in Anatomy. . . . The students showed a very fair practical knowledge of the subject." Dr. Mcleod, Examiner in Surgery, writes: "I was very much pleased with the result of my examination of the Sealdah students in Surgery. I put them to a very searching test, examined them orally, practically as to the use of

instruments and appliances, made each dissect a surgical region and examined him on the dissection, made each perform an operation in my presence, and took them to the College Hospital and examined them in cases they could not possibly have seen before. I found them well grounded in theoretical surgery, good bandagers, and well acquainted with the purposes and modes of using the commoner instruments, neat dissectors, familiar with surgical anatomy, and fairly good in minor operations. Their weak point was diagnosis. They seemed to want tact and insight in rapidly identifying diseases." Similar testimony is borne by Dr. Coates, Examiner in Medicine. Dr. Payne indicates the important bearing this change may be expected to have on the future of dispensaries. During 1881 further efforts were made to ensure that the knowledge once acquired should be maintained and added to. Periodical examinations have been prescribed, which must be passed before a hospital assistant can qualify for promotion to a higher grade; and the value of the English qualification has been increased, while the rules relating to it have been made more stringent.

4. The Surgeon-General considers it difficult to say whether the sick-poor of the Province did or did not derive greater benefit from the dispensaries in 1881 than in former years, and he thinks that no satisfactory inference is to be deduced from the recorded figures. The year was an unhealthy one. Epidemic fever spread over several districts, and cholera was more prevalent than usual, yet the apparent attendance at dispensaries has shown no increase. "The special sanitary officer of Nuddea reported his surprise at the small dispensary figures in the midst of devastating fever, and the district returns tell the same tale." The sameness of the record under widely differing circumstances is indeed one of the most unsatisfactory features of the system; and though considerable improvement in this respect has been effected by the efforts of the local officers in late years, yet it would be quite unsafe to place any reliance upon the figures. Gross instances of falsification have been exposed in the past year. The Civil-Surgeon, 24-Pergunnahs, inspecting the Taki Dispensary, writes: "The registers exhibit a uniform daily attendance of over 30 persons. Yesterday's entries are eight only, and though only eight attended, figures up to 15 have been written, and the spaces in the column opposite the seven extra numbers left blank. In explanation of this, I am first told that only eight attended. Later, in explanation of the reason for writing 15 numbers, I am told that more than eight attended, but a pain in the stomach prevented the hospital assistant from entering more. On my asking again did eight attend or did more attend, the hospital assistant is silent." Dr. Jackson adds: "I cannot help fearing that, but for my visit, the daily number would have been made up to 30 as usual." There is too much reason for suspecting that this was by no means an isolated case, and it will be long before the recorded figures for outlying dispensaries can be accepted as a basis for comparison of real work.

The following table shows the number of dispensaries open in Bengal in the year under review:—

| | |
|---|---|
| Open on 31st December 1880 ... ... ... ... | 247 |
| Established during 1881 ... ... ... ... | 1 |
| Total ... | 248 |
| Abolished or closed during 1881 ... ... ... | 17 |
| Remaining on 31st December 1881 ... ... ... | 231 |

The 17 dispensaries that were closed during the year are described as "institutions which had never shown any public usefulness, and represented only misuse of public money." Of the 231 dispensaries now open, there is reason to suspect that many are now in receipt of Government aid, to which they are not legitimately entitled. Many of these, however, will be made over to local management under the scheme of Local Self-Government, and it is hoped that a more direct interest in efficiency and more complete financial responsibility on the part of the managers will lead to the weeding out of those institutions which are not really required for the purposes of medical charity. In view of this impending change, closure has been less widely resorted to during the past year than would otherwise have been the case. It will be for the Local Boards to decide whether the assistance now given from public funds

will be continued or not. At the commencement of the year the 247 dispensaries in Bengal were classified thus—

| | | |
|---|---|---|
| Class I | | 33 |
| Class II | | 209 |
| Class III | | 5 |
| | Total | 247 |

During the year 48 dispensaries in Class II were brought into Class I, and made independent of Government aid, 17 were closed, and 1 new one was established. The numbers in each class at the end of the year therefore were—

| | | |
|---|---|---|
| Class I | | 81 |
| Class II | | 145 |
| Class III | | 5 |
| | Total | 231 |

The second class now comprises nearly all the dispensaries which made up the inferior classes in the statements of previous years.

5. The following table compares the recorded work done by dispensaries in 1880 and 1881 :—

| | In door Patients | | | | | | | | Out door Patients | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|

| 1881 | 28 | 19 | 10 | 15 | 46 | 23 | | | 149 | | | 10 | 86 | 7) | 27 | 10 | 17 | 236 |
| Percentage | 18 79 | 12 75 | 6 71 | 10 07 | 30 87 | 15 44 | 4 03 | 67 | | 1 27 | 1 27 | 4 24 | 36 44 | 33 48 | | 4 2 | 7 2 | |
| 1880 | 30 | 20 | 18 | 12 | 48 | 23 | | | 158 | 1 | | 12 | 9, | 84 | | 13 | 12 | 251 |
| Percentage | 15 98 | 12 66 | 11 4 | 7 6 | 30 38 | 14 5 | | | | 4 | 3 58 | 4 78 | 37 85 | 33 46 | 9 06 | 5 18 | 4 78 | |

The number of in-patients has always been small, and was still further reduced by the orders passed in 1881 in some remote dispensaries to restrict the practice in future to out-patients. In some places a large proportion of the house-patients consisted of persons sent in by the police; and in other places the wards of dispensaries are mere refuges for lepers and other disabled paupers or out-castes.

6. There were 60 Assistant Surgeons in charge of dispensaries during the year against 65 in the year before. The Surgeon-General does not consider this a mark of retrogression, but rather as a sign that juster proportions now prevail between work and pay.

7. The work of inspecting dispensaries away from head-quarters was, on the whole, better performed by Civil Surgeons in 1881 than in the previous year. Thirteen dispensaries only received no visit of inspection during the year, and these are said to be situated in remote outlying localities.

8. The total number of persons treated during the year was—in-patients 23,444, out-patients 947,534—total 970,978. In 1880 the corresponding numbers were 23,567 and 888,095—total 911,662. Among in-patients the mortality was 15·8 per cent. against 15 17 in the previous year. Dr. Payne writes: "There can be no doubt that if the figures were true throughout, and the work were genuine, the excess of 1881 would be larger than it has been made to appear. In some places a clear relation to the public health is established, but this is not common in remote dispensaries, although medical subordinates habitually adapt the public health to their figures where they think the latter will be considered unfavourable to themselves. It must not be forgotten, however, that in 1881 the number of dispensaries was gradually reduced, and this, taken with the more careful scrutiny of records and the widespread sickness, may sanction a hopeful inference from the larger numbers

of sick returned." The divisional percentages of patients treated on total population were—

| | | |
|---|---|---|
| Burdwan | . | 2·21 |
| Presidency | . | 2·1 |
| Rajshahye | . | 1·98 |
| Orissa | . | 1·33 |
| Dacca | . | 1·18 |
| Chittagong | . | ·5 |
| Patna | . | 1·94 |
| Bhagulpore | . | ·9 |
| Chota Nagpore | . | ·48 |

The total number of patients treated throughout the Province amounted to 1·78 per cent. of the entire population, the proportions varying from 5·95 in Darjeeling and 3·54 in Moorshedabad to ·3 in Tipperah and ·25 in Lohardugga. The Surgeon-General rightly considers this a "miserably small fraction" of the population, proving beyond a doubt that, as a rule, the people are not moved to value the dispensaries even by stress of heavy public sickness.

9. The death-rates among in-patients in the different dispensaries exhibit the widest variations, ranging from 100 per cent. in Magoora and 66·6 in Sherepore to 2·7 in Bagirhat and Ungool and 2·98 in Madaripore. The divisional percentage depends largely on the manner in which the wards of outlying dispensaries are filled, and has no bearing on management, healthiness, or any other point which death-rates are supposed to illustrate.

10. The consumption of cinchona febrifuge made a considerable advance in 1881, the quantity sold being 323lbs., representing a value of Rs. 5,349, against 163lbs. only, with a value of Rs. 2,885 in the previous year. The increase is partly attributable to the excessive prevalence of fever in Nuddea and Midnapore. These two districts alone consumed 145lbs. of the febrifuge.

11. The financial results of the year's working are briefly exhibited in Table XII attached to the Report. The opening cash balance of the year was Rs. 67,723. This differs from the closing balance shown in the Report for 1880 by Rs. 3,749. The difference is explained as being due to the non-receipt by the 31st December 1880 of the returns for 11 dispensaries which were closed during that year, and also to several incorrect balances previously recorded having been rectified during 1881. The opening balance of invested capital was Rs. 8,36,776, while the closing balance of 1880 was shown as Rs. 8,83,272. The difference is due to the omission of a sum of Rs. 50,000 belonging to the Mozufferpore dispensary which has now been included in the accounts of the local municipality. Certain adjustments have also been made in the invested capital of the dispensaries at Jamui and Midnapore. The total receipts during the year were—

| | Rs. | A. | P. |
|---|---|---|---|
| From Government ... ... ... | 1,06,384 | 6 | 0 |
| From local funds ... ... ... | 45,695 | 3 | 6 |
| From Municipal funds ... ... ... | 50,684 | 1 | 6 |
| Interest on investments ... ... ... | 33,430 | 15 | 1 |
| Sale of securities and withdrawal of deposits ... | 17,942 | 7 | 0 |
| Subscriptions from Europeans... ... ... | 20,022 | 0 | 3 |
| Ditto from Natives ... ... ... | 1,27,786 | 14 | 6 |
| Total ... | 4,01,945 | 15 | 10 |

The total expenditure was—

| | Rs. | A. | P. |
|---|---|---|---|
| Establishment ... ... | 2,40,543 | 14 | 2 |
| Bazar medicines ... | 9,956 | 13 | 7 |
| Europe ditto ... ... | 36,114 | 15 | 2 |
| Diet ... ... | 29,104 | 10 | 2 |
| Miscellaneous ... ... | 27,742 | 1 | 6 |
| Buildings and repairs ... | 30,821 | 3 | 1 |
| Total ... | 3,74,283 | 9 | 8 |

The closing cash balance of the year was Rs. 67,907-10-10. In addition to the above, a sum of Rs. 27,478-4-10 was invested during the year in purchasing securities of the par value of Rs. 29,477-2-10. On the other hand securities of the nominal value of Rs. 2,000 were sold, and deposits were withdrawn to the extent of Rs. 15,833-10-4, and the amount of invested balance on 31st December 1881 was Rs. 8,48,420-7-8. The Government grant of Rs. 1,06,384-6 was made up thus—

| | Rs. | A. | P. |
|---|---|---|---|
| Salaries ... ... ... | 87,477 | 0 | 4 |
| Registers and forms | 2,400 | 12 | 11 |
| European medicines | 272 | 14 | 5 |
| Diet of police cases | 1,163 | 11 | 6 |
| Sale of medicines | 31 | 0 | 0 |
| Special allowances | 15,038 | 14 | 10 |
| Total ... | 1,06,384 | 6 | 0 |

In 1880 the charge to Government on account of salaires amounted to Rs. 1,02,363. The large reduction is due to the great number of dispensaries which were brought into Class I during the year. For European medicines the charge in 1881 was only Rs. 272 against Rs. 9,534 in 1880 and Rs. 50,136 in 1879. This reduction, however, does not represent simple saving. Money grants in many places were substituted for the privilege of free indent on the Government stores. The total income from local sources amounted to Rs. 2,77,619 against Rs. 2,95,976 in 1880. The decrease of Rs. 18,357 is said to be rather apparent than real, and to be due to the transfer of receipts erroneously recorded under this head to " Subscriptions." The latter, however, also show a falling off which is attributed partly to the closure of 17 dispensaries during the year. The total expenditure amounted to Rs 3,74,283, which falls short of that for 1880 by Rs. 28,498. This is said to be mainly due to the discharge of superfluous servants, and the re-adjustment of the salaries of medical officers.

12. The Lieutenant-Governor recognizes the zeal and ability with which Dr. Payne has carried out the reforms of past year; and he has noted the names of the officers who are mentioned in the interesting compilation at the end of the Report as having afforded valuable assistance.

# Report on the Charitable Dispensaries

UNDER THE

## GOVERNMENT OF BENGAL

### FOR THE YEAR 1882.

FROM THE OFFG. SURGEON-GENERAL FOR BENGAL,

TO THE SECRETARY TO THE GOVERNMENT OF BENGAL,
MEDICAL AND MUNICIPAL DEPARTMENT.

*Calcutta, the 31st July* 1883.

SIR,

IN presenting my report on the working of charitable dispensaries in Bengal during the year 1882, there is little to be said of progress in the administrative reform which had received the attention of Government in this department during the previous years, and had by the end of 1881 been pursued to the introduction of an intelligible system, the improvement of radical defects, the correction of working abuses, the removal of useless and mischievous institutions, and the issue of a new code of dispensary rules. General reform was checked before it was complete by the introduction of the scheme of local self-government. It was manifestly useless to continue the laborious application of particular measures, however necessary they may have been when the entire system of dispensary government was about to be changed in a manner that should probably subvert altogether the policy which had been inaugurated. In April 1882 a considerable number of dispensaries passed into the hands of municipalities, and the transfer of nearly the whole of the remainder to district committees was regarded as pending legislation and the enaction of definite rules of management under the new law. Accordingly, with the exception of a few cases, the practice of representing to Government the uselessness of institutions and other matters needing reform came to an end, and thus, although the practical effect of changes already accomplished will continue to be apparent in the working of dispensaries in 1882, it will be seen that no great advance was made in those matters which relate to State administration.

2. In the working of the dispensaries themselves, no ground which had been previously gained would seem to have been yet lost with regard to points which relate to the daily duties of the institutions, the truth of returns, the keeping of records, and the criticism of superintending officers. The changes introduced three years ago into the the method of teaching in the schools, have continued to bear the best of fruits. The Government service has not yet gained largely, for the vacancies in it have been very few; but the public cannot fail to gain, for the University examinations have given ample proof of the protection which the public will derive from the practical character of recent

teaching. Actual work done in the examiners' presence has taken a prominent place in the examinations, and successful candidates have shown that they have profited by the opportunities offered them. In the class of Government assistant surgeons, improvement is a more immediate result of this than in the case of hospital assistants. Without reference to vacancies, it is still necessary to admit to this class all who qualify themselves and fulfil other conditions; but, as one of these conditions, applicants are required to present themselves for admission within a month of their passing examination, which ensures the reception of none but those qualified in the current year.

| Remaining on 31st December 1882 ... ... ... | 223 |

* Bistopore. Natuda. Morelgunge. | Semolya. Lonesing. Matbaria. | Nathnagger. Bagdogra.

3. The total number of dispensaries fell during the year from 231 to 223; eight were closed for the same reasons which had led to closure in other years. There can be no doubt that this last number would have been larger if revision had not been arrested in the manner I have mentioned, for the number of really useful charities is, I fear, far below that of remaining dispensaries. During the past year there have been strong indications that, under the self-government scheme, pseudo charities will rapidly become more numerous even than they were before reform was undertaken, and will be even less defensible than those were which Government has ordered to be closed. Formerly a few influential men, desiring to secure English medicines for their families and dependents, guaranteed subscriptions and applied for Government aid. No data were asked for and no valid reasons given for supposing that the poorer classes would use the dispensary. The Government acquiesced and paid, and for years supposed that charity was being administered. Gradually this error was being corrected and sham dispensaries closed, when municipal authority was extended in 1882. The governing bodies have not been slow to use their newly acquired power. Several proposals have already been made to Government to establish dispensaries in outlying places. No facts are given, no reasons for supposing that public charity is intended, but the applications represent simply the wishes of municipal commissioners. They have received nevertheless the same support from local officers as the old proposals had received, and have been submitted to Government with the same recommendations. For the old requests there was at least the plausible plea that residents had promised private subscriptions, and that only a part of the expenditure would be met from the public purse. The recent proposals would devote local public funds to the establishment of dispensaries without bond or guarantee of private contribution. I have been unable to recommend that Government should sanction this employment of local funds in any cases where there is no proof of public demand or sign of public usefulness, for it has appeared to me, on the evidence of past events, that the benefits will be chiefly private and the outlay wholly public, while check and prevention of abuses will be less possible than ever.

4. Statement No. I of the appendix shows the classification of dispensaries. This subject was under consideration in 1882. Classification in Bengal has been based on the financial relation of dispensaries to Government. This relation would be altered by transfer to local bodies, inasmuch as every dispensary which should cease to be supported or aided by Government would pass into the first class. There would still, however, be a difference which is important as affecting management. A first class dispensary, under the old system, is one which is supported entirely by private persons. Such persons are rightly allowed to appoint their own medical officers, to give them any establishment which they may ask, and to expend as much money otherwise as they please. The

local governing body, though it derives no aid from general revenues, does not support a dispensary from private funds. It administers public though local funds. It cannot claim the right of appointment for the reasons which assign that right to a private supporter, nor can the expenditure of local funds on establishment or otherwise be regarded with the same indifference as in the other case. Therefore, as regards Government money, the municipal dispensary is in the first class; but whether it shall be so administratively depends on other matters, which have yet to be considered by Government. The statement in the appendix has been prepared to show alterations of class, as they would have been, if the municipal system had been unchanged, and a footnote shows the number which have passed into municipal hands with their position in the tables. Under the limitation of departmental work which I have mentioned, the increase from 81 to 107 in the number of first class dispensaries is a satisfactory indication of what might have been done in this direction without regard to municipalities, if the latter had not interposed.

5. Number of occasions on which committees assembled:—

| | | | |
|---|---|---|---|
| Monthly or oftener ... | 19 | Three times ... ... | 6 |
| Eleven times ... ... | 4 | Twice ... ... ... | 11 |
| Ten „ ... ... | 2 | Once ... ... ... | 4 |
| Nine „ ... ... | 7 | None held o" no record of them ... | 25 |
| Eight „ ... ... | 6 | No committee ... ... | 26 |
| Seven „ ... ... | 5 | Under municipalities ... | 91 |
| Six „ ... ... | 4 | | |
| Five „ ... ... | 6 | Total ... | 225 |
| Four „ ... ... | 9 | | |

This as a comparative statement fails to show the attention given by committees to dispensaries in 1882. In some places dispensary affairs are discussed at ordinary meetings of municipal commissioners. In others it is understood that special sub-committees are appointed. It is probable that the interest shown by committees has not increased. The indifference of members is very frequently noted by inspecting officers, who do not fail to note, also, on occasions that no member of the municipality has visited the dispensary. In some places the sub-divisional officer is the only person who concerns himself about the existence of a medical charity.

TABLE No. 2.

*Showing the work of Dispensaries grouped in the order of number treated.*

| | In-door. | | | | | | | | | | Out-door. | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | Under 25. | 25 to 50. | 50 to 75. | 75 to 100. | 100 to 250. | 250 to 500. | 500 to 750. | 750 to 1,000. | Upwards of 1,000 | Total. | Under 250. | 25 0 to 500. | 500 to 750 | 750 to 1,000 | 1,000 to 2,500. | 2,500 to 5,000. | 5,000 to 7,500. | 7,500 to 10,000. | Upwards of 10,000. | Total. |
| 1882 .. | 21 | 13 | 8 | 9 | 53 | 20 | 7 | | 2 | 183 | 1 | 1 | 4 | 11 | 78 | 72 | 32 | 10 | 16 | 225 |
| Percentage .. | 15·79 | 9·77 | 6·01 | 6·77 | 39·85 | 15 04 | 5·26 | | 1 5 | | ·44 | ·44 | 1 78 | 4·89 | 34 67 | 32· | 14·22 | 4·44 | 7 11 | |
| 1881 . | 28 | 19 | 10 | 15 | 46 | 23 | 6 | 1 | 1 | 149 | 1 | 3 | 3 | 10 | 86 | 7[illegible] | 27 | 10 | 17 | 236 |
| Percentage | 18·79 | 12·75 | 6 71 | 10 07 | 30 87 | 15 44 | 4 03 | ·67 | ·67 | | ·42 | 1 27 | 1 27 | 4 24 | 36 44 | 33·48 | 11 44 | 4 24 | 7·2 | |

6. This table shows, as in former years, the insignificance of the house practice of dispensaries as a whole. There existed only 9 institutions in which the entire number of persons treated in hospital exceeded 500 in the year, and in 51 the number was less than 100, whereof 34 admitted less than 50 persons. Having regard to the numbers of police cases and pilgrims which these figures include, it cannot be said that the public derives much benefit from the house practice of dispensaries. Few examples, such as the Dacca, Durbhunga, Patna, and Cuttack hospitals, represent nearly all the good that is done to the

sick poor in this respect. Nevertheless, when it is proposed to close a dispensary to house patients, strenuous opposition is made for reasons indicated in former reports.

### TABLE No. 3.

*Showing grade of officers in charge of Dispensaries.*

| | 1882. | | 1881. | |
|---|---|---|---|---|
| House surgeon, Dacca ... ... ... | | 1 | | 1 |
| Assistant surgeon, 1st grade ... ... ... | 4 | | 4 | |
| ,, 2nd ,, ... ... ... | 10 | | 14 | |
| ,, 3rd ,, ... ... ... | 43 | 57 | 42 | 60 |
| Medical graduate of East Indian Railway Service ... | | 1 | | 1 |
| Civil hospital assistants ... ... ... | | 157 | | 160 |
| Native doctors (private practitioners) in charge of 1st class institutions ... ... ... ... | | 7 | | 9 |
| Total ... | | 223 | | 231 |

7. In the classes and grades of medical subordinates no great change was made in 1882. In one or two instances, hospital assistants were substituted for assistant surgeons where the work was unsuited to the higher officer. The object, which has led to appointment of these men, has been disclosed by the action of some municipal commissioners when removal has been ordered. Though it was impossible that the dispensary could find employment for an assistant surgeon, his services were much desired by private individuals, who strove to retain them by voting municipal money for payment of the higher salary. This was prohibited by Government as not being a legitimate use of municipal funds. If this principle continue in force under the self-government scheme, it may be possible still to maintain some proportion between public work and public pay; but if the power of appointment be left to governing bodies, there is little doubt that hereafter the number of assistant surgeons in charge of dispensaries will be largely increased, whatever the requirements of the institutions may be.

### TABLE No. 4.

*Inspection by Civil Surgeons.*

| | Daily or frequently. | More than four times. | Four times. | Three times. | Twice. | Once. | Not inspected. | No information received. | Total. |
|---|---|---|---|---|---|---|---|---|---|
| Inspected by Civil Surgeon, 1882 ... | 51 | 7 | 11 | 23 | 78 | 43 | 11 | 1 | 225 |
| ,, ,, 1881 ... | 51 | 4 | 6 | 25 | 82 | 55 | 13 | ...... | 236 |

8. In 1882 inspection was more efficiently performed than in previous years. The numbers in the first five columns are proportionally higher, and of dispensaries unvisited the number was small. Inspection reports were on the whole carefully prepared, and showed close criticism on all points ascertainable in this manner.

### TABLE No. 5.

*Numbers of patients treated in* 1882 *and seven previous years, and ratio per cent of mortality among in-patients.*

| | In-patients treated. | Out-patients treated. | Total. | Mortality among in patients per cent. |
|---|---|---|---|---|
| 1875 ... ... ... ... ... ... ... ... | 22,753 | 724,144 | 746,897 | 17·1 |
| 1876 ... ... ... ... ... ... ... ... | 23,757 | 829,804 | 853,561 | 16·96 |
| 1877 ... ... ... ... ... ... ... ... | 23,954 | 875,631 | 899,585 | 17·34 |
| 1878 ... ... ... ... ... ... ... ... | 28,473 | 927,783 | 956,256 | 20·01 |
| 1879 ... ... ... ... ... ... ... ... | 24,847 | 865,995 | 890,842 | 17·78 |
| 1880 ... ... ... ... ... ... ... ... | 23,567 | 888,095 | 911,662 | 15·17 |
| 1881 ... ... ... ... ... ... ... ... | 23,444 | 947,534 | 970,978 | 15·5 |
| 1882 ... ... ... ... ... ... ... ... | 23,468 | 934,155 | 957,623 | 15·75 |

9. The total numbers here recorded are less than those of the previous year, but inspecting officers have given much attention to records of attendance, and their notes on this point are more satisfactory than they have yet been. Scrutiny of records in the presence of dispensary doctors has, no doubt, revealed to the more intelligent of them the method employed for the detection of false entries, and enabled them to guard against detection on later occasions, but careful officers have expressed themselves this year in a manner which shows that reduction of numbers might be expected in the returns of 1882. The number of dispensaries was reduced by 8 during the year, and it is probable that on the whole the public health of the province was better in 1882. There were, however, great local variations in this latter respect, and the general record of dispensary practice has never yet borne such relation to the public health as to indicate any connection with, or dependence upon, it. There are districts where reality of dispensary work is shown to some extent by corresponding fluctuations; but there are others where the contrary is seen, and these outnumber the first so largely that the general fact is without doubt, as it would seem to be, from the small total numbers of sick entered as attending dispensaries. The Sanitary Commissioner's returns make as yet little or no pretence to accuracy, and in comparing dispensary figures with general health, the statements of magisterial and medical officers made in dispensary reports have been used in preference. The general death-rate among dispensary patients in 1882 did not differ materially from that of the two preceding years.

10. This table, as in previous years, shows the insignificant proportion of the population resorting to dispensaries. This is indeed so small throughout that comment on particular figures is unprofitable. The Nuddea district, though less sickly than before, was sufficiently so to prove the uselessness of the established medical charities towards meeting the prevalence of fever. The districts of Behar are understood to have been very unhealthy, yet attendance in dispensaries was less than before.

11. The general death-rate was, as I have already said, nearly the same as that of the two preceding years. The explanation of the mortality here recorded in particular places will be found in every case in the notes which follow. In some cases a few persons only have been admitted in hopeless condition. In others exhausted pilgrims, unable to continue their journey, have been dropped at the dispensary as the only refuge open to them. In others, again, a few decrepid paupers have been kept in charity as dispensary patients. In these respects, the year under review has not differed from its predecessors, nor have its mortuary figures approached nearer than theirs to the genuine results of sickness

TABLE No. 11.

*Sale of Cinchona Febrifuge in* 182-883.

| Year. | Cinchona Alkaloid. | | | | | |
|---|---|---|---|---|---|---|
| | Quantity sold. | | | Value. | | |
| | lb. | oz. | dr. | Rs. | A. | P. |
| 1882-83 ... | 423 | 3 | 0 | 6,987 | [illegible] | 0 |
| 1881-82 ... | 323 | 0 | 0 | 5,349 | 0 | 0 |
| 1880-81 ... | 163 | 9 | 10 | 2,885 | 8 | 3 |

12. The sale of cinchona febrifuge in the districts progresses. The increase in the preceding year is less large than that reported in 1881, but epidemic fever was less marked in 1882.

13. *Finance.*—The following table exhibits the income and expenditure of the dispensaries during the past year:—

TABLE No. 12— PART I.

| Securities sold ... ... ... ... | 38,000 | 0 | 0 |
| Deposits withdrawn ... ... ... | 22,127 | 5 | 0 |
| Balance on 31st December 1882 ... | 8,01,405 | 14 | 2 |

15. During the year under review, an important change has been effected in the financial status of dispensaries and hospitals within the limits of municipalities, in connection with the scheme of local self-government. Under Government resolution dated 20th February 1882, all charges borne by Government on account of dispensaries and hospitals, with the exception of those

in Calcutta, the Suburbs, and Howrah, were transferred from 1st April 1882 to the respective municipalities, unions, and stations, within which they were situated. The municipalities were at the same time relieved entirely of charges of police, which amounted to Rs. 4,43,919, on condition of the income devoted to that object being expended on education, sanitation, and other works of improvements. The charges paid by Government to these dispensaries and hospitals were estimated to amount to nearly a lakh of rupees. How far the changes have affected the municipal funds, will be fully considered hereafter under the head of "municipal contribution."

16. *Balance.*—On 1st January 1882 there remained a cash balance of Rs. 64,412 from the preceding year. This amount differs from the balance returned in the report for 1881 by Rs. 3,495. The closure of dispensaries, from which no accounts have been received, accounts for Rs. 2,451. Of the remaining sum of Rs. 1,044, the discrepancies were due to errors and omissions previously made, but rectified during the year under review.

17. *Receipts from Government.*—The total receipts from Government amounted to Rs. 41,269 in 1882, against Rs. 1,06,384 in the previous year, or less by Rs. 65,115. The reduction was chiefly the outcome of the orders of Government contained in resolution dated 20th February 1882, and of the orders issued during the year transferring some of the dispensaries to class I of the rules. The contribution on account of salaries of medical subordinates fell from Rs. 87,477 in 1881 to Rs. 33,351 in the year under report. The special allowances, likewise, showed a reduction of Rs. 10,315 on those of 1881, which were Rs. 15,038. The grant for special allowances, with very few exceptions, will disappear in the accounts of 1883. The cost of registers and forms was nearly half the amount charged in the accounts of 1881, viz. Rs. 1,219 against Rs. 2,400. In eight of the districts, it would appear, no forms were obtained. But supposing they had received their regular supplies, and accepting the figures of 1881 as their value, the total cost would amount to Rs. 1,696, or Rs. 704 less than that of 1881. All indents for forms are submitted to this office in quadruplicate, and after being duly checked, three copies are forwarded to the Superintendent of Stationery for compliance. Rs. 1,392 were paid by Government as diet of police cases against Rs. 1,163 in 1881. These payments should not, strictly speaking, be regarded as Government contributions made under ordinary circumstances, though, for the purpose of accounts, it is necessary that the outlay be exhibited and included in the total income from Government. The total cost to Government was 11·9 per cent, against 28·4 and 32·4 in 1881 and 1880 respectively. In 1879, the percentage was 39·5.

18. *Income from local sources—local or other funds.*—The income from local or other funds was Rs. 49,211 against Rs. 45,695 in 1881. The entry of the money under this head in the statement has been regulated as far as possible from previous records, but still some items, which should have appeared under "subscriptions," may have been included here.

19. *Municipal contribution.*—From 1st April 1882 all charges on account of dispensaries situated within the limits of municipalities (excepting Calcutta, the Suburbs, and Howrah) which were borne by Government, were transferred to these bodies, the Government undertaking to pay the whole of the expense of maintaining police in all municipalities, unions, and stations. The police charges amounted to Rs. 4,43,919, whereof Rs. 1,00,000, the estimated amount of Government contribution to dispensaries and hospitals, were ordered to be paid by the municipalities concerned, leaving the balance to be expended by them on other specified charges in connection with the extension of local self-government. Two statements have been prepared and published in the appendix, showing the financial operation of the dispensaries aided or supported by municipalities. They exhibit at once the outlay which the municipalities had incurred under the altered system, as compared with that of the previous year. There were 73 dispensaries (statement B, appendix) affected by the Government Resolution of 20th February 1882 from 1st April. These were required to pay all the charges borne by Government. Besides these, there were 30 dispensaries (statement C, appendix) aided by municipalities, which were transferred to class I of the rules prior to the issue of the Government order cited above, and

under circumstances quite different from those of the 73 dispensaries. These institutions have been separately dealt with, as no additional expenditure was incurred from municipal funds on their account under the order. They would seem, however, to have derived the same benefit from the exemption of police charges as the other 73 dispensaries. It will be observed that the amount contributed by the municipalities during the year, as per statement B, was Rs. 73,053, and the Government contribution amounted to Rs. 15,242 in the 1st quarter of 1882. The total annual contribution which the municipalities are supposed to pay may, therefore, be approximately estimated to amount to Rs. 73,053 + Rs. 15,242, or Rs. 88,295. It will, at the same time, be observed that Rs. 36,152 were paid by municipalities in 1881. This amount formed a regular outlay from the municipal funds towards the maintenance of charitable dispensaries, and would have been continued year after year. Deducting, therefore, this sum from the total contribution of Rs. 88,295, there remain Rs. 52,143, which practically represent the net estimated charges the municipalities have been called upon to pay under the operation of Government Resolution dated 20th February 1882. In 1881 the amount paid by Government was Rs. 59,454. The amount paid by the municipalities (*vide* statement C) was Rs. 15,096 as compared with Rs. 10,664 in 1881, and the Government contribution fell from Rs. 9,509 to Rs. 772 in the year under review. The latter sum will disappear altogether from the accounts of 1883.

20. *Interest on investments.*—The interest received on investments was Rs. 29,035, to compare with Rs. 33,430 in 1881. The reduction was chiefly due to larger amount of investments sold or withdrawn during the year. The amount was Rs. 60,127, inclusive of Rs. 36,000 refunded to the proprietor of the dispensary at Natuda on the closure of the institution, against Rs. 17,942 in 1881. The undrawn interest on Savings Bank deposits has been included in the accounts with few exceptions, and the total interest shown may, on the whole, be regarded as correct, though individual items may not bear strict comparison. There remained at the close of the year Rs. 7,25,000 in Government securities, &c., exclusive of Rs. 36,000 paid back to the proprietor of the Natuda dispensary. The interest on this amount, at the rate of 4 per cent, inclusive of Rs. 768 received as interest on investments of the Natuda dispensary, was Rs. 29,768. This exceeds the total interest shown in the statement by Rs. 733. It will, however, be seen that in the accounts of the Bauleah and Nattore dispensaries the invested capital is shown to be Rs. 1,07,400 in Government securities, the proceeds of which also maintain the Digaputtea school. The interest on this amount, at 4 per cent, is Rs. 4,296; but of this, Rs. 2,522 only had been contributed towards the support of the dispensaries. The difference of Rs. 1,774, *minus* the excess of Rs. 733, may, therefore, be accounted for as interest received on deposits in Savings Bank. This is of course an approximate estimate, but it will also be noted that Savings Bank deposits are generally made in current accounts, not fixed deposits, and do not, therefore, cover annual interest in full at the specified rate.

21. *Sale of securities, &c.*—The amount received by sale of securities and withdrawal of deposits was Rs. 24,127. Of this, Rs. 2,000 represent the value of Government securities sold, and the rest was drawn from the Savings Banks for current expenditure. The total amount in column $3d\frac{1}{2}$ in statement No. V, part I, corresponds with the money shown in part II under the heads "securities sold" and "withdrawal of deposits."

22. *Subscriptions.*—Subscriptions from Europeans and natives amounted to Rs. 18,856 and Rs. 1,18,544 respectively, to compare with Rs. 20,022 and Rs. 1,27,786 in 1881. The closure of dispensaries chiefly accounts for the difference. In some dispensaries subscriptions fell greatly in arrears from some years, and there is little likelihood of their recovery. In the Balasore district, the Civil Surgeon suggested that the names of defaulters over 12 months should be struck off. On this, the Magistrate observes that "this would be fatal to collections, for it is the one thing our pseudo-liberal gentry would desire. It is far better to keep their names on the list of those who promise, and from time to time are compelled, by very shame, to give something. They will never remove their names themselves, but they do not object to flourish in public pretended beneficence, if they are allowed to escape making

payment." Some subscribers refuse to pay on account of the transfer of dispensaries to municipalities. At Furreedpore the residents have stopped their subscriptions to the town dispensary, alleging that they "cannot subscribe twice towards the same charity, once in the shape of taxes and again in subscription form."

23. *Expenditure.*—The gross expenditure of the dispensaries in 1882 amounted to Rs. 3,45,759 against Rs. 3,74,283 in 1881, exclusive of the amounts invested. The reduction is to be observed under all items of expenditure except the cost of diet, which shows a slight increase. The cost of establishment exhibits a further reduction of Rs. 23,147 on that of 1881. The closure of dispensaries, the dismissal of superfluous servants, and chiefly the adjustment of salaries of medical officers, were the causes of the reduced expenditure. Bazar medicines cost Rs. 9,437 against Rs. 9,956. The expenditure on Europe medicines was Rs. 34,128 against Rs. 36,114. Medical stores were obtained from Government store department and from private druggists. Of the 223 dispensaries remaining at the end of the year, 104 elected to obtain medicines from private sources. The dispensaries at Kalimpoong, Ungool, Bissipara, and Dehree are entirely supported by Government. The value of medicines supplied to these institutions was Rs. 582, inclusive of Rs 349, which were the cost of medicines supplied to the Silligoree dispensary under special circumstances. The total amount advised by this office in 1882 for the recovery of the value of Government medical stores by the Accountant-General, through the Collectors of the districts, was Rs. 7,157, inclusive of Rs. 1,847, the value of cinchona febrifuge supplied from the Botanical Gardens. Deducting this amount, *plus* Rs. 582 mentioned above, the balance (Rs. 26,389) represents the estimated value of medical stores locally purchased. This large amount would appear anomalous in comparison with the number of dispensaries which obtained medicines from Government stores; but it is to be remarked that almost all these dispensaries supplement their medical stores by local purchase, which in many cases largely exceed the value of stores obtained from the Medical store department on payment. In few cases the dispensaries have not paid for stores obtained during the year from both sources, and their special mention in a tabular statement is hardly called for. Again, in some cases, the outstanding bills of 1881 have been paid in the year under report. The cost of diet was Rs. 30,957 against Rs. 29,104 in 1881, or an increase of Rs. 1,853. The total daily average number of in-patients in 1882 was nearly the same as in the previous year, and the increase in the cost was apparently due to dearness of provisions in 1882. The average cost of each diet varied from three annas six pie to six pie. The expenditure on miscellaneous items was Rs. 26,299 against Rs. 27,742, and the building charges amounted to Rs. 27,540 against Rs. 30,821 in 1881. These call for no remark.

24. *Investments during the year.*—The amount shown as invested during the year was Rs. 19,758, against Rs. 27,478 in 1881. As explained in the previous report, the majority of the investments are made in current accounts and subsequently withdrawn for current expenditure, and do not, therefore, represent real investments. In the past year the money drawn from the Savings Banks and obtained by sale of securities, exceeded by Rs. 4,369 the money invested during the year. This, on the whole, indicates that no real investments were made, but that more money was expended from the preceding year's balance. It contrasts unfavourably with 1881, when the amount invested exceeded by Rs 9,536 the money obtained by sale of securities and withdrawal of deposits. The total sum invested in 1882 corresponds with the amounts shown in part II statement.

25. *Investments.*—The balance remaining on 1st January 1882 was Rs. 8,41,775, which differs from the figures shown in the report for 1881 by Rs. 6,645. The invested capitals of dispensaries closed during the year, including the Choodadungha, Chanchal, and Begooserai dispensaries closed in 1881, have disappeared from the accounts. The total capital thus excluded amounted to Rs. 6,470, and to this the difference was chiefly due. Rs. 38,000 have been shown under the head "securities sold," which include Rs. 36,000 refunded to the proprietor of the Natuda dispensary. The total invested capital at the end of the year was Rs. 8,01,405. The corresponding sum in 1881 was Rs. 8,48,420.

The nature of investments is specified in a table in the appendix, and may be summarised as follows:—

| | Rs. | A. | P. |
|---|---|---|---|
| Government securieties of 4 or 4½ per cent ... | 7,20,000 | 0 | 0 |
| Government debenture of 5 per cent ... ... | 2,000 | 0 | 0 |
| Municipal debenture (Calcutta) ... ... | 3,000 | 0 | 0 |
| Landed property ... ... ... ... | 15,120 | 0 | 0 |
| Money lent ... .. ... ... | 3,360 | 0 | 0 |
| In Government Savings Banks ... ... | 57,925 | 14 | 2 |
| Total ... | 8,01,405 | 14 | 2 |

26. *Half yearly return of surgical instruments and hospital necessaries.*—Under orders of the Government of India in the Military Department, conveyed in letter No. 75SF, dated 26th October 1881, the check and control over surgical instruments and hospital necessaries in all civil medical institutions were vested in local administrative medical officers. It was, at the same time, ordered that a short note be made in this report on the state of the instruments and other appliances in hand, and what proceedings have been taken during the year to ensure that a complete check is exercised over them The half-yearly returns are now submitted to this office instead of to the Examiner, Medical Accounts. As all the charitable dispensaries pay for their medical stores obtained from the Store Department, and as many of them have elected to obtain their supplies altogether from private sources, the check and control of Government over these are not required, and no returns are received from these institutions. The condition of dispensary instruments is noted in the inspection reports of Civil surgeons, and due notice is taken by this office where it is needed. The maintenance of a regular check and control over instruments remaining in Government medical institutions, including civil stations, sub-divisions, &c., is essentially necessary. This is partially carried out from information supplied in the indents for medical stores, which are duly checked in this office before they are passed for compliance.

27. The working of each dispensary is shown in the following abstract from Civil Surgeons' reports, &c.

## EXTRACTS FROM REPORTS OF CIVIL SURGEONS, &c.

### BURDWAN DIVISION.

Burdwan district.

The Civil Surgeon has submitted a full and interesting report. Dr. Purves says that the past year, according to the statistics collected, was the unhealthiest on record. The Magistrate, however, entirely disagrees with him, and is of opinion that the year 1882, if not more healthy, has not been worse than its immediate predecessor. He states that the increase in the recorded mortality was due to improvement in registration made by the police under stringent orders issued by him. There was no change in the number of dispensaries. At the end of the year there were three dispensaries in charge of municipalities—one managed by a local committee, and two were under private management in class I of the rules. The managing bodies are said to give a fair share of attention to dispensary affairs. The dispensaries under municipalities receive attention at the ordinary meetings, and are, as a rule, the Civil Surgeon says, liberally treated. They are appreciated by poorer classes, but others seem to take little or no interest in them. The total number of patients treated fell from 36,346 in 1881 to 32,890 in 1882, but the daily average exhibits an increase, being 300 against 291 in 1881. The dispensaries at Burdwan, Chuckdighee, and Ranigunge are in charge of assistant surgeons, and the rest are under civil hospital assistants. Two private dispensaries at Burdwan and Culna are entirely supported by the Maharajah of Burdwan under his own management.

*Burdwan.*—The dispensary is managed by the local municipality, who paid all the expenses since April 1882. The district officers, vice-chairman, and the municipal commissioners frequently visited the institution, but did not record their visits. The Civil Surgeon paid daily visits. There were treated 635 in and 12,992 out patients against 624 and 15,705 in 1881. The daily averages were 27 and 85 against 22 and 94. Of the decrease in attendance, the Civil Surgeon says, that it is difficult to account for it in the face of the great unhealthiness of the year. From malarious fever 2,329 cases were treated in 1882 against 6,415 in 1881, but the cases treated from spleen diseases rose from 2,941 in 1881 to 5,132 in the year under report. There were 157 deaths, or 24·7 per cent, against 179 and 28·6 in 1881. There were performed 87 major and 1,062 minor operations, resulting in 7 deaths. The total expenditure was Rs. 4,277, of which Rs. 424 were paid by Government, and Rs 2,135 by the municipality. The amount contributed by the municipality in 1881 was Rs 847. Establishment cost Rs. 1,813, and the amount expended on European medicines was Rs. 768. Except the cinchona febrifuge, the medicines were purchased from private firms. Dieting articles cost Rs. 1,028. There is an invested capital of Rs. 18,000 in Government securities.

*Cutwa.*—A municipal dispensary. Visited twice by the Magistrate and Civil Surgeon, and frequently by the sub-divisional officer. A first class hospital assistant is in charge, whose half salary was paid by Government till March 1882. There were treated 99 in and 4,461 out patients, with a daily average of 3 and 48. The numbers in 1881 were 136 and 4,191, with a daily average of 4 and 31 respectively. The death-rate was 6·06 per cent against 11·7 in 1881. Spleen affections head the list of prevailing diseases, and malarious fever comes next. One hundred and forty-eight minor operations were performed; no major operation. The total expenditure was Rs. 1,394, of which Rs. 975 were expended on establishment. The municipality paid Rs. 1,154 in 1882 against Rs. 234 in the previous year. Government contributed Rs. 88, viz. Rs. 6 as the cost of forms, and Rs. 82 the half salary of the hospital assistant from January to March 1882. All expenses were paid by the municipality from 1st April 1882.

*Chuckdighee.*—A first-class dispensary entirely supported by Baboo Lolit Mohun Roy, the zemindar. An assistant surgeon is in charge. There were 112 in and 4,632 out-patients treated against 84 and 4,493 in 1881, the daily averages being 4 and 26 against 3 and 19. The death-rate was 9·8 per cent against 15·4 in 1881. Three major and 328 minor operations were performed. The total expenditure was Rs. 2,185, of which Rs. 1,640 represent the cost of establishment. The Magistrate and the Civil Surgeon visited the dispensary twice each.

*Mancoor.*—A second-class dispensary, Government contributing half the salary of the hospital assistant. It is managed by a committee. There were treated 4,138 out-patients with a daily average of 35, against 4,804 and 42 in 1881. Eleven major operations are recorded, chiefly setting of fractures and reduction of dislocations. Minor operations numbered 224. The financial condition of the dispensary was very bad during the year. As a special case, the Government, in letter dated 12th January 1883, allowed the dispensary to be kept open till the end of the current financial year, and ordered that, if satisfactory arrangements in regard to its funds could not be made, a further report should be submitted to Government in order that the dispensary might be closed. Of the total expenditure of Rs. 514, Rs 160 were paid by Government. At the end of the year there was a cash balance of Rs. 233, and an invested capital of Rs. 1,000 in 4 per cent Government securities. Visited once by the Magistrate and twice by the Civil Surgeon.

*Ranigunge.*—A municipal dispensary. A third grade assistant surgeon was appointed in May in the place of the second grade man who was in charge, on the representation of the municipality. It was, however, made a condition that when the assistant surgeon becomes entitled to promotion to a higher grade, the municipality will pay the higher salary, or

accept a hospital assistant for the charge of the institution. There were 296 in and 3,143 out patients treated against 298 and 2,813 in 1881. The daily avarage attendance was 9 and 31 against 11 and 27. The death-rate was 39·5 per cent against 38·5 in 1881. Moribund pilgrims and travellers chiefly form the admissions to this dispensary. Twenty-nine major operations of no importance and 264 minor operations were recorded. The dispensary was visited once by the Commissioner, thrice by the Magistrate, and twice by the Civil Surgeon. The sub-divisional officer paid frequent visits. The total expenditure was Rs. 2,692, whereof Rs. 1,970 were expended on establishment. Government contribution amounted to Rs. 234, viz., half salary of the assistant surgeon for three months, diet of police cases, and the cost of registers and forms. The municipality paid Rs. 740 against Rs. 415 in 1881.

*Mahata.*—The dispensary was placed in class I during the year, Baboo Sreenarain Mitter undertaking to maintain it. There were no regular meetings; two only were recorded in 1882. The Magistrate visited the dispensary once, and the Civil Surgeon twice. A civil hospital assistant is in charge, who is paid Rs. 30 a month. A compounder was temporarily engaged during the final quarter of the year. There were treated 2,382 out-patients against 3,198 in 1881, the daily average attendance being 27 against 34. No in-patients. Minor operations numbered 96. The total expenditure was Rs. 547, whereof Rs. 6 represent the cost of forms supplied by Government.

**Hooghly district.** The report submitted by the Civil Surgeon on this occasion is complete, and gives the necessary information in the prescribed form. The public health of the district was somewhat better than that of 1881, though the recorded death-rate exceeded slightly that of 1882. The Magistrate, however, disbelieves the figures. The total number of dispensaries in the district was four. The management of one of them has been transferred to municipality during the year. Two are maintained in class I, and one is aided by Government. The dispensaries are said to be appreciated by the people, and the managing bodies take great interest in dispensary affairs. Three assistant surgeons and one civil hospital assistant were in charge. The total number of patients treated was 727 in and 20,414 out patients against 658 and 19,913 in 1881, the daily averages being 29 and 135 against 26 and 125. The Civil Surgeon verified the figures from the registers and returns, and believes them to be correct; but his evidence concerning the case of the Emambarah Hospital is opposed to this. The prevailing diseases were malarial fever and its complications.

*Emambarah Hospital*—A first-class institution under the management of a committee consisting of the local agents, the mutwallee, and the Civil Surgeon. No committee meetings are held, but the accounts are checked monthly in the local agent's office. Visited occasionally by the Magistrate; the Civil Surgeon paid daily visits The Civil Surgeon reports very favourably on the assistant surgeon in charge. The establishment maintained at the dispensary consist of, besides the assistant surgeon, a hospital assistant on Rs. 35, a clerk on Rs. 40, two compounders, one dresser, two apprentices, and one apprentice dhai and nine other servants, at a monthly cost of Rs. 303, which includes Rs. 30 paid to the Civil Surgeon as palkee allowance. There were treated 665 in and 10,183 out-door patients against 603 and 10,213 in 1881. The daily average numbers were 26 and 54 against 25 and 57. Represented persons were included in calculating the daily average; this practice should be discontinued at once. There were 132 deaths against 123 in 1881. A large number of moribund cases are sent to the hospital by the police. Forty major and 434 minor operations were recorded. The total expenditure was Rs. 6,796, whereof Rs 3,635 represent the cost of establishment. Rs. 828 were expended on imported medicines, which were obtained from a private firm in Calcutta. Bazar medicines, diet, and miscellaneous charges cost Rs. 116, Rs. 755, and Rs. 1,460 respectively.

*Jehanabad.*—A dispensary under the municipal union. It is managed by a local committee, who held nine meetings during the year. Visited once by the Magistrate and several times by the sub-divisional officer. The Civil Surgeon paid one visit, the place being very difficult of access. He had, however, got an inspection report form filled up by the Magistrate when he visited Jehanabad. An assistant surgeon is in charge. The in-door ward was closed in December last for want of funds, and it is probable that, owing to insufficiency of local support, the dispensary will be reduced to a lower status and a civil hospital assistant placed in charge, the income of the Jehanabad union being insufficient to maintain an assistant surgeon. The work of the dispensary does not justify the retention of an assistant surgeon. In-door patients numbered 62 against 55 in 1881, and out-patients 3,670 against 3,110. The total daily average was 33 against 17. There were 15 deaths, or a rate of 24·1 per cent against 16·3 per cent in 1881. Of the total deaths, six took place within six hours of admission, and two were from cholera. Ten major and 157 minor operations were recorded. The total expenditure was Rs. 2,032, of which Rs. 1,373 were expended on establishment, and Rs. 261 on buildings. The municipality paid Rs. 828, inclusive of Rs. 400 drawn from Government, which were ordered to be refunded by the Accountant-General. Nothing was contributed in 1881. At the end of the year there was a cash balance of Rs. 88 and an invested capital of Rs. 1,122 in the Savings Bank.

*Behary Lall Charitable Dispensary, Boinchee.*—A first-class dispensary, managed by a committee consisting of the District Collector, the Civil Surgeon, and the Deputy Inspector of Schools, but no meetings are recorded. Visited thrice by the Civil Surgeon and once by the Magistrate. An assistant surgeon is in charge. It is an out-door institution, and the number treated was 3,561 against 3,794, with a daily average of 27 against 30. Four major and 405 minor operations were recorded. The amount expended was Rs. 1,988, of which

Rs. 1,582 represent the cost of establishment, and Rs. 342 the cost of Europe medicines. The cost of forms supplied by Government was Rs. 8.

*Dwarbasiny.*—A second-class dispensary. It is not situated within the limits of a municipality. The dispensary is managed by a committee, who held 13 meetings during the year. Twice visited by the Civil Surgeon; no visits were paid by other civil officers. There were treated 3,000 out-patients against 2,796 in 1881, the daily average being 20 against 21. Minor operations numbered 165; no major operation. The total expenditure was Rs. 703, whereof Rs. 483 were expended on establishment. A compounder and water-bearer on Rs. 9 and Rs. 4 are needlessly maintained here. The pay of the civil hospital assistant has been reduced to that of his grade, having failed to pass the departmental examination in October last. The funds of the dispensary are sufficient for all its legitimate requirements. Government contributes half the salary of the hospital assistant.

Midnapore district.

The Civil Surgeon has submitted an excellent report. It is replete with interesting and useful criticism on the working of the dispensaries in all its details, and shows the great interest taken in the work by Dr. Tomes. The public health of the district shows a great improvement on that of 1881, especially in respect of fevers and bowel-complaints. There was no change in the number of dispensaries during the year, which was nine. Of these, four are in class I (including one placed in that class during the year), two transferred to municipalities under Government Resolution dated 20th February 1882, and three are in class II. Midnapore and Mysadal dispensaries are in charge of assistant surgeons, and the rest are under civil hospital assistants. The total number treated was 729 in and 48,252 out patients against 701 and 41,123* in 1881. The daily average attendance in all the dispensaries was 31 and 332 against 31 and 359. The figures, the Civil Surgeon says, may on the whole be accepted as correct, and his evidence is good. Five dispensaries were managed by local committees, who met almost every month, but the Civil Surgeon says that this is no evidence of the interest taken by them in the welfare of the institutions. He says that "the Mysadal committee met twelve times, but did not pass regular monthly accounts; they agitated for the retention of a superfluous dresser, while they omitted to provide the in-patients with blankets." The affairs of four dispensaries are considered at municipal meetings. Dr. Tomes states that "at Midnapore official visitors several times remarked that no municipal commissioner ever visited the dispensary."

*Midnapore.*—A municipal dispensary, visited several times by the civil officers, and the Civil Surgeon visited daily or oftener when in the station. There were 591 in and 17,317 out patients treated against 507 and 11,144 in 1881, the daily average attendance being 23 and 114 against 21 and 90. An assistant surgeon is in charge, who is assisted by a supernumerary assistant surgeon. The large increase in out-patients the Civil Surgeon attributes to the prompt attention now paid to the persons attending the dispensary with the aid of the supernumerary officer, while a long delay was formerly unavoidable. The increase among in-patients was mainly due to greater practice of operative surgery. Besides the patients noted above, a daily average number of eight paupers were lodged, clothed, and fed, and 20 paupers received alms in the shape of pice every day and clothing twice in the year, as provided for in the Pearce endowment. The death-rate among in-patients was 17·9 per cent against 34·9 in 1881, the large fall being due chiefly to the decline of fatal types of diseases in 1882. Major operations numbered 103 against 61 in 1881, and the death-rate was 9·8 per cent after operation against 15 per cent. Six hundred and twenty-one minor operations were recorded. The total expenditure was Rs. 7,086, of which Rs. 2,698 were expended on buildings. The amount expended on imported medicines was Rs. 539, which is exclusive of Rs. 303 due to Government and not paid for during the year. Dieting articles cost Rs. 1,093, and Rs. 758 were expended on miscellaneous items. The municipality contributed Rs. 1,853 against Rs. 600 in 1881. Government contribution was confined to Rs. 876, whereof Rs 300 represent the salary of the assistant surgeon from January to March 1882. From April all expenses were paid by the municipality. A house for the medical officer was constructed during the year at an outlay of Rs. 2,320, to meet which the municipality withdrew all the available cash balance in the Savings Bank, and sold a Government security of Rs. 1,000. It appears also that a sum of Rs. 750 was subscribed towards this by the Rajah of Midnapore and by the Mysadal Raj.

"Little's soluble phenyle" was tried as a substitute for carbolic acid and other antiseptics for surgical purposes. Dr. Tomes says that its cheapness is its great recommendation, being half the cost of carbolic acid. He found it to be a less powerful agent than the latter, but it was perfectly suitable for the ordinary requirements of the surgical practice of a charitable dispensary.

*Mysadul.*—A first-class dispensary, supported entirely by the Mysadul estate under the Court of Wards, and managed by a committee; but all bills are countersigned by the Civil Surgeon before payment by the Collector. The committee met 12 times. Visited twice by the Civil Surgeon and the sub-divisional officer of Tumlook, and once by the superintendent of vaccination, Metropolitan circle. The Civil Surgeon is not satisfied with the work of the assistant surgeon in charge, and has submitted an unfavourable report against him during the current year. There were treated 103 in and 2,219 out patients against 86 and 2,628 in 1881. The daily averages were 4 and 16 against 3 and 28. In 1881 the average daily attendance was wrongly calculated. The death-rate was 12·6 against 9·3. Sixteen major operations with two deaths and 337 minor operations were recorded. The total amount expended was Rs. 1,897, of which Rs. 1,473 represent the cost of establishment. The cost of

forms supplied by Government was Rs. 9. A superfluous dresser is employed here, and the committee is unwilling to discharge him.

*Contai*.—A first-class dispensary. Contai is a sub-division, but there is no municipality. The institution is under the management of a local committee, by whom 12 meetings were held. Twice inspected by the Civil Surgeon and once by the Magistrate and sub-divisional officer. A civil hospital assistant is in charge, but orders have been issued in this year to replace him by an assistant surgeon, whose services were asked for by the sub-divisional officers at Contai. There were treated 2,355 out-patients against 1,556 in 1881, the daily average being 18 against 13. Minor operations numbered 176 against 67; no major operation. The total expenditure amounted to Rs. 528, whereof Rs 304 were expended on establishment. The cost of forms supplied by Government was Rs. 7. Subscriptions are much in arrears, and one zemindar, the Civil Surgeon says, owes Rs. 830 at Rs. 10. This should be written off. A house for the medical officer has been sanctioned by the committee at a cost of Rs. 200.

*Ghatal*.—A sub-divisional dispensary, transferred to class I in January 1882, Government paying the grade pay of the hospital assistant and the dispensary an extra allowance of Rs. 10 per mensem. It is under the management of the local municipality. A separate committee exist, who held seven meetings. Visited once by the Commissioner and the Joint-Magistrate, and twice each by the Civil Surgeon and sub-divisional officer. There were 4,615 out patients treated with a daily average of 27 against 4,774 and 40 in 1881. No in-patients. Fever is said to be most severely felt here, but 1,103 cases only were treated. Five major and 230 minor operations were recorded. The total expenditure was Rs. 838, of which Rs. 411 were expended on establishment, and Rs. 138 on imported medicines. Rs. 199 were spent on a house for the medical officer. The municipality contributed Rs. 592 against Rs. 720 in 1881. Government paid Rs. 18, which includes Rs. 7 as the moiety of pay of the hospital assistant for a few days in January. Subscriptions to the dispensary fell considerably, and latterly have almost ceased. The closure of the in-door ward in 1881 has been made the excuse by subscribers for withdrawing their aid. It is said that the municipality has arranged to re-open the ward from 1st January 1883, and this will give an opportunity of testing the sincerity of the subscribers. It appears that the hospital assistant has been allowed Rs. 25 a month from the dispensary funds, but this is contrary to the Government orders which prescribe a sum of Rs. 10 to be paid to the native doctor The Civil Surgeon noticed in November last that contingent bills, amounting to Rs 226, had not been paid for five months and that the accounts had been irregularly kept.

*Tumlook*.—A sub-divisional dispensary formally vested in the municipality in January 1882. Visited several times by the sub-divisional officer and thrice by the Civil Surgeon. The in-door ward was re-opened since May last. There were treated 35 in and 4,471 out patients against 29 and 4,082 in 1881. The daily average was 3 and 28 against 2 and 37. One death occurred among the in-patients. The amount expended was Rs. 740, of which Rs. 11 were paid by Government as the cost of forms and a portion of the salary of the hospital assistant for some days in December 1881. The municipality, which undertook to pay all the expenses from January 1882, paid Rs. 196 against Rs 180 in 1881.

*Chunderkona*.—A municipal dispensary. Inspected once by the sub-divisional officer, and thrice by the Civil Surgeon. The municipal commissioners visit the dispensary on the occasion of their monthly meetings There were 6,420 out-patients treated against 4,937 in 1881, the daily averages being 32 and 62. The latter figure was inclusive of represented attendance. Two major (reductions of dislocations) and 112 minor opperations were performed. The total expenditure was Rs. 441, of which Rs 52 were paid by Government as half pay of the native doctor from January to March. From April 1882 the municipality undertook to pay all the expenses of the institution. The expenditure does not represent the total outlay of the year. The Civil Surgeon, on visiting the dispensary in December last, found that the municipality have suspended all payments since 31st August, and that there were outstandings on account of salaries, medicines, and contingencies, amounting to two or three hundred rupees. Thus the benefits of the dispensary were being interfered with for want of money to purchase cinchona febrifuge and bazar medicines. The matter was represented to the Magistrate and to this office It is said that salaries have since been paid, but not the other bills.

*Narajole*.—A second-class dispensary under the management of a local committee, of which the civil hospital assistant is the secretary. There were four meetings held during the year. Twice inspected by the Civil Surgeon; no civil officers paid any visits. Out-patients numbered 3,120 against 3,136 in 1881, the daily averages being 32 and 28. A compounder was entertained for a few weeks under sanction. Represented persons were included in the average of 1881, and the figures for the past year, therefore, are rather open to suspicion. Minor operations numbered 245; no major operation. The total expenditure was Rs. 574, of which Rs. 390 represent the cost of establishment. Government contributed half the salary of the hospital assistant and the cost of forms, which amounted to Rs. 177.

*Garbetta*.—A second-class dispensary under a committee, which met twelve times. Visited once by the Magistrate, and twice by the Civil Surgeon. Government pays half the salary of the hospital assistant. There were treated 3,907 out-patients against 5,508 in 1881, the daily average being 29 and 35. The method of reckoning attendance was erroneous in 1881, hence the apparent reduction No in-patients. Nine major and 192 minor operations were recorded. The amount expended was Rs. 620, of which Rs. 426 were expended on

establishment, and Rs. 129 on imported medicines. Government contributed Rs. 190 as half salary of the hospital assistant and the cost of forms.

*Dantoon.*—A second-class dispensary, managed by a local committee, who held eight meetings. Visited once by the Assistant Magistrate and twice by the Civil Surgeon. Out-patients numbered 3,828 against 3,358 in 1881, the daily average being 31 and 20. No in-patients. An American medical mission was established here in 1881, but it has not affected the dispensary attendance. Forty-three minor operations were recorded. The total expenditure was Rs. 537, whereof Government contributed Rs. 157. Subscriptions are steadily falling off year by year. A new dispensary building is wanted, the present one—a mere shed—is falling to pieces.

**Beerbhoom district.**

The public health of the district was as unhealthy as in 1881. The total number of recorded deaths was 27,285 against 25,557. Total cases of fever do not show much difference, but cholera was excessively prevalent in certain localities, the number of deaths being 2,593 against 637 in 1881. Dr Roy notices the increased number of quacks that spring up in every thanah as local practitioners, who have no pretension to medical training, and these people are said to cause as much mortality as disease. There were three dispensaries in the district—one transferred to class I during the year, one in class II, and the other a municipal dispensary. There were treated 195 in and 23,528 out patients as compared with 209 and 23,914 in 1881. The daily averages were 5 and 201 against 6 and 225 respectively. The Civil Surgeon is entirely under a misapprehension as to the object of this office order prohibiting the inclusion of attendance of patients represented by friends, in calculating the daily average number of cases. He remarks that this order involves "cruelty to patients," but this was entirely due to the erroneous instruction issued by Dr. Roy, insisting on personal attendance of patients, which he says they do "at the risk of increasing the illness or jeopardizing the patient's life from exposure and fatigue." The order referred to was never intended, nor was it understood in any other district, to mean that represented persons will not be treated as before. The circular simply forbids the inclusion of such attendances in the calculation of averages, as they do not, properly speaking, represent the work done by medical subordinates. The entries must, as a matter of course, be recorded in the register, and the other anomalies pointed out by the Civil Surgeon will thus be removed. The Civil Surgeon must withdraw his instruction at once. Two assistant surgeons and one civil hospital assistant were in charge at the close of the year. The dispensaries are said to be appreciated by the people.

*Soory.*—A municipal dispensary. It was entirely maintained from 1st April 1882 from municipal funds and local subscriptions. Visited daily by the Civil Surgeon. There were treated 49 in and 12,352 out patients against 73 and 12,819 in 1881, the daily averages being 1 and 113 against 2 and 120. There were 12 deaths, or 24·5 per cent, and six are said to have died within 48 hours of admission. Major operations numbered 40, of which there were many important cases; 362 minor operations were recorded. The total expenditure was Rs 1,719, of which Rs. 877 were expended on establishment, and Rs. 537 on imported medicines Government contributed Rs. 116, and the municipality Rs. 870. In 1881 the amount paid by the municipality was Rs. 437.

*Rampore Hat.*—A second-class dispensary, governed by a committee presided over by the sub-divisional officer. Twelve meetings were held. The Civil Surgeon paid two visits. An assistant surgeon in the service of the railway is in charge, who receives Rs. 25 per mensem from Government and Rs. 25 from the dispensary fund. He is reported to be very dilatory in submitting returns, and somewhat negligent in attending to departmental orders. The number of patients treated was 146 in and 4,100 out door against 136 and 4,153 in 1881. The daily average attendance was 3 and 22 against 4 and 26. The order regarding the calculation of daily average, the Civil Surgeon says, was not strictly carried out. Railway servants are chiefly treated here. There were 15 deaths, or 10·2 per cent. Two major and 245 minor operations were recorded. The total expenditure was Rs. 1,401, of which Government contributed Rs. 303.

*Hetampore.*—Transferred to class I on 15th December 1882, Raja Ram Runjan Chuckerbutty offering to pay all the expenses. He had also agreed to appoint an assistant surgeon in the place of the hospital assistant, which has been done. A nominal committee exists, but no meeting was held. The Civil Surgeon remarks that "the eager interest shown by the Rajah in its promotion to class I, seems not to have arisen from any innate desire for the welfare of the institution for, as he has said before, no interest is taken by the Rajah in its management. The committee never sat for two years; there is no arrangement for receiving in-patients; the dispensary room consists of an old dilapidated temple, and the assistant surgeon has no proper quarters. The Rajah's interest ceases with the appointment of an assistant surgeon, who is to be his own nominee." The establishment consists of, besides the assistant surgeon, a compounder on Rs. 8 and a cooly on Rs. 5. There were treated 7,076 out-patients with a daily average of 66, against 6,942 and 78 in 1881. The total expenditure was Rs. 668, whereof Rs. 553 represent the cost of establishment, and Rs. 61 only the cost of Europe medicines. Government paid Rs. 175.

**Bankoora district.**

A clear and concise report has been submitted by the Civil Surgeon, covered by a letter from Mr. Anderson, the Magistrate, containing much useful criticism on the working of the dispensaries in the district and on the public health. The latter is said to have undergone considerable deterioration since 1880, and the year 1882 was much unhealthier than the two preceding years. The death-rate rose from 14·6 per 1,000 in 1880 to 32·2 in the year under

review. The Magistrate, however, thinks that "the increase in mortality may be ascribed solely to the greater completeness of registration in consequence of the beat system of rural police begun in this district in 1880, and substantially completed in 1881." The total number of dispensaries working at the close of the year was four. Two of the dispensaries are maintained by the local municipalities, and two are in class II aided by Government. The number of patients treated was 300 in and 16,296 out door against 273 and 14,527 in 1881, the daily averages being 10 and 136, against 10 and 115 respectively. The Civil Surgeon considers the figures reliable, and this is corroborated by the Magistrate. The municipal commissioners at Bankoora and Bishenpore are said to take great interest in dispensaries under their management.

*Bankoora.*—A municipal dispensary. Visited daily by the Civil Surgeon when in the station, five times by the Magistrate, and once by the Inspector-General of Jails. There were treated 214 in and 4,614 out patients against 273 and 4,654 in 1881. The daily average attendance was 8 and 54 against 10 and 41 respectively. There were 41 deaths, half of which were among pilgrims, who were brought in a state of utter exhaustion, and most of them died within a short time after admission. Fifty-six major and 788 minor operations were recorded, resulting in two deaths only. The total expenditure was Rs. 1 479, whereof Rs 930 were expended on establishment, and Rs. 255 on imported medicines. The latter item was for two years. Government contribution was confined to Rs 346, viz., half pay of hospital assistant, Rs 100; diet of police cases, Rs. 37; and special allowance, Rs. 209. The municipality paid Rs. 1,179 against Rs. 594 in 1881. The Government aid to the dispensary was discontinued from 1st April 1882.

*Bishenpore*—A municipal dispensary. It was inspected once by the Magistrate and thrice by the Civil Surgeon. Bishenpore is a sub-division. The number of patients treated was 86 in and 4,690 out door, the daily average being 2 and 38. The number of out-patients treated in 1881 was 4,932, with a daily average of 41. There was no in-patient in 1881. Seven major with one death and 250 minor operations were recorded. The total amount expended was Rs 1,045, of which Government paid Rs 122. The municipality contributed Rs. 913 against Rs. 480 in 1881. The Government aid to the dispensary was withdrawn from 1st April 1882.

*Maliara.*—A second-class dispensary, managed by a committee, which met six times during the year. Visited once by the Magistrate, and thrice by the Civil Surgeon Out-patients numbered 2,867 against 2,568 in 1881, the daily average attendance being 21 and 17. No in-patients. Five major and 82 minor operations were recorded. The amount expended was Rs. 545, of which Government paid Rs. 172 as half salary of the hospital assistant Establishment cost Rs. 408, and imported medicines Rs. 111. There is no municipality at Maliara.

*Ajodhya.*—A dispensary in class II, under the management of a local committee, which met eight times. The civil hospital assistant does not seem to take much interest in his work, and he was fined during the year for neglect of duty. Ajodhya is not situated within the limits of a municipality. There were treated 4,125 out-patients with a daily average of 22, against 2,373 and 13 in 1881. Fever was very prevalent here, which has caused the increased admissions in 1882. Major 4 and minor 229 operations were recorded. The total expenditure was Rs 652, whereof Government contributed Rs. 194. The expenditure on establishment was Rs. 430, and on Europe medicines Rs. 153. Medicines to the value of Rs 60 were purchased from private dealers. The dispensary was visited once by the Magistrate and twice by the Civil Surgeon.

**Serampore Sub-division.** The general health of the sub-division, as compared with the mortuary statistics, was worse than in 1881. Fever and cholera were more prevalent There were four dispensaries at the end of the year—one in class I (municipal), two in class II, the entire management and expenses of which were taken over by the municipality during the year, and one in class II, aided by Government. In-door patients are treated in the Serampore hospital, the rest are out-door institutions. There were treated 579 in and 14,455 out patients against 452 and 13,517 in 1881. The daily average numbers were 17 and 114 against 13 and 117 respectively.

*Serampore.*—A municipal dispensary in class I. The affairs of the dispensary are considered at the monthly meetings of the commissioners. The dispensary is under the immediate charge of the civil medical officer, who visits it twice a day and oftener when necessary. The sub-divisional officer paid several visits. The civil hospital assistant attached to the sub-divisional lock-up is also employed in the institution, who is paid Rs. 10 per mensem from the dispensary funds. There were treated 579 in and 4,748 out-door patients against 452 and 4,473 in 1881. The daily average numbers were 17 and 36 against 13 and 36 respectively. The number of deaths was 156, or 26·9 per cent, against 123 and 27 in 1881. The majority of deaths occurred among persons picked up by the police from ghâts and public roads. Twenty-five major operations were performed, chiefly amputations of the leg, arm, fingers, &c., for mill injuries or railway accidents. The total expenditure was Rs. 1,843, of which Rs. 870 represent the cost of establishment, and Rs. 535 the cost of dieting articles. The municipality contributed Rs. 1,200 against Rs. 967 in 1881. Government paid Rs. 15 for diet of police cases. The subscriptions from Europeans and natives amounted to Rs 1,249. In 1881 the amount was Rs. 1,012.

*Rishra.*—A municipal dispensary, governed by the Serampore municipality. Inspected frequently by the civil medical officer. No record of visits of civil officers. Out-patients numbered 2,661 against 2,716 in 1881, and the daily average was 17 against 21. Minor

operations numbered 176; no major operation. The total expenditure was Rs. 646, of which Rs. 535 were expended on establishment. The municipality paid Rs. 120 against Rs. 260 in 1881. Government contributed Rs. 55 as half salary of the hospital assistant to 31st March 1882.

*Boidyabati.*—A municipal dispensary. Inspected several times by the civil medical officer. The number of out-patients treated was 4,240 with a daily average of 34, against 3,991 and 29 in 1881. Minor operations numbered 282; no major operation. The total expenditure was Rs. 605, whereof Rs. 484 were expended on establishment. The municipality paid Rs. 480 against Rs. 360 in 1881. Government paid Rs. 60 as a moiety of salary of the native doctor from January to March 1882. From 1st April all charges were met by the local municipality.

*Bundipore.*—A dispensary in class II, under the management of a committee; but no meetings were held by them during the year. Visited once by the Magistrate and twice by the civil medical officer. There were 2,806 out-patients treated with a daily average of 26, against 2,367 and 29 in 1881. No in patients Minor operations numbered 86; no major operation. The amount expended was Rs. 533, of which Rs. 170 were paid by Government as half salary of the hospital assistant. The private funds of the dispensary are sufficient for all its legitimate wants. The institution may be placed in class I of the rules. It is not situated within a municipality.

**Howrah district.**

*Ooterparah*—A second-class dispensary, under the management of the local municipality. In view of the special circumstances under which the dispensary was established, and in consideration of the police charges from which the municipality was relieved, amounting only to Rs. 1,216 a year, the Government sanctioned the payment of the whole cost of the salary of the assistant surgeon in charge on condition of substituting a third grade officer as soon as the present incumbent is promoted to the higher grade or retires from the service. At the end of the year a third grade assistant surgeon was appointed to the dispensary, the permanent incumbent having passed into first grade. There were treated 258 in and 3,601 out patients against 280 and 3,252 in 1881, the daily averages being 12 and 25 against 11 and 23. Five major and 372 minor operations were recorded. The dispensary was inspected twice by the Civil Surgeon. There were expended Rs. 3,734, of which Rs. 2,459 represent the cost of establishment. Government paid Rs. 1,800, the full salary of a second grade assistant surgeon. The amount realized by European and native subscriptions was Rs. 1,922. Nothing was contributed from municipal funds.

## PRESIDENCY DIVISION.

**District of 24-Pergunnahs.**

The Civil Surgeon has submitted an excellent report. It is, as in the previous year, full of useful criticisms, which exhibit at once the great intelligent supervision made on the working of the dispensaries under his charge in all matters of detail. The public health of the district may, on the whole, be compared very favourably with that of the previous year. Cholera prevailed extensively in October, November, and December, notably in the suburbs. There were no epidemics reported from any part of the district. Fifteen dispensaries were working at the end of the year, or three less than in 1881. The dispensaries at Satkhira and Shamnuggor were transferred to the new district of Khulna, and the Bistopore Dispensary has been removed from the list of institutions under Government supervision. In seven of the dispensaries in-door as well as out-door patients are treated, and in eight out-patients only. There were treated 1,235 in and 57,554 out patients, with daily avarages of 47 and 462. In 1881 the number of patients treated, exclusive of the figures of the dispensaries transferred or closed during the past year, was 1,212 and 59,323, with daily averages of 64 and 515 respectively. The Civil Surgeon verified the figures with the registers, and believes in those of the Alipore, North and South Suburban, Bhowanipore, Russa, Goberdangha, Baraset, and Diamond Harbour dispensaries. As regards others he has not much confidence respecting the accuracy of the entries or the class of people treated. It is impossible to control, or adequately supervise the dispensaries at a distance, but the North Suburban, Russa, and Bhowanipore dispensaries, Dr. Jackson says, do really good work, and are a boon to their neighbourhood. Six dispensaries were in charge of assistant surgeons and the rest under civil hospital assistants. At the close of the year the assistant surgeon attached to the Alipore Dispensary, which has peen converted into a police hospital, was replacad by an hospital assistant. Ten dispensaries wore in class I at the close of the year, including two transferred during the year, and two were taken over by the local municipalities under the operation of the Government Resolution dated 20th February 1882. The dispensary at Alipore is practically in class III, as all expenses are now paid by Government. Seven dispensaries are in charge of municipalities, and five are under local committees. The suburbs of Calcutta were exempted from the operation of the Government orders issued in Resolution dated 20th February 1882. Concerning the interest shown by managing bodies, Dr. Jackson observes as follows:—

"The interest shown by managing bodies is in my opinion very trifling, almost none. The meetings are fewer than heretofore. Accounts are passed; each meeting is an exact repetition of the last. The dirtiest and least cared for dispensaries I have under me are those in municipal buildings. I read through all the proceedings at my inspections when I can get them, for they are sometimes away at the secretary's house, or the cutcherry; but I never see any indication of interest or supervision. The Russa Dispensary committee meets, but generally for business connected with repairs. There were only two meetings in 1882

against 12 in 1881. I believe that the only interest taken in the dispensaries by local committees has reference to their obtaining treatment for their families. They like to be on good terms with the hospital assistants and to go in and out for a chat; active, unselfish, public-spirited interest there is none, and the people for whose special benefit these institutions were specially created—*the poor*—derive less and less advantage year by year."

Dr. Jackson also complains that in many places meetings are convened at the cutcherry or secretary's house, and books are not forthcoming when the dispensaries are inspected. The medical officers often know nothing about accounts, and the submission of returns is delayed in consequence. He suggests that orders be issued compelling the secretaries to keep the books in the dispensary buildings, and allow the hospital assistants to know something of the financial condition of the institutions. Owing to sudden and unforeseen calls, the Civil Surgeon could not pay the required number of visits to all the dispensaries. He says that on three occasions last year he had to recall horses that he had placed on dâk on account of sudden emergencies in connection with police cases. Moreover, the Alipore Dispensary, being now in charge of a civil hospital assistant, it is no longer convenient for the Civil Surgeon to be away for a week at a time. Dr. Jackson was also on leave for two months and 18 days during the year.

*North Suburban Dispensary.*—An institution in class II, managed by a local committee, which met twice during the year. Dr. Waldie, the honorary secretary, devotes a great deal of time to the accounts, and visits the place frequently. Visited four times by the Civil Surgeon. No visits paid by civil officers. Third grade assistant surgeon Jadub Kristo Sircar was in charge from 1st May 1882, of whom the Civil Surgeon holds a very high opinion. He is said to be "a good surgeon and medical man, and takes great interest in his profissional work," and that the "dispensary has improved under his management, and has been in a satisfactory condition as regards the wards and the patients." There were treated 606 in and 4,534 out patients against 632 and 4,325 in 1881, the daily averages being 27 and 37 against 32 and 34 respectively. Of the total diseases treated, malarious fevers formed 18 per cent and skin diseases 15 per cent. Forty-nine cases of cholera were treated The villages round Chitpore were visited and supplied with medicines during an outbreak of cholera in the final quarter of the year. The death-rate in 1882, excluding the moribund, was 3 6 per cent against 4·8 in 1881. There were 119 cases of major operations treated in 1882, of which 115 were new, or six more than the number of 1881. Major amputations numbered four, of which one proved fatal. Eight scrotal tumours were removed, and 12 cases of compound fractures were treated. There was no death. Five hundred and thirty-five minor operations were recorded. The total expenditure was Rs. 4,420. Establishment cost Rs 2,307, bazar medicines, in which wines and spirits are included, cost Rs 149, European medicines Rs. 538, dieting articles Rs. 1,000, miscellaneous charges Rs. 418, and building charges Rs 7. The total expenditure in 1881 was Rs. 4,429. The total income amounted to Rs. 4,720, exclusive of the balance on 1st January 1882. Government contributed Rs. 1,270, viz salary of assistant surgeon Rs. 1,200, and for diet of police cases Rs 70. The amount received from local sources was Rs. 3,450, whereof Rs 300 were paid by the municipality as subscriptions for 1881. Since December 1881 no payment was made by the municipality, and its subscriptions were therefore 12 months in arrears. It is said that a meeting was called at the end of the year with the object of endeavouring to convert the dispensary into a first-class institution, but nothing seems to have come of it.

*Barisa.*—A municipal dispensary from 1st April 1882, subsequently transferred to class I, *vide* Government order No. 613TM, dated 14th July 1882. A committee exists, which, it is reported, meets irregularly at Alipore. The secretary, who lives near, visits the dispensary frequently. Inspected once by the Surgeon-General, and three times by the Civil Surgeon. A second grade assistant surgeon was in charge, whose grade pay was entirely paid by the municipality since April 1882. The Civil Surgeon frequently found fault with the lack of energy and interest displayed by the assistant surgeon, and it was with the greatest difficulty that he was induced to live at his quarters in the dispensary. There were treated 101 in and 5,008 out patients against 125 and 5,455 in 1881, the daily averages being 2 and 31 against 3 and 7 respectively. There is a steady falling off in the number of patients, owing, the Civil Surgeon says, to increasing inattention and to the assistant surgeon living at a distance. The death-rate was 19 per cent against 6·3 in 1881; the increase is attributed to the larger number of moribund cases admitted during the year. Twenty-two major operations were recorded—setting of fractures and reduction of dislocations. Minor operations numbered 386. The total expenditure was Rs. 2,448, whereof Rs. 2,133 were expended on establishment, and Rs. 315 on all other charges. The expenditure is very disproportionate to the work done in the dispensary, which should be placed in charge of an hospital assistant. Government contributed Rs. 369, of which Rs. 360 represent the salary of the assistant surgeon at Rs. 90 a month from December 1881 to March 1882. The income from local sources was Rs. 1,950, whereof Rs. 1,872 were paid by the municipality, and Rs. 78 were realized by local subscriptions.

*Bhowanipore*—A second-class dispensary, under the management of the Suburban Municipality. Inspected five times by the Civil Surgeon. Assistant surgeon Ram Moy Roy took charge of the dispensary on 1st May 1882 from assistant surgeon Ram Chunder Sen, retired, The former had charge of the North Suburban Hospital to 30th April 1882, whence he was transferred on the requisition of the civil authorities. He is said to be a more than average man, a good surgeon, has a good knowledge of medicines, and is attentive to his duties. There were treated 10,351 out-patients with a daily average of 76, against 9,288 and 66 in

1881. No in-patients. Fevers formed about a third of total cases treated. Forty-nine major operations were performed during the year, of which some were important ones. The dispensary being an out-door institution, there is little opportunity for operative surgery. There was no major operation in 1881. Minor operations in 1882 numbered 1,034 against 624 in the previous year. The total expenditure was Rs. 2,347, whereof Rs. 1,916 were expended on establishment. Europe medicines cost Rs. 256, which were purchased from private druggists. Government contribution amounted to Rs 820, of which Rs. 800 represent the salary of the assistant surgeon at Rs. 90 for five months and at Rs 50 for seven months. The income from local sources amounted to Rs 522, of which Rs. 212 were paid by the municipality, and Rs. 310 were received as interest on investments. The amount contributed from municipal funds in 1881 was Rs. 800. There was no subscription received during the year. In the previous year Rs. 21 only were realized.

*Alipore.*—This dispensary was originally in class II in charge of an assistant surgeon. It was made over to the local municipality, who declined to accept its control and management. In October 1882 orders were issued by Government converting the dispensary into a simple police hospital, the public being left to resort to other dispensaries in the neighbourhood. The assistant surgeon in charge was also replaced by a civil hospital assistant. There is also a separate police hospital, where constables, both district and suburban, are treated. The Alipore Dispensary, as it now stands, receives only injured persons (not policemen) sent in by the police. Here also are examined all wounded persons, concerning whom the Magistrate requires a report. The Civil Surgeon visits the dispensary almost daily. There were treated 187 in and 3,593 out patients against 183 and 4,038 in 1881, the daily averages being 3 and 19 against 6 and 25. From injuries 851 cases were treated. The general death-rate was 13 per cent against 19 in 1881. Eleven major (setting of fractures) and 177 minor operations were performed. The total expenditure was Rs. 1,862, of which Rs. 1,449 were expended on establishment. Europe medicines cost Rs. 192. Government contributed Rs. 1,113, consisting of Rs. 1,043 as salaries of assistant surgeon and civil hospital assistant, Rs. 68 as diet of police cases, and Rs. 2 as cost of forms. The municipality paid Rs. 481. All the expenses are now paid by Government, and as the dispensary affords no in or out-door relief to the general public, it will no more appear in the report as a charitable dispensary.

*Russapagla.*—A first-class dispensary, supported by private endowments. It is managed by a local committee, which met twice during the year. Visited by the Surgeon-General and the District Magistrate. The Civil Surgeon inspected seven times. A third grade assistant surgeon is in charge. There were treated 198 in and 6,064 out patients against 147 and 6,494 in 1881, the daily averages being 7 and 61 against 15 and 87. In 1881 the dispensary was closed to in-patients for repairs for three months. The death-rate was 12·6 against 18·3 in 1881. There were fewer moribund cases in 1882. The total expenditure was Rs. 4,250. The amount expended on Europe medicines was Rs. 359. Dieting articles cost Rs. 510, establishment Rs. 2,132, and building charges Rs 900. The cost of forms supplied by Government was Rs. 11. The dispensary is entirely maintained by the income from the invested capital, which was Rs. 1,32,000 No subscriptions are received. At the end of the year there was a cash balance of Rs. 5,430.

*Baraset.*—Transferred to class I on 10th January 1883. The dispensary is under the management of the local municipality. Visited once by the Commissioner of the division, occasionally by the sub-divisional officer, and twice by the Civil Surgeon. A second grade assistant surgeon is in charge, who received his grade pay from Government from 1st to 9th January 1882. Since that date he received Rs. 175 for the charge of the sub-division and jail from Government, and Rs. 25 from the dispensary fund for the charge of the dispensary. There were treated 114 in and 4,329 out patients against 117 and 4,190 in 1881, the daily averages being 4 and 32 against 5 and 31 respectively. The death-rate per cent exceeded very slightly that of 1881. There were four deaths from cholera. Forty-two major operations were performed, chiefly of little importance. Minor operations numbered 339. The total expenditure was Rs. 1,253, whereof Rs. 775 represent the cost of establishment. Some reduction was made in the subordinate establishment during the year under the orders of Government. Europe medicines cost Rs. 144. Government contributed Rs. 193 as salary of the assistant surgeon from 1st December 1881 to 9th January 1882, and Rs. 26 as cost of forms. The municipality paid Rs. 611 against Rs. 484 in 1881. The amount received from local subscriptions, which are said to be falling off rapidly since the dispensary was transferred to the municipality, was Rs. 341 against Rs. 647 in 1881.

*Tara Sunkur Chowdhurie's Dispensary at Taki.*—A first-class dispensary from 30th May 1882, supported by the widow of the local zemindar, after whose name the dispensary is now called. A civil hospital assistant is in charge, who receives Rs. 40 per mensem. The dispensary is managed by a local committee, which met nine times. No visit was paid by the Civil Surgeon. The place is distant and is not easy of access. There were treated 1,452 out-patients with a daily average of 24, against 1,627 and 30 in 1881. The public health was good, and a compounder was in charge of the dispensary for nearly three months, to which causes may be traced the reduced attendance. No in-patients. Four major and 181 minor operations were reported. The total expenditure was Rs. 914, of which Rs. 728 were expended on establishment, and Rs. 114 on Europe medicines. Government contributed Rs. 80 as half salary of the hospital assistant from December 1881 to March 1882, and Rs. 15 as forms.

*Bussirhat.*—A first-class sub-divisional dispensary under the management of a committee, which met nine times. Visited once by the Civil Surgeon. The hospital assistant of the sub-

division is in charge, who receives Rs. 10 from the dispensary fund. There were treated 1,107 out-patients with a daily average of 9, against 1,175 and 11 in 1881. One major—reduction of dislocation—and 41 minor operations were recorded. The total expenditure was Rs. 391, of which Rs. 144 were expended on establishment, and Rs. 120 on Europe medicines. The cost of forms was Rs. 4.

*Goberdanga.*—A first-class dispensary, entirely supported by Baboo Girija Prossunno Mookerjee, who personally supervises it. There is no committee. The Civil Surgeon was unable to visit the dispensary on account of pressure of work in the station and for other reasons. A second-class hospital assistant is in charge, who is paid Rs. 50 per mensem. There were treated 13 in and 3,565 out patients against Rs. 9 and 3,752 in 1881, the daily averages being 0·7 and 30 against 0·3 and 38 respectively. There was one death. Sixteen major and 346 minor operations were recorded. The total expenditure was Rs. 1,193, whereof Rs. 936 represent the cost of establishment. Europe medicines cost Rs. 128. The municipality paid Rs. 50 during the year as contribution for April and May 1881.

*Naihati.*—Transferred to class I on 21st January 1882. The dispensary is under the management of the local municipality. Inspected once by the Civil Surgeon. A third grade civil hospital assistant is in charge, who is paid Rs. 50 a month. There were treated 4,828 out patients, with a daily average of 35, against 4.685 and 40 in 1881. Two major—reductions of dislocations—and 148 minor operations were performed. The total expenditure was Rs. 1,313, whereof Rs. 867 were expended on establishment, and Rs. 208 on buildings. Europe medicines cost Rs. 172. Government contributed Rs. 91 as half salary of the hospital assistant for October 1881 to 20th January 1882, and Rs. 14 as cost of forms. The municipality paid Rs. 1,040 against Rs. 631 in 1881, and the amount realized from other local sources was Rs. 300. Subscriptions are falling off.

*Harinari.*—A municipal dispensary from 1st April 1882. Inspected twice by the Civil Surgeon. There were treated 7,370, with a daily average of 47, against 7,350 and 42 in 1881. No in-patients. Fevers form 60 per cent. of the total number of cases treated, and the Civil Surgeon thinks that the diagnosis must be careless and inaccurate. Seven major and 308 minor operations were reported. The total expenditure was Rs. 779, of which Rs. 582 were expended on establishment, and Rs. 134 on Europe medicines. Government contributed Rs. 67 as half salary of the hospital assistant for December 1881 to March 1882, and Rs. 6 as cost of forms. The amount paid by the municipality was Rs. 440 against Rs. 325 in 1881. Rs. 268 were received from local subscriptions.

*North Barrackpore or Nawabgunge.*—A first-class dispensary, under the management of the municipality. Inspected once by the Civil Surgeon, who arrived at 9 A. M., and found the dispensary closed. The hospital assistant and the servant had gone away together, and no one in the neighbourhood knew the address. The number of out-patients treated was 1,423 against 2,519 in 1881, the daily averages being 17 and 23. There was a large fall in attendance, which is ascribed to the comparative healthiness of the year, but the Civil Surgeon thinks that inattention of the hospital assistant has some share in this deficiency. No operation is recorded. The total expenditure was Rs. 587, of which Rs. 210 were paid by the municipality against Rs. 400 in 1881. No money was received from local subscriptions. The cost of forms supplied by Government was Rs 5. The amount expended on establishment was Rs. 456, and Rs 64 were expended on Europe medicines.

*Khurdah or South Barrackpore.*—A first-class dispensary, under the managemant of the local municipality. Visited by the District Magistrate and the Civil Surgeon once each; the Cantonment Magistrate inspected twice. The number of out-patients treated was 1,550 against 1,978 in 1881, the daily averages being 20 and 28. The falling off is alleged to be due to improved public health. No in-patients. One hundred and sixty-two minor operations were recorded. The total expenditure was Rs. 517, whereof Rs. 420 were expended on establishment. The only income from local sources was Rs. 188 contributed by the municipality. In 1881 the amount paid from municipal funds was Rs. 600. At the end of the year there was a cash balance of Rs. 506, which was transferred to municipal funds.

*Canning Town.*—A first-class dispensary, under the management of a committee, which met ' ' times. No inspection was made by the Civil Surgeon; the sub-divisional officer of Barripore inspected twice. Out-patients numbered 927 against 1,273 in 1881, the daily averages being 7 and 8. No in-patients. Thirty-three minor operations were reported. The total expenditure was Rs. 427, whereof Rs. 367 were expended on establishment. The income from local sources amounted to Rs. 461. Government contributed Rs. 20, consisting of Rs. 15 as half salary of the hospital assistant for December 1881, and Rs. 5 as the cost of forms. Rs. 487 were invested during the year.

*Diamond Harbour.*—A first-class sub-divisional dispensary, managed by a committee, which met eight times. No inspection was made by the Civil Surgeon. The hospital assistant of the sub-division is in charge, who received Rs. 10 per mensem from the dispensary fund. There were treated 16 in and 1,453 out patients against 28 and 1,174 in 1881, the daily averages being 0·5 and 9 against 0·7 and 8 respectively. Two major—reduction of dislocations—and 36 minor operations were recorded. The total expenditure was Rs. 332, whereof Rs. 240 represent the cost of establishment. Government contributed Rs. 9 as the cost of forms and the diet of police cases.

*Bistopore.*—The dispensary was closed on 1st July 1882, and is now maintained as a private institution. The amount paid by Government was Rs. 127 as salary of the hospital assistant.

Nuddea district.

The report has been submitted by Dr. Meadows, the officiating Civil Surgeon, who took charge of the district at the end of the year. It is covered by an interesting letter from the Commissioner, reviewing the working of the dispensaries. The public health of the district shows some improvement on that of 1881, notwithstanding that cholera was unusually prevalent in certain parts of the district, causing 11,020 deaths against 6,149 in 1881. From fevers the mortality was 60,911 against 73.196. Regarding the prevalence of fever in the district, the Civil Surgeon remarks: "So far as I was able to judge, it did not present any active epidemic character; but in every village a large proportion of the inhabitants was suffering from malarial cachexia, and the various sequels—enlarged spleen, liver, jaundice, anæmia, dropsy, and general debility—in short, from the effects of previous illness and residence under the same unhealthy conditions. It was apparent in many of the cases I saw that a fatal termination was merely a question of time; any fresh access of fever or bowel affection acting on such debilitated miserable creatures must prove fatal." He considers that the mortality in 1882 was chiefly the outcome of the widespread excessive sickness of the two preceding years. There were eight dispensaries working during the year, of which the dispensary at Natuda has been converted to a private institution. The dispensary at Kooshtea was in charge of the civil medical officer, Goalundo. Of the total number of dispensaries at the end of the year, five were in class I, including two transferred during the year, and two were made over to municipalities under the Government Resolution dated 20th February 1882. The total number of patients, both in-door and out-door, treated at these dispensaries, including the one at Kooshtea, was 19,049 against 21,211 in 1881, or a decrease of 2,162, which is chiefly due to the reduced number of patients treated in the Kooshtea and Bongong dispensaries. The daily average number was 227 against 248 in 1881. The figures may be accepted as correct. The sudder dispensary is in charge of an assistant surgeon; the rest are under civil hospital assistants. All the dispensaries, except the one at Bongong, are under the management of the local municipalities, which are said to take much interest in them. The local committee at Bongong does not evince much interest.

*Krishnagurh*—A municipal dispensary. Visited by His Honor the Lieutenant-Governor, the Surgeon-General, the Presidency Commissioner, and the District Magistrate, once each. The Civil Surgeon inspected 172 times. There were treated 213 in and 8,610 out patients against 163 and 5,587 in 1881, the daily averages being 11 and 81 against 8 and 51. The death-rate was 14·4 against 16·5 in 1881. Twenty-eight major and 491 minor operations were performed. The total expenditure was Rs. 3,214, of which Rs. 1,901 were expended on establishment, and Rs. 402 on buildings. Europe medicines, which were purchased from private druggists, except the cinchona febrifuge, cost Rs. 452. Government contributed Rs 587 as salary of assistant surgeon to 31st March 1882, and the cost of forms. The municipality paid Rs. 2,614 against Rs. 889 in 1881. At the end of the year there was a cash balance of Rs. 1,033, which has been made over to the municipality.

*Ranaghat.*—A 1st class sub-divisional dispensary, governed by the local municipality. Visited twice by the Magistrate, three times by the sub-divisional officer, and four times by the Civil Surgeon There were treated 11 in and 1,388 out patients against 15 and 2,311 in 1881, the daily averages being 0·3 and 18 against 0·7 and 40. Five deaths occurred among in-patients. Ninety-five minor operations were returned. The total expenditure was Rs. 505, whereof Rs. 320 were expended on establishment, and Rs. 94 on Europe medicines. The municipality contributed Rs. 391 against Rs. 495 in 1881. Private subscriptions fell from Rs. 142 in 1881 to Rs. 40 only in the year under review. The cost of forms supplied by Government was Rs. 3.

*Santipore.*—Transferred to class I in February 1882. The dispensary is governed by the local municipality. Inspected thrice by the Civil Surgeon. There were treated 1,501 out patients with a daily average of 23, against 1,444 and 26 in 1881, or each patient attended more than five times during the year. No in-patients. Eighty-eight minor operations were recorded. The total expenditure was Rs. 827, whereof Rs. 515 represent the cost of establishment. Rs. 152 were expended on Europe medicines. Government paid Rs. 15 as half salary of the hospital assistant for January 1882, and Rs. 4 as the cost of forms. The municipality contributed Rs. 808, inclusive of Rs 750 due from them previous to the transfer of the dispensary to class I, and which was shown in the accounts as cash balance remaining on 1st January 1882. There were no subscriptions realized. The only source of income, besides the municipal contribution, was the interest on investments. At the end of the year there was an invested capital of Rs. 3,259 in the Savings Bank.

*Ula.*—A municipal dispensary. Inspected four times by the Civil Surgeon. The number of out-patients treated was 1,071 with a daily average of 16, against 1,090 and 22 in 1881. No in-patients. Sixty-four minor oprations were returned. The total expenditure was Rs. 562, whereof Rs. 462 represent the cost of establishment. Europe medicines cost Rs. 76. The municipality contributed Rs. 571 against Rs. 290 in 1881. Private subscriptions fell from Rs. 66 in 1881 to Rs. 42 in the year under report. Government paid Rs. 45 as half salary of the hospital assistant from January to March 1882, and Rs. 2 as cost of forms. There was an invested capital of Rs. 1,592 in the Savings Bank at the end of the year.

*Bongong.*—A sub-divisional dispensary, transferred to class I during the year. It is under the management of a committee, which met seven times. Visited twice by the Magistrate and thrice by the Civil Surgeon. There were treated 10 in and 1,503 out patients against

14 and 2,036 in 1881. The daily averages were 0·6 and 11 against 0·6 and 19. There was no death. Twenty-one minor operations were recorded. The total expenditure was Rs. 236, of which Rs. 196 were expended on establishment. Rs. 102 worth of medicines were purchased from private druggists, but not paid for during the year. A civil hospital assistant is in charge, who is paid Rs. 10 per mensem from the dispensary fund. Government contributed Rs 40 as salary of the hospital assistant prior to the transfer of the dispensary to class I. The cost of forms was Rs. 2 There is no municipality.

*Meherpore.*—A first class dispensary. In January 1882 it was transferred to the local municipality. Nineteen meetings were held. The civil hospital assistant in charge receives Rs. 10 as extra allowance from the dispensary fund and his grade pay from the sub-division. There were treated 5 in and 2,256 out patients against 8 and 2,702 in 1881, the daily averages being 0 06 and 18 against 0·7 and 23 respectively. No deaths occurred. Three major—reduction of dislocations—and 148 minor operations were returned. The total expenditure was Rs. 706, whereof Rs. 527 were paid by the municipality. Establishment cost Rs. 314, and Europe medicines Rs. 322. The latter represent the expenditure for two years. The amount paid by the municipality in 1881 was Rs. 448. The dispensary was inspected once by the Magistrate, and twice by the Civil Surgeon.

*Natuda* —A class II dispensary to 12th June 1882, when it was removed from Government supervision. Inspected once by the Civil Surgeon There were treated 25 in and 1,417 out patients, with daily averages of 1 and 30 The total expenditure was Rs. 949, of which Rs 711 were expended on establishment. Government contributed Rs 300 as half salary of the assistant surgeon for six months. The invested capital of Rs. 36,000 was refunded to the proprietor of the dispensary on the closing of the institution.

**Koostea sub-division.**

*Koostea.*—A first-class dispensary under the supervision of the civil medical officer, Goalundo, by whom the report has been submitted. The dispensary was managed by its own local committee for the first three months of the year, from which time the municipality took charge of it. There were treated 979 out-patients with a daily average of 10, against 1,765 and 16 respectively in 1881. The civil medical officer remarks—"the dispensary is fairly appreciated by the poor, but the well-to-do classes positively take no interest in it whatever, possibly because they obtain no appreciable benefits therefrom." Inspected by the District Magistrate, the sub-divisional officer, and the civil medical officer once each. Ninety minor operations were recorded; no major operation. The in-door ward is proposed to be re-opened. The total expenditure was Rs. 273, whereof Rs 184 were expended on establishment. The amount contributed by the municipality was Rs. 180 against Rs 20) in 1881. Public subscriptions are considerably in arrears, and their realization forms the subject of a separate correspondence in the office of the Commissioner of the division. The cost of forms supplied by Government was Rs. 9.

**Jessore district.**

The report is complete, and is covered by letters from the Magistrate and the Commissioner, containing useful criticisms on the working of the dispensaries. The year under report was unusually unhealthy, owing to exceptional prevalence of fever and cholera, specially the latter, in the early and latter parts of the year, although neither of the diseases broke out in an epidemic form. Extra native doctors were deputed to the affected places, and medicines were distributed through the sub-divisional officers, planters, police, &c. There were ten dispensaries working at the beginning of the year, of which four (Khulna, Dowlutpore, Bagirhat, and Morrelgunge) were transferred to the new district of Khulna Of the six dispensaries remaining at the end of the year, four are in class I, including two transferred to that class in the year under report, one in class II, and the dispensary at the sudder station was made over to the local municipality under the Government Resolution dated 20th February 1882 Three dispensaries receive both in and out patients, and the rest treat out-patients only. There were treated 333 in and 15,128 out patients against 334 and 14,667 in 1881, the daily averages of both in and out patients being 111 against 99. The Jessore Dispensary is in charge of a 3rd grade Assistant Surgeon, the rest were under civil hospital assistants. The committees are said to take a great deal of interest in the working of the dispensaries, but great difficulty is experienced in realizing subscriptions from the native public. The Commissioner observes that "the subscribers in general do not see the force of paying for a charity money which does them personally no good. They are hopelessly in arrears." The matter forms the subject of a separate correspondence in the Commissioner's office.

*Jessore.*—A municipal dispensary. Visited daily by the Civil Surgeon. The Commissioner inspected once, and the Magistrate thrice. There were treated 322 in and 5,416 out patients against 313 and 4,961 in 1881. The daily averages were 9 and 35 against 10 and 32. There were 17 deaths against 28 in 1881. Thirty-four major and 437 minor operations were performed. The total expenditure was Rs. 2,492, whereof Rs. 1,548 were expended on establishment and Rs. 177 on Europe medicines. Rs. 234 were expended on buildings, and dieting articles cost Rs. 259. Government contributed Rs. 218, of which Rs 150 represent the half salary of the assistant surgeon from January to March 1882, and Rs. 64 were paid for diet of police cases. The municipality paid Rs. 1,198 against Rs. 808 in 1881. The income from other local sources amounted to Rs. 1,105, exclusive of the cash balance on 1st January 1882.

*Narail.*—A first-class sub-divisional dispensaay, managed by a committee, which met eight times during the year. Inspected once by the Commissioner, twice by the Civil Surgeon, and four times by the sub-divisional officer. A 2nd grade hospital assistant is in

charge, who is said to receive Rs. 15 per mensem as extra allowance from the dispensary fund instead of Rs. 10. The number of out-patients treated was 1,038 with a daily average of 10 against 1,599 and 13 in 1881. Five in-patients were treated as special cases. Forty-seven minor operations were recorded; no major operation. The total expenditure was Rs. 474, whereof Rs. 267 were expended on establishment, and Rs. 72 on buildings. Europe medicines cost Rs. 71. The income from local sources was Rs. 480.

*Magurah.*—A sub-divisional dispensary in class I, under the management of a committee, which met 15 times during the year. Visited by the Commissioner and the District Magistrate once each; the Civil Surgeon inspected twice. A hospital assistant is in charge, who receives his grade pay from the sub-division and Rs. 10 from the dispensary fund as extra allowance. An in-patient ward was opened during the year. There were treated 6 in and 2,329 out patients against 1 and 2,490 in 1881, the daily averages being 0·2 and 10 against ·002 and 10. Cholera and fevers prevailed throughout the sub-division. Forty-two minor operations were recorded; no major operation. The total expenditure was Rs. 652, of which Rs. 299 were expended on establishment, and Rs. 179 on buildings. Europe medicines, which were purchased from private druggists, cost Rs. 114. The income from local sources amounted to Rs. 743.

*Jhenidah.*—A sub-divisional dispensary, transferred to class I during the year, Government paying the grade pay of the hospital assistant of the sub-division, and the dispensary an extra allowance of Rs. 10. It is under the management of a committee, which met six times during the year. Visited twice by the District Magistrate, and thrice by the Civil Surgeon. There were treated 2,206 out-patients with a daily average of 15 against 1,353 and 8 in 1881. In the latter year 20 in-patients were also treated. Fevers and rheumatism were the prevailing diseases treated. Eight major and 137 minor operations were returned. The total expenditure was Rs. 390, of which Rs. 144 were expended on establishment, and 125 on Europe medicines. Government contributed Rs. 55 as extra allowance to the hospital assistant from 1st January to 16th June 1882. The amount realized by local subscriptions was Rs. 193.

*Shreedhurpur.*—Transferred to class I in February 1882. The dispensary is under the management of a committee, which met 11 times. Inspected twice by the Civil Surgeon and once by the sub-divisional officer of Narail. The number of out-patients treated was 1,945 with a daily average of 15 against 2,228 and 20 in 1881. No in-patients. Two major and 68 minor operations were returned. The total expenditure was Rs. 733, whereof Rs. 515 were spent on establishment. Europe medicines cost Rs. 107, of which Rs. 80 were paid for medicines obtained from private druggists. Government contributed Rs. 57 as salary of the hospital assistant from 1st January to 12th February 1882. The income from local sources amounted to Rs. 605. At the end of the year there was a cash balance of Rs. 1,315 and an invested capital of Rs. 1,300.

*Chandra.*—A second-class dispensary. There is no comimttee. Everything in connection with the institution is disposed of by the secretary, who pays the whole of the subscription. Government contributes the full salary of the hospital assistant. Inspected twice by the Civil Surgeon. There were treated 2,194 out-patients, with a daily average of 15, against 2,036 and 14 in 1881. Minor operations numbered 127. The total expenditure was Rs. 486, of which Rs. 360 were expended on establishment. Europe medicines cost Rs 64. Government paid Rs. 300 as salary of the hospital assistant, who has been reduced to his grade pay from 1st April 1882. The income from local sources was Rs. 539. Rs. 1,059 were invested during the year. At the end of the year there was a cash balance of Rs. 1,261 and an invested capital of Rs. 2,065. There are ample private funds for the maintenance of the dispensary independant of Government aid. A proposal to place the dispensary in class I forms the subject of a separate correspondence in the office of the Commissioner. Orders have since been issued to place the dispansary in class I.

**Moorshedabad district.**

The report is full and complete. The general health of the district in 1882 was better than in the previous year, notwithstanding the increased prevalence of cholera. The total number of registered deaths was, however, nearly the same as in 1881, and this is ascribed to a large number of persons who suffered from the outbreak of epidemic fever in 1881 having succumbed during the year under review. Of the 37,792 deaths registered, 31,921 were caused by fever. There were six dispensaries working at the close of the year, all of which receive both in and out door patients. There were treated in all the dispensaries 1,438 in and 44,561 out patients against 1,347 and 42,085 in 1881, the daily averages being 64 and 302 against 55 and 279 respectively. The Civil Surgeon has every confidence in the accuracy of the figures returned. Five assistant surgeons are in charge, and one dispensary is in charge of a private practitioner, a graduate of the Calcutta Medical College. Five of the dispensaries are in class I, and one was made over to the municipality under Government Resolution dated 20th February 1882. Of the six dispensaries, two were in charge of private managers, and four were under the management of municipalities. The different municipalities, it is said, show as much interest in their management as can be reasonably expected of such bodies. All the dispensaries are appreciated by the people who resort to them. Medicines are obtained from private druggists for all the dispensaries in the district.

*Berhampore.*—Transferred to class I in January 1882. The dispensary was under the management of a committee till August, when it was transferred to the local municipality. The dispensary committee held monthly meetings as long as it existed; and since the transfer of the management to the municipality, the affairs of the dipensary are considered

and discussed at their monthly meetings. The dispensary was visited by His Honor the Lieutenant Governor of Bengal, the Surgeon-General, the Presidency Commissioner, and the District Magistrate. It is under the immediate supervision of the Civil Surgeon, who paid "constant" visits. An assistant surgeon is in charge, who receives Rs. 120 per mensem. It has been decided by the committee that his successor is to receive the pay of his grade only. The subordinate establishment cost Rs. 46 per mensem. There were treated 408 in and 7,787 out patients, giving daily averages of 18 and 49. In 1881 the corresponding numbers were 392 and 7,829, 16, and 51 respectively. There were 68 deaths, or a rate of 16·6 per cent., against 75 and 19·1 in 1881. Fever and cholera were the prevailing diseases. Twenty-five major operations were performed with two deaths. Minor operations numbered 642. The total expenditure was Rs. 4,339, of which Rs 1,949 were expended on establishment, and Rs. 1,343 on the purchase of a piece of land on the east side of the dispensary, the addition of which enlarged the compound and materially improved the ventilation of the wards. Europe medicines, which were obtained from England, cost Rs. 402. Sufficient quantities of the drugs remained at the end of the year. Government contributed Rs. 40, whereof Rs. 17 was paid as the moiety of the assistant surgeon's salary from 1st to 9th January 1882. The municipality paid only Rs. 232, against Rs. 300 in 1881. The income from other local sources during the year amounted to Rs. 4,585. At the end of the year there remained an invested capital of Rs. 45,000 in Government securities and Rs. 2 343 in Savings bank.

*City Moorshedabad*.—A municipal dispensary from 1st April 1882. The committee met four times from January to April, and since the assumption of the charge of the dispensary by the municipality, its affairs are controlled by the commissioners at their monthly meetings. Inspected by the Surgeon-General, the Commissioner of the division, the District Magistrate, and the sub-divisional officer. The Civil Surgeon visits once a month, or oftener when required. A 3rd grade assistant surgeon is in charge, who receives Rs. 120 a month from the dispensary fund, but the extra allowance of Rs. 20 is to cease in the case of a new man appointed to the charge. Minor establishment cost Rs. 49 per mensem. There were treated 291 in and 9,615 out patients against 254 and 9,069 in 1881, the daily averages being 14 and 57 against 11 and 52 respectively. Eight midwifery cases were treated against 11 in 1881. The number of these cases, the Civil Surgeon says, fluctuates according to the condition of the people, *i.e.*, in years of scarcity the number increases and when there is plenty of food and its price low, a decrease is exhibited. The death-rate was 11 6 per cent against 9·8 in 1881. Fever and cholera were the prevailing diseases treated. Forty-six major operations were performed, of which one—a case of lithotomy—proved fatal. Minor operations numbered 495. The total expenditure was Rs. 3,053, whereof Rs. 2,016 were expended on establishment, and Rs. 203 on Europe medicines. Dieting articles cost Rs. 345, and the charges on miscellaneous items amounted to Rs. 249. Government contributed Rs. 201, of which Rs. 180 were paid as half salary of the assistant surgeon from January to March 1882. The amount received from municipal funds was Rs 1,994 against Rs. 800 in 1881. The income from other local sources was Rs 813 in 1882 to compare with Rs. 966 in the previous year.

*Jungipore*.—Transferred to class I on 3rd February 1882. The dispensary is under the management of the local municipality. It was visited by His Honor the Lieutenant-Governor, the Presidency Commissioner, the Surgeon-General, the District Magistrate, and the sub-divisional officer. The Civil Surgeon inspected twice. A 3rd grade assistant surgeon is in charge, who receives Rs. 120 per mensem from the dispensary fund. There were treated 90 in-patients, with a daily average of 7·4, or each patient remained in the hospital on an average of 30 days. The number of patients treated in 1881 was 88, with a daily average of 6 7. Out-patients numbered 5,629 against 5,853, the daily average attendance being 40 and 42 respectively. There were 11 deaths, or 12·2 per cent. Six major—all reductions of dislocations—and 320 minor operations were returned. The total expenditure was Rs 2,228, of which Rs. 1,693 were expended on establishment, and Rs. 150 on Europe medicines. Government paid Rs. 69, whereof Rs. 61 represent the salary of the assistant surgeon prior to the transfer of the dispensary to class I. The sum paid by the municipality was Rs. 1,393 against Rs 900 in 1881. Private subscriptions amounted to Rs. 605. At the end of the year there remained an invested capital of Rs. 1,133.

*Kandi*.—Transferred to class I on 3rd January 1882. The dispensary is managed by the local municipality. It was visited by the Commissioner, the District Magistrate, and the sub-divisional officer The Civil Surgeon inspected twice. A 2nd grade assistant surgeon is in charge, who receives his grade pay from the dispensary fund. There were treated 179 in and 7,177 out patients against 163 and 7,026, the daily averages being 6 and 72 against 5 and 66 respectively. The death-rate was 8 3 per cent against 10·4 in 1881. There were performed 15 major and 154 minor operations. The total expenditure was Rs 2,660, whereof Rs. 2,160 represent the cost of establishment. Europe medicines cost Rs. 175. Government contribution amounted to Rs. 9, of which Rs. 5 were paid as salary of the assistant surgeon. The amount paid from municipal funds was Rs. 1,509 against Rs 275 in 1881. Private subscriptions amounted to Rs. 817. At the end of the year there remained an invested capital of Rs. 2,207.

*Azimgunge*.—A first-class dispensary, managed by Rai Dhunput Singh Bahadoor, the sole supporter of the institution. A nominal committee exists, but the members never meet. Visited by the Commissioner, the Magistrate, and the sub-divisional officer of Lalbaugh.

The Civil Surgeon usually visits the dispensary once a month. Third grade assistant surgeon Umrith Lall Mozoomdar was in charge, who is reported to be an efficient officer and well suited for the post he occupies. There were treated 300 in and 10,485 out patients against 281 and 8,883 in 1881, the daily averages being 10 and 58 against 9 and 47 respectively. The number of deaths among in-patients was 52, or 17·3 per cent against 38 or 13·5 per cent in 1881. The return shows a considerably larger number of cases of anæmia than that of any other dispensary. The Civil Surgeon writes: "In Azimgunge reside a large community of wealthy Kaiahs, whose charities attract a large number of professional beggars and poor people of all classes to the place, some of whom come from long distances and undergo severe privations on the journey, and arrive at Azimgunge in a miserable condition." Seventeen major operations were performed. Minor operations numbered 521. The total expenditure was Rs. 2,393, whereof Rs. 1,607 were expended on establishment and Rs. 382 on Europe medicines. The amount contributed by Government was Rs. 11 as the cost of forms and the diet of police cases. Rs. 45 were paid by the municipality, apparently on account of dispensary vaccination.

*Lalgola.*—A first-class institution, entirely supported by Rao Jogendro Narain Roy, the local zemindar, who is said to take great interest in the working of the dispensary. Visited once by the District Magistrate and twice by the Civil Surgeon. A graduate of the Calcutta Medical College, not in the service of Government, is in charge, who receives Rs. 100 per mensem. There were treated 170 in and 3,868 out patients against 169 and 3,425 in 1881, the daily averages being 6 and 25 against 5 and 19 respectively. The death-rate was 4·8 per cent against 4·1 per cent in 1881. There were performed 16 major and 218 minor operations. The total expenditure was Rs. 2,320, whereof Rs. 1,647 represent the cost of establishment. Europe medicines cost Rs. 297. The value of forms supplied by Government was Rs. 5.

**Khulna district.**

This is a new district, formed with its head-quarters at Khulna, under orders of Government conveyed in letter No. 936-67Jur., dated 4th April 1882. It comprises the sub-divisions of Khulna, Bagirhat, and Satkhira. The report is submitted by assistant surgeon Denobundhoo Dutt, who took charge of the district in January 1883. The year under report is said to have been unhealthy, but no statistics of the preceding year have been furnished. The total number of dispensaries working at the end of the year was five, of which the dispensaries at Satkhira and Shamnugger were transferred from the district of 24-Pergunnahs, and the dispensaries at Khulna, Bagirhat, Dowlutpore, and Morrelgunge from the district of Jessore. The dispensary at Morrelgunge has been removed from Government supervision during the year, and is maintained as a private institution. The total number of in and out patients treated in 1882 was 177 and 6,737 against 240 and 6,778 in 1881, the daily averages being 5 and 75 against 8 and 76 respectively. All the dispensaries were in charge of civil hospital assistants at the end of the year. Of the total number of dispensaries, four were in class I and one in class II. The assistant surgeon is unable to give any opinion on the interest taken by managing committees for the institutions under his charge, as he had no opportunities of inspecting the dispensaries; but, judging from past experience in other districts, it seems to him that the managing bodies devote a fair share of attention, and the well-to-do people are generally not very willing to help them with subscriptions.

*Khulna.*—A first-class dispensary, managed by a committee presided over by the District Magistrate, which met five times during the year. It was visited by His Honor the Lieutenant-Governor, the Commissioner of the division, and the Surgeon-General. The Magistrate, Mr. Clay, paid several visits. He takes great interest in the welfare of the institution, and has rendered substantial aid by the gift of a donation of Rs 100 and of a barrel of Portland cement for repair of the dispensary, besides supplying blankets for the use of the patients at his own cost. The Civil Surgeon of Jessore inspected twice. The medical officer in civil medical charge attended daily since Khulna has been created a district. A first grade hospital assistant is in charge, who receives an extra allowance of Rs. 10 per mensem from the dispensary funds and his grade pay from Government. There were treated 1,829 out-patients with a daily average of 16·11 against 1,770 and 16· in 1881. Arrangements are being made for treatment of in-patients at the dispensary. The total expenditure was Rs. 611, of which Rs. 196, were expended on establishment, and Rs. 128 on buildings. Miscellaneous items cost Rs. 200, including a sum of Rs. 158, which were deposited in the sub-divisional treasury from a long time past and lapsed to Government. It was found impossible to realize this amount, and it has consequently been written off the accounts. Private subscriptions amounted to Rs. 342 only.

*Satkhira.*—Transferred to class I on 3rd March 1882. The dispensary is governed by the local municipality. Visited by the Commissioner, the Magistrate, and the District Superintendent. No inspection was made by the Civil Surgeon, 24-Pergunnahs, or the medical officer in charge of the Khulna district. Satkhira is a sub-division. The assistant surgeon was withdrawn during the year and a civil hospital assistant appointed in his place, who receives an extra allowance of Rs. 10 per mensem from the dispensary fund. There were treated 122 in and 1,884 out patients against 129 and 2,036 in 1881, the daily average numbers being 4 and 13 against 6 and 18 respectively. The sub-division was said to have been very unhealthy in the year under review, but there is no indication of this in the dispensary attendance. The death-rate among in-patients was 9·8 per cent against 6·9 in 1881. Ten major—of no importance—and 106 minor operations were returned. The total expenditure was Rs. 1,710, whereof Rs. 1,366 represent the cost of establishment. Government contributed Rs. 258 as salaries, &c., before the institution was transferred to

class I. Local subscriptions amounted to Rs. 317 only, and the amount paid by the municipality was Rs. 1,247 against Rs. 910 in 1881.

*Bagirhat.*—A first-class sub-divisional dispensary, managed by a committee, which met seven times during the year. Visited by the Commissioner and District Magistrate once each. The Civil Surgeon of Jessore inspected once. A civil hospital assistant is in charge, who receives Rs. 10 per mensem from the dispensary funds. There were treated 55 in and 1,010 out patients against 111 and 1,117 in 1881, the daily averages being 1 and 6 against 2 and 6 respectively. The decrease in the number of patients is ascribed to the healthiness of the year as compared with 1881. The entire number of in-patients treated, consisted of cases of injuries sent in by the police or the sub-divisional officer. Fifty-five minor operations were returned. No major operation. The total expenditure was Rs. 751, which includes a sum of Rs 355-8-4 returned as "amount lost." No explanation has been given as to how and by whom the money was lost. Establishment cost Rs. 315. The amount realized by local subscriptions was Rs. 392.

*Shamnugger.*—A first-class dispensary, governed by a committee, which met every month during the year. It was neither visited by civil officers nor by the medical officers concerned. The number of out-patients treated was 721, with a daily average of 23, or each patient attended the dispensary on an average of 11 times during the year, which is absurd. It is said that the daily average number has been correctly calculated, but the above figures show that this is not probable. The dispensary was not inspected by the Civil Surgeon in the last two years. The recorded number of cases treated in 1881 was 568, with a daily average of 17. Fifty-seven minor operations were returned. The total expenditure was Rs 555, whereof Rs. 457 represent the cost of establishment. The amount realized by local subscriptions was Rs. 600. At the end of the year there remained a cash balance of Rs. 589. The Commissioner states that the proprietress of the dispensary has expressed her unwillingness to continue her subscriptions to the dispensary, and it will shortly be closed in consequence. The dispensary is of very little use to the public, and is situated in a remote part of the district, which is difficult of access.

*Dowlutpore.*—A dispensary in class II, under the management of a committee, which met thrice during the year. The Civil Surgeon of Jessore inspected twice. A 1st grade hospital assistant is in charge, who receives his grade pay from Government for the charge of the dispensary. The compounder, uselessly employed in the dispensary, was discharged during the year. There were treated 1,293 out-patients, with a daily average of 17, against 1,287 and 17 in 1881. No in-patients. Minor operations numbered 174. No major operation. The total expenditure was Rs. 684, of which Rs. 519 represent the cost of establishment. Europe medicines cost Rs. 75, whereof Rs. 69 worth of medicines were purchased from private druggists. The amount received from local sources was Rs. 264 only. There remained at the end of the year Rs. 631 in cash and Rs. 364 in the Savings Bank.

## Rajshahye and Cooch Behar Division.

**Dinagepore district.**

The public health of the district in 1882 was on the whole much better than the previous year. There was no change in the number of dispensaries. The dispensary at Baloorghat was transferred to class I during the year, and the management of the sudder dispensary was made over to the municipality on 1st April 1882. The dispensaries at Raigunge, Chooramun, and Mohadebpore are in class I. The sudder dispensary receives both in-door and out-door patients; the rest are out-door institutions. The number of in and out patients treated was 8,325 against 9,165 in 1881. The average daily number was 81 against 94. The figures were verified by the civil medical officer and found to be correct. Regarding the interest shown by the managing bodies in dispensary affairs, the civil medical officer states that "at Chooramun the members, but for the anxious desire of the hospital assistant and the secretary, would have been very lukewarm. The hospital assistant says he has to go over to the houses of several members to bring them over to the meetings, and the secretary, being the manager of the estate which supports the institution, had to influence men under him to attend them. At Mohadebpore the members, though they seemed to have very regularly met every month, do not show the slightest interest in the working of the dispensary, except the secretary, who is dewan of the principal donor. The meetings are only got up with as many as may care to come, with the view of passing the monthly bills."

*Dinagepore.*—A municipal dispensary from 1st April 1882. A sub-committee has been appointed by the municipal commissioners to look after the interest of the dispensary and check its accounts. The dispensary committee has been abolished since April, but subscribers are appointed monthly to visit the dispensary. There were altogether seven meetings. The civil officers paid five visits, and the civil medical officer inspected daily when in the station. There were treated 291 in and 3,026 out patients against 322 and 3,155 in 1881, the daily averages being 9 and 23 against 9 and 26 respectively. It is said that the dispensary attendance does not show the increased unhealthiness of the town and its surrounding places, as the acute cases amongst those who are entitled to the dispensary treatment seldom attend the dispensary. The number of deaths was 56 in 1882, the same as in the previous year. Six major and 75 minor operations were performed against 8 and 87 in 1881. There was no death. The total expenditure was Rs. 1,500, of which Rs. 46 were

paid by the municipality. Nothing was paid by the municipality in the previous year. Government contribution amounted to Rs. 172, of which Rs. 75 were paid as half salary of the hospital assistant from January to March 1882, and Rs. 37 were paid for medical stores. The income from local sources was Rs. 1,292, including Rs. 456 drawn from the Savings Bank to meet the current expenses of the dispensary.

*Raigunge.*—A first-class dispensary, managed by a committee consisting of six members, who held nine meetings during the year. The Magistrate and the civil medical officer each visited twice. The civil hospital assistant passed into the second grade during the year, and receives Rs. 30 per mensem from the dispensary fund. The total number of out-patients treated was 1,503 against 1,472 in 1881, the daily average being 19 against 20. Minor operations numbered 22. No major operation. The total expenditure was Rs. 546, whereof Rs. 503 were expended on establishment. The cost of forms supplied by Government was Rs. 4.

*Mohadebpore.*—A first-class dispensary, governed by a committee, which held 13 meetings. Inspected once by the civil medical officer. Sickness in the station prevented his visiting twice. No visit was paid by civil officers. The civil hospital assistant passed into the second grade during the year, and receives Rs. 30 as pay from dispensary fund. Out-door patients numbered 923 against 916, the daily average attendance being 4·1 against 2·3. The increase in the daily average of 1882 is said to be due to erroneous calculation of patients, but the daily average shown in 1881, if multiplied by the number of days during the year, does not reach the recorded number of cases treated. If the number of cases treated is to be accepted, the daily average of 1882 seems to be the correct figure. The civil hospital assistant is reported to be careless in preparing returns, and is not well acquainted with the usual routine work. The dispensary is situated 53 miles from head-quarters, and is of no use to the public. The total expenditure was Rs. 489, whereof Rs. 435 represent the cost of establishment. Rs. 16 were expended on bazaar and Europe medicines during the year. The cost of forms supplied by Government was Rs 4.

*Chooramun.*—A dispensary in class 1, supported by a guaranteed subscription of Rs. 40 per mensem, contributed by an estate under the Court of Wards. It is under the management of a committee, which held 12 meetings. Inspected once by the Magistrate and twice by the Civil Surgeon. The civil hospital assistant has qualified himself in English, and receives Rs. 30 a month from dispensary funds. The number of out-patients treated was 1,462 against 1,369 in 1881, the daily average being 14 against 15. Malarious fever and goitre were the prevailing diseases. Fifty-six minor operations were performed. No major operation. The total expenditure was Rs. 463, whereof Rs. 429 were expended on establishment. Europe medicines cost Rs. 2 only, as the dispensary had a large stock from the previous year.

*Baloorghat.*—In June last, the dispensary was transferred to class I. It is supported by an estate under the Court of Wards and governed by a committee, which held 11 meetings during the year. Visited once by the Magistrate and the civil medical officer. There were treated 1,120 out patients against 1,931 in 1881, the daily average being 10 against 20. The large decrease has not been explained, but the civil medical officer thinks that it was due to improved health and to the paucity of labourers, who come to the place during the paddy-husking season. Forty-two minor operations were returned. No major operation. The total expenditure was Rs. 506, of which Rs. 425 represent the cost of establishment. Government contributed Rs. 92, viz, half salary of the hospital assistant to 19th June, and the cost of forms.

**Rungpore district.**

The public health of the district was, on the whole, comparatively good. The improvement in the health of the town, which followed the drainage of the swamps in the station, has been maintained. There were 11 dispensaries working at the end of the year. The dispensary at Bagdogra was closed in March 1882 on the removal of the sub-divisional head-quarters to Nelphamaree. A new dispensary, the Civil Surgeon understands, has been opened in the new sub-division, but it has not been placed under Government supervision. Three dispensaries have accommodation for in-door patients; the rest are out-door institutions. Two of the dispensaries were made over to local municipalities under the operation of the Government Resolution dated 20th February 1882, seven are maintained in class I, and two in class II. There were treated 357 in and 52,219 out-patients against 433 and 55,041 in 1881, the daily averages being 13 and 216 against 15 and 247 respectively. The decrease was mainly due to the comparative healthiness of the district during the year. The Civil Surgeon says the figures may be accepted as correct. The dispensary at Kurigram was in charge of an assistant surgeon till the close of the year; he was replaced by a civil hospital assistant in January 1883. The Civil Surgeon cannot say much of the interest taken by the managing bodies, with the exception of Tushbunder and Ulipore dispensaries. The dispensaries, in which the supporters take interest and the medical officers are attentive to the patients, are said to be appreciated and frequented by the people.

*Rungpore.*—A municipal dispensary. From 1st April 1882, the dispensary was under the entire management of the municipal commissioners. It was visited once by His Honor the Lieutenant-Governor, twice by the Commissioner of the division, three times by the District Magistrate, and once by the Joint-Magistrate. The Civil Surgeon visited daily. There were treated 317 in and 7,256 out-patients with daily averages of 9 and 22 against 371 and 8,798, with daily averages of 11 and 32 in 1881. The death-rate was 12·3 per cent

against 11·8. Eleven major—all unimportant cases—and 122 minor operations were performed. The total expenditure was Rs. 2,410, whereof Rs. 1,077 were expended on establishment and Rs. 286 on buildings. The municipality contributed Rs. 491 against Rs. 191 in 1881. There is an invested capital of Rs 16,300, and Rs. 666 were realized as interest during the year. Government contributed Rs. 211, which includes Rs. 44 as salary of the hospital assistant, Rs. 17 as cost of forms, and Rs. 150 as special allowance in lieu of medicines. The latter represent the cost of medicines supplied in 1881, but carried to account in 1882.

*Mahigunge.*—A municipal out-door dispensary in the large bazaar of the old town of Rungpore from 1st April 1882. Visited frequently by the Civil Surgeon. The number of patients treated was 5,113 against 6,101 in 1881, with a daily average of 14 and 25 respectively. Minor operations numbered 56. No major operation. The total amount expended was Rs. 747, of which Rs. 128 were paid by the municipality and Rs. 173 by Government. The Government contribution includes Rs. 140 as special allowance in lieu of medicines paid in 1881, but carried to account in the year under report. The amount paid from municipal funds in 1881 was Rs. 200. The Government aid was withdrawn from 1st April 1882.

*Ulpore.*—A first-class dispensary, under the private management of the chief local agent of Moharanee Surnomoyee Dossee, who pays all the expenses of the institution. Visited twice by the Civil Surgeon. A civil hospital assistant is in charge, who is paid Rs. 70 per mensem. There were treated 37 in and 5,405 out-patients against 32 and 5,034 in 1881. The daily average attendance was 3 and 44 against 2 and 45. The daily average of in-patients, as compared with the total number treated, indicates that each patient remained in the dispensary for an average period of about 30 days. The death-rate was 5·4 per cent against 25 per cent in 1881, which points to the fact that cases of less severe illness were treated in the year under review. Minor operations numbered 110. No major operation. The total expenditure was Rs. 2,171, whereof Rs. 1,164 were expended on establishment and Rs. 573 on imported medicines, besides Rs. 122 on bazaar medicines. Europe medicines were obtained from Government store and from private druggists; the cost was Rs. 77 and Rs. 496 respectively. A masonry house has been built for the dispensary, which is said to be a suitable building, with a dispensary, a prescribing room, an examination-room in the centre, and a wing on each side for the accommodation of in-door patients. No outlay, however, appears in the financial statement under the head of "building charges."

*Kakina.*—A first-class dispensary under the private management of its sole supporter, Baboo Mohima Runjun Rai Chowdhry, zemindar of the place. Visited once by the Magistrate and twice by the Civil Surgeon There were treated 3 in and 5,816 out-patients, with daily averages of ·2 and 9, against 30 and 6,155 and daily averages of ·9 and 8 respectively. The total attendance is out of all proportion to the daily average. The discrepancy, as explained by the Civil Surgeon, was due to the inclusion of represented attendance, which was large, in the total number treated. This is no explanation. The figures are worthless. The large fall in the number of in-patients has not been explained. Four major and 131 minor operations were recorded. The total expenditure was Rs. 835, of which Rs. 690 represent the cost of establishment. A civil hospital assistant is paid Rs. 40 per mensem; a compounder and other servants cost Rs. 19-12-0. The cost of forms supplied by Government was Rs. 9.

*Tushbunder.*—A dispensary in class I, managed by the sole supporter Rai Romoni Mohun Chowdhry Bahadoor, the local zemindar. The number of out-patients treated was 6,724, with a daily average of 21, against 7,752 and 19 in 1881. Ninety minor operations were recorded. No major operation. The total expenditure was Rs. 1,205, of which Rs. 576 were expended on establishment. Europe medicines cost Rs. 302, of which Rs. 277 worth of medicines were purchased from private druggists towards the end of the year, which remained in stock. The cost of forms supplied by Government was Rs. 7. The dispensary was inspected once by the Magistrate and twice by the Civil Surgeon.

*Batashim.*—A dispensary in class I, under private management. Visited once by the Assistant Magistrate and twice by the Civil Surgeon. The civil hospital assistant is paid Rs. 50 a month by the supporter. There were treated 3,705 out-patients, with a daily average of 24, against 3,965 and 26 in 1881. Minor operations numbered 126. The total amount expended was Rs. 728, of which Rs. 624 represent the cost of establishment. The cost of forms supplied by Government was Rs. 8.

*Dimla.*—A first-class dispensary, managed by a committee, which met four times during the year. It was inspected once each by the District Magistrate and the sub-divisional officer. The hospital assistant is said to be far above the average of his class in intelligence and professional knowledge, which are wasted in a small dispensary. Out-door patients numbered 2,282 against 2,099 in 1881. The daily average attendance was 13·1 against 13·6. The dispensary is situated in a healthy part of the district, and the people, it is said, are backward and do not appreciate the European method of treatment. Goitre and skin diseases were the most prevailing complaints. Thirty-seven minor operations were recorded. The total expenditure was Rs. 551, of which Rs. 456 were expended on establishment.

*Kurigram.*—A dispensary in class II (*vide* report for 1881). No direct aid is given by Government to this dispensary. The assistant surgeon of the sub-division was in charge, who receives nothing from the dispensary fund. The institution is managed by a committee,

which met twice only during the year. The sub-divisional officer and the present secretary, it is said, take great interest in the dispensary. Visited once by the District Magistrate and often by the sub-divisional officer. The Civil Surgeon inspected once; station duties prevented him from visiting twice during the year. There were treated 7,006 out-patients, with a daily average of 19, against 5,678 and 23 in 1881. The dispensary is situated on the banks of one of the hill streams, Dhurla, where goitre is prevalent, and nearly 3,000 cases were treated. Fifty-four minor operations were performed. The total expenditure was Rs. 513, of which Rs. 100 were expended on Europe medicines, and Rs. 251 as salaries of the menial servants. The assistant surgeon has since been replaced by a civil hospital assistant, on the permanent incumbent proceeding to join an appointment under the Cashmere State.

*Saptana.*—A first-class dispensary, under private management. Inspected once each by the sub-divisional officer and the Civil Surgeon. There were treated 2,493 out-patients against 2,691 in 1881, the daily average being 11 against 16. Minor operations numbered 36. The total expenditure was Rs. 599, of which Rs. 432 were expended on establishment and Rs. 71 on miscellaneous charges. The latter item is inclusive of the travelling allowance of the officiating medical officer paid from the dispensary fund.

*Dinhatta.*—A second-class dispensary, under private management. Visited once each by the sub-divisional officer and the Civil Surgeon. Government contributes Rs. 12-8-0 per mensem, or half the salary of the hospital assistant. There were treated 3,334 out-patients, with a daily average of 17, against 3,355 and 16 in 1881. Thirty-three minor operations were recorded. The total expenditure was Rs. 457, whereof Rs. 365 were expended on establishment. Government contributed Rs. 158, including the cost of forms supplied. The local income of the dispensary was Rs. 480, which is quite sufficient for all its legitimate wants. There is no municipality.

*Gyabanda.*—A second-class dispensary, under the management of a committee, which met only twice during the year. It was inspected by the Commissioner of the division, the District Magistrate and the Civil Surgeon, once each. The sub-divisional officer paid frequent visits. The number of out-patients treated was 3,085 against 3,413 in 1881, the daily average being 17 against 20. The prevailing diseases were fever, goitre, and skin affections. The total expenditure was Rs. 285, of which Government contributed Rs. 126, viz, Rs. 120 as extra allowance, at Rs. 10 a month, to the civil hospital assistant, and Rs. 6, the cost of forms. The income from local sources was Rs. 321, which is sufficient for the maintenance of the dispensary as a sub-divisional institution in class I. The dispensary invested Rs 134 during the year. Government aid is not required.

**Rajshahye district.**

The public health of the district in 1882 was as bad as it was in the previous year, if not worse. Fevers prevailed very severely in some places, and in one locality special aid had been sent. Some zemindars, chiefly the European planters of the district, purchased cinchona febrifuge and distributed it gratuitously among their tenants and work-people, "thus," the Civil Surgeon says, "setting an example of charity that many well-to-do native gentlemen of this district would do well to follow." Cholera broke out in a severe epidemic form in the southern parts of the district in the cold season. There were eight dispensaries working at the end of the year. The sudder dispensary was transferred to the municipality from 1st April 1882. All the rest are in class I. Two were transferred to class 1 during the year. Bauleah and Nattore Dispensaries receive both in and out door patients; the rest treat out-patients only. There were treated 329 in and 25,997 out patients against 358 and 25,761 in 1881, the daily averages being 15 and 282 against 14 and 294. Regarding the correctness of figures, the Civil Surgeon can only speak confidently of those of the Bauleah Dispensary, though the others, he says, cannot be far off the truth as far as he could judge by local evidence. The sudder dispensary is in charge of a first grade assistant surgeon; all the other dispensaries were under hospital assistants. Little interest, Dr. Bensley says, is shown by managing bodies in the working of the dispensaries supervised by them. He cannot speak favourably even of single proprietors. with the exception of Rajah Kristender Roy of Bollihar and Baboo Raj Coomar Sircar of Kurruchmeria, who take great interest in the welfare of their dispensaries.

*Bauleah.*—Transferred to the municipality from 1st April 1882. The dispensary is chiefly supported by the Prosunno Nath Fund, the committee of which fund manages it. The committee met only once during the year. The dispensary was visited by the Lieutenant-Governor, the Commissioner, the Surgeon-General, and the Magistrate. The Civil Surgeon inspected daily A first grade assistant surgeon is in charge, who is said to be an experienced officer, but he "is slow and vacillating in his work, and sadly lacks interest." There were treated 227 in and 6,203 out door patients against 262 and 6,358 in 1881, the daily averages being 12 and 59 against 11 and 64. There were 28 deaths, or 12·3 per cent, against 33, or 12·2 per cent in 1881. The largest number of deaths occurred from dysentery, whereas in 1881 it was from remittent fever. Forty-one major operations were performed. Minor operations numbered 373. The total expenditure was Rs. 3,454, whereof Rs. 2,763 were expended on establishment. Government contributed Rs. 450 as salary of the assistant surgeon, at Rs. 150 a month, from January to March 1882, and Rs. 9 as cost of forms. The income of the dispensary was as follows:—Rs. 1,205 from Prosunno Nath Fund, Rs. 1,650 from municipal fund, and Rs. 169 were received as subscriptions from Europeans and natives. The amount paid by the municipality in 1881 was Rs 75. Referring to the subscriptions received from native residents, the Civil Surgeon observes that "it is a matter of regret that native residents of this town, while willing to testify to the usefulness of the dispensary, and while at all times making use of it by sending for treatment their poor

relatives and dependants, should show such an unwillingness to contribute towards its support."

*Nattore.*—A first-class dispensary, supported by the Prosunno Nath Fund, and managed by a sub-committee of the fund. The institution receives no support from the local municipality. Visited once by the Commissioner, twice by the Magistrate, thrice by the Civil Surgeon, and frequently by the sub-divisional officer. A civil hospital assistant is in charge, who receives Rs. 60 per mensem from the dispensary fund. There were treated 102 in and 3,851 out patients against 96 and 3,663 in 1881. The daily average numbers were 2 and 35 against 2 and 31. A severe outbreak of cholera occurred in November, and 359 patients were treated by the hospital assistant and his assistants, mostly in the first instance at the patients' houses, whose friends subsequently came to the dispensary for medicines. The general death-rate was 20 5 per cent against 25 in 1881. Twenty-six major operations were performed; none of any importance. Minor operations numbered 147. The total expenditure was Rs 1,326, whereof Rs. 1,008 were expended on establishment. Rs. 1,317 were received from Prossunno Nath Fund and Rs. 97 as subscription from natives. The cost of forms, supplied by Government, was Rs. 9.

*Pooteah.*—A dispensary in class I, entirely supported by Ranee Monmohinee Dabee, of Pootoah. There is no committee. Inspected twice by the Magistrate and Civil Surgeon, and once by the Joint-Magistrate. There were treated 4,439 out-patients, with a daily average of 33, against 4,622 and 46 in 1881. One major and 184 minor operations were recorded. The total expenditure was Rs. 1,023, of which Rs. 900 were expended on establishment. The civil hospital assistant is paid Rs. 60 per mensem by the supporter; a compounder and two servants also cost Rs. 15 a month. The cost of forms, supplied by Government, was Rs. 9.

*Lallpore.*—A first-class dispensary, supported entirely by Maharani Surrut Soondery Dabee, of Pootoah. There is no committee, and the dispensary is not visited by any of the subordinates of the Maharani. Visited once each by the Magistrate and the Joint-Magistrate; the Civil Surgeon inspected thrice A hospital assistant is in charge, who receives Rs. 60 a month from the dispensa y fund. There were treated 2,973 out-patients, with a daily average of 30, against 2,751 and 38 in 1881. The increase in the number treated was mainly due, the Civil Surgeon says, to the prevalence of cholera in an epidemic form There were, however, only 161 cases treated at the dispensary. One hundred and eight minor operations were recorded. The total expenditure was Rs. 1,041, whereof Rs 885 represent the cost of establishment. The cost of forms, supplied by Government, was Rs. 9.

*Tahirpore.*—The dispensary was transferred to class I on the 22nd March 1882, and has been since nominally supported by the Tahirpore zemindars. It appears that owing to a disagreement between the parties the dispensary remained thoroughly uncared for and subscriptions fell into arrears Orders have since been issued to close the dispensary from 1st March 1883. In the year under report the institution was visited twice by the Magistrate, and once each by the Joint-Magistrate and the Civil Surgeon. The number of out-patients treated was 3,324, with a daily average of 36 against 3,485 and 32 in 1881. Minor operations numbered 82. The total expenditure was Rs. 884, of which Rs. 686 were expended on establishment. Government contributed Rs. 75, whereof Rs. 67 represent the salary of the hospital assistant.

*Kuruchmaria*—The dispensary was transferred to class I in June 1882. It is supported by Baboo Raj Koomar Sircar, the local zemindar, who is said to take an intelligent interest in the working of the institution, which is held in great esteem by the people in its vicinity. Visited once by the sub-divisional officer of Nattore. The Civil Surgeon could not inspect twice, the place not being easily accessible. The civil hospital assistant has been reduced to his grade pay since the transfer of the dispensary to class I. There were treated 1,980 out-patients, with a daily average of 38. In 1881 the number was 1,665, and a daily average of 27. Minor operations numbered 54. The total expenditure was Rs. 577, of which Rs. 419 were spent on establishment. Government contributed Rs. 108.

*Kassimpore.*—A first-class dispensary, under a committee, which met five times. The dispensary building is in a bad state of repairs, and although the Civil Surgeon pointed this out to some members of the committee on his last visit, nothing has as yet been done. The number of of out-patients treated was 1,447, with a daily average of 23, against 1,564 and 33 in 1881. There were 31 minor operations recorded. No major operation. The total expenditure was Rs. 695, whereof Rs 597 represent the cost of establishment. The cost of forms supplied by Government was Rs. 8. The dispensary was inspected twice by the Civil Surgeon and once each by the District Magistrate and the sub-divisional officer, Nowgong.

*Bohhar.*—A dispensary in class I, supported entirely by Raja Kristender Roy, the local zemindar, who is said to take great interest in the affairs of the dispensary, and is most lavish in his expenditure on the institution. Inspected once by the Magistrate and once by the Civil Surgeon. Press of work prevented the latter from paying a second visit. A private medical subordinate of the vernacular licentiate class is in charge, who is paid Rs. 60 per mensem He is said to be most extravagant in the use of medicines. There were treated 1,780 out-patients, with a daily average of 24 against 1,656 and 20 in 1,881. Minor operations numbered 105. The total expenditure was Rs. 1,251, including Rs 8, being the cost of forms supplied by Government. The amount spent on establishment was Rs. 864, and Rs. 287 were expended on Europe medicines purchased from private druggists. The outlay on

medicines was most extravagant, but the proprietor of the dispensary says that "so long as good is done he does not mind the expense."

Bogra district.

The general health of the district was not so good during the year as it was in 1881, as evidenced by the mortuary statistics, but the increased mortality is said to be due to improved registration. This statement is supported by the civil officers. There were 3 dispensaries working at the end of the year, all in class I. The number of patients treated was 97 in and 8,022 out door, against 117 and 7,010 in 1881, the daily average being 3 and 71 against 5 and 63 respectively. The Civil Surgeon examined the registers and made private enquiries on his inspection visit as to the correctness of attendance, but he found nothing to discredit it. All the dispensaries are in charge of civil hospital assistants. The Magistrate agrees with the Civil Surgeon in thinking that the committees all take an interest in the dispensaries under their management, which are also appreciated by the people.

*Bogra.*—A first-class dispensary, under the management of the local municipality from 1st January 1882. It was visited by His Honor the Lieutenant-Governor, the Commissioner, and the Magistrate. The Civil Surgeon inspected daily. A civil hospital assistant is in charge, who receives Rs. 60 per mensem. There were treated 84 in and 4,805 out patients against 105 and 3,803 in 1881. The daily average attendance was 3·2 and 35 against 3·8 and 30. The death-rate per cent was 26·1 against 21·9 in 1881. Nearly one-third of the cases treated consisted of fevers. Twenty major and 105 minor operations were performed. The former chiefly comprised setting of fractures and reduction of dislocations. The total expenditure was Rs. 1,222, of which Government paid Rs. 50, viz., Rs. 25 as salary of the hospital assistant for December 1881 entered in 1882, and Rs. 25 as diet of police cases. Rs 890 were expended on establishment, and Rs. 124 on buildings. The municipality contributed Rs. 210. No payment was made from municipal funds in 1881.

*Nowkhil'a.*—A first-class dispensary, entirely supported by Rajah Promotho Nath Roy, of Digaputtoah. Visited twice each by the Magistrate and the Civil Surgeon. A second-class hospital assistant is in charge, who receives Rs. 50 per mensem. The number of out-patients treated was 1,667, with a daily average of 24, against 1,771 and 20 in 1881 Minor operations numbered 97. The total expenditure was Rs. 821, whereof Rs. 747 represent the cost of establishment. The forms supplied by Government cost Rs. 3.

*Sherepur.*—Transferred to class I on 29th January 1882. The dispensary is under the management of the local municipality. Visited twice by the Magistrate and four times by the Civil Surgeon. There were treated 1,550 out-patients, with a daily average of 14, against 1,436 and 12 in 1881. The in-door ward was opened in the early part of the year, but was subsequently closed by order of the Magistrate. Thirteen patients were treated in the first half of the year, of whom 4 died and 9 recovered. Twenty-six minor operations were reported. The total expenditure was Rs. 591, of which Rs. 409 were expended on establishment and Rs. 101 on buildings. The amount paid by the municipality was Rs. 556 against Rs. 258 in 1881. Government contributed Rs. 28 as salary of the hospital assistant for December 1881 and 28 days of January 1882.

Pubna district.

The general health of the district was fairly good till after the rains, when cholera prevailed in several places. There are two dispensaries in this district, both of which were made over to local municipalities under the operation of the Government Resolution dated 20th February 1882. There were treated 405 in and 4,767 out patients against 262 and 5,015 in 1881. The daily average attendance was 14 and 39 against 11 and 50 respectively. The figures, the Civil Surgeon says, may be accepted as correct. The members of the sudder municipal committee, it is said, do not evince much interest in the institution, but a more lively interest is taken in the other dispensary, both of which are fairly appreciated by the people.

*Pubna.*—A municipal dispensary. It was visited by His Honor the Lieutenant-Governor and the Surgeon-General on the 28th August last. The Commissioner of the division visited it in December. It was inspected frequently by the Magistrate and almost daily by the Civil Surgeon. There were treated 252 in and 2,166 out-door patients against 185 and 2,113 in 1881. The daily average attendance was 10 and 18 against 6 and 26 respectively. The death-rate was 13 against 7 per cent in 1881. The increase was due to several cases having been admitted in a moribund condition. Eight major and 116 minor operations were performed. The total expenditure was Rs. 1,339, of which Rs. 733 were expended on establishment and Rs. 278 on buildings. The municipality contributed Rs. 253 against Rs. 660 in 1881. The amount paid by Government was Rs. 77 as half salary of the hospital assistant to 31st March 1882 and diet of police cases.

*Serajgunge.*—A municipal dispensary. Visited twice by the Civil Surgeon, and frequently by the sub-divisional officer. An assistant surgeon is in charge, who received his entire salary Rs. 120 a month from the municipality from 1st April 1882. There were treated 153 in and 2,601 out patients against 77 and 2,902 in 1881, the daily average being 4 and 20 against 4 and 24. The death-rate was 18 per cent against 20. Forty-two cases of cholera and 189 cases of injuries were treated. The Civil Surgeon observes that the attendance hardly appears to bear a fair relation to local public health. Nine major and 199 minor operations were reported. The total expenditure was Rs. 2,475, of which Rs. 1,781 were expended on establishment and Rs. 354 on buildings. Dieting articles cost Rs. 117. Government contributed Rs. 180 as half salary of the assistant surgeon from January to March 1882. The amount paid from municipal funds was Rs. 838 against Rs. 1,150 in 1881.

Darjeeling district.

The health of the district generally has been satisfactory. There was an increase in the number of cases of cholera in the Terai circles, otherwise no disease prevailed in an

epidemic form. There were four dispensaries working at the end of the year. The Darjeeling and Kurseong dispensaries were transferred to the local municipalities on 1st April 1882, and the dispensaries at Silliguri and Kalimpong are entirely supported by Government. The number of patients treated was 251 and 9,672 against 183 and 9,356 in 1881, the daily averages being 50 against 54 for both classes of patients. All the dispensaries are in charge of civil hospital assistants. At Darjeeling two of the Municipal Commissioners are appointed to supervise the dispensary. The dispensaries seem to be fairly appreciated by the people. Dr. A. B. Morris has been appointed during the year to afford medical aid to Government officers and the institutions at Kurseong and Silliguri, i e medical supervision of the police hajut and dispensary at Kurseong and inspection of the Silliguri dispensary.

*Darjeeling.*—A municipal dispensary. There is no separate committee, but a sub-committee of two Municipal Commissioners inspect the institution. Inspected daily by the Civil Surgeon. No official visits were paid by civil officers. A first grade hospital assistant is in charge, who receives altogether Rs. 110 per mensem, viz., grade pay Rs. 55, hill allowance Rs. 10, subordinate charge of civil station Rs 15, allowance for police hospital Rs. 10, allowance for temporary European hospital Rs. 10, and charge of small-pox hospital, when occupied, at the rate of Rs. 10. The pay of the compounder has been reduced from Rs. 19 to Rs. 14. Since April 1881, all Government servants, other than menials, had to buy their own drugs, and the compounder's work was consequently much diminished. There were treated 215 in and 4,014 out patients against 143 and 3,868 in 1881, the daily average being 13 and 16 against 10 and 15 respectively. The total number of deaths was 35 against 25 in 1881. In out-patients malarious fever was the prevailing disease. The next in order of prevalence was worms, from which 725 cases were treated. Intestinal worms, chiefly round worms, are very frequent in this district. The Civil Surgeon says that santonine is used by the pound on large tea estates. Twelve major operations were performed, with two deaths. Minor operations numberd 102. The total expenditure was Rs. 2,852, of which Rs. 1,619 were expended on establishment,and Rs. 155 on Europe medicines. The latter represent the cost of medicines supplied by the store department in 1881, and paid for in 1882, inclusive of Rs. 20, being the value of medicines purchased locally. The Civil Surgeon comments at length on the alleged short supply of medicines received in November 1882, because the quantities indented for have not been supplied in full. The indents, as usual, are checked, based on past expenditure, and the stock remaining. If the medicines run short, the Civil Surgeon may submit an emergent indent with the necessary explanation, which he has not done. Government contributed Rs. 430, of which Rs. 141 represent the salary of the hospital assistant to March 1882, and Rs. 289 as special allowance to the medical subordinate From 1st April the grade pay of the hospital assistant was paid from the dispensary funds. The total amount contributed by the municipality was Rs. 1,048 to compare with Rs. 123 in 1881. Subscriptions from Europeans amounted to Rs. 1,172, and from natives Rs. 200. The payments made by Government on account of hill allowance to the hospital assistant will be refunded by the municipality under recent orders.

*Kurseong.*—A municipal dispensary from 1st April 1882. Prior to this, it was entirely supported by Government. This dispensary and that at Silliguri, have been removed from the immediate supervision of the Civil Surgeon since the appointment of Dr. Morris as civil medical officer of Kurseong, who visited the institution frequently and made two formal inspections. The Civil Surgeon made no inspection, but orders have since been issued that he may, if he thinks necessary, inspect both the dispensaries once or more during the year. The Deputy Commissioner of Darjeeling and the Sanitary Commissioner visited the dispensary during the year. From May to September 1882 a third grade hospital assistant was in charge, who gave great dissatisfaction to all his superior officers as well as to patients, and who has since been removed for misconduct. There were treated 36 in and 1,115 out patients against 30 and 1,606 in 1881, the daily averages being 1·03 and 9·7 against 1·18 and 15 8. The falling off was due to changes in the medical subordinates and to the unpopularity of the hospital assistant referred to above. There were 11 deaths, the same number as in 1881. Six major and 33 minor operations were recorded. The total expenditure was Rs. [illegible]11, whereof Rs. 661 were expended on establishment. The medicines were received too late to admit of payment during the year. Government contributed Rs. 508, which represent the salaries of medical subordinates and other charges entered under "special allowances." Some excess amount was drawn from Government, including the hill allowance to the hospital assistant, which will be refunded by the municipality. The amount contributed by the municipality was Rs. 333. Nothing was paid in 1881. There is no subscription realized in aid of this dispensary.

*Kalimpong.*—A third-class dispensary at a sub-divisional station in the hills, entirely supported by Government There is no committee Visited twice by the Civil Surgeon and once each by the Deputy Commissioner and the Assistant Commissioner. There were treated 2,663 out-patients against 2,228 in 1881, the daily average being 8 and 6. The dispensary is largely attended by hill people, who come to the Kalimpong bazaar from miles around every Sunday. Worms were the prevailing disease, from which no less than 1,130 cases were treated. Eighteen minor operations were recorded The total expenditure was Rs. 689, whereof Rs. 624 were expended on establishment.

*Silligori.*—Owing to the abolition of the Estates Improvement Fund, the charge of the dispensary, which was formerly in class II, was entirely taken over by Government as a class III

institution. Visited four times by the Civil Surgeon, and five times by the civil medical officer. No visit was paid by the Civil Surgeon for reasons given in the case of the Kurseong dispensary. A hospital assistant is in charge, who now receives his grade pay of Rs. 25 and a sub-divisional allowance of Rs. 10. The number of out-patients treated was 1,880, with a daily average of 16, against 1,654 and 17 in 1881. The number of attendances is said to be small as compared with the known unhealthiness of Terai. "This," the Civil Surgeon says, "may be due to the move from Phansdewah to Silligori, and to a permanent building at Silligori not having been provided about the middle of the year; also to ill health of civil hospital assistant Rash Behary Dass." The number of patients treated in 1882 has, however, exceeded that of the previous year by 226, though the daily average was nearly the same in both the years. The absence of an increase in daily attendance indicates less severity of illness. Two major and 40 minor operations were recorded. The total expenditure was Rs. 1,026, all paid by Government, except Rs. 102. The amount expended on establishment was Rs. 607, and Rs. 386 were expended on Europe medicines. At the end of the year there remained Rs. 179 in the Savings Bank, invested during the year.

Julpigoree district.

The report is written by Dr. Macrae, the new Civil Surgeon, who took charge of the district on 13th December 1882. The general health in 1882 may compare favourably with preceding years in so far as no outbreak of epidemic disease occurred during the year in any portion of the district. Malarious fever prevailed to a considerable extent, but the district, on the other hand, enjoyed a more than ordinary immunity from cholera and small-pox. Four dispensaries were working at the end of the year. The sudder dispensary was transferred to the Julpigoree union on 1st March 1882. The dispensaries at Boda and Titalyah are in class I, and the Alipore Dispensary, which is under the supervision of the Civil Surgeon, Buxa, Bhootan, is in class II. There were treated 295 in and 8,301 out patients against 212 and 7,379 in 1881. The daily average was 12 and 62 against 10 and 55. The figures on the whole may be accepted as correct. The sudder dispensary was in charge of a first grade assistant surgeon to 27th December 1882, when a civil hospital assistant was appointed. The rest were under hospital assistants throughout the year.

*Julpigoree.* A municipal dispensary from 1st March 1882, under the management of a committee presided over by the Deputy Commissioner. Twelve meetings were held. The Deputy Commissioner observes that "some little interest was displayed by the members of the committee in the early part of the year, but it died away subsequently." The dispensary was inspected once by the Commissioner, frequently by the Deputy Commissioner, occasionally by the District Superintendent, and daily by the Civil Surgeon A first-grade assistant surgeon, who also acted as Civil Surgeon, was in charge till 27th December 1882. There were treated 247 in and 4,383 out patients, with a daily average of 9 and 26. The numbers treated in 1881 were 208 and 3,962, with a daily average of 9 and 23 respectively. The death-rate to total treated was 21 2 per cent against 23·5 in 1881. Ten major and 98 minor operations were performed. The total expenditure was Rs. 3,741, of which Rs. 2,740 were expended on establishment and Rs. 331 on buildings. Government paid Rs. 404, which include the salary of the assistant surgeon for January and February. The Julpigoree union contributed Rs 1,974, of which Rs 1,400 were advanced by Government, which will be refunded. The amount realized by private subscriptions was Rs 1,106. No payment was made by the union in 1881.

*Boda.*—A first-class dispensary, under the management of a local committée. The Moharajah of Cooch Behar contributes Rs. 528 per annum towards its expenditure. Nine meetings were held. Inspected once each by the Deputy Commissioner and the Civil Surgeon, and twice by the District Superintendent of Police. The number of out-patients treated was 1,287 against 1,073, the daily average being 12 and 8 respectively. No in-patients. Minor operations numbered 83. No major operation. The total expenditure was Rs. 817, of which Rs. 607 were expended on establishment and Rs. 149 on Europe medicines. The cost of forms supplied by Government was Rs. 7. The total income of the dispensary from local sources was Rs. 878.

*Titalyah.*—A first-class dispensary, entirely supported by the Chaklajat estate of Cooch Behar. It is governed by a managing committee, but no meetings were held during the year. Visited twice each by the District Superintendent of Police and the assistant surgeon in charge. There were treated 37 in and 2,159 out patients against 28 and 1,843 in 1881. The daily average number was 2 and 17 against ·95 and 16. The death-rate was 13·5 per cent against 21 4 in 1881. No major operation. Seventy-one minor operations were returned. The total expenditure was Rs. 775, whereof Rs. 504 represent the cost of establishment. The cost of forms supplied by Government was Rs. 9.

*Alipore, Buxa.*—The report has been submitted by the Military Surgeon of Buxa Bhootan, who is superintendent of the dispensary, and conducts the civil duties of the station. Visited frequently by the civil officers, and twice by the Civil Surgeon. There were treated 11 in and 472 out patients against 6 and 501 in 1881. The daily averages were 0·59 and 5·5 against 0·09 and 5·9. No operations performed. The dispensary is in class II, and Government pays Rs. 120 per annum as allowance to the hospital assistant of the sub-division for the charge of the dispensary. The total expenditure was Rs. 371, of which Rs. 202 were expended on establishment and Rs 102 on Europe medicines. The latter item includes Rs. 66 paid for medicines purchased in 1881. The cost of forms supplied by Government was Rs. 4.

## Dacca Division.

Dacca district.

The report is complete, and contains much useful information on the working of dispensaries. The year under report was a healthy one with the exception of severe prevalence of cholera, which caused 6,307 deaths against 3,213 in 1881. There were nine dispensaries working at the end of the year. The dispensary at Simolya was closed on 30th April 1882. Five dispensaries were in class I, including two transferred during the year, two transferred to local municipalities under Government Resolution dated 20th February 1882, and two were in class II. There were treated 1,754 in and 39,738 out patients against 1,896 and 47,166 in 1881, the daily averages being 93 and 270 against 94 and 329 respectively. The statistics of the Mitford Hospital, the Civil Surgeon says, may be regarded as perfectly accurate, but he cannot speak so decidedly with regard to those of other dispensaries. The Mitford Hospital is in charge of a first-class apothecary, the dispensary at Maluchi is in charge of an assistant surgeon, and the rest are under civil hospital assistants. Seven dispensaries are under local committees. The Civil Surgeon observes that "as a general rule the committee takes no interest in the dispensary, and those are best managed which are under the direct management of the gentleman who solely supplies the funds required." With the exception of two branch dispensaries, Dr. Crombie could only inspect once during the year owing to pressure of work in the station. He says that "an idea of the length of time consumed in inspections in this district may be obtained when I state that I was absent for eight days in October, and during that time I was able to inspect only two dispensaries."

*Mitford Hospital.*—A municipal hospital from 1st April 1882. It is under the management of a committee, composed of the principal civil officials and of the leading European and native gentlemen of Dacca. The contribution to the hospital formerly paid by Government, amounting to Rs 5,085, is now paid by the municipality in addition to its former subscription of Rs. 3,600 per annum. Six meetings were held by the committee. The Civil Surgeon pays daily visits when in the station. First-grade apothecary G. H. Campbell was in charge, who is assisted in his work by the four teachers of the medical school, and two of the civil hospital assistants attached to the school, besides supernumerary medical subordinates doing duty in the hospital. Mr. Campbell receives Rs 230 per mensem from the hospital fund. He is said to be a very efficient and painstaking officer. There were treated 1,512 in and 17,203 out patients against 1,634 and 19,138 in 1881, the daily averages being 82 and 120 against 81 and 135. The falling off in out-door patients is attributed to the absence of epidemic malarial fever, which was so prevalent in 1880 and 1881 in certain parts of the town. Of the in-patients, 246 persons died, or a rate of 16·2 per cent of the total treated, against 11·1 per cent in 1881. Cholera was unusually prevalent, and 108 cases were treated against 47 in 1881. For malarial fevers, 115 persons were treated in 1882 against 174 in the previous year. The higher rate of mortality in the year under review was obviously due to the large number of cholera cases treated in the hospital. There were 136 major operations performed during the year, whereof 45 were performed by the superintendent, and 91 by the apothecary and the teachers attached to the school. Of the total number of operations 9 were fatal, or 8·8 per cent, to compare with 17 and 10·4 per cent in 1881. Seven amputations of the thigh were performed, with two deaths. There were no cases of pyæmia or erysipelas after operation. Minor operations numbered 2,960. The total expenditure was Rs. 16,708, whereof Government contributed Rs. 1,271 to 1st April 1882, out of an annual grant of Rs. 5,085. Establishment cost Rs. 8,884 against Rs. 8,946 in 1881. Europe medicines cost Rs. 1,100, of which Rs. 788 were for medicines received in 1881, but paid for in January 1882. The corresponding sum in 1882 was Rs. 770 as the cost of the indents of May and August 1882. Formerly the hospital was charged with half the cost of Europe medicines obtained from the store department. From 1st April 1882 all indents are passed "chargeable in full." Dieting articles cost Rs. 4,280 against Rs. 3,976 in 1881, and the average cost of each diet was 2 annas 6 pie against 2 annas 5 pie erroneously entered in the return for 1881 as one anna 7 pie. The expenditure on miscellaneous items was Rs. 1,419 against Rs. 1,845. Building charges amounted to Rs. 968 against Rs. 501 in 1881. The question of thorough repairs to the hospital at an estimated cost of nearly Rs. 15,000 was referred to Government. It has been ordered that the hospital would be put in a state of thorough repair by Government on this occasion, but that in future all charges would be borne by the municipality. The total receipts amounted to Rs. 20,028, including the balance of Rs. 4,115 on 1st January 1882. The municipality contributed Rs. 7,413 against Rs. 3,600 in 1881. At the end of the year, there remained a cash balance of Rs. 3,319 and an invested capital of Rs. 1,69,000 in Government securities, besides an invested sum of Rs 10,600 held in deposit for the purpose of erecting a ward for Armenians. The new female ward is almost ready for occupation.

*Narayanganj.*—A municipal dispensary from 1st April 1882. The members of the municipal committee form the governing body. The committee met four times during the year. Inspected twice by the Civil Surgeon. A civil hospital assistant is in charge, who receives Rs. 50 per mensem. Minor establishment cost Rs. 21. There were treated 74 in and 4,008 out patients against 74 and 4,112 in 1881, the daily averages being nearly the same as in the previous year. The death-rate among in-patients was 25·6 per cent. There were 14 deaths from cholera against 6 in 1881. Twelve major and 261 minor operations were reported. The total expenditure was Rs. 999, whereof Rs. 759 represent the cost of establishment. Europe medicines cost Rs. 81. Government contributed Rs. 105, of

which Rs. 100 were for half the salary of the hospital assistant for four months. The municipality entirely supports the dispensary. The amount paid in 1882 was Rs. 894 against Rs. 876 in the previous year. There was a cash balance of Rs. 45 on 1st January 1882, which has been refunded to the municipality. Narayangunge has been made a sub-division during the year. The dresser, who has been needlessly maintained, has been discharged.

*Moonsheegunge.*—A sub-divisional dispensary transferred to class I during the year, Government paying the grade pay of the hospital assistant and the dispensary an extra allowance of Rs. 10 per mensem. It is under the management of the committee, which met five times during the year. Visited twice by civil officers and twice by the Civil Surgeon. There were treated 16 in and 2,630 out patients against 20 and 2,537 in 1881, the daily averages being 0·9 and 14 against 0·9 and 12. The in-door patients were mostly police cases suffering from injuries. The prevailing complaints among out-patients were skin diseases, malarial fevers, &c. Five major and 330 minor operations were returned. The total expenditure was Rs. 397, of which Rs. 90 were paid by Government prior to the transfer of the dispensary to class I. Establishment cost Rs. 300, and Rs. 40 were expended on Europe medicines. The amount received from local subscriptions was Rs. 289 only; great difficulty is experienced in realizing the subscriptions for this dispensary. The arrears amount to over Rs. 200, some of which are outstanding for four or six years. The thatch of the roof must be removed before next rains, and there is no money in hand to do it with. There is no municipality.

*Manikgunge.*—A first-class sub-divisional dispensary, under the management of a committee, which met seven times during the year. Inspected once by the Civil Surgeon and once by a civil officer. A hospital assistant is in charge, who is paid Rs. 10 a month from the dispensary fund. The in-door ward has been abolished during the year. Out-patients numbered 2,460, with a daily average of 19 against 2,626 and 26 in 1881. Malarial fevers and goitre contributed more than a fourth of the total number treated. One hundred and seventy-five minor operations were recorded. No major operation. The total expenditure was Rs. 333, whereof Rs. 241 represent the cost of establishment. No payment was made for Europe medicines obtained during the year, the cost of which was Rs 36. The financial statements have been very carelessly prepared, and were returned for revision; they were resubmitted with an imperfect and unsatisfactory explanation by the hospital assistant. Government paid Rs. 60 to the hospital assistant as salary from October 1881 to March 1882 at Rs. 10 per mensem. As the dispensary was placed in class I in August 1881, it is not understood why any money was drawn from Government. The balance remaining in the Savings Bank on 1st January 1882 was erroneously exhibited in both the statements of cash and invested capital, which has been rectified.

*Maluchi.*—A first-class dispensary, supported by an estate. It is governed by a committee, which met 16 times during the year. Visited once by the sub-divisional officer and once by the Civil Surgeon. A third grade assistant surgeon is in charge, who receives his grade pay from the dispensary fund. Minor establishment costs Rs 40. There were treated 137 in and 3,149 out patients, with daily averages of 7 and 23. The numbers treated in 1881 were 133 and 4,968, with daily averages of 7 and 39 respectively. The assistant surgeon attributes the smaller number of out-patients to absence of the epidemic malarial fever in the last three months of the year, which characterised the two previous years. Malarial fevers constitute nearly a half of the total treated among out-patients, but of spleen diseases only two cases were returned. This anomaly needs explanation before the figures are accepted as correct. The daily average includes attendances of persons represented by friends, which must be excluded at once. There were seven deaths, or 5·1 per cent. Thirteen major—not of much importance—and 88 minor operations were returned. The dispensary is said to be a most useful one in the district next to Mitford Hospital, and the local members of the committee take a great interest in its working; but the usefulness of the dispensary is likely to be materially curtailed in consequence of the estates which support it having recently been placed under the Court of Wards. The funds of the dispensary have been reduced, and it is, therefore, evident that either a civil hospital assistant must take the place of the assistant surgeon, or the in-patient ward must be closed. The Civil Surgeon has written to the Court of Wards on the subject. The total expenditure was Rs. 2,197, of which Rs. 1,652 were spent on establishment. Europe medicines cost Rs. 117, inclusive of Rs. 46, being the value of medical stores obtained from the store department and not paid for during the year. Diet cost Rs. 288.

*Joydebpore.*—Transferred to class I in February 1882. A nominal committee exists, which never met during the year. The dispensary is really managed by Kumar Rajendra Narayan Roy Chowdhuri, of Bhawal, who supplies the whole of the funds Inspected twice by the District Magistrate and once by the Civil Surgeon. A second grade hospital assistant is in charge, who receives Rs. 60 per mensem from the dispensary funds. Minor establishment cost Rs. 17-12 per mensem. There were treated 15 in and 2,491 out patients against 22 and 2,664 in 1881, the daily averages being 0·6 and 16 against 0·4 and 15. Skin diseases and malarial fevers were the prevailing complaints. There were two deaths among in-patients, one from cholera and the other from dysentery. Four major—of no importance—and 122 minor operations were returned. The total expenditure was Rs. 1,141, whereof Rs. 1,018 were neutralized by the establishment. Europe medicines cost Rs. 55. Government paid Rs. 145 as salary prior to the transfer of the dispensary to class I. The

site of the dispensary has been taken up by the Dacca and Mymensingh Railway for a station, and the dispensary must be removed elsewhere.

*Bhagakul*.—Transferred to class I on 22nd February 1882. A nominal committee exists, which never met during the year. The affairs of the dispensary are, as a matter of fact, left entirely in the hands of the civil hospital assistant. Inspected once by the Civil Surgeon. The hospital assistant received Rs. 40 per mensem up to 21st February, and Rs. 30 since that date. The subordinate establishment consists of a compounder on Rs. 8 and a servant on Rs. 4 per mensem. There were treated 2,288 out-patients, with a daily average of 11·4, against 2,303 and 11·1 in 1881. No in-patients. Malarial fevers and diarrhœa were the prevailing diseases. Thirty-three cholera cases were treated. Twelve major—reduction of fractures and dislocations—and 200 minor operations were recorded. The total expenditure was Rs. 781, of which Rs. 524 were expended on establishment. Europe medicines cost Rs. 112, whereof medicines to the value of Rs. 77 were purchased from private dealers. The expenditure on Europe medicines is too high for the work done. No indents for purchase of drugs were submitted to the Civil Surgeon for sanction by the civil hospital assistant. The Civil Surgeon says that as the committee takes no interest in the work done by the medical subordinate, "he has it entirely his own way." Government contributed Rs. 70 as half salary of the hospital assistant previous to the transfer of the dispensary to class I. The income from local sources amounted to Rs. 210 only.

*Baliati*.—A second-class dispensary, under the management of a nominal committee, which did not meet during the year. The affairs of the dispensary are in reality managed exclusively by Baboo Jasoda Lal Roy Chowdhuri, of Baliati. Inspected once by the Civil Surgeon. Government contributes half the salary of the hospital assistant. A compounder on Rs. 8 and a dresser on Rs. 4 per mensem, are uselessly maintained here. The number of out-patients treated was 3,053, with a daily average of 19, against 3,153 and 24 in 1881. No in-patients. Five hundred and seventy-one cases of goitre were treated. One hundred and four minor operations were returned. No major operation. The total expenditure was Rs. 576, of which Rs. 521 represent the cost of establishment, and Rs. 55 were spent on all other items of expenditure. Government contributed Rs. 161 as half salary of the hospital assistant, who has been reduced to his grade pay from May 1882. The Government aid is not required, the guaranteed income of the dispansary, viz., Rs. 480, being sufficient for all its legitimate wants. The dispensary may be placed in class I.

*Joinsher*.—A second class dispensary, managed by a committee, which met four times during the year. Inspected once by the Civil Surgeon. Government pays Rs. 15 a month, or half the salary of the civil hospital assistant. There were treated 2,156 out-patients, with a daily average of 22, against 2,791 and 22 in 1881. In calculating the daily average attendance the persons represented by friends were included. This must be corrected at once. Goitre and otitis were the principal diseases treated. Twelve major—chiefly fractures and dislocations—and 556 minor operations were returned. The total expenditure was Rs. 615, whereof Rs. 396 were expended on establishment and Rs. 60 were paid as house-rent for the dispensary. The expenditure on bazaar medicines, viz., Rs. 73, is too high for the work done, and indicates misuse of the money. The dispensary at Baliati, with a daily attendance of 19, expended Rs. 12 only. Europe medicines cost Rs. 41. Government contributed Rs. 180, as half salary of the hospital assistant. The amount received from local subscriptions was Rs. 435. Subscriptions for this dispensary are said to be greatly in arrears, but the establishment, which was four months in arrears in December last, was paid up before the end of the year.

**Furreedpore district.**

The report is written by assistant surgeon Kamikha Nath Acharjee, who acted for a short time in the place of Dr. Basu, the Civil Surgeon. The general health of the district appears to have been much worse than usual; fevers and cholera were very prevalent, especially the latter. There were four dispensaries working at the beginning of the year, of which the dispensary at Lonesingh was closed on 31st March 1882. The Goalundo dispensary is under the supervision of a civil medical officer of its own, who has submitted a separate report. Of the two dispensaries under the Civil Surgeon of Furreedpore, one is in class I and the sudder dispensary was made over to the municipality under Government Resolution dated 20th February 1882. The dispensary at Goalundo is in class I. There were treated at Furreedpore and Madaripore 377 in and 8,558 out patients against 358 and 9,480 in 1881, the daily averages being 11 and 29 against 12 and 25 respectively. All the dispensaries in the district are in charge of civil hospital assistants. The assistant surgeon in charge states that "since the transfer of the dispensaries to the municipalities, financial difficulties have become enhanced, especially at Furreedpore, for the inhabitants of the town, with the exception of European residents, have stopped their subscriptions on the plea that they cannot subscribe twice towards the same charity, once in the shape of tax and again in subscription form." The people, however, readily expend Rs. 2,000, subscribed by them on a fair (*mela*), which is annually held at Furreedpore.

*Furreedpore*.—A municipal dispensary from 1st April 1882. Visited once by the Surgeon-General and several times by the District Magistrate. The Civil Surgeon inspected daily. There were treated 224 in and 5,944 out patients against 224 and 6,272 in 1881, the daily averages being 8 and 22 against 9 and 17 respectively. Malarial fevers and cholera were the prevailing diseases. There were 13 deaths among in-patients, or 5·8 per cent of the total treated, against 4 per cent in 1881. Five of the persons died of dropsy, most of whom were admitted in a moribund state. Nine major operations with one death and 120

minor operations were returned. The total expenditure was Rs. 1,112, of which Rs. 592 were expended on establishment. Bazar medicines cost Rs. 72 against Rs. 53 in 1881. The amount expended on Europe medicines was Rs. 115, whereof medicines to the value of Rs. 80 were purchased from private druggists. Dieting articles and miscellaneous items cost Rs. 239 and Rs. 93 respectively. The supply of bedding is deficient. The assistant surgeon in charge observes that "the patients have no new beddings since last two years. The torn dhurrees and blankets do not protect them from cold draughts, which blow freely through the *tati* walls, and what pillows there are, the patients of this hospital never saw. I requested the municipal members of Furreedpore to provide the in-patients with coarse but requisite beddings, but they could not supply on account of the shortness of their funds." Government contributed Rs. 139, of which Rs. 41 were for salary of the hospital assistant to 31st March 1882, and Rs. 98 for diet of police cases. The municipality contributed Rs. 708, or less by Rs. 72 than the amount paid in 1881. Private subscriptions amounted to Rs. 264 only against Rs. 434 in 1881.

*Madaripore.*—A sub-divisional dispensary, transferred to class I in 1881. It is under the management of the local municipality. Inspected once by the Magistrate and twice by the Civil Surgeon. The civil hospital assistant of the sub-division is in charge, who receives Rs. 10 per mensem from the dispensary funds. There were treated 153 in and 2,614 out patients against 134 and 3,208 in 1881, the daily averages being 3 and 6·5 against 2 and 8 respectively. The record of out-patients cannot be accepted. The daily attendance multiplied by the number of days of the year was less than the total number of cases treated. Either the number of cases or the daily average attendance has, therefore, been incorrectly returned. There were three deaths among in-patients, or a rate of 1·9 per cent, which shows that cases of trivial complaints were admitted as in-patients. Seventy-eight minor operations were returned. No major operation. The total expenditure was Rs. 464, of which Rs. 204 were expended on establishment and Rs. 119 on Europe medicines. The latter item is inclusive of Rs. 21 paid for medicines supplied from the store department in 1881. The municipality contributed Rs. 280 against Rs. 82 in the previous year. Private subscriptions fell from Rs. 284 in 1881 to Rs. 146 in the year under review.

*Goalundo.*—A first-class dispensary, under the management of a committee, which met twice during the year. The dispensary is in charge of the hospital assistant of the sub-division, who receives an allowance of Rs. 10 per mensem from the dispensary fund. His total emoluments amounted to Rs 75, inclusive of Rs. 30 paid from the labour transport fund. The civil medical officer, Goalundo, paid frequent visits to the dispensary according to the urgency and importance of the cases under treatment. There were treated 166 in and 1,580 out door patients against 113 and 1,345 in 1881, the daily averages being 7 and 14 against 4 and 7. The number of patients is said to fluctuate according to the condition of the river. Minor establishment cost Rs. 40 per mensem, which is too high for the work done, but the peculiar condition of the place and the requirements for the transport of emigrants, render it impossible for the committee to reduce the charge. Thirteen major and 92 minor operations were performed. Three cases of lithotomy were performed by the civil medical officer, all terminated successfully. It is said that the largest stone weighed over two ounces, and the patient was an old man over sixty years of age. There were altogether 65 deaths, or a rate of 39·1 per cent, against 30·9 in 1881. Cholera caused 36 deaths in 1882 against 12 in the previous year. The total expenditure was Rs. 1,142, whereof Rs. 600 represent the cost of establishment. Europe medicines cost Rs. 122, and bazar medicines Rs. 60, against Rs. 191 and Rs. 46 respectively in 1881. The total income from local sources amounted to Rs 1,069, and Rs. 11 were paid by Government for diet of police cases. The municipality contributed Rs. 185. The Eastern Bengal Railway Company and the emigration contractors largely subscribe to the dispensary. Rs 383 were invested during the year.

**Backergunge district.**

The general health of the district was worse than that of 1881, the recorded death rate being 18·8 against 28·1 per 1,000 in 1881. The increase was chiefly due to improved registration. There were four dispensaries in the district, of which the dispensary at Matbaria was closed on account of mismanagement. Two of the remaining dispensaries were transferred to municipalities on 1st April 1882 under Government Resolution dated 20th February 1882, and one is in class II. The number of patients fell considerably in 1882. There were treated 202 in and 8,511 out patients against 434 and 11,948 in 1881. There was a similar decrease in 1881 as compared with the preceding year. The Magistrate attributes this decrease to the increase of native practitioners and of various specifics now freely sold in the bazars. The recorded attendance may be accepted as a "faithful representation of the work done in dispensaries." One assistant surgeon and two civil hospital assistants are in charge. Very little interest is shown by the managing bodies, and the people do not much appreciate the charity.

*Burrisal.*—A municipal dispensary from 1st April 1882. It is under the management of a committee. Visited by His Honor the Lieutenant-Governor, the Surgeon-General, twice by the Divisional Commissioner, and several times by the Magistrate. The Civil Surgeon paid frequent visits. There were treated 167 in and 5,799 out patients against 296 and 8,848 in 1881, the daily averages being 6 and 28 against 9 and 42 respectively. Skin diseases and fevers were the prevailing complaints. There were 17 deaths, or 10·1 per cent against 9·1 per cent in 1881. Eighteen major and 120 minor operations were performed. The total expenditure was Rs. 3,486, of which Rs. 2,372 were expended on establishment. Europe medicines cost Rs. 318, inclusive of Rs. 138 paid for medicines obtained in 1881.

Miscellaneous charges amounted to Rs. 237, which are said to have been swelled by the travelling bills of the various assistant surgeons who held charge during the year. Government contributed Rs. 614, of which Rs. 600 represent the salary of assistant surgeon from 11th September 1881 to 31st March 1882. The municipality paid Rs. 949 against Rs. 136 in 1881. Native subscriptions fell from Rs. 1,559 in 1881 to Rs. 1,323 in the year under review.

*Perozepore.*—A municipal dispensary. Perozepore is a sub-division, and Government contributed Rs. 10 per mensem as extra allowance to the hospital assistant to 31st March 1882. The dispensary is under the management of a committee, which met twice during the year. Inspected by the Surgeon-General and the District Magistrate once each, and the sub-divisional officer inspected it from time to time. The Civil Surgeon paid two visits. A third-class hospital assistant is in charge, who is reported to have forgotten much of his knowledge of his profession, and the attendance of patients is falling thereby. There were treated 21 in and 1,727 out patients against 103 and 1,998 in 1881, the daily averages being 0·8 and 9 against 3 and 9 respectively. There were 3 deaths. 39 minor operations were recorded. No major operation. The total expenditure was Rs. 493, whereof Rs. 240 were expended on establishment and Rs 176 on buildings; Rs. 77 represent charges on all other items. Government contributed Rs. 34, of which Rs. 30 were paid as allowance to the hospital assistant of the sub-division for the charge of the dispensary from January to March 1882. The income from local sources was Rs. 323, including Rs. 90 contributed by the municipality.

*Bhola.*—A second-class dispensary, governed by a committee, which met five times during the year. Visited once by the District Magistrate and frequently by the sub-divisional officer. The Civil Surgeon inspected twice. Government pays an extra allowance of Rs 10 per mensem to the hospital assistant of the sub division for the charge of the dispensary. Fourteen in and 985 out patients were treated against 35 and 1,102 in 1881, the daily averages being 0·3 and 7 against 0 7 and 9 respectively. Three deaths occurred; 79 minor operations were recorded. No major operation. The total expenditure was Rs. 335, of which Rs. 262 were expended on establishment and Rs. 32 on Europe medicines. The latter amount includes Rs. 25 paid for medicines obtained in 1881. The total income from local sources was Rs. 319, which is enough for the necessary wants of the dispensary for its maintenance in class I There is no work for a compounder, and the peon on Rs 6 a month is certainly not needed. There is no municipality at Bhola.

**Mymensingh district.**

Dr. Moorhead has submitted an excellent report. It is complete, and abounds with interesting criticism. The public health of the district was worse than in the previous year. Cholera was unusually prevalent, and malarial fevers were more numerous than in the preceding year. The Civil Surgeon gives a useful account of the health of the prisoners in the jail. There were 15 dispensaries working at the end of the year. There were no changes during the year. In four of the dispensaries in-door and out-door patients are treated. Two dispensaries are in charge of assistant surgeons, and the rest are under civil hospital assistants. During the year five dispensaries were affected under Government Resolution dated 20th February 1882, and three were placed in class I of the rules. At the end of the year there remained only two dispensaries in class II of the rules, aided by Government. There were treated 355 in and 28,993 out patients against 362 and 24,717 in 1881, the daily averages being 14 and 215 against 17 and 219 respectively. The figures are, the Civil Surgeon believes, fairly trustworthy. The Magistrate observes that "so far as I have been able to ascertain, the small attendance of out-door patients at most dispensaries is due to people preferring *hakims* and *kobirajes* to the hospital assistants At Tangail with a capable assistant surgeon and three times the cost, there is not a larger attendance than at Jhawail, where there is only a civil hospital assistant" Twelve dispensaries were under local committees, 2 under private managers, and the sudder dispensary was in charge of the municipality. Dr. Moorhead says that the "committees, as a rule, take but a very superficial interest in the success of the dispensaries, and the check exercised by them is little more than nominal." To increase the interest of the committees, the Magistrate suggested the appointment of members monthly as visitors. The Civil Surgeon could only pay the required number of visits to three dispensaries; three were not inspected at all. The same causes which prevented the Civil Surgeon from paying regular visits to dispensaries in 1881 operated to a greater extent during the year under review. The Magistrate found it necessary to make some provision for the accommodation of police cases at sub-divisional dispensaries, but the Commissioner appears to think that the primary object of these dispensaries is to give charitable relief to poor patients, and not to provide for police cases.

*Mymensingh*—A municipal dispensary from 1st April 1882. Visited once by the Surgeon-General and frequently by the Civil Surgeon. An assistant surgeon is in charge, who receives Rs. 120 per mensem. There were treated 187 in and 4,116 out patients against 175 and 3,857 in 1881, the daily averages being 6 and 37 against 8 and 35 respectively. The death-rate among in-patients was 21·3 per cent. as compared with 16·5 per cent. in 1881. A large number of moribund patients, chiefly up-country coolies, were admitted during the year. Seven major and 220 minor operations were performed, with two deaths. The total expenditure was Rs 2,380, of which Rs. 1,823 were expended on establishment and Rs. 147 on buildings. Government contributed Rs. 255, whereof Rs. 240 were paid as the moiety of the salary of the assistant surgeon for four months. The municipality contributed Rs. 475

against Rs. 60 in 1881. The total income from other local sources amounted to Rs. 1,533. At the end of the year there remained an invested capital of Rs. 15,265.

*Sherepore.*—The dispensary is situated within the local municipality. It is under the management of a committee, which met 13 times. Visited by the Magistrate and Civil Surgeon once each, and four times by the sub-divisional officer. There were treated 972 out patients against 678 in 1881, the daily averages being 7 and 8 respectively. The number treated appears to the Civil Surgeon exceedingly small for a place like Sherepore, which is of considerable size, and is in the most wretched sanitary condition. The prevailing diseases were goitre and malarial fevers. Cases of goitre formed almost half of the total treated. Fifty-seven minor operations were recorded. No major operation. The total expenditure was Rs. 553, of which Rs. 353 were expended on establishment and Rs. 122 on buildings. Europe medicines cost Rs. 40. Government contributed Rs. 152 as salary of the hospital assistant, which included arrears from previous year. The municipality paid Rs 70 only against Rs. 120 in 1881. A new dispensary building is being constructed at a cost of Rs. 225.

*Ramgopalpore.*—Transferred to class I in February 1882. There is no municipality. A nominal committee exists, which never met. Inspected thrice by the Civil Surgeon and once by the Assistant Magistrate. Out-patients numbered 2,617 against 2,052, with a daily average of 16 and 15 repectively. A compounder is employed on Rs. 10 a month Malarial fevers and goitre were the prevailing diseases No in-patients. Six major and 160 minor operations were recorded. Government contributed Rs. 20 as moiety of the salary of the hospital assistant to 17th February. The total expenditure was Rs. 1,263, whereof Rs 502 were expended on establishment and Rs. 500 on buildings. Europe medicines cost Rs 180.

*Tangail.*—A first-class dispensary, governed by a committee, which met four times. An assistant surgeon is in charge, who receives Rs. 120 per mensem. Visited once by the Civil Surgeon, and occasionally by the sub-divisional officer. There were treated 150 in and 2,741 out patients against 159 and 2,337 in 1881, the daily averages being 6 and 19 against 7 and 19 respectively. There were six deaths, of which two were from cholera The prevailing diseases were goitre and malarious fevers Eight major and 131 minor operations were returned. The total expenditure was Rs. 2,478, whereof Rs. 1,941 were expended on establishment and Rs. 165 on Europe medicines. Dieting articles cost Rs. 210. Government paid Rs. 38 for diet of police cases.

*Paguldighee.*—A second-class dispensary, managed by a committee, which met five times. Visited once by the sub-divisional officer and once by the Civil Surgeon. It is an out-door institution, and the number of patients treated was 1,197, with a daily average of 10, against 1,474 and 7 in 1881. One major (reduction of dislocation) and 74 minor operations were reported. The total expenditure was Rs. 592, of which Rs. 457 represent the cost of establishment. The superfluous compounder was dismissed during the year. Europe medicines cost Rs. 85. Government contributed Rs. 162 as salary of the hospital assistant; and the income from local subscriptions amounted to Rs. 420. The dispensary is about to be transferred to Gopalgunge.

*Jamurki.*—A first-class dispensary, managed by Mr. Weatherall, agent of Nawab Ashanoollah of Dacca Visited once by the Civil Surgeon. A private native doctor is in charge from February 1882. The in-door ward was abolished during the year. Out-patients numbered 2,402 against 2,090 in 1881, with a daily average of 14 against 13. Cholera was epidemic at Jamurki, and 52 cases were treated in the dispensary Four major and 198 minor operations were recorded. The total expenditure was Rs. 1,082, whereof Rs. 873 were expended on establishment and Rs. 172 on Europe medicines.

*Jhanail.*—A first-class dispensary, under a private manager, the representative of the supporter, Maharani Sarat Sundari Debya, of Rajshahye. Inspected once by the Civil Surgeon. There were treated 1,843 out patients against 1,226 in 1881, the daily average being 18 against 14. No in-patients. Two hundred and thirty-one cases of goitre were treated. Twenty-eight minor operations were returned. No major operation. A compounder and a shop cooly are employed at the dispensary. The total expenditure was Rs. 771, of which Rs. 552 were expended on establishment, and Rs. 181 on Europe medicines.

*Kerotia.*—A first-class dispensary, supported by Mahamed Ali Khan. It is under the management of a committee, which met nine times during the year. Visited once by the Civil Surgeon and once by the sub-divisional officer. A civil hospital assistant is in charge, who receives Rs 50 a month. A compounder and a dresser are also employed. The number of out-patients treated was 3,953, with a daily average of 15, against 3,025 and 25 respectively in 1881. The figures, the Civil Surgeon thinks, are not trustworthy. The total treated is out of proportion to the daily average. Fourteen major—of no importance—and 132 minor operations were returned Malarious fevers and "worms" were the prevailing diseases. The total expenditure was Rs. 1,280, whereof Rs. 888 represent the cost of establishment. Europe medicines obtained from private druggists cost Rs. 236. The cost is too high for the work done. The indent was not checked by the Civil Surgeon.

*Hybutnugger.*—A dispensary situated within the limits of a municipality. It is under the management of a committee, which met ten times during the year. Visited once by the Civil Surgeon. Out-door patients numbered 1,598 against 958, with a daily average of 17 against 13. No in-patients. The prevailing diseases were skin affections and fever. Four major (reductions of dislocations) and 116 minor operations were recorded. The total expenditure was Rs. 750, whereof Rs. 561 were expended on establishment and Rs. 130 on Europe

medicines. Government paid Rs. 113, and the municipality Rs. 100. Nothing was contributed by the municipality in 1881. Local subscription amounted to Rs. 509.

*Netrokona.*—Transferred to class I in February 1882. The dispensary is supported by Sreemutty Bissessuree Debya Chowdhurani of Gouripóre, and managed by a committee, which met 11 times during the year. Visited once by the Civil Surgeon, and occasionally by the sub-divisional officer. There were treated 6 in and 2,006 out patients against 3 and 1,705 in 1881, the daily averages being 0·3 and 12 against 0·1 and 14 respectively. The in-patients represent police cases. A compounder on Rs. 10, and a shop cooly on Rs. 5, are employed. Four major and 130 minor operations were performed. The total expenditure was Rs. 670, whereof Rs. 509 represent the cost of establishment. Europe medicines cost Rs. 86. Government contributed Rs. 36 as salaries prior to the transfer of the dispensary to class I.

*Jamalpore.*—A dispensary situated within the local municipality. It is under the management of a committee, which met three times during the year. It was visited once by the Surgeon-General, twice by the Civil Surgeon, and occasionally by the sub-divisional officer. There were treated 12 in and 774 out patients against 778 out-patients in 1881. There were no in-patients in 1881. The daily averages were 0·3 in and 4 out-patients against four out-patients in 1881. The dispensary is of no use to the people. Jamalpore is a sub-division. One major (reduction of dislocation of jaw) and 12 minor operations were recorded. The total expenditure was Rs. 514, whereof Rs. 118 were expended on establishment and Rs. 59 on Europe medicines. Government contributed Rs. 52 as salaries. The municipality paid Rs. 215 against Rs. 130 in 1881. The income from local subscriptions amounted to Rs. 184.

*Muktagachha.*—Transferred to class I in February 1882. The dispensary is supported by an endowment from Raja Surja Kanta Acharjee, and is under the management of a committee, which met twice. Inspected three times by the Civil Surgeon. One thousand six hundred and twenty-two out-patients were treated, with a daily average of 11, against 1,961 and 17 in 1881. Five major—all reductions of dislocations, some "probably imaginary"—and 121 minor operations were returned. The total expenditure was Rs 561, of which Rs. 394 were expended on etablishment and Rs 121 on Europe medicines. Government paid Rs. 21 as salaries, previous to the transfer of the dispensary to class I. The interest received on investments was Rs. 551.

*Bazitpore.*—A dispensary within the local municipality. It is under the management of a committee, which met three times during the year. The Civil Surgeon paid no visits. The place is difficult of access, being 80 miles from the station, and only approachable by boat in the rains. There were treated 1,347 out-patients against 1,019 in 1881, with a daily average of 7 against 6. The medical subordinate explains the low daily average by the fact that patients generally come from a distance, and that he was obliged to give them 4 or 6 days' medicines at a time. No in-patients. Sixty-three minor operations were recorded. No major operation. The total expenditure was Rs. 569, of which Rs. 383 were expended on establishment and Rs. 99 on Europe medicines. Government paid Rs 15 as half pay of the hospital assistant to 31st March 1882. The municipality paid Rs. 135 against Rs. 130 in 1881. The income from local subscriptions amounted to Rs. 285 in 1882 against Rs. 310 in the previous year.

*Ambaria.*—A second-class dispensary. A nominal committee exists; no meetings were held. The dispensary was not inspected by the Civil Surgeon or by any civil officers. One thousand two hundred and fifty-eight out-patients were treated, against 1,248 in 1881, with a daily average of 12 against 16. Minor operations numbered 24. No major operation. The total expenditure was Rs. 865, whereof Rs. 639 were expended on establishment and Rs. 173 on Europe medicines. The expenditure in all items is too high for the work done. The local income of the dispensary was Rs. 845, which is more than sufficient for all the requirements of the dispensary. Government contributed Rs. 100 as salaries.

*Kukurmari.*—A first-class dispensary, supported by Raja Promotho Nath Roy Bahadoor of Dighapati in Rajshahye. It is under the management of a committee, by whom four meetings were held during the year. No visits were paid by civil officers or by the Civil Surgeon. It is situated in an exceedingly out-of-the-way place on the Doakaha, and is only accessible by elephant or boat. The dispensary is useless to the people. There were treated 217 out-patients only against 306 in 1881, the daily average being 6 against 7, or each patient attended 9 times during the year. The figures are not trustworthy. Sixteen minor operations were returned. The total expenditure was Rs. 709, whereof Rs. 635 represent the cost of establishment. A private native doctor is in charge, who is paid Rs. 40 per mensem.

## CHITTAGONG DIVISION.

Chittagong district.

The public health of the district in 1882, as compared with the previous year, was bad. Cholera was unusually prevalent. There is only one dispensary in the district at the sudder station, which was taken over by the municipality under Government Resolution dated 20th February 1882. A third grade assistant surgeon is in charge, who receives Rs. 120 per mensem. There were treated 320 in and 6,447 out patients against 322 and 6,380 in 1881, the daily averages being 14 and 35 against 13 and 34 respectively. There were 25 deaths, or 7·8 per cent. against 40 or 12·4 per cent in 1881. Thirty-three major and 350 minor operations were performed. There were three cases of lithotomy and 11 cases of amputations. The results of the operations were good.

The total income of the dispensary, inclusive of Rs. 826 withdrawn from Savings Bank, was Rs. 5,458. Private subscriptions amounted to Rs. 893, and Rs. 857 were received from local funds. The municipality contributed Rs. 2,615 against Rs. 731 in 1881. The total expenditure was Rs. 5,402, whereof Rs. 2,462 were expended on establishment, Rs. 201 on Europe medicines, Rs. 880 on diet, Rs. 967 on miscellaneous charges, and Rs. 774 on buildings. The total expenditure in 1881 was Rs. 4,315. Government contributed Rs. 208, of which Rs. 120 represent the half salary of the assistant surgeon for January and February 1882. The money remaining to the credit of the dispensary in the Savings Bank was transferred to the municipal account. The European wards are very useful, specially for severe cases occurring amongst the shipping in the port. During the year 37 persons were treated with one death, and Rs. 724 were realized as fees and charges. The people do not, however, much appreciate the charity.

**Noakhally district.**

The report contains useful marginal annotations by the Officiating Magistrate, Mr. H. G Cooke. The general health of the district in 1882 was comparatively better than the preceding year. There were three dispensaries working at the end of the year, of which the dispensary at the Fenny sub-division was opened on 3rd August 1882 under Government order No 790, dated 6th July 1881. The sudder dispensary treats both in and out patients; the rest are out-door institutions. Of the three dispensaries, one was in class I and two were in class II of the rules. There were treated 149 in and 4,165 out patients against 107 and 4,082 in 1881, the daily averages being 5 and 37 against 5 and 27 respectively. The assistant surgeon in charge thinks that full reliance may be placed on the figures recorded. All the dispensaries were in charge of hospital assistants. The assistant surgeon in charge says that the Noakhally and Fenny dispensary committees took lively interest in the welfare of the respective institutions. The Magistrate disagrees with him on this point in the case of the Noakhally dispensary. The committee of the Dulal Bazar dispensary is said to be indifferent. They "allowed the dispensary to remain unsupplied with medicines for months together, and that they held their monthly meetings and remained satisfied in passing the accounts only." The people are rather backward in appreciating the benefits of the institutions.

*Noakhally*.—A first-class dispensary, governed by the local municipality. Visited once by the Commissioner, 30 times by the Magistrate, and often by the municipal commissioners. The assistant surgeon in civil medical charge of the district inspected daily, and oftener when required. A first grade hospital assistant is in charge, who is paid Rs. 55 per mensem. There were treated 119 in and 2,833 out-patients against 107 and 2,765 in 1881, the daily averages being 5 and 16 against 5 and 18 respectively. Five deaths occurred. Skin affections and fevers were the prevailing diseases. Twenty-five major—some of them important ones—and 183 minor operations were performed The number of major operations performed in 1881 was 11. The total expenditure was Rs. 2,426, whereof Rs. 1,038 were expended on establishment and Rs. 553 on buildings. Europe medicines were purchased from private druggists and cost Rs. 387 against Rs. 53 in 1881. The increased outlay is said to be chiefly due to purchase of new instruments and thorough repair of others, as well as to increased expenditure of chloroform. Quinine was also more largely used than in the previous year. Government contributed Rs. 74, of which Rs 69 were for diet of police cases. The municipality paid Rs. 912. The income from other local sources amounted to Rs. 1,283.

*Dulal Bazar*.—A second-class dispensary. A committee exists, which met 12 times. The institution is, however, practically managed by the local zemindar, who pays the whole of the guaranteed contribution for the dispensary. The Magistrate says that an application was made by Baboo Chandra Kumar Roy, the zemindar, for the transfer of the dispensary to class I; but the Commissioner declined to submit the proposal to Government until the question of classification of dispensaries is settled. Inspected once by the Magistrate and twice by the assistant surgeon. A third grade hospital assistant is in charge, who receives Rs. 30 per mensem, half of which is paid by Government. The number of out patients treated fell from 1,317 to 612 in the year under review, the daily averages being 8 and 4 respectively. The reduced attendance is attributed by the assistant surgeon to the ill-health of the hospital assistant, and to the want of interest shown by the committee and the donor in not supplying the institution with the necessary medicines. Fifty-six minor operations were returned. No major operation. The total expenditure was Rs. 446, of which Rs. 396 represent the cost of establishment, Rs 36 were paid for Europe medicines purchased in 1881. Government paid Rs. 182, of which Rs. 180 represent the half pay of the hospital assistant. The dispensary is useless to the people and should either be closed or transferred to class I.

*Fenny*.—The dispensary was opened on the 3rd August 1882. It is a second-class dispensary, under the management of a committee, which met six times. Visited once by the District Magistrate and twice each by the assistant surgeon and the sub-divisional officer. The civil hospital assistant of the sub-division is in charge, who receives Rs. 10 from Government for the dispensary duties. There is no municipality. There were treated 720 out-patients during the year, with a daily average of 17. One major and 4 minor operations were recorded. The total expenditure was Rs. 96, of which Rs. 81 were paid for establishment. No payment was made for Europe medicines purchased during the year. The cost was Rs. 129.

**Tipperah district.**

The public health of the district was worse than that in 1881, as evidenced by the mortuary statistics. The Magistrate thinks that the larger number of deaths recorded was due to improved registration. There were four dispensaries working at the end of the year,

all in class I. Two of these receive in-patients. There were treated 102 in and 5,944 out-patients against 94 and 4,581 out patients in 1881, the daily averages being 3 and 53 against 3 and 57 respectively. The figures, the assistant surgeon in medical charge says, may be regarded as "comparatively correct." All the dispensaries are in charge of hospital assistants. The assistant surgeon says that "sufficient zeal and interest are shown by the managing bodies, as indicated by the increased attendance." Two of the dispensaries are under municipalities, and two are under private management.

*Commillah.*—A first-class dispensary, under the management of the local municipality. Visited once by the magistrate and daily by the assistant surgeon in medical charge of the district. A civil hospital assistant is in charge, who receives his grade pay, Rs. 20, from the dispensary fund, and Rs 10 from Government for attending non-gazetted officers. There were treated 93 in and 2,193 out patients against 75 and 1,535 in 1881, the daily averages being 2 and 17 against 3 and 13 respectively. The death rate was 12 9 per cent of the total treated. Five major and 210 minor operations were performed. The total income of the dispensary, exclusive of the balance on 1st January 1882, was Rs. 5,096, whereof Rs. 4,000 were paid by the Maharajah of Hill Tipperah for a new dispensary building The municipality contributed Rs. 48 against Rs. 192 in 1881. The total expenditure was Rs 1,988, of which Rs. 1,213 were expended on buildings and Rs. 447 on establishment. Europe medicines cost Rs 112. At the end of the year there remained a cash balance of Rs. 4,533, and Rs. 5,000 invested in Government securities.

*Brahmanberiah*—A first-class dispensary governed by the municipality. Visited once by the assistant surgeon. The civil hospital assistant of the sub-division is in charge, who receives Rs. 10 a month as extra allowance from the dispensary fund. Nine in and 1,112 out-patients were treated against 19 and 879 in 1881, the daily averages being 0·2 and 15 against 0·3 and 16 respectively. Four deaths occurred among in-patients Minor operations numbered 42. No major operation. The total expenditure was Rs. 469, of which Rs. 284 were expended on establishment and Rs 100 on Europe medicines. The municipality paid Rs. 227 against Rs 213 in 1881. Local subscriptions amounted to Rs. 146 in 1882 against Rs. 275 in the previous year.

*Ramchunderpore.*—A first-class dispensary, under the management of Nawab Ashanwoollah Khan, of Dacca. Inspected once by the assistant surgeon. A third grade hospital assistant is in charge, who is paid Rs 35 a month. There were treated 1,006 out-patients, with a daily average of 10, against 769 and 7 respectively in 1881. One major and 53 minor operations were returned. The total expenditure was Rs. 657, whereof Rs. 592 represent the cost of establishment. Europe medicines cost Rs. 45.

*Jafferguage.*—A first-class dispensary, entirely supported by Rajah Harendrakrishna Bahadoor of Calcutta. It is under the management of the Rajah's naib Inspected once by the Magistrate, and twice by assistant surgeon. The civil hospital assistant in charge is paid Rs. 30 per mensem. One thousand six hundred and thirty-three out-patients were treated against 969 in 1881, the daily averages being 10 and 6 respectively. Eighty-two minor operations were recorded. The total expenditure was Rs. 425, whereof Rs. 395 represent the cost of establishment. Europe medicines were obtained from private druggists, but no payments were made during the year. At the end of the year there remained a cash balance of Rs. 600.

## Patna Division.

The working of the charitable dispensaries in all the districts of the division, has been reviewed by the Commissioner with useful criticisms of a general character. There was no change in the number of dispensaries in this division. Under the Government Resolution dated 20th February 1882, most of the dispensaries were brought under the control and management of municipal committees, and this change, Mr Halliday says, is considered to have been a salutary one, as the municipal meetings are generally held regularly, and ample opportunities are offered for the discussion of questions relating to the welfare of these institutions All the medical officers have been well reported on, with the exception of the assistant surgeon of Sitamarhee and the hospital assistants of Burharwa and Rosera dispensaries.

**Patna district.** The report is submitted by Dr French, who took charge of the district on the 2nd December 1882, and was therefore unable to give any information from his personal observation. The report is, however, complete. The general health of the district, according to the Superintendent of Vaccination, was comparatively better in 1882 than the year preceding. It appears to the Civil Surgeon from the mortuary returns received in his office, that the year 1882 was a very unhealthy year as compared with the figures of the preceding years. The dispensary attendance does not justify this conclusion. The Magistrate considers that the general increase was partly due to improved registration. More than one-third of the report is taken up by the Civil Surgeon in reviewing the public health of the district. There were five dispensaries working at the end of the year, all of which were brought under the control of the respective municipalities under Government Resolution dated 20th February 1882. All the dispensaries give both in-door and out-door relief, and with one exception, all were in charge of assistant surgeons. There were treated 2,248 in and 50,348 out patients, against 1,958 and 50,420 in 1881, the daily averages being 117 and 468 against 112 and 508 respectively. The figures are believed to be correct. All the dispensaries are appreciated by the people.

*Bankipore dispensary or Temple Medical School.*—A municipal dispensary from 1st April 1882. It was visited frequently by the Civil Surgeon ; no visits were paid by civil officers. A third grade assistant surgeon is in charge, who received his entire pay from the dispensary fund from 1st April. Minor establishment cost Rs. 106 per mensem. Government grant to this hospital, as provided in the budget estimate of 1882-83, was Rs 4,651. No payment was made from 1st April 1882, under recent orders. There were treated 1,052 in and 16,389 out patients, against 954 and 16,917 in 1881, the daily averages being 69 and 113 against 60 and 125 respectively. The number of deaths among in-patients was 105, or 9·8 per cent, against 97 or 10·1 per cent in 1881. Of the total deaths 22 occurred from fevers, 19 from dysentery, 15 from cholera, and 49 from other diseases. Ninety-four major operations were performed, with 10 deaths. Nearly all the operations were performed by the teacher of surgery. Minor operations numbered 987. The total expenditure was Rs. 6,701, whereof Rs. 3,753 were expended on establishment and Rs. 479 on Europe medicines. Dieting articles cost Rs. 1,675, and miscellaneous charges amounted to Rs. 601. Government contribution to 31st March 1882 amounted to Rs. 1,693. The municipality paid Rs. 4,802, against Rs. 1,800 in 1881. The income from other local sources was Rs. 1,312.

*Patna City Dispensary*.—A municipal dispensary from 1st April 1882. Visited several times by the Civil Surgeon. A third grade assistant surgeon is in charge, who receives Rs. 120 a month. Minor establishment cost Rs. 66 per mensem. There were treated 400 in and 15,106 out patients, against 302 and 16,664 in 1881, the daily averages being 16 and 167 against 20 and 185 respectively. There were 103 deaths, or 25·7 per cent, against 82, or 27 per cent in 1881. Admissions of moribund and hopeless cases were numerous. The Civil Surgeon remarks that "there is no alms or reception house in the city, and all the old, worn-out, and debilitated sick seek the wards of the Patna city dispensary and die there." Forty-one major operations were performed, against 47 and 73 in 1881 and 1880 respectively. This is unsatisfactory, as it was in the previous year, and was due, Dr. French says, to changes in assistant surgeons. Minor operations numbered 1,642. The total expenditure was Rs. 2,849, of which Rs. 1,859 were expended on establishment and Rs. 335 on diet. Europe medicines cost Rs. 300, inclusive of Rs. 192 paid for medicines purchased in 1881. The municipality paid Rs. 1,845. No payment was made in 1881. Government contributed Rs. 111, of which Rs. 100 represent the moiety of salary of the assistant surgeon for January and for 25 days of March 1882. No salary was drawn from 1st February to 6th March 1882. Local subscriptions amounted to Rs. 760, and the interest on investments was Rs. 829.

*Barh.*—A municipal dispensary from 1st April 1882. Inspected once by the Civil Surgeon. A third grade assistant surgeon is in charge, who receives Rs. 120 per mensem. Minor establishment cost Rs. 29 a month. There were treated 291 in and 7,360 out patients, against 173 and 5,047, the daily averages being 8 and 70 against 7 and 60 respectively. The death-rate was 5·5 per cent. against 11·5 per cent in 1881 There were only eight major operations during the year against 17 in the previous year. Minor operations numbered 538. There were two deaths, both occurred after amputations of thigh and arm. The total expenditure was Rs. 2,055, of which Rs. 1,170 were expended on establishment and Rs. 186 on buildings. Europe medicines cost Rs. 116. Government contributed Rs. 187, of which Rs. 180 were paid as the moiety of salary of the assistant surgeon for three months. The amount paid by the municipality was Rs. 985 as recorded in the statement, against Rs. 480 in 1881. No money was shown in the columns of local subscriptions or of other sources of income. It is remarked that the Barh Dispensary Fund is amalgamated with the local municipal fund, and no separate account has therefore been kept since March 1882. It appears to me that the money realized by local subscriptions on account of the dispensary must have been entered in the municipal accounts as such, and there could have been no difficulty in showing them in the annual accounts under the prescribed heads. The local subscriptions in 1881 amounted to Rs. 942.

*Behar.*—A municipal dispensary from 1st April 1882. Visited by the Commissioner, the District Judge, and the District Superintendent of Police. The Civil Surgeon inspected once. A second grade assistant surgeon is in permanent charge of the dispensary, who received his full grade pay from the dispensary fund from 1st April 1882. Subordinate establishment cost Rs. 42. There were treated 170 in and 5,491 out patients, against 19› and 5,330 in 1881, the daily averages being 1‚l and 45 against 13 and 9 respectively. The total number of deaths was 19, or 11·1 per cent, against 13, or 6·1 per cent, in 1881. In 1880 the percentage was 16·8. Twenty-nine major operations were performed, of which only 7 were of an important nature. One death occurred after operation. The Civil Surgeon found fault particularly with the method of reporting the results of operations, which requires improvement. Minor operations numbered 244 against 272 in 1881. The total expenditure was Rs. 3,173, of which Rs 2,502 were expended on establishment and Rs. 245 on Europe medicines. Government paid altogether Rs. 449. The municipality contributed Rs. 1,957 against Rs. 733 in 1881. Local subscriptions amounted to Rs. 866 against Rs. 945 in 1881. At the close of the year there remained a cash balance of Rs. 506.

*Dinapore.*—A municipal dispensary from 1st April 1882. Inspected twice by the Civil Surgeon and frequently by the Staff Surgeon. There is no record of visits by civil officers. A first-class hospital assistant is in charge, who is now paid Rs. 80 per mensem from the Nizamut and dispensary funds under the municipality. Subordinate establishment cost Rs 30 a month. There were treated 335 in and 6,002 out patients against 334 and 6,462

in 1881, the daily averages being 11 and 72 against 10 and 77 respectively. The decrease in out-patients is ascribed to the general healthiness of the year. There were 40 deaths, or 11·9 per cent, against 37, or 11·7 per cent, in 1881. Twenty-seven major and 374 minor operations were performed. The total expenditure was Rs. 1,313, of which Rs. 749 were expended on establishment and Rs. 133 on Europe medicines. The total income from local sources amounted to Rs. 1,135 No payment was made from municipal funds. Government contributed Rs. 93, of which Rs. 90 represent the moiety of salary of the hospital assistant for three months.

**Gya district.** The public health of the district was about the average during the year. Cholera was unusually prevalent, and caused 4,996 deaths against 2,281 in 1881. There were five dispensaries working at the end of the year, of which four were affected by Government Resolution dated 20th February 1882. All the dispensaries received in-door and out-door patients. There were treated 587 in and 12,743 out patients against 554 and 12,404 in 1881, the daily averages being 22 and 172 against 19 and 166 respectively. The practice of including represented attendance is said to have been discontinued during the year. There was some increase in cases treated. Two dispensaries were in charge of assistant surgeons and three were under civil hospital assistants. Three dispensaries were under the management of local committees, who are said to take very little interest in them. The mass of the people, the Civil Surgeon says, are still averse to the European mode of treatment, and it is only comparatively small number, living near the sub-divisional dispensaries or at the sudder station, who resort to dispensaries for treatment.

*Gya Pilgrim Hospital.*—A municipal dispensary from 1st April 1882. Visited by His Honor the Lieutenant-Governor of Bengal, the Commissioner, the Judge, and the District Magistrate. The Civil Surgeon paid daily visits. There were treated 371 in and 5,054 out patients against 386 and 5,221 in 1881, the daily averages being 12 and 65 against 12 and 66 respectively. The death rate was 31·2 per cent, against 31·8 per cent in 1881. The high death-rate is ascribed to the large number of moribund and cholera cases treated. Of the 37 cholera cases 22 proved fatal. Forty-six major operations were performed, with one death. There were 12 cases of lithotomy, all successful. The total expenditure was Rs. 3,397, whereof Rs. 2,426 were expended on establishment and Rs. 351 on Europe medicines. The amount spent on buildings was Rs. 210. Government contribution to 31st March 1882 amounted to Rs 700, viz, Rs 300 as salary of the assistant surgeon, Rs 200 as Europe medicines, and Rs 200 as special allowance to the Civil Surgeon. The municipality paid Rs. 1,150 against Rs. 600 in 1881. The income from other local sources amounted to Rs. 8,019. At the end of the year there remained a cash balance of Rs. 8,363, besides Rs. 9,500 in Government securities.

*Tikaree.*—A first-class dispensary, entirely supported by the Moharanee of Tikaree. There is no committee; the dispensary is managed by the Moharanee's agent Visited thrice by the Civil Surgeon, once by the District Magistrate, and once by the Joint-Magistrate. An assistant surgeon is in charge, who is paid Rs. 100 per mensem. Minor establishment cost Rs. 23-8 a month. There were treated 64 in and 3,620 out patients against 12 and 3,122 in 1881, the daily averages being 4 and 51 against 3 and 42 respectively. The death-rate was 7 8 per cent, and this low rate is ascribed to simple nature of cases treated and to the healthiness of the year. But it would appear that each patient remained in the hospital more than 24 days. Again, each out-patient attended nearly six times. Seven major and 118 minor operations were recorded. The total expenditure was Rs. 1,940, of which Rs. 1,434 were expended on establishment and Rs. 280 on Europe medicines.

*Nowada.*—A dispensary situated within the Nowada union. It is under the management of a local committee, which met only once during the year. Visited thrice by the Civil Surgeon The hospital assistant of the sub-division is in charge, who is paid an extra allowance of Rs. 10 a month for dispensary duties There were treated 72 in and 1,004 out patients against 86 and 941 in 1881, the daily averages being 2 and 12 against 2 and 11 respectively. The death-rate among in-patients was 11·1 per cent Forty-six minor operations were returned. No major operation. The total expenditure was Rs. 662, of which Rs. 310 were expended on establishment and Rs 162 on buildings. Europe medicines cost Rs. 69 Government paid Rs. 38, of which Rs. 30 represent the special allowance to the hospital assistant for three months. The union contributed Rs 90 The income from other local sources amounted to Rs. 699. At the end of the year there remained a cash balance of Rs. 453 and Rs. 1,172 as invested capital.

*Aurungabad.*—A dipensary situated within the Aurungabad union. It is under the management of a committee, which met only once during the year. Inspected four times by the Civil Surgeon. The hospital assistant of the sub-division is in charge, who receives Rs. 10 per mensem as extra allowance for the dispensary duties. There were treated 39 in and 1,307 out patients against 1 and 1,575 in 1881, the daily avarages being 1·9 and 20 against 0·02 and 23 respectively. The death-rate was 20 2 per cent. The in-door ward was opened from April 1882. Minor operations numbered 48. No major operation. The total expenditure was Rs. 432, of which Rs. 246 were expended on establishment and Rs 36 on buildings. Europe medicines cost Rs. 61. Government paid Rs. 46, of which Rs. 40 were for the extra allowance of the hospital assistant for four months. The municipality contributed Rs. 70. Local subscriptions fell from Rs. 315 to Rs. 142 in the year under report.

*Jehanabad.*—A sub-divisional dispensary, situated within the Jehanabad union. It is managed by a committee, which met three times. Visited once by the Commissioner, three times each by the District Magistrate and the Civil Surgeon. Forty-one in and 1,758 out patients were treated against 39 and 1,545 in 1881, the daily averages being 1 and 22 against 1 and 23 respectively. The death-rate was 12 per cent. Minor operations numbered 51. No major operation. The total expenditure was Rs. 700, of which Rs. 345 were spent on establishment and Rs. 100 on buildings. Europe medicines cost Rs. 155. No payment was made from municipal funds. The income from local subscriptions amounted to Rs. 792. Government paid Rs 55.

**Shahabad District.**

An excellent report has been submitted by Dr. O'Brien, the Officiating Civil Surgeon, who took charge of the district in November 1882. The year 1882, according to the opinions of the local officers, was comparatively healthy, but the mortuary figures do not point to this conclusion. The Civil Surgeon says that an error crept in in the compilation of statistics in his office, whereby not less than one-third of the total deaths registered by the police was systematically omitted from the returns of the last three years. Cholera is said to have spread in an epidemic form through most part of the district from May to August. There were seven dispensaries working at the end of the year, of which five were brought under the control of the local municipalities under Government Resolution dated 20th February 1882, one was transferred to class I during the year, and one was a Government institution. There were treated 790 in and 44,397 out patients against 761 and 46,043 in 1881, the daily averages being 32 and 453 against 32 and 461 respectively. The number of out-patients is short of that of 1881, but it is considerably in excess of the average of the three years preceding 1881. At several of the dispensaries averages were not correctly calculated during the year. Four of the dispensaries are in charge of assistant surgeons, and three under civil hospital assistants. The Civil Surgeon cannot at present give a decided opinion as to the amount of interest taken by the municipalities and private managers, and his reasons are good. The dispensaries are appreciated by the people to some extent, but, as a rule, the Beharis prefer *kobirajes* and *hakims*.

*Arrah* —A municipal dispensary from 1st April 1882. Visited by His Honor the Lieutenant-Governor, the Commissioner, the District Magistrate, and other officials. The Civil Surgeon visited daily. A third grade assistant surgeon is in charge, who receives Rs. 120 a month. The total cost of subordinate establishment was Rs 37 per mensem. Some reduction was effected at the end of the year. There were treated 265 in and 9,513 out patients against 266 and 10,425 in 1881, the daily averages being 11 and 68 against 11 and 76 respectively This dispensary does not seem to be popular as compared with the attendance of the Sasseram and Dumraon dispensaries. There were 38 deaths, or 14·3 per cent, against 11, or 15 4 per cent in 1881. Skin diseases with boils and ulcers were the prevailing complaints among out-patients. Fifty-five major operations were performed, as compared with 50 in 1881. Of the more serious operations there were 6 for stone with one death, one amputation of arm, one perineal section, and 9 tumours removed. Minor operations numbered 850. The total expenditure was Rs. 2,751, of which Rs. 2,004 were expended on establishment, Rs. 175 on bazar medicines, and Rs. 103 on Europe medicines. Government paid Rs 251, of which Rs. 240 were for salary of the assistant surgeon to 31st March 1882. The municipality contributed Rs 1 201 against Rs. 680 in 1881. The income from other local sources amounted to Rs 1,108 against Rs 1,509 in 1881. At the end of the year there was an invested capital of Rs. 9,500 in Government securities.

*Sasseram.*—A municipal dispensary from 1st May 1882, rupees 1,200 are contributed annually towards the maintenance of this dispensary by the Sasseram endowment fund. Inspected by the District Magistrate and the Civil Surgeon twice each, and frequently by the sub-divisional officer. A third grade assistant surgeon is in charge, who receives Rs 120 per mensem for dispensary duties, and an allowance of Rs. 20 for charge of the lock-up. Minor establishment cost Rs 29 a month. There were treated 157 in and 8,614 out patients against 142 and 7,423 in 1881, the daily averages being 5 and 141 against 6 and 125 respectively. Each out patient attended the dispensary six times. In the dispensary at Arrah 9,513 out-patients were treated, but the daily average attendance was 68. The calculation of daily averages does not seem to be rightly made in the Sasseram dispensary. The Civil Surgeon remarks that the daily average of represented persons is shown as 1·3, when it was in reality 10 or 12. The death-rate among in-patients was 15·9 per cent. Fifteen major and 419 minor operations were returned. There were five cases of lithotomy, all successful. The total expenditure was Rs. 2,495, of which Rs. 1,759 were expended on establishment, Rs. 129 on bazar medicines, and Rs. 179 on Europe medicines. Miscellaneous charges amounted to Rs. 90, which include Rs. 192 paid for rent of the dispensary. The municipality contributed Rs. 1,038 against Rs. 636 in 1881. Government paid Rs. 256, of which Rs. 240 were for the moiety of salary of the assistant surgeon from January to April 1882.

*Jugdispore.*—A municipal dispensary from 1st April 1882. It is supported by the local municipality, and by Messrs. Burrows, Thomson, and Mylne, the local zemindars. Visited once by the Judge, twice by the District Magistrate, once by the Joint-Magistrate, and twice by the Civil Surgeon. A first class hospital assistant is in charge, who receives Rs 60 per mensem. Thirty-eight in and 6,326 out patients were treated against 83 and 7,467 in 1881, the daily averages being 0·5 and 32 against 2 and 35 respectively. The decrease in the number treated was due to the improved health of the locality. There were three deaths among in-patients. Three major, removal of tumours, and 211 minor operations were

recorded. The total expenditure was Rs. 1,166, of which Rs. 900 were expended on establishment and Rs. 164 on Europe medicines. The amount contributed by the municipality was Rs. 539 against Rs. 106 in 1881. Messrs. Burrows, Thomson, and Mylne paid Rs. 517. Government contributed Rs. 109, of which Rs. 105 were for salaries.

*Bhubooah.*—A municipal dispensary from 1st April 1882. Visited once by the District Magistrate, thrice by the sub-divisional officer, and once by the Civil Surgeon. The hospital assistant of the sub-division is in charge, who receives an extra allowance of Rs 10 for the dispensary duties. There were treated 70 in and 4,002 out patients against 41 and 2,997 in 1881, the daily averages being 2 and 38 against 2 and 24 respectively. The increase, the Civil Surgeon says, was due to the attention paid to the dispensary, and not to increased sickness. There were three deaths, viz., two from injuries and one from fever. One major and 139 minor operations were returned. The total expenditure was Rs. 771, of which Rs. 335 were expended on establishment and Rs. 120 on buildings. Europe medicines, including some new surgical instruments purchased during the year, cost Rs. 230. Government paid Rs 34, of which Rs. 30 represent the extra allowance paid to the hospital assistant for the first three months of 1882. The municipality contributed Rs 228 against Rs. 194 in 1881. Local subscriptions amounted to Rs. 334 against Rs. 378.

*Doomraon.*—Transferred to class I on 23rd January 1882. The dispensary is entirely supported and managed by the Maharajah of Doomraon. Visited by the District Magistrate, sub-divisional officer, and the Civil Surgeon twice each. A third grade assistant surgeon is in charge, who is paid Rs. 100 by the Maharajah. The subordinate establishment cost Rs. 36 a month. There were treated 113 in and 7,571 out patients against 68 and 9,360 in 1881, the daily averages being 4 and 75 against 2 and 103 respectively. The reduced attendance of out-patients was chiefly due to lesser prevalence of malarial fevers in the year under review. There were 16 deaths, or a rate of 11·1 per cent, against 17·6 per cent. in 1881. Of the total deaths, six were due to cholera. Forty-two major and 691 minor operations were returned. There were three deaths after operation. The total expenditure was Rs. 2,110, whereof Rs. 1,695 were expended on establishment and Rs. 312 on buildings. Europe medicines cost Rs. 138. Government contributed Rs 66, of which Rs 53 represent the salary of the assistant surgeon previous to the transfer of the dispensary to class I.

*Buxar.*—A municipal dispensary from 1st April 1882. Visited thrice by the sub-divisional officer, and twice by the Civil Surgeon. A civil hospital assistant is in charge, who receives Rs. 30 a month. His work is supervised by the assistant surgeon in medical charge at Buxar. There were treated 111 in and 5,162 out patients against 115 and 5,261 in 1881, the daily averages being 5 and 69 against 5 and 67 respectively. Twenty-nine deaths occurred among in-door patients, or a rate of 26·1 per cent. Seven major and 490 minor operations were recorded. The total expenditure was Rs. 893, of which Rs. 612 were expended on establishment and Rs. 123 on Europe medicines. Government paid Rs. 82, of which Rs. 75 were for salary of the hospital assistant to 31st March 1882. The municipality paid Rs. 615 in 1882 A similar contribution was made in the previous year. The income from local subscriptions fell from Rs. 452 in 1881 to Rs 182 in the year under report.

*Dehree.*—A third-class dispensary, entirely supported by Government for the sick of the Irrigation Department. There is no managing committee. Visited thrice by the Civil Surgeon A second grade assistant surgeon is in charge There is not, however, much work. Dr. O'Brien remarks that "if it were not for the possibility of occasional accidents in the workshops and on the tramways needing operation, and for the presence of a few European officers who may require his services, an assistant surgeon would be hardly necessary at this station." There were treated 36 in and 3,209 out patients against 46 and 3,110 in 1881, the daily averages being 1·7 and 27·7 against 1·3 and 27·8 respectively. There were 11 deaths, or 30·5 per cent, of the cases treated Diarrhœa caused six deaths. Two major and 185 minor operations were recorded. The total expenditure was Rs. 2,183, of which Rs. 2,010 represent the cost of establishment, and Rs. 173 all other charges.

**Mozufferpore District.** The general health of the district was good, as far as ordinary diseases were concerned. Cholera was unusually prevalent. There are four dispensaries in the district, of which one was in class I, one in class II, and two were transferred to municipalities from 1st April 1882. Three of the dispensaries have accommodation for in-patients. Four hundred and nineteen in and 24,536 out-patients were treated, against 397 and 23,002 in 1881, the daily averages being 22 and 170 against 19 and 165 respectively. Two assistant surgeons and two hospital assistants are in charge. Dr. Mathew says that "the average Beharee peasant is both ignorant and superstitious. The hakeems, or missers as they are sometimes called, have it all their own way in the mofussil, and it is only when the patience and resources of the sick are exhausted that the dispensary is resorted to." The Civil Surgeon advocates the employment of Beharee hospital assistants in the dispensaries.

*Mozufferpore.*—A municipal dispensary Visited frequently by the Magistrate and daily by the Civil Surgeon. An assistant surgeon is in charge, who receives Rs. 120 a month. The subordinate establishment cost Rs. 89 per mensem, including a vaccinator on Rs. 10, which is much more than the dispensary requires. There were treated 219 in and 12,584 out-patients, against 206 and 12,586 in 1881, the daily averages being 14 and 83

against 12 and 88 respectively. The death-rate among in patients was 13·2 against 10·6 in 1881. The increased death rate was due to larger number of moribund and hopeless cases having been admitted during the year. Sixty-seven major and 690 minor operations were returned. The Civil Surgeon remarks that the operations performed were of the usual kind, and presented no features of special interest. The total expenditure was Rs. 3,902, whereof Rs. 2,442 were expended on establishment, and Rs. 75 on buildings. Europe medicines cost Rs. 279, and bazar medicines Rs. 180. Government contributed Rs. 203, of which Rs. 180 were for half salary of the assistant surgeon for three months.

*Hajeepore.*—A municipal dispensary from 1st April 1882. Inspected twice by the District Magistrate, once by the Sub-divisional Officer, and twice by the Civil Surgeon. A hospital assistant is in charge. Ninety-two in and 5,104 out-patients were treated against 74 and 4,841 in 1881, the daily averages being 4 and 35 against 3 and 38 respectively. Fourteen major and 278 minor operations were recorded. The total expenditure was Rs. 1,254, of which Rs. 937 were expended on establishment, and Rs. 128 on Europe medicines. Government contributed Rs. 80, of which Rs. 75 represent half salary of the hospital assistant from January to March 1882. The income of the dispensary from local sources, all shown as paid from municipal funds, was Rs. 1,174.

*Soorsund.*—A first-class dispensary, under the management of a committee, which did not meet during the year. Inspected once by the Civil Surgeon, and once by the sub-divisional officer of Seetamurhee. The dispensary, the Civil Surgeon says, is situated in a remote and inaccessible quarter of the district, which could not be reached during the rains without the aid of an elephant. A visit to Soorsund involves a journey of 90 miles. A second class hospital assistant is in charge. There were treated 3,632 out-patients, against 1,781 in 1881, the daily averages being 36 and 22 respectively. The increase in attendance is ascribed to the appointment of a Beharee hospital assistant during the year. No in-patients. Twenty-six minor operations were returned; no major operation. The total expenditure was Rs. 650, of which Rs. 420 were expended on establishment, and Rs. 49 on buildings. The dispensary is maintained from the income on investments, which amounted to Rs. 468 during the year.

*Seetamurhee.*—A second-class dispensary, under the management of a committee, which met once during the year. At the close of the year, the dispensary was placed under municipal management. Inspected once by the District Magistrate, frequently by the sub-divisional officer, and twice by the Civil Surgeon. A second grade assistant surgeon is in charge, who received Rs. 90 per mensem from Government and Rs. 60 from the dispensary funds. The Civil Surgeon does not report favourably regarding him. He says the assistant surgeon's transfer is eagerly desired both by the public and the officials connected with the sub-division. One hundred and eight in and 3,216 out-patients were treated against 117 and 3,794 in 1881, the daily averages being 4 and 15 against 3 and 16. The death-rate among in-patients was 4·6 per cent. The attendance at the dispensary is insignificant, and the number was swelled by 2,088 cases of goitre. The dispensary is situated close to a large town, and in a densely populated quarter of the district. The extremely meagre attendance is attributed to the inefficiency of the assistant surgeon in charge. Six major and 44 minor operations were recorded. The total expenditure was Rs. 2,431, of which Rs 2,084 represent the cost of establishment. Europe medicines cost Rs. 84, and Rs. 114 were expended on buildings. Government contributed Rs 1,080 as salary of the assistant surgeon. The income from private sources amounted to Rs. 1,375. There is an invested capital of Rs. 2,000 in Government securites.

**Durbhunga District.**

The year 1882, as compared with the previous year, was an extremely unhealthy one. Cholera prevailed in an epidemic form, which caused 10,916 deaths against 330 in 1881. There were five dispensaries working at the end of the year—three in class I, one in class II, and one a municipal dispensary from 1st April 1882. All the dispensaries receive both in and outdoor patients with the exception of the Naraya dispensary. Two assistant surgeons and three hospital assistants were in charge. There were treated 719 in and 41,718 out-patients, against 806 and 41 237 in 1881, the daily averages being 36 and 234 against 37 and 253 respectively. There can be no question, the Civil Surgeon says, of the accuracy of the figures of the Raj Hospital at Durbhunga, and that the attendance of the branch dispensaries may be accepted as tolerably accurate. Besides the charitable dispensaries, there is a hospital at Somastipore, maintained for the employés of the Tirhoot State Railway, under the supervision of the Civil Surgeon.

*Durbhunga.*—A first-class dispensary, entirely supported by the Maharajah of Durbhunga. Visited once by the Surgeon General, once by the Commissioner of the division, and daily by the Civil Surgeon. Assistant surgeon Gopal Chunder Chatterjee was in charge, who has been very favourably reported on by the Civil Surgeon. Minor establishment cost Rs. 121-8-0 per mensem. There were treated 389 in and 15,053 out patients, against 392 and 14,974 in 1881, the daily averages being 23 and 86 against 22 and 89 respectively. There were 46 deaths against 35 in 1881, of which 11 were admitted in a moribund state, and died within 24 hours of admission. The most common diseases treated among out-patients were skin affections, intestinal worms, goitre, &c. Forty-two major and 388 minor operations were performed. Cases of stone and cataract furnished the largest number of major operations, but the operations for the former did not meet with so much success as in the preceding year. The total expenditure was Rs. 6,949, whereof Rs. 4,392 were expended on establishment, and Rs. 1,133 on Europe medicines. Bazar medicines cost Rs. 210, and Rs. 719 were expended on diet.

*Naraya.*—A first-class dispensary, supported by the Durbhunga Raj. Visited once by the Civil Surgeon. The place is not easily accessible. A second grade hospital assistant is in charge, who is paid Rs. 50 per mensem. The total number of out-door patients treated was 4,126 against 4,284 in 1881, the daily averages being 28 and 27 respectively. No in-patients. Goitre, skin diseases, and malarious fevers were the prevailing complaints. Twenty-five minor operations were returned; no major operation. The total expenditure was Rs. 1,021, of which Rs. 809 were expended on establishment, and Rs. 108 on Europe medicines. Bazar medicines cost Rs. 67.

*Tajpore.*—A first-class sub-divisional dispensary, governed by a committee presided over by the Assistant Magistrate of the sub-division. Inspected once only by the Civil Surgeon. The hospital assistant of the sub-division is in charge, who receives Rs. 10 a month from the dispensary fund. There were treated 116 in and 7,418 out-patients against 84 and 5,716 in 1881, the daily averages being 2 and 39 against 1 and 36 respectively. Goitre and skin diseases were the prevailing complaints. Minor operations numbered 148 ; no major operation. The total expenditure was Rs. 989, whereof Rs. 410 were expended on establishment, and Rs. 96 on buildings. Europe medicines cost Rs. 297. The income from local subscriptions amounted to Rs. 938.

*Roserah.*—A municipal dispensary, Inspected twice by the Civil Surgeon. The subscriptions of a neighbouring indigo factory having been withdrawn, the financial condition of the dispensary suffered to such an extent that the local municipality could no longer afford to pay for the services of an assistant surgeon, and he was therefore replaced by a hospital assistant in June 1882. There were treated three in-door patients only, against 15 in the previous year, the decrease being due to the withdrawal of the assistant surgeon. Out-patients numbered 5,420 against 4,921 in 1881, the daily averages being 40 against 50. The increase in attendance was due to goitre, which furnished more than half the total number. One major and 26 minor operations were performed. The total expenditure was Rs. 1,550, of which Rs. 1,343 represent the cost of establishment. Government paid Rs. 243, whereof Rs. 240 represent the half salary of the assistant surgeon from December 1881 to March 1882. The municipality contributed Rs. 934, against Rs 880 in 1881. Local subscriptions amounted to Rs. 409. The Civil Surgeon was not satisfied with the hospital assistant's management of the dispensary.

*Modhubani.*—A dispensary in class II, under the management of the local municipality. The Government aid is continued to this dispensary pending the revision of the limits of the Modhubani municipality, which has not yet been notified in the Gazette. An assistant surgeon is in charge, who receives Rs. 100 per mensem, half of which is contributed by Government. There were treated 211 in and 9,701 out-patients, against 315 and 11,342 in 1881, the daily averages being 9 and 39 against 13 and 50 respectively. Fifteen major and 326 minor operations were returned. The total expenditure was Rs. 2,628, of which Rs. 1,928 were expended on establishment, and Rs. 200 on buildings. Europe medicines cost Rs. 171. Government contribution, as shown in the statement, amounted to Rs. 423, whereof Rs. 420 only represent the salary of the assistant surgeon. It appears that the whole of the salary of the assistant surgeon from April to October was erroneously paid from the dispensary fund. The municipality paid Rs. 310, against Rs. 60 in 1881. The income from other local sources amounted to Rs. 1,493.

**Sarun district.** The public health of the district was on the whole good, as compared with the previous year. There were six dispensaries working at the end of the year—five in class I of the rules, and one in class II—under the municipality. Three dispensaries receive both in-door and outdoor patients, and three out-patients only. There were treated 594 in and 61,876 out-patients, against 493 and 58,197 in 1881, the daily averages being 36 and 521 against 31 and 528 respectively. The Civil Surgeon has no reason to doubt the accuracy of the figures. Two assistant surgeons and four civil hospital assistants were in charge. Three of the dispensaries were under the control of municipalities. A fair amount of interest is said to be shown by the managing bodies generally, and all the dispensaries are much appreciated by the people.

*Chupra.*—A dispensary transferred to class I in 1881. It is under the management of the local municipality. Visited thrice by the Magistrate, and daily by the Civil Surgeon. A third grade assistant surgeon was in charge, who received Rs. 120 a month. Two hundred and sixty-five in and 17,307 out-patients were treated against 274 and 15,817 in 1881, the daily averages being 19 and 185 against 19 and 166 respectively. The death-rate among in-patients was 14·3 per cent, against 13·1 in 1881. Large numbers of moribund cases and injuries brought in by the police are treated here. Goitre is endemic, more particularly in the north of the district, about Hutwa and Gopalgunge. Eighty-four major operations were performed with six deaths, of which four followed the operation of paracentisis abdominis in bad and confirmed cases of ascites combined with dysentery. Four hundred and eighty minor operations were performed. The total expenditure was Rs. 3,510, of which Rs. 2,011 were expended on establishment, and Rs. 432 on Europe medicines. The latter item is exclusive of Rs. 384, the value of medicines purchased from a private druggist and not paid for during the year. The municipality contributed Rs. 433, and the income from other sources amounted to Rs. 2,369, including Rs. 14, the cost of forms paid by Government. The dispensary has an invested capital of Rs. 17,700 in Government securities.

*Sewan.*—A dispensary transferred to class I in 1881. It is controlled by the local municipality. Visited once by the District Magistrate, and several times by the sub-divisional officer. The Civil Surgeon paid two visits A first grade hospital assistant was in charge

till 19th November 1882, who received his grade pay from the dispensary funds. There were treated 154 in and 8,118 out-patients against 95 and 7,876 in 1881, the daily averages being 4 and 82 against 3 and 99 respectively. The death-rate was 5·1 against 12·6 in 1881. Minor operations numbered 174; no major operation. The total expenditure was Rs. 1,069, whereof Rs. 894 were expended on establishment, and Rs. 62 on buildings. Europe medicines are obtained from private firms, but none were purchased during the year. The total income from local subscriptions was Rs. 909. No contribution was made from the municipal funds.

*Hutwa.*—A first-class dispensary, entirely supported by the Maharajah of Hutwa. There is no committee. Visited once by the sub-divisional officer of Gopalgunge, and twice by the Civil Surgeon. An assistant surgeon of the third grade is in charge, who draws Rs. 200 per mensem from the Raj. Minor establishment cost Rs. 27-8-0 a month. One hundred and seventy-five in and 13,784 out-patients were treated, against 124 and 13,174 in 1881, the daily averages being 12 and 101 against 8 and 95 respectively. The death-rate was 13·7 per cent against 10·4 per cent in 1881. Twenty major operations followed by one death, and 278 minor operations were performed. The total expenditure was Rs. 5,171, of which Rs. 2,529 were expended on establishment, and Rs. 327 on buildings. Europe medicines were obtained from a private firm in London, at a cost of Rs. 2,123, for the Hutwa, Bhori, and Gopalgunge dispensaries. The value of medicines retained for the Hutwa dispensary was Rs. 1,705. The indents are not checked by the Civil Surgeon, but sent to the manager, who orders the medicines direct from England. Bazar medicines cost Rs. 144.

*Gopalgunge.*—A branch dispensary of Hutwa, entirely supported by the Maharajah. No committee Visited twice by the Civil Surgeon. A civil hospital assistant is in charge, who receives Rs. 30 a month from the dispensary fund, and Rs. 10 from Government for the charge of the sub-division. There were treated 11,900 out-patients against 10,988 in 1881, the daily average being 58 against 63. No in-patients. Goitre and malarious fevers were the principal diseases treated. One hundred and sixteen minor operations were returned; no major operation. The total expenditure was Rs. 894, whereof Rs. 522 were expended on establishment, and Rs. 211 on Europe medicines supplied from the Hutwa dispensary.

*Bhori.*—A first-class branch dispensary of Hutwa, entirely supported by the Maharajah. There is no committee. Inspected once by the sub-divisional officer of Gopalgunge, and twice by the Civil Surgeon. There were treated 5,139 out-patients against 4,785 in 1881, the daily average being 38 against 40. No in-patients. The principal diseases treated were goitre, ophthalmia, and skin diseases. Forty-one minor operations were recorded; no major operation. The total expenditure was Rs. 832, whereof Rs. 516 were expended on establishment, and Rs. 205 on Europe medicines supplied from the Hutwa dispensary. Bazar medicines cost Rs. 88.

*Rajgunge.*—A municipal dispensary. Inspected twice by the District Magistrate, and twice by the Civil Surgeon. Out-patients numbered 5,628 against 5,557 in 1881, the daily average being 55 against 61. No in-patients. There were returned 207 minor operations; no major operation. The total expenditure was Rs. 1,026, of which Rs. 656 were expended on establishment, and Rs. 150 on buildings. Europe medicines cost Rs. 68. At the end of the year medicines were purchased to the value of Rs. 389, but not paid for during the year.

**Chumparun District.**

The year under report was more unhealthy than the preceding year. Cholera and fevers were prevalent. There are four dispensaries in the district, of which two were taken charge of by the municipalities from 1st April 1882; two were in class II of the rules. There were treated 330 in and 38,068 out-patients, against 395 and 43,791 in 1881, the daily averages being 14 and 183 against 17 and 198 respectively. The Civil Surgeon has nothing to say against the accuracy of the figures. Two assistant surgeons and two hospital assistants were in charge. It is said that the managing bodies take considerable interest in the dispensaries, and all the institutions are appreciated by the people.

*Motihari.*—A municipal dispensary. Inspected once by His Honor the Lieutenant-Governor. the Surgeon-General, and the Commissioner; the Magistrate paid several visits. The Civil Surgeon inspected almost daily. An assistant surgeon is in charge. There were treated 179 in and 20,927 out-patients, against 131 and 26,997 in 1881, the daily averages being 7 and 72 against 5 and 82 respectively. The reduction of out-patients is not attributed by Dr. Cameron to decrease in the popularity of the institution, but to other causes. In any case the dispensary attendance does not coincide with the history of public health furnished by him. Notwithstanding the registered mortality from fever being equal to that of the preceding year, Dr. Cameron assumes that the disease was comparatively very prevalent. This conclusion is not supported by the number of cases treated, which fell from 5,212 in 1881 to 3,761 in the year under review. There were 29 deaths in all, against 21 in 1881. Among the out-patients goitre and fevers were the prevailing diseases. There were 25 major operations, with four deaths. The total expenditure was Rs. 2,172, of which Rs. 1,754 were expended on establishment, and Rs. 123 on buildings. Europe medicines cost Rs. 91, which chiefly represent the value of drugs obtained in 1881. Those supplied in 1882 were not paid for during the year. Government contributed Rs. 189, whereof Rs. 180 were for salary of the assistant surgeon for three months at Rs. 60 a month. The municipality paid Rs. 761, against Rs. 75 in 1881. The income from other sources amounted to Rs. 1,128.

*Bettiah.*—A municipal dispensary. There is no separate committee, but the appointment of a sub-committee for supervising the work of the dispensary has been proposed by

the municipality. Visited once by the District Magistrate, several times by the sub-divisional officer, and twice by the Civil Surgeon. A third grade assistant surgeon is in charge, whose entire salary was paid from the dispensary fund from 1st April 1882. There were treated 76 in-patients, with a daily average of 3, against 178 and 8 respectively in 1881. This large decrease is attributed to the apathy of the assistant surgeon in charge. Out-door patients numbered 7,790 against 7,054, the daily average being 57 and 45 respectively. One thousand seven hundred and twenty-eight cases of goitre were treated. Nine deaths occurred among in-patients. There were only two major operations—tapping of the abdomen. The Civil Surgeon remarks that "the assistant surgeon is inexperienced, and appears to have no taste for operations. One case I saw personally which he failed to operate on—a case of cancer involving skin of the chest." Minor operations numbered 376. The total expenditure was Rs 3,155, of which Rs. 1,565 were spent on establishment, and Rs. 1,100 on buildings. Europe medicines cost Rs. 193. Government paid Rs. 192, of which Rs. 187 were for half salary of the assistant surgeon from December 1881 to March 1882. The municipality contributed Rs. 770, against Rs. 600 in 1881. The income from other sources amounted to Rs. 1,753. The new building was completed during the year at a total cost of Rs. 3,500.

*Barhurwa.*—A dispensary in class II, under the management of a committee, which met twice during the year Inspected once by the District Magistrate, and thrice by the Civil Surgeon. A civil hospital assistant is in charge, who was reduced to his grade pay from August 1882 for failing to pass the grade examination. Out-patients numbered 5,977 against 4,467 in 1881, the daily averages being 27 and 24 respectively. No in-patients. One hundred and seventy-two minor operations were recorded; no major operation. The total expenditure was Rs. 789, of which Rs. 429 were expended on establishment, and Rs 186 on Europe medicines. The income from local sources amounted to Rs. 900, which is more than enough for the maintenance of the dispensary in class I. There is no municipality. The dispensary has an invested capital of Rs. 1,500 in Government securities. Government contributes half salary of the hospital assistant.

*Bagaha*—A second class dispensary, managed by a committee, which met twice during the year. The District Magistrate, the Sub-divisional Officer, and the Civil Surgeon visited twice each. A hospital assistant is in charge, who receives Rs. 30 per mensem, half of which is paid by Government. There were treated 75 in and 3,374 out-patients, against 86 and 5,273 in 1881, the daily averages being 3 and 26 against 2 and 46 respectively. Goitre cases showed a decrease of 1,147 on those of 1881. The native doctor attributes the decrease to the want of proper medicine for treatment, but he never reported the matter to the Civil Surgeon, nor did he purchase the medicines from the local market. The hospital assistant has been called on to explain. There were 12 deaths. Eighteen major and 151 minor operations were recorded. The total expenditure was Rs. 953, whereof Rs 588 were spent on establishment, and Rs. 136 on Europe medicines. The latter charge includes Rs. 50 paid for 1881. Government paid Rs. 187. The income from local sources amounted to Rs. 677. There is no municipality.

## Bhagulpore Division.

**Monghyr District.**

The report is complete. The general health of the district was good. There was, however, unusual prevalence of cholera during the year. There were three dispensaries in the district, of which two were in class I and one in class II, transferred to municipality on 1st April 1882. Two of these dispensaries have accommodation for house patients. There were treated 680 in and 22,700 out-patients, against 686 and 21,023 in 1881, the daily averages being 41 and 165 against 41 and 151 respectively. Dr. Thornton has no reason to doubt the correctness of the figures. One assistant surgeon and two hospital assistants are in charge. The managing bodies are said to take interest in the working of the dispensaries.

*Monghyr.*—A municipal dispensary. The old buildings, which were unsuited for hospital purposes, are being demolished, and a new one, estimated to cost about Rs. 20,000, is being constructed by Mr. Dear of Monghyr. The description of accommodation to be provided occupied more than two pages of the Civil Surgeon's report. A second grade assistant surgeon is in charge. Visited daily by the Civil Surgeon. There were treated 576 in and 15,986 out-patients against 581 and 14,649 in 1881, the daily averages being 36 and 117 against 37 and 100 respectively. The death-rate per cent was 8·8; the Civil Surgeon erroneously shows it to be 3·07 per 1,000. There were 137 major and 1,612 minor operations performed There was no death after operation recorded, though there were 30 cases of lithotomy and many other operations of a serious nature. The result surpasses that of all medical institutions in Calcutta and in the outlying stations, and furnishes ample grounds to doubt the accuracy of the mode of recording results of operations in this dispensary. This should be enquired into by the Civil Surgeon. The total expenditure was Rs 5,686, whereof Rs. 2,500 were expended on establishment, and Rs. 643 on buildings. Europe and bazar medicines cost Rs. 477 and Rs. 228 respectively. The amount spent on dieting articles was Rs. 1,252. In the last report it was remarked that since the transfer of the dispensary to the municipality in 1880, the voluntary subscriptions had been withdrawn. In the year under review, there was nothing shown under "subscriptions" The only income from local sources, besides the municipal contribution, was from investments, amounting to Rs. 262. Government paid Rs. 320, of which Rs. 270 were part of the salary

of the assistant surgeon from January to March 1882. The amount contributed by the municipality was Rs. 5,104, against Rs. 3,685 in 1881.

*Khurruckpore.*—A first-class dispensary, entirely supported by the Maharajah of Durbhunga. It is under the management of the assistant manager of the Raj. Visited once by the Magistrate, and once by the Civil Surgeon, who does not say why the required number of visits has not been paid during the year. A civil hospital assistant is in charge, who is reported to be a very good officer, but the Civil Surgeon notes that it is rather remarkable that no major operations were performed during the year, having plenty of accommodation for indoor patients. There were treated 104 in and 4,809 out-patients against 83 and 4,495 in 1881, the daily averages being 4 and 30 against 3 and 34 respectively. The number of deaths was 10 against 5 in 1881. Minor operations numbered 147. The total expenditure was Rs. 1,164, of which Rs. 880 were expended on establishment, and Rs. 66 on Europe medicines. Bazar medicines cost Rs 76.

*Jamui.*—A first-class dispensary, under the management of a committee presided over by the sub-divisional officer. Four meetings were held. Inspected by the Magistrate, sub-divisional officer, and the Civil Surgeon twice each. The number of out-patients treated was 1,905 against 1,879 in 1881, the daily average being 16·8 against 16·3. No house-patients. Five major and 118 minor operations were recorded. The total expenditure was Rs. 692, of which Rs. 502 represent the cost of establishment. Rs. 42 were expended on Europe medicines. The total income from local sources amounted to Rs. 2,114. There is an invested capital of Rs. 9,900 in Government securities.

**Bhagulpore District.**

The public health of the district was bad as compared with the previous year. Cholera prevailed in an epidemic form, and caused 7,719 deaths against 780 in 1881. There were five dispensaries working at the end of the year. The dispensaries at Nathnugger and Soopole were closed during the year, but the re-establishment of the latter in class I was subsequently sanctioned by Government. No intimation of its re opening was received during the year. Besides the five dispensaries, Baboo Hori Mohun Thakur, of Borari, maintained a private dispensary of his own. This institution has, under the orders of Government, been placed in class I of the rules in 1883. There were treated 521 in and 12,666 out-patients, against 518 and 13,083 in 1881, the daily averages being 24 and 119 against 20 and 132 respectively. The figures were verified by the Civil Surgeon, and he says they may be fairly relied on on the ground that "there does not appear to be any object in falsifying the figures." The means adopted by Dr. Beatson for the verification of the figures were insufficient. Two assistant surgeons and three civil hospital assistants were in charge. Of the five dispensaries, two were in class I, and three in class II, including two transferred to municipalities under the operation of the Government Resolution, dated 20th February 1882. The Civil Surgeon does not think that the managing bodies take very much interest in the dispensaries.

*Bhagulpore.*—A municipal dispensary from 1st April 1882. Visited daily by the Civil Surgeon, thrice by the Commissioner, five times each by the Magistrate and the Joint-Magistrate. Assistant surgeon Nemai Churn Chatterjee was in charge. The Civil Surgeon says that he is a very steady, hard-working officer, and has a very good knowledge of his profession, and is much liked by the people of the place. The establishment was reduced during the year, which effected a saving of Rs. 24 per mensem, and there had been no loss in efficiency. There were treated 298 in and 4,119 out-patients, against 276 and 4,094 in 1881, the daily averages being 17 and 45 against 13 and 48 respectively. The death-rate among house-patients was 17·4 per cent against 23·9 in 1881. Of the total number of deaths, viz., 52. twenty-nine occurred in patients who had been picked up in a moribund condition and sent in by the police. Fifty-three major and 523 minor operations were performed. Four deaths followed after major operations, of which three were in lithotomy cases, and one a case of liver abscess. The total expenditure was Rs. 3,358, of which Rs. 1,554 were expended on establishment, and Rs. 1,048 on buildings. Government contributed Rs. 311, whereof Rs. 300 were for salary of the assistant surgeon from January to March 1882. The municipality paid Rs. 1,389 against Rs. 325 in 1881. The income from other local sources amounted to Rs. 1,727.

*Banka.*—A second-class dispensary, under the management of a committee, which met three times during the year. Visited once by the District Magistrate, four times by the Sub-divisional Officer, and thrice by the Civil Surgeon. A hospital assistant is in charge, who receives his entire pay from Government. There were treated 61 in and 1,406 out-patients against 69 and 1,113 in 1881, the daily averages being 2 and 13 against 2 and 12 respectively. There were eight deaths, or 13·1 per cent. Thirty-nine minor operations were recorded; no major operation. The total expenditure was Rs. 829, whereof Rs. 564 represent the cost of establishment. Europe medicines cost Rs. 86. The income from local sources amounted to Rs. 594. Government contributed Rs. 366.

*Colgong.*—A municipal dispensary. Visited thrice by the Civil Surgeon, twice by the District Magistrate, and once by the Joint-Magistrate. A civil hospital assistant is in charge, who received his half salary from Government to 31st March 1882. The number of out-patients treated was 2,282 against 2,731, the daily average being 27 against 28 respectively. No in-patients. One hundred eighty minor operations were returned; no major operation. The total expenditure was Rs. 627, whereof Rs. 432 were expended on establishment, and Rs. 90 on buildings. The municipality paid Rs. 336, against Rs. 260 in 1881. Government contribution amounted to Rs. 106, of which Rs. 45 were for salary of the

hospital assistant, and Rs. 56 as special allowance for Europe medicines. The income from other sources was Rs. 319, inclusive of Rs. 129 withdrawn from the Savings Bank.

*Muddhepoor.*—A first-class dispensary, under the management of a committee, which met three times during the year. Inspected once by the Civil Surgeon, who could not pay a second visit owing to cholera having broken out in the central jail. There were treated 162 in and 3,603 out patients, against 172 and 3,267 in 1881, the daily averages being 5 and 20 against 4 and 22 respectively. Fever, skin diseases, and goitre were the principal causes of sickness. Twenty-six major and 195 minor operations were recorded. The total expenditure was Rs. 2,097, of which Rs. 1,760 were expended on establishment, and Rs. 133 on Europe medicines. The total income from local sources amounted to Rs 2,342.

*Protabgunge.*—A first-class dispensary, entirely supported by Rai Dhunput Singh Bahadur. There is no committee. Visited once by the Civil Surgeon; an outbreak of cholera in the central jail prevented him from paying a second visit. A second class civil hospital assistant is in charge, who receives his grade pay from the dispensary fund. The number of out-patients treated was 1,226, against 1,860, with a daily average of 12 against 20 in 1881. There is nothing said about the falling off in attendance. Goitre and fever were the prevailing diseases. Thirteen minor operations were returned; no major operation. The total expenditure was Rs. 592, of which Rs. 432 represent the cost of establishment. Europe medicines cost Rs 83, and bazar medicines Rs. 64.

Purneah District.

The district has passed through a year of unusual sickness, and the average health of ordinary years has not been approached. Cholera and fever were unusually prevalent. There were three dispensaries working at the end of the year, of which one was transferred to class I during the year, and two were transferred to municipalities under Government Resolution, dated 20th February 1882. There were treated 170 in and 7,317 out-patients, against 214 and 6,082 in 1881, the daily averages being 7 and 39 against 8 and 35 respectively. The Civil Surgeon found no reason to doubt the accuracy of the figures. All the dispensaries are in charge of civil hospital assistants. The managing bodies do not take much interest in the dispensaries.

*Purneah.*—A municipal dispensary. Visited once by the Commissioner of the division, once by the District Judge, twice by the Joint-Magistrate, and almost daily by the Civil Surgeon. There were treated 140 in and 3,284 out-patients, against 152 and 2,877 in 1881, the daily averages being 6 and 23 against 6 and 20 respectively. One thousand fourteen cases of goitre were treated. There were performed 19 major and 87 minor operations. The total expenditure was Rs. 1,512, of which Rs. 1,010 were spent on establishment, and Rs. 189 on buildings. The amount expended on Europe medicines was Rs. 86. Government paid Rs. 69, of which Rs. 60 were for half salary of the hospital assistant for two months. The municipality contributed Rs. 30, against Rs. 120 in 1881. The income from other local sources, including Rs. 126 drawn from the Savings Bank, was Rs. 1,392. There is an invested capital of Rs. 8,500 in Government securities.

*Kissengunge.*—A municipal dispensary, inspected by the Commissioner and the Magistrate once each; the Civil Surgeon visited twice. A civil hospital assistant is in charge, who receives his grade pay from the dispensary fund and Rs. 10 from Government for charge of the subsidiary jail. The number of patients treated was 16 in and 2,534 out against 16 and 1,671 in 1881, the daily averages being ·5 and 7·9 against ·4 and 7·4 respectively. The disproportion of the total attendance and the daily average in both the years is accounted for by the falling off of patients after their first application for relief. Four major and 40 minor operations were recorded. The total expenditure was Rs. 386, of which Rs. 238 were expended on establishment. Government paid Rs. 52. The municipality contributed Rs. 124, against Rs. 75 in 1881, and the income from local subscriptions amounted to Rs. 204. There is an accumulated cash balance of Rs. 1,683 in the Savings Bank, and it is said that the undrawn interest of the invested capital is due from 1st April 1879. Mr. Weekes, the Magistrate, remarks that the dispensary is well managed, and does a great deal of good; but the insignificant attendance does not justify this conclusion.

*Bussuntpore.*—Transferred to class I during the year, Government paying the grade pay of the hospital assistant of the sub-division, and the dispensary an extra allowance of Rs. 10 a month. Inspected by the Commissioner and the Magistrate once each; the Civil Surgeon inspected twice. There were treated 14 in and 1,499 out patients, against 46 and 1,531 in 1881, the daily averages being 0·5 and 8 against 1 and 8. There were recorded 4 major and 46 minor operations. The total expenditure was Rs. 582, of which Rs. 418 were expended on establishment, and Rs. 75 on buildings. The total income from local sources amounted to Rs. 555.

Maldah District.

The report is submitted by assistant surgeon Debendronath Roy, who took charge of the district in 1883. It is incomplete and irregularly arranged. The public health of the district was nearly the same as in the previous year. The prevalence of cholera is said to have been more severe during the year. There are two dispensaries in the district, both in class I of the rules. There were treated 144 in and 10,435 out-patients during the year, the daily averages being 5 and 72 respectively. Both the dispensaries are in charge of civil hospital assistants. The dispensaries are said to be appreciated by the people.

*English Bazar Dispensary.*—A dispensary transferred to class I in 1882. It is governed by the local municipality. A separate committee exists, which met six times during the year. Visited five times by the Magistrate, and daily by the Civil Surgeon. There were treated

144 in and 7,083 out-patients, against 117 and 5,859 in 1881, the daily averages being 5 and 49 against 4 and 43 respectively. The death-rate per cent was 24. The assistant surgeon gives the death-rate as 2·4 per thousand, as compared with 26·2, the death-rate of the town. This is absurd. Thirty-nine major and 249 minor operations were recorded; no deaths after operation. The total expenditure was Rs. 949, of which Rs. 527 were expended on establishment, and Rs. 155 on Europe medicines. The municipality paid Rs. 850, against Rs. 450 in 1881. During the year Rs. 488 were invested. The income from other local sources, exclusive of Rs. 105 withdrawn from the Savings Bank, was Rs. 603.

*Maldah Town.*—Transferred to class I in December 1880. The dispensary is under the management of the local municipality. Visited once by the Magistrate and six times by the Civil Surgeon. A civil hospital assistant is in charge, who receives Rs. 30 per mensem. The number of out-patients treated during the year was 3,352 against 3,393 in 1881, the daily average being 22 against 19 respectively. No in-patients. The total expenditure was Rs. 564, whereof Rs. 364 represent the cost of establishment. Europe medicines cost Rs. 69. The municipality contributed Rs. 567, against Rs. 340 in 1881. The income from local subscriptions amounted to Rs. 143 only. The dispensary had an invested capital of Rs. 1,211 at the end of the year.

**Sonthal Pergunnahs.**

The report of the Civil Surgeon is complete, and furnishes much useful information. The general health of the district was not so good as in previous years. Fever and cholera were more prevalent. There are five dispensaries in the district under Government supervision. Of these, three are in class I, one a municipal dispensary from 1st March 1882, and one in class II. There are also two mission dispensaries, from which no returns are received; their names are therefore excluded from this report. There were treated in the five dispensaries 407 in and 6,672 out-patients, against 480 and 6,992 in 1881, the daily averages being 14 and 56 against 18 and 53 respectively. The figures, the Civil Surgeon says, may be accepted as fairly correct. All the dispensaries were in charge of civil hospital assistants at the end of the year. Four dispensaries were under the management of local committees, and one under the municipality. The managing bodies, with two exceptions, generally take a fair interest in the institutions, which are not much appreciated by the people.

*Doomka.*—A second-class dispensary, under the management of a committee, which met eight times during the year. Visited frequently by civil officers, and almost daily by the Civil Surgeon. A first grade hospital assistant was in charge, who received Rs. 30 from Government and Rs. 25 from dispensary funds. The minor establishment cost Rs. 32 a month, which was reduced, at the suggestion of the Civil Surgeon, to Rs. 25. There were treated 102 in and 2,308 out-patients, against 173 and 2,092 in 1881, the daily averages being 3 and 21 against 7 and 17 respectively. The decrease in house-patients is said to be due to more careful selection of cases. There were 18 deaths, or 17·6 per cent of the total treated. Six major and 132 minor operations were performed. The total expenditure was Rs. 1,307, of which Rs. 1,003 represent the cost of establishment. The amount expended on Europe medicines was Rs. 111. Government contributed Rs 373, of which Rs. 360 were for salary of the hospital assistant. The income from local sources, exclusive of the amount drawn from the Savings Bank, was Rs. 917. Subscriptions are greatly in arrears, and the Civil Surgeon says that the policy of the committee is not to press the contributors. One subscriber, a Maharajah, owes Rs. 270 at Rs. 7-8-0 per mensem; another, also a Maharajah, owes Rs. 235 at Rs. 5 a month. Rs. 59 are due from one subscriber at Re. 1 per mensem, or in other words, no payment was made during the last four years and 11 months, and so on. There is little hope of the recovery of the subscriptions, and the names of the defaulters should be struck off. The subscriptions hitherto paid from the Damin-i-koh Government estate, were withdrawn on account of the abolition of the Estate Improvement Fund.

*Deoghur.*—A municipal dispensary. Visited once by the Commissioner of the division, twice by the Deputy Commissioner, four times by the Civil Surgeon, and several times by the sub-divisional officer. A second grade assistant surgeon was in charge from 1st January to 8th October 1882, when he was replaced by a first grade hospital assistant, who is paid Rs. 60 a month. There were treated 174 in and 1,689 out-patients against 153 and 1,823 in 1881, the daily averages being 4 and 11 against 4 and 10 respectively. The mortality of the dispensary, as it was in preceding years, was high, as large numbers of moribund pilgrims are brought into this dispensary for treatment. Of the 174 patients treated, 69 died, or 39·6 per cent. Four major and 65 minor operations were recorded. The total expenditure was Rs. 2,218, of which Rs. 1,860 were expended on establishment, and Rs. 100 on Europe medicines. Government paid Rs. 180, as part of the salary of the assistant surgeon at Rs. 90 a month for January and February 1882. The municipality contributed Rs. 510 against Rs 72 in 1881. The income from local sources amounted to Rs. 1,115. Here also the arrears of subscriptions amount to Rs. 1,600. Two of the chief defaulters were representative men.

*Godda.*—A first-class dispensary, managed by a local committee, which met once only during the year. Visited twice by the Deputy Commissioner and thrice by the Civil Surgeon. The Deputy Commissioner observes that the accommodation for the dispensary is absurdly disproportionate to the requirements, and entails heavy expenditure at times for maintenance. The civil hospital assistant of the sub-division is in charge, who is paid Rs. 10 a month from the dispensary funds. There were treated 32 in and 802 outdoor patients against 54 and 1,043 in 1881, the daily averages being 2 and 9 against 2 and 12 respectively. The fall in attendance is attributed to the unpopularity of the hospital assistant, who is said

to favour one section of the community more than the other. One death occurred. Minor operations numbered 46; no major operation. The total expenditure was Rs. 466, of which Rs. 252 were spent on establishment, and Rs. 57 on Europe medicines. At the end of the year there was an invested capital of Rs 1,762 in the Savings Bank.

*Jamtara.*—A first-class dispensary, governed by a local committee, which held two meetings during the year. Inspected twice by the Deputy Commissioner, three times by the sub-divisional officer, and twice by the Civil Surgeon. A second class hospital assistant is in charge, who receives an allowance of Rs 10 per mensem from dispensary funds, and grade pay from the sub-division. There were treated 975 out-patients with a daily average of 6, against 874 and 5 respectively in 1881. One major and 66 minor operations were returned. The total expenditure was Rs. 229, of which Rs. 162 were expended on establishment, and Rs. 37 on Europe medicines. Local subscriptions amounted to Rs. 138 only.

*Rajmehal.*—A dispensary in class I, under the management of a committee, by whom nine meetings were held. Visited once by the Commissioner, twice by the Deputy Commissioner, four times by the Civil Surgeon, and frequently by the sub-divisional officer. The civil hospital assistant of the sub-division is in charge, who receives an extra allowance of Rs. 10 a month from the dispensary fund. There were treated 99 in and 878 outdoor patients against 100 and 1,160 in 1881, the daily averages being 4 and 6 against 3 and 7 respectively. The death-rate among in-patients was 23·3 against 32 per cent in 1881. Minor operations numbered 40; no major operation. The total expenditure was Rs. 596, of which Rs. 372 represent the cost of establishment. Europe medicines cost Rs. 92, inclusive of Rs. 73 paid for medicines obtained in 1881.

## Orissa Division.

**Cuttack District.**

The general health of the district was good. Cholera prevailed to a greater extent, but the total mortality from all causes was much less than in the previous year. There are eight dispensaries in the district and in tributary estates. Of these, one was in class I, five in class II—including the three dispensaries transferred to municipalities from 1st April 1882—and two in class III. Six dispensaries treat both indoor and outdoor patients, and two out-patients only. There were treated 1,031 in and 41,105 out-patients, against 1,137 and 38,441 in 1881, the daily averages being 52 and 315 against 55 and 322 respectively. Two assistant surgeons and six civil hospital assistants were in charge. A fair amount of interest is said to be taken by the managing bodies. Dr. Stewart says that natives of Orissa will not, except under dire necessity, consent to become inmates of an hospital for fear of losing caste; pilgrims, however, take advantage of the indoor accommodation, and to them the hospitals are a great relief. A fair number apply for outdoor relief.

*Cuttack General Hospital.*—A second-class institution, under the management of the Cuttack Unnochutter Committee, consisting of the Commissioner, Judge, Magistrate, and Executive Engineer as *ex officio* members. A first grade assistant surgeon is in charge, whose entire salary is paid by Government. The hospital was visited by the Commissioner, Magistrate, and the Deputy Surgeon-General of Her Majesty's Forces, Madras Circle. The Civil Surgeon visited daily. There were treated 583 in and 5,824 out-patients, against 653 and 5,579 in 1881, the daily averages being 35 and 29 against 41 and 37 respectively. The number of deaths was 94 against 117 in 1881, chiefly consisting of pilgrims brought in in the last stage of illness. Thirty-nine major and 272 minor operations were performed. There were six operations for scrotal tumours and two for lithotomy. Two deaths resulted after operation. The total expenditure was Rs. 8,638, of which Rs. 3,468 were expended on establishment, and Rs. 3,764 on miscellaneous items. The latter amount includes charges which belong to Unnochutter proper, such as distribution of alms to paupers, payment to pundahs, &c. Europe medicines cost Rs. 230. Government contributed Rs. 2,416, whereof Rs. 2,400 represent the salary of the assistant surgeon. The Unnochutter Fund contributed Rs. 6,447. This hospital is connected with the medical school. The cost of the latter is entirely paid by Government.

*Cuttack Branch Dispensary.*—An outdoor institution, transferred to the municipality on 1st April 1882. Visited occasionally by the vice-chairman of the municipality. The Civil Surgeon inspected daily. A hospital assistant is in charge, who is also teacher of anatomy of the school. The total number of out-patients treated was 11,297 against 10,601 in 1881, the daily averages being 148 and 150 respectively. There were performed 28 major—chiefly incisions and reductions of dislocations—and 444 minor operations. The total expenditure was Rs. 858, whereof Rs. 625 represent the cost of establishment. Europe medicines cost Rs. 64. Government paid Rs. 64, of which Rs. 45 were part of salary of the hospital assistant for January to March 1882. The municipality contributed Rs. 150, against Rs 600 in 1881. The Government security of Rs. 1,000, which remained on 1st January 1882, was sold during the year, and Rs. 173 were withdrawn from the Savings Bank. At the end of the year there was a cash balance of Rs. 711.

*Jajepore.*—A municipal dispensary from 1st April 1882. Visited once by the Commissioner of the division, and twice each by the District Magistrate and the sub-divisional officer. The Civil Surgeon inspected thrice. The hospital assistant of the sub-division is in charge, who receives Rs 30 from the dispensary fund. There were treated 65 in and 2,120 out-patients, against 59 and 2,443 in 1881, the daily averages being 2 and 24 against 1·8 and 26 respectively. The number of deaths was 13. Eleven major and 143 minor operations were recorded. The total expenditure was Rs. 748, of which Rs 570 were spent on estab-

lishment. Government paid Rs. 59, of which Rs. 45 were for salary of the hospital assistant to 31st March 1882. The municipality contributed Rs. 696, against Rs. 555 in 1881. The income from other local sources amounted to Rs. 101 only. Jajepore is a pilgrim shrine, and is frequented by pilgrims either on their way to or from Pooree.

*Kendraparah*.—A municipal dispensary from 1st April. Inspected once by the Commissioner of the division; the District Magistrate, sub-divisional officer, and the Civil Surgeon visited twice each. The hospital assistant of the sub-division is in charge, who is paid Rs. 30 from the dispensary fund. There were treated 26 in and 1,844 out-patients, against 44 and 2,476 in 1881, the daily averages being 07 and 5 against ·1 and 6 respectively. Five deaths occurred among in-patients. Eight major and 74 minor operations were returned. The total expenditure was Rs. 972, of which Rs. 614 were spent on establishment, and Rs. 133 on Europe medicines. The amount expended on buildings was Rs. 96. Government paid Rs. 77, of which Rs. 60 were half salary of the hospital assistant for four months. The municipality paid Rs. 700, against Rs. 330 in 1881. The income from local subscriptions amounted to Rs. 297, against Rs. 316.

*Dhurmsala*.—A second-class dispensary, under the management of a committee consisting of the same members as the Cuttack General Hospital Committee, with the addition of the manager of the Durpan estate in which the dispensary is situated. Government pays half salary of the hospital assistant. Visited twice by the Magistrate, once by the sub-divisional officer, and four times by the Civil Surgeon. There were treated 173 in and 4,125 out-patients against 168 and 3,837 in 1881, the daily averages being 5 and 34 against 4 and 31 respectively. Among in-patients 31 deaths occurred. Two major and 319 minor operations were returned. The total expenditure was Rs 1,376, of which Rs. 816 were expended on establishment, and Rs. 171 on buildings. Government paid Rs 315, of which Rs. 300 were for half salary of the hospital assistant. The dispensary is situated on the main road leading to Calcutta and Jajepore. To pilgrims it is a great benefit.

*Dhenkanal*.—A first-class dispensary, entirely maintained by the tributary estate of Dhenkanal. A committee of three members exists, but no meetings were held. An addition to the members is proposed. Visited once by the Commissioner of the division—who is also Superintendent of the Tributary Mehals—and three times by the Civil Surgeon. A third grade assistant surgeon is in charge, who receives Rs. 170 per mensem from the estate. There were treated 150 in and 9,959 out-patients against 176 and 9,045 in 1881, the daily averages being 7 and 47 against 5 and 45 respectively. Six deaths occurred among in-patients. Six major and 177 minor operations were recorded. The total expenditure was Rs. 2,856, of which Rs. 2,387 were expended on establishment.

*Ungul*.—A dispensary in class III, entirely supported by Government. It is situated in the Government estate of Ungul. No members are available here to form a committee. Visited once by the Superintendent, Tributary Mehals. No visit appears to have been paid by the Civil Surgeon. A civil hospital assistant is in charge. There were treated 34 in and 3,701 out-patients against 37 and 2,359 in 1881, the daily averages being 1 and 19 against 1 and 18 respectively. The number of deaths among in-patients was 3. The total expenditure was Rs 564, whereof Rs. 459 represent the cost of establishment. There is an invested capital of Rs. 160, lent to a mahajun at 25 per cent per annum.

*Bissyparah*.—A third-class dispensary, entirely supported by Government. It is situated in the Government estate of Khond mehal on the western frontier of the Orissa Tributary Hill Estates and on the confines of the Madras Presidency. The place is very difficult of access, and is about 144 miles distant from Cuttack. No visit was paid by the Civil Surgeon in this or in any other year. The teshildar and inspector of police are the chief officials there. In the cold weather the Superintendent of Tributary Mehals or his assistant inspects the place. A civil hospital assistant is in charge. There were treated 2,232 out-patients against 2,101 in 1881, the daily averages being 6 and 5 respectively. No in-patients. Fourteen minor operations were returned. The total expenditure was Rs. 562, of which Rs. 408 were expended on establishment, and Rs. 105 on Europe medicines.

**Balasore District**

The public health of the district, the Civil Surgeon says, was good, there being no severe epidemic during the year. The Magistrate disagrees with him, and says that cholera raged with violence in different parts of the country. No statistics have been furnished by the Civil Surgeon, who in three small lines concluded his report on the general health of the district. The report on the whole is meagre and wanting in important details. There are three charitable dispensaries, of which one is in class I and two in class II, including the sudder dispensary made over to the municipality under Government Resolution, dated 20th February 1882. There were treated 387 in and 7,010 out-patients against 444 and 6,930 in 1881, the daily averages being 9 and 53 against 10 and 44 respectively. The Civil Surgeon found no grounds to doubt the accuracy of the figures, but he does not give the grounds of his opinion. All the dispensaries are in charge of civil hospital assistants.

*Balasore Pilgrim Hospital*.—A municipal dispensary under Government Resolution, dated 20th February 1882, but the dispensary is managed by the Magistrate and Civil Surgeon, and all bills and accounts are submitted to the Commissioner of the division for sanction. Regarding the transfer of the dispensary to the local municipality under the operation of the Government order quoted above, the Magistrate observes that "the charge of the Pilgrim hospital against the municipality is an anomaly which, I am sure if represented to Government, would be corrected. It is not required for the municipality. It happens to be erected in one extreme which might well be left out of municipal limits." Again, "the

municipality has its dispensary in the town, and if forced to pay extra sums for establishment, it should be allowed to entertain it where most suitable for municipal purposes." Visited daily by the Civil Surgeon. There were treated 243 in and 2,075 out-patients against 285 and 2,089 in 1881, the daily averages being 5 and 11 against 6 and 10 respectively. The death-rate was 32 per cent. Twelve major operations were performed with two deaths. Minor operations numbered 62. The total expenditure was Rs. 3,729, whereof Rs. 2,478 were expended on buildings, and Rs. 864 on establishment. Europe medicines cost Rs. 25 only, as there was a large stock from the previous year. Government contributed Rs. 176, of which Rs. 165 were for salary of the hospital assistant. The municipality paid Rs. 495. No payment was made in 1881.

*Bhuddruck.*—A second-class dispensary, under the management of a committee, which met ten times during the year. Inspected four times by the Civil Surgeon. There were treated 144 in and 2,273 out-patients against 159 and 2,493 in 1881, the daily averages being 4 and 15 against 4 and 17 respectively. The dispensary is chiefly resorted to by pilgrims. The death-rate was 22 9 per cent. Fifteen major—chiefly reductions of dislocations and fractures—and 110 minor operations were returned. The total expenditure was Rs. 1,185, whereof Rs. 927 represent the cost of establishment. Government contributed Rs. 713, and the income from local sources amounted to Rs. 494. Regarding the arrears of subscriptions, the Civil Surgeon considers that the names of defaulters over 12 months should be struck off. The Magistrate observes that "this would be fatal to collections, for it is the one thing our pseudo-liberal gentry would desire. It is far better to keep their names on the list of those who promise, and from time to time are compelled, by very shame, to give something. They will never remove their names themselves, but they do not object to flourish in public pretended beneficence if they are allowed to escape making payment." A new cholera-shed has been erected.

*Shamanund De Dispensary*—A first-class dispenary. A committee exists, but no meetings were held during the year. The secretary, who is son of the founder of the institution, attends to its wants. Inspected frequently by the Civil Surgeon. The number of out-patients treated was 2,662 against 2,348, the daily average being 26 against 16. No in-patients. Minor operations numbered 145; no major operation. A second grade hospital assistant is in charge, who receives Rs. 35 per mensem. The total expenditure was Rs. 619, of which Rs. 474 were expended on establishment, and Rs. 87 on Europe medicines. The dispensary has an investment in landed property, which yields Rs. 500 per annum. The municipality contributes Rs. 200 a year.

**Pooree District.**

An excellent report has been submitted by the Civil Surgeon. The public health of the district has been very nearly as bad as it was in 1881, though the district suffered much less from small-pox. There are three dispensaries in the district, of which one is a municipal dispensary, and two are in class II aided by Government. There were treated 635 in and 10,452 out-patients against 624 and 9,422 in 1881, the daily averages being 22 and 69 against 19 and 66 respectively. The figures of the sudder dispensary may be taken as correct, and those of the Piplee dispensary as fairly correct. The Civil Surgeon has not much confidence in the figures of the other dispensary at Khoorda. All the dispensaries are in charge of civil hospital assistants. The majority of the members of the managing committee are said to take a fair amount of interest in the well-being of these charities, but the non-official members who are natives of the place have, with few exceptions, showed little interest in these dispensaries. The dispensaries are fairly appreciated by the indigent portion of the local population, but the amount of their appreciation is limited to their attendance at the out-door dispensary only, as it is very rarely that they can be induced to come to the hospital as house-patients. Dr. Gupta remarks that "the upper classes who are able to help in the cause of medical charity, have not hitherto shown much appreciation in any very tangible shape. Some time ago a subscription was opened in aid of the Pooree and Piplee dispensaries, but in a short time usual difficulty was met, and the attempt had to be given up as unsatisfactory."

*Pooree.*—A municipal dispensary from April 1882. The affairs of the dispensary are governed by a sub-committee of the municipality, which met nine times during the year. Visited once by the Commissioner of the division, and daily by the Civil Surgeon. A civil hospital assistant is in charge, who receives Rs. 60 per mensem. Minor establishment cost Rs. 42 a month. There were treated 377 in and 3,750 out-patients, against 375 and 4,117 in 1881, the daily averages being 14 and 29 against 12 and 31 respectively. The decrease in out-patients corresponds with the local public health. One hundred and nineteen deaths occurred among house-patients, or 31·5 per cent, against 127 or 33·8 per cent in 1881. The principal causes of deaths were, 50 from cholera, 31 from dysentery, 12 from diarrhœa, and 26 from other causes. Sixteen major and 408 minor operations were performed. The smallness of major operations was due to the fact that Uriyas are extremely unwilling to come to hospital unless reduced to extremity. The total expenditure was Rs. 2,298, of which Rs. 1,192 were expended on establishment, and Rs. 445 on buildings. Europe medicines cost Rs. 63. Government paid Rs. 98, of which Rs. 90 represent the half salary of the hospital assistant from January to March 1882. The municipality contributed Rs 270; there was no payment made in 1881 from municipal funds. The income from other local sources amounted to Rs. 2,051, whereof Rs. 1,929 were paid from the Pooree Lodging-house Fund.

*Piplee.*—A second-class dispensary, under the management of the Pooree Lodging-house Committee, which met nine times during the year. Inspected four times by the Civil Surgeon. A hospital assistant is in charge, who receives Rs. 50 a month, half of which is paid by Government. There were 127 in and 1,781 out-patients, against 108 and 1,782 in 1881, the daily averages being 2·9 and 17 against 2·7 and 17 respectively. The number of deaths was 33 or 26 per cent, against 19 or 17 per cent in 1881. Cholera was more prevalent and fatal than in the preceding year, causing 20 deaths against 3 in 1881. Three major and 154 minor operations were returned. The total expenditure was Rs. 1,082, of which Rs. 827 were expended on establishment, and Rs. 83 on buildings. Europe medicines cost Rs. 20. Government paid Rs. 304, and the income from local sources was Rs. 778.

*Khoorda.*—A dispensary in class II in the records of this office, but it is practically a first-class institution. Since the abolition of the Estate Improvement Fund, by which the dispensary was entirely maintained, Government paid all the expenses. The status of the dispensary needs to be changed. The dispensary is under the management of a branch committee, presided over by the Magistrate of the district with the sub-divisional officer as vice-chairman. The committee held twelve meetings during the year. Inspected once by the Commissioner, eight times by the sub-divisional officer, and four times by the Civil Surgeon. A civil hospital assistant is in charge, who is also in charge of the sub-division. There were treated 131 in and 4,921 out-patients, against 141 and 3,523 in 1881, the daily averages being 5 and 21 against 3 and 18 respectively. The indoor patients in all the three dispensaries in the district chiefly represent the poor pilgrims, who annually visit the shrine of Juggernath at Pooree, and the Civil Surgeon remarks, that their increase or decrease in hospital does not form a fair index of local public health. There were 11 deaths. Two major and 71 minor operations were returned. The total expenditure was Rs. 746, all paid by Government. The amount spent on establishment was Rs. 332. Europe medicines cost Rs. 34. The expenditure on bazar medicines was exorbitant, amounting to Rs. 119.

### CHOTA NAGPORE DIVISION.

**Manbhoom District.**

The year under review was less healthy than the preceding year, owing to greater prevalence of all principal diseases. There are three disponasries in the district—two in class I, including one transferred during the year, and one a municipal dispensary. All the dispensaries are in charge of civil hospital assistants. There were treated 573 in and 7,429 out-patients, against 471 and 5,758 in 1881, the daily averages being 19 and 65 against 22 and 58 respectively. The figures of the sudder dispensary are correct, but the Civil Surgeon cannot vouch for the accuracy of those of other dispensaries, though he had no reason to doubt their correctness.

*Purulia.*—A municipal dispensary from 1st April 1882. A sub-committee consisting of six members—all members of the municipal committee—exists. Visited daily by the Civil Surgeon, and frequently by the Deputy Commissioner. A second grade civil hospital assistant is in charge, who receives Rs. 50 a month. Minor establishment cost Rs. 41 per mensem. A peon for collecting subscriptions is also employed, who gets 6 per cent on all collections. There were treated 322 in and 4,129 out-patients, against 250 and 3,422 in 1881, the daily averages being 12 and 39 against 14 and 32 respectively. Fifty-five deaths occurred among in-patients, against 33 in 1881, the increase being due to deaths from cholera. Thirty-one major and 246 minor operations were performed. There was one death after operation. The total expenditure was Rs. 2,186, of which Rs. 1,129 were expended on establishment, and Rs. 270 on buildings. Europe medicines cost Rs 305, including the value of medicines supplied in 1881. The municipality contributed Rs. 405, against Rs. 180 in 1881. Government paid Rs. 146, of which Rs. 75 were for half salary of the hospital assistant for January to March 1882. Local subscriptions amounted to Rs. 1,396.

*Pandra.*—A first-class dispensary. The supporter, Maharanee Hingun Kumari, died at the close of 1881, and since then her estate is under attachment. The Civil Surgeon says that it is difficult to say what the future of this dispensary will be. It is under the management of a committee, which met five times during the year. Inspected twice by the Deputy Commissioner, five times by the sub-divisonal officer, and twice by the Civil Surgeon. A private native doctor is in charge, who gets Rs. 35 a month. There were treated 137 in and 1,868 out-patients against 130 and 1,380 in 1881, the daily averages being 3 and 16 against 4 and 15 respectively. The number of deaths was 13 against 17 in 1881. Three major and 44 minor operations were recorded. The total expenditure was Rs. 824, of which Rs. 691 represent the cost of establishment. Europe medicines cost Rs. 25.

*Gorundpore.*—A sub-divisional dispensary, transferred to class I during the year, Government paying the grade pay to the civil hospital assistant of the sub-division, and the dispensary an extra allowance of Rs. 10 a month. It is under the management of a committee, which met eight times during the year. Inspected by the Deputy Commissioner and the Civil Surgeon twice each. There were treated 114 in and 1,132 out-patients, against 91 and 956 in 1881, the daily averages being 3 and 9 against 2 and 10 respectively. The death-rate was 21 per cent. Most of the patients treated in the dispensary were pilgrims, and were admitted in a moribund state. Two major and 32 minor operations were recorded. The total expenditure was Rs. 572, of which Rs. 307 were expended on establishment, and

Rs. 65 on buildings. The amount expended on Europe medicines was Rs. 68. The income from local sources, exclusive of the amount withdrawn from the Savings Bank, was Rs. 632.

**Hazareebagh District.**

The general health of the district was good as compared with the previous year. There are three dispensaries in the district, of which one was transferred to class I during the year, one in class II, and one a municipal dispensary. There were treated 158 in and 5,732 out-patients against 221 and 7,624 in 1881, the daily averages being 11 and 68 against 11 and 74 respectively. The Civil Surgeon thinks that the figures of the sudder dispensary are deserving of confidence, but he cannot say how far the figures of the outlying dispensaries could be relied on. Great interest is said to be taken by the managing bodies, and the dispensaries are appreciated by the people. All the institutions are in charge of civil hospital assistants.

*Hazareebagh.*—A municipal dispensary. Visited frequently by the Civil Surgeon. There were treated 156 in and 3,111 out-patients, against 168 and 4,099 in 1881, the daily averages being 10 and 43 against 9 and 44 respectively. The figures correspond with the improved public health during the year. The death-rate among in-patients was 14·7 against 17·8 in 1881. Nearly 50 per cent of the mortality was caused by dysentery. Thirty-seven major and 128 minor operations were performed. The total expenditure was Rs. 1,774, whereof Rs. 684 were expended on establishment, and Rs. 284 on buildings. Europe medicines cost Rs. 306. Government paid Rs. 97, of which Rs. 90 were for half the salary of the hospital assistant from January to June 1882. The municipality paid Rs. 952 against Rs. 342 in 1881. Local subscriptions amounted to Rs. 723.

*Chatra.*—Transferred to class I in February 1882. The dispensary is under the management of the local municipality. Visited once by the Civil Surgeon. The number of patients treated was 2 in and 1,746 out against 5 and 2,468 in 1881, the daily averages being ·6 and 14 against ·1 and 20. One hundred and eight minor operations were returned; no major operation. The total expenditure was Rs. 644, of which Rs. 373 were expended on establishment, and Rs. 170 on Europe medicines. The municipality paid Rs. 413 against Rs. 258 in 1881. Government contributed Rs 33, of which Rs 30 were for half the salary of the hospital assistant for two months. The hospital assistant receives Rs. 10 per mensem in consideration of the duties which he has to perform in connection with the four police stations. Local subscriptions amounted to Rs 221 only.

*Burhee.*—A second-class dispensary, governed by a dispensary committee, which held three meetings during the year. Inspected once by the Civil Surgeon A third grade civil hospital assistant is in charge, who receives Rs. 30 a month, half of which is paid by Government. Out-patients numbered 875 against 1,057 in 1881, the daily average being 11 against 10. No in-patients. Fifty-nine minor operations were returned; no major operation. The total expenditure was Rs. 597, of which Rs. 396 were expended on establishment, and Rs. 100 on buildings Europe medicines cost Rs. 35. Government contributed Rs. 183, and the income from local sources amounted to Rs. 529.

**Lohardugga District.**

The public health of the district appears to have been about the same as in the previous year. There are three dispensaies in the district. Of these, two are municipal institutions and one in class II. There were treated 218 in and 4,368 out-patients, against 252 and 3,845 in 1881, the daily averages being 13 and 44 against 15 and 48 respectively. The figures of the Ranchee dispensary are correct, but the Civil Surgeon is not prepared to say that the figures of other dispensaries are altogether reliable. One assistant surgeon and two civil hospital assistants are in charge. The managing bodies of the Ranchee and Daltongunge dispensaries are said to take a fair amount of interest in the institutions, but the same cannot be said of the Lohardugga dispensary, which has not in consequence made any progress.

*Ranchee.*—A municipal dispensary from 1st April 1882. Visited daily by the Civil Surgeon, and occasionally by civil officers. A civil hospital assistant is in charge, who receives Rs. 40 a month. There were treated 108 in and 2,401 out-patients, against 156 and 2,532 in 1881, the daily averages being 6 and 26 against 7 and 28 respectively. The total number of deaths among in-patients was 23 as compared with 32 in 1881. The chief cause of death was chronic dysentery among pilgrims. It is said that the people at Ranchee do not come as in-patients as a rule, but only resort to it as a last resource Pilgrims and poor, suffering from serious diseases or accidents, constitute the majority of in-patients. Five major and 97 minor operations were performed. The total expenditure was Rs. 1,390, of which Rs. 722 were expended on establishment, and Rs. 266 on buildings. No payment was made by the municipality during the year, the expenditure being chiefly met from cash balance on 1st January 1882. The amount paid by the municipality in 1881 was Rs. 100. Government contributed Rs. 87, of which Rs 60 were for half salary of the hospital assistant for January, February, and March 1882. The income from local sources amounted to Rs. 699.

*Palamow (Daltongunge.)*—A dispensary in class II; Government pays the entire salary of the assistant surgeon of the sub-division, inclusive of Rs. 25 as special allowance for the charge of the subsidiary jail. The dispensary pays nothing. There were treated 110 in and 1,462 out-patients, against 96 and 1,111 in 1881, the daily averages being 6 and 12 against 8 and 11 respectively. There were three deaths among in-patients. Fourteen major and 84 minor operations were returned. The total expenditure was Rs. 2,183, of which Rs. 1,720 were expended on establishment, and Rs. 233 on buildings. Europe medicines cost Rs. 43. The total income from local sources amounted to Rs. 634. The dispensary was visited occasionally by civil officers, and twice by the Civil Surgeon.

*Lohardugga.*—A municipal dispensary from 1st April 1882. It is under the management of a local committee, which met three times during the year. Visited by the Deputy Commissioner and the Civil Surgeon twice each. A civil hospital assistant is in charge, who is paid Rs. 30 a month. It is said that there had been constant disputes and misunderstanding between the medical subordinate and the secretary, and the Civil Surgeon remarks that so long as this state of affairs continues, the institution can have no chance of increasing in popularity. The number of out-patients treated was 505, giving a daily average of 6 against 202 and 8 respectively in 1881. The dispensary was opened in September 1881. No accommodation for in-patients. Twenty-two minor operations were recorded; no major operation. The total expenditure was Rs. 558, of which Rs. 407 represent the cost of establishment. Government paid Rs. 45 as half salary of the hospital assistant for January to March 1882. The municipality contributed Rs. 135. The income from local subscriptions amounted to Rs. 342.

Singbhoom District.

The public health of the district was worse than in the preceding year. There is only one dispensary in the district at the sudder station.

*Chybassa.*—A municipal dispensary from 1st April 1882. It is under the management of a local committee, with the Civil Surgeon as its secretary. The members meet occasionally to transact business that may be placed before them, but beyond this no further interest, the Civil Surgeon says, is taken in the institution. Eight meetings were held during the year. The civil hospital assistant attached to the jail hospital is in charge, who receives an extra allowance of Rs. 10 a month from the dispensary fund. The dispensary is daily visited by the Civil Surgeon. The number of out-patients treated was 1,803, with a daily average of 22, against 1,771 and 18 respectively in 1881. Of the total attendance, ophthalmic cases numbered 790, or 43·8 per cent. One major and thirty-eight minor operations were returned. The total expenditure was Rs 360, of which Rs. 183 were expended on establishment, and Rs. 83 on Europe medicines. The municipality paid Rs. 240 against Rs. 150 in 1881. The income from other local sources amounted to Rs. 449. Government paid Rs. 43, of which Rs. 30 represent the allowance to civil hospital assistant from January to March 1882. At the end of the year, the dispensary had an invested capital of Rs. 2,019 in the Savings Bank.

28. In conclusion, I beg to say that the report was written by Dr. Payne, with the exception of the remarks on the financial condition of the institutions, and of the reviews on the working of individual dispensaries.

I have the honour to be,

Sir,

Your most obedient servant,

B. SIMPSON, M. D.,

*Offg. Surgeon-General for Bengal.*

# STATISTICAL TABLES.

## Statement No. I.

*Showing the number of dispensaries in Bengal during the year* 1882.

| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
|---|---|---|---|---|---|---|
| Population of the Province. | Dispensaries. | Number open on 31st December 1881. | Number opened during the year. | Number closed during the year. | Number open on the last day of the year. | Remarks. |
| 69,53,6861 | I class ... . . . . | 81 | . .. | 1 | 107 | The transfer of dispensaries from one class to another caused the differences in the total under each class. There is no column to indicate these in the statement. |
| | II " ... | 145 | . | 7 | *111 | |
| | III " ... . . | 5 | . | .. .. | 5 | |
| | Total | 231 | | 8 | 223 | |

* Inclusive of 73 dispensaries maintained by the municipalities under operation of the Government Resolution dated 20th February 1882.

Reg. No. 1925J—250—1-8-83.

# MUNICIPAL DEPARTMENT.

## MEDICAL.

DARJEELING, THE 3RD SEPTEMBER 1883.

## RESOLUTION.

**Read—**

The Report on the Charitable Dispensaries in Bengal for the year 1882.

**Read again—**

The Report for 1881, and the Resolution recorded upon it.

In submitting the report, the Surgeon-General observes that the reforms in the management and constitution of dispensaries in Bengal, which were begun some years back, and which made considerable progress in 1881, were not continued in 1882 in consequence of the important changes foreshadowed by the scheme of Local Self-Government and the Resolution of the Government of Bengal dated the 20th February 1882. Dr. Simpson anticipates that, if the principles which underlie the policy of that scheme are applied in their fulness to the management of the dispensaries of this province, the work of improvement and reformation will receive a serious check; and that the control exercised by Government will be largely withdrawn, and will pass into the hands of inexperienced and irresponsible local bodies. For this reason no attempt was made during the year under review to continue the work of administrative reform. "It was manifestly useless to continue the laborious application of particular measures, however necessary they may have been, when the entire system of dispensary government was about to be changed in a manner that should probably subvert altogether the policy which had been inaugurated." The Lieutenant-Governor does not share the apprehensions that have been expressed by the Surgeon-General as to the future of medical charity in Bengal. There are still many acknowledged defects in the management of these institutions, but it is altogether premature to anticipate that these defects will not be remedied, much more to assert that they are sure to become much graver, because a system of purely State administration is to be abandoned. Dr Simpson has not fully appreciated the intentions of Government in the matter. It is the desire of the Government of Bengal to allow to the representatives of the people a voice in the settlement of all questions which affect merely local wants and local interests, and which do not involve considerations of general policy. With this object it is proposed to invest Local Government bodies with a certain degree of discretion in administering such funds as may be locally available for expenditure upon medical charity. It is no part of the intention of Government to surrender any powers of supervision and control which the interests of the local public or of the State make it desirable to retain. Ample precautions will be taken to ensure that in administering medical funds, local bodies shall conform to the general policy of the Government; and though the precise measures by which this is to be carried into effect cannot be formulated till the results of legislation are known, it is the Lieutenant-Governor's intention that they shall be such as to provide a substantial guarantee against inefficiency or abuse in the future.

2. The number of dispensaries of all kinds open at the beginning of the year was 231; eight were abolished during the year, leaving 223 in existence at its close. These were classified as follows:—

| | 1882. | 1881. |
|---|---|---|
| Class I ... .. ... ... | 107 | 81 |
| „ II ... ... .. ... | 111 | 145 |
| „ III ... ... ... ... | 5 | 5 |
| Total ... | 223 | 231 |

During the year under review, therefore, 26 dispensaries were transferred from Class II to Class I, and were rendered independent of Government aid.. Of the 111 dispensaries, however, still shown under Class II as being partly supported by the State, no less than 70 have, in virtue of the Resolution of the 20th February 1882, been transferred to the charge of the municipalities within which they are situated, and are now supported by funds made available by the assumption by Government of the charges for police. Since the close of the year under review, a new system of classification has been prescribed by the Government of India, which distinguishes clearly between dispensaries which receive aid from General Revenues and those which are supported by municipalities and other Local Government bodies from public money.

3. The following table shows the amount of work done by the dispensaries in Bengal during the last two years:—

| | In-door. | | | | | | | | | | Out-door. | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | Under 25. | 25 to 50. | 50 to 75. | 75 to 100. | 100 to 250. | 250 to 500. | 500 to 750. | 750 to 1,000. | Upwards of 1,000. | Total. | Under 250. | 250 to 500. | 500 to 750. | 750 to 1,000. | 1,000 to 2,500. | 2,500 to 5,000. | 5,000 to 7,500. | 7,500 to 10,000. | Upwards of 10,000. | Total. |
| 1882 ... | 21 | 13 | 8 | 9 | 53 | 20 | 7 | ... | 2 | 133 | 1 | 1 | 4 | 11 | 78 | 73 | 32 | 10 | 16 | 225 |
| Percentage ... | 15·79 | 9·77 | 6·01 | 6 77 | 39 85 | 15·04 | 5·26 | | 1 5 | | ·44 | ·44 | 1·78 | 4 89 | 34 67 | 32 | 14·22 | 4 44 | 7 11 | |
| 1881 ... | 28 | 19 | 10 | 15 | 48 | 23 | 6 | 1 | 1 | 149 | 1 | 3 | 3 | 10 | 86 | 70 | 27 | 10 | 17 | 236 |
| Percentage ... | 18·79 | 12 75 | 6 71 | 10 07 | 30 87 | 15 44 | 4 03 | ·67 | ·67 | | ·42 | 1 27 | 1·27 | 4 24 | 36 44 | 33 48 | 11 44 | 4·24 | 7 2 | |

The Surgeon-General makes the following observations:—"Having regard to the numbers of police cases and pilgrims which these figures include, it cannot be said that the public derives much benefit from the house practice of dispensaries. Few examples, such as the Dacca, Durbhunga, Patna, and Cuttack hospitals, represent nearly all the good that is done to the sick-poor in this respect." The popularity of the European methods of treatment is of slow growth, and develops less rapidly than could be wished. It is at present confined almost exclusively to the educated and semi-educated classes, and has made but little progress among the masses of the people. There was little change in the classes and grades of medical officers in charge of dispensaries during the year. There are now 57 Assistant Surgeons and 157 Civil Hospital Assistants of all ranks so employed, against 60 and 160 in the previous year. The reduction corresponds very nearly with the total reduction in the number of dispensaries during the year. The Surgeon-General notices that attempts were made in several instances by municipalities to retain the service of medical officers of a higher grade than the work required, and he observes that, "if the power of appointment be left to governing bodies, there is little doubt that hereafter the number of Assistant Surgeons in charge of dispensaries will be largely increased, whatever the requirements of the institutions may be." For the present, the Lieutenant-Governor has ordered, in the Municipal Department Circular No. 14T—M, dated 27th October 1882, that all appointments to the charge of municipal dispensaries will be made by the Surgeon-General. The general question of the right of making appointments to dispensaries maintained by local bodies is still under the consideration of Government in connection with the general scheme of Local Self-Government.

4. Some improvement is apparent in the record of inspections performed by Civil Surgeons during the past year. The number of dispensaries which were not visited during the year was only 11; 51 were visited every day or "frequently," and 23 three times, 11 four times, and 7 more than four times during the year. The inspection reports were, on the whole, carefully prepared, and showed close criticism on all points ascertainable in this manner. At the same time the local reports too frequently confirm what has come under the Lieutenant-Governor's personal observation in many places, that the duties of inspection are seldom performed by Sub-Committees or members of the municipalities where dispensaries are under municipal control. The Magistrate and Collector, the Sub-Divisional Officer, and the Civil Surgeon are punctual in the discharge of their duty. Native members of the municipality

ignore it. There can be no doubt, as one Civil Surgeon has pointed out, that the dispensaries in which the supporters take an interest are best appreciated and frequented by the people; and in now bringing the matter forward, the Lieutenant-Governor would wish the Chairmen of all Municipalities to establish a system of weekly or monthly visitings in rotation by those who have accepted the responsibility of supervising these local hospitals.

5. The total number of patients, both in-door and out-door, treated at the charitable dispensaries throughout Bengal during 1882 was—

| | 1881. | | 1882. | |
|---|---|---|---|---|
| | Number. | Patients. | Number. | Patients. |
| Calcutta hospitals and dispensaries ... | 6 | 275,714 | 6 | 253,083 |
| Provincial ditto ditto ... | 236 | 970,978 | 225 | 957,623 |
| Total ... | 242 | 1,246,692 | 231 | 1,210,736 |

Of these, 23,468 were in-door and 934,155 were out-door patients, the corresponding numbers in 1881 being 23,444 and 947,534. The Surgeon-General considers that the inspecting officers have given much attention to records of attendance, and that some improvement in the trustworthiness of the returns has taken place. This, added to the reduction in the number of dispensaries open during the year, is sufficient to account for the apparent falling off in the numbers of patients treated. The Lieutenant-Governor is not disposed to think that there has been any real diminution in the benefits afforded to the public by the dispensaries of the province. According to recorded figures, the proportion borne by the number of patients treated to total population in each civil division was—

| | 1881. Percentage. | 1882. Percentage. |
|---|---|---|
| Burdwan ... ... ... | 2·21 | 2·26 |
| Presidency ... ... ... | 1·94 | 1 89 |
| Rajshahye ... ... ... | 1·98 | 2 05 |
| Orissa ... ... ... | 1·33 | 1·41 |
| Dacca ... ... ... | 1·18 | 1·005 |
| Chittagong ... ... ... | ·5 | ·5 |
| Patna ... ... ... | 1·94 | 1·92 |
| Bhagulpore ... ... ... | ·9 | ·84 |
| Chota Nagpore ... ... ... | ·48 | ·49 |

The percentage for the entire province was 1·38 against 1·78 in the previous year. These figures show the insignificant proportion of the population resorting to dispensaries.

6. Of the total number of patients treated during the year, 60·39 per cent. were adult males, 16·84 per cent. were adult females, and 22·76 children of both sexes. Out of every 100 patients ·08 were Europeans, ·29 Eurasians, 31·44 Mahomedans, 66·32 Hindus, and 1·86 Others. These figures do not differ materially from those of previous years. The relative proportions of Hindu and Mahomedan patients accord closely with those of the total populations of those religions as ascertained at the Census of 1881. The mortality among in-patients, as usual, varied enormously in different dispensaries, being 93·15 per cent. at Goalundo and 45·45 per cent. at Ranaghat, against 1·96 at Madaripore and 2·72 at Palamow. The general death-rate was almost the same as in the two preceding years. As was stated in the Resolution recorded last year, no inferences of any value are to be deduced from these figures as to the management or healthiness of any particular institution.

7. The use of cinchona febrifuge continues to make rapid progress, the quantity sold during 1882-83 being 423lbs. against 323lbs. in 1881-82 and 163lbs. in the year before. The Surgeon-General points out that the increase was less marked than in the previous year, in consequence of the diminution in the prevalence of epidemic fever in 1882.

8. The total income and expenditure of the dispensaries of the province during the year are shown in the following table:—

| | Rs. | A. | P. |
|---|---|---|---|
| *Income.* | | | |
| Cash balance on 1st January 1882 ... ... | 64,412 | 6 | 8 |
| From Government— | | | |
| As salaries ... ... ... ... | 33,351 | 0 | 6 |
| „ registers and forms ... ... ... | 1,219 | 9 | 3 |
| „ European medicines ... ... ... | 582 | 5 | 1 |
| For diet of police cases ... ... ... | 1,392 | 15 | 3 |
| Sale of medicines ... ... ... | ...... | | |
| Special allowance from Government ... ... | 4,723 | 4 | 6 |
| Total ... | 41,269 | 2 | 7 |
| From local or other funds ... ... ... | 49,211 | 12 | 5 |
| „ municipal funds ... ... ... | 89,189 | 4 | 5 |
| Interest on investments ... ... ... | 29,035 | 8 | 2 |
| Sale of securities or withdrawal of deposits ... | 24,127 | 5 | 0 |
| European subscriptions ... ... ... | 18,856 | 7 | 4 |
| Native subscriptions ... ... ... | 1,18,544 | 12 | 0 |
| Total Income ... | 4,34,646 | 10 | 7 |
| *Expenditure.* | | | |
| On establishment ... ... ... | 2,17,396 | 8 | 4 |
| „ bazar medicines ... ... ... | 9,437 | 1 | 6 |
| „ Europe medicines, whether from Government store or purchased otherwise .. .. | 34,128 | 10 | 7 |
| „ diet ... ... ... | 30,957 | 0 | 4 |
| „ miscellaneous charges ... .. ... | 26 299 | 12 | 7 |
| „ buildings and repairs ... ... ... | 27,540 | 5 | 0 |
| Invested during the year ... ... ... | 19,758 | 0 | 4 |
| Total Expenditure ... | 3,65,517 | 6 | 8 |
| Cash balance on 31st December 1882 ... | 69,129 | 3 | 11 |

A comparison of these figures with those of the previous year illustrates the effect of the orders of Government transferring the charges on account of dispensaries and hospitals to the municipalities within which they are situated. In 1882 the total sum paid by Government in various forms towards the support of dispensaries, including the salaries of medical officers, was Rs. 41,269. In the previous year the sum contributed by Government had been Rs. 1,06,384, so that the new policy has resulted in a reduction of the charge hitherto borne by Government of Rs. 65,115. It is stated also that the charge for special allowances from Government, which amounted to Rs. 4,723, will almost entirely disappear from the accounts of 1883. The total amount of the annual charges which will thus have been thrown upon municipalities will therefore come to a little more than Rs. 70,000. The same Resolution which transferred to municipalities the expenditure incurred on dispensaries, also relieved those bodies of charges on account of police, which aggregate upwards of Rs. 4,40,000 per annum. The effect of the double transfer has, therefore, been to place at the disposal of municipalities a net sum of Rs. 3,70,000 per annum for expenditure on other public objects.

9. The invested capital of the dispensaries of Bengal on the 1st January 1882 amounted to Rs. 8,41,775. A sum of Rs. 19,758 was invested during the year, while securities were sold to the amount of Rs. 38,000, and deposits withdrawn to the extent of Rs. 22,127. The closing balance of the invested capital, therefore, amounted to Rs. 8,01,405. The cash balance, on the other hand, increased from Rs. 64,412 to Rs. 69,129. The payments by Government on account of salaries of medical subordinates fell from Rs. 87,477 in 1881 to Rs. 33,351 in 1882, and the special allowances from Rs. 15,038 to Rs. 4,723. These reductions were due to the interchange

of medical and police charges already referred to. The receipts from local sources, other than municipalities, were Rs. 49,211 against Rs. 45,695 in the previous year; while the receipts from municipalities rose from Rs. 36,152 to Rs. 89,159. The interest on investments amounted to Rs. 29,035, being a reduction of Rs. 4,395 from the receipts of the previous year. This was due to the large amount of securities sold or withdrawn during the year. Among other sums, the endowment of the dispensary at Natuda, which amounted to Rs. 36,000, was refunded to the proprietor on the closure of the institution. The subscriptions from Europeans and Natives amounted to Rs. 18,856 and Rs. 1,18,544 respectively, against Rs. 20,022 and Rs. 1,27,786 in 1881. In some dispensaries it is reported that subscriptions have fallen largely into arrears, and that subscribers have made the transfer of the institutions to municipalities a pretext for refusing to pay. The Lieutenant-Governor hopes that it will not be long before a truer view prevails of the claims of dispensaries under local management, and that the transfer which has been made will ultimately prove, not a drawback, but a stimulus to local liberality.

10. The gross expenditure on dispensaries reported by the Surgeon-General during 1882 was Rs. 3,45,759 against Rs. 3,74,283 in the previous year. The reduction was shared by all items of expenditure, except cost of diet, which shows a small increase. The cost of establishment was reduced by Rs. 23,147, which was chiefly due to the closure of dispensaries, the dismissal of superfluous servants, and the adjustment of salaries of medical officers. Bazar medicines cost Rs. 9,437 against Rs. 9,956, and Europe medicines Rs. 34,128 against Rs. 36,114. Of the 223 dispensaries remaining open at the close of the year, no less than 104 elected to obtain their medicines independently of the Medical Store Department. The cost of diet was Rs. 30,957 against Rs. 29,104, the average cost of each diet varying from 3 annas 6 pies to 6 pies.

11. The report, which is supplemented by a number of abstracts from the Civil Surgeons' reports, showing the details of working of each dispensary, is submitted by Dr. Simpson, who took over charge of the Surgeon-General's office after the close of the year under review. The Department was in charge of Dr. Payne throughout the year.

# Report on the Charitable Dispensaries

UNDER THE

# GOVERNMENT OF BENGAL

## FOR THE YEAR 1883.

FROM THE OFFG. SURGEON-GENERAL FOR BENGAL,

TO THE SECRETARY TO THE GOVERNMENT OF BENGAL,
MEDICAL AND MUNICIPAL DEPARTMENT.

*Calcutta, the 21st August* 1884.

SIR,

I HAVE the honour of reporting on the working of the charitable dispensaries of Bengal during the year 1883.

2. The most conspicuous points in dispensary administration during the past year have been the passing of a large number of the institutions into the hands of municipalities, the opening of some new dispensaries, and the re-opening of others which had been closed as useless, or for financial reasons.

3. The progress mentioned in former reports in the teaching of the medical subordinates, on whose qualifications and conduct the efficiency of dispensaries depends, has continued. The year 1883 brought to an end the old system under which Government had bound itself to admit to its service as an Assistant Surgeon every candidate who should pass the Licentiates' examination. The consequence of this was the accumulation of a large number of Assistant Surgeons for whom no employment could be found, and who, remaining for years on the pay of a supernumerary, naturally became dissatisfied. The number has been considerably reduced by resignation and otherwise, but it is still large, and the remoteness of the prospect of substantive employment has a depressing effect. No new admissions have been made this year, and as the number of unemployed men will slowly diminish, it will, I hope, be possible shortly to improve the position of those now on the rolls. Not only do these men suffer from protracted low pay, but their service, which qualifies for pension, does not commence until they are appointed to permanent charges. It follows that there are at the present time on the list Assistant Surgeons who have served nearly long enough for promotion to the second grade, and have officiated in important posts, but who have reverted to supernumerary pay for no fault of their own, and have not yet begun to earn a claim to pension or any of the privileges of recognized service.

4. The same satisfactory account which I gave last year may be given again of the pupils of the hospital assistant class, trained in the Campbell school. In the report for 1881 this subject was treated at some length, and the same practical tests have drawn this year from unbiassed examiners the same favourable opinions as were then recorded. Notwithstanding that few recruits for the Government service have been recently taken from this school, the number of its pupils has steadily increased, and at the close of 1883 there were 190 in the classes—a number less, by ten only, than the maximum allowed by

Government. Tea plantations, railways, and other sources of employment have offered attractions which have probably prevented the scarcity of appointments to the service from being felt as an evil. The scarcity has arisen in this manner: There have been strong reasons for resorting to the Patna school for filling vacancies. There has been a want of Mahomedans in the service, and it was probable that the pupils of this school would supply this want and furnish a good class of men for service in Behar. Their great disadvantage was the want of English education, and an attempt was made to correct this by asking sanction for an English tutor for the school. The attempt was unsuccessful; but application for service in considerable numbers had been received from Patna, and, for the other reasons mentioned, men were admitted from the school, which had always enjoyed a reputation for success in preparing its pupils. On the whole, however, recruitment from Patna cannot yet be pronounced satisfactory. In Bengal proper, complaint is made that the hospital assistants are, many of them, ignorant of the vernacular. Everywhere their inability to speak and write English is a ground of complaint, as many of them are required to take executive charge of subsidiary jails. Lately also the professional ability and conduct of some of the most promising men from Patna have been severely noticed.

5. This year the vacancies in the service have been filled almost entirely from the Campbell school, and it is particularly satisfactory to note that with the great improvement in professional training the standard of English qualification is advancing among them. Students with the University entrance qualification have increased in number, as have those possessing the minor or middle English certificates.

6. Of the old service of hospital assistants I cannot report favourably. There are good men among them, but the average is very low indeed, and the difficulty of carrying on the duties of this branch of the service is often very great from the number of men it contains who have no sense of duty whatever, who evade or defiantly protest their inability to obey orders which happen to be unpalatable to them, and who employ every artifice of falsehood and chicanery to gain their ends. The work and liabilities of such men fall of necessity on the shoulders of better men, and then my inability to punish adequately or get rid of habitual offenders forces me to sanction injustice to the working men of the service, and prevents me from using the opportunity of raising the character and quality of the service which would otherwise be afforded by the presence of superior men waiting for admission.

7. In 1883 a reform of the sub-divisional medical administration of the province was undertaken which will have material effect on its dispensaries. The scheme is now complete and is in course of being carried out. Some account of it, therefore, is due in this place. There had been no organized method of providing for the medical wants of sub-divisions: no classification or adaptation of means to requirements. In some places dispensary doctors had been used for Government work, and in others Government doctors for dispensary work without adjustment of pay. In a third class two medical men were employed where the work was not enough for one, and in a fourth the reverse obtained. Subsidiary jails had been entrusted to the executive care of medical subordinates, and irregular salaries sanctioned in former years had destroyed all equality of preferment in the several grades. So far as the dispensaries were separately concerned, the new rules restored statutory equality in this last respect, and time would equalize practice; but there remained excess of work in some places and excess of men in others. Sub-divisions, which in former years had been important places, had grown insignificant, and others, with nothing to distinguish them before, had become commercial and industrial centres now. Above all, the local self-government scheme required that there should be clear definition of the charges to fall on the Government and on the local bodies. To make this definition, and to provide against superfluity or insufficiency of medical officers, it was necessary first to classify sub-divisions and to declare the class of medical officer which Government would provide for the public duties of each, as distinguished from dispensary charges. The unit, on the one side, was a third class hospital assistant, and on the other a sub-division in which nothing was added to the ordinary Government establishment of a kind to give importance to the place. Special

local circumstances were considered, and a graduated scale of sub-divisions was formed, each receiving a medical officer of corresponding grade, from the lowest hospital assistant up to the fully qualified uncovenanted Surgeon on the one side, and from the smallest sub-division to places resembling a sudder station on the other.

8. In every case the medical incumbent is to hold the sub-division as his substantive charge and to receive from Government his grade pay on that account, whether the sub-division or the dispensary has been his substantive charge hitherto. If the governing body of the dispensary desires for its service an officer of higher grade than is allowed for the sub-division, such an officer will be appointed to the sub-division, and will receive from the governing body the difference between his grade pay and the standard pay of the sub-divisional officer whom he may replace. If the governing body is content to employ the appointed officer of the sub-division, it may do so, paying him the authorized allowance for the additional charge, viz. Rs. 20 for an Assistant Surgeon and Rs. 10 for a hospital assistant. By placing medical subordinates entirely in the hands of municipal bodies, who have the disbursement of all funds, there can be no doubt that they would have become practically independent of departmental authority, and the past year has not been wanting in examples of their quickness to perceive this. The payment of bills without the countersignature of the Civil Surgeon must and will lead to abuses. It has done so already where rules have been ignored and medicines have been purchased without authority. But under the sub-divisional scheme the medical officer will hold his appointment from Government, and the dispensary will be an adjunct. Removal for misconduct will thus be possible at all times, and such control as would have been lost under the late system will be recovered. This is an important matter for conduct, which, from an administrative point of view, renders removal most necessary, is often the very conduct which secures local popularity and makes removal through a local body impossible. Some cases having been brought to notice during the past year which served to shew abuse of the liberty of purchasing medicines from private dealers, it was desirable to ascertain whether such doings had been common, and a circular was issued for the purpose of ascertaining how far check on indents had been practiced by Civil Surgeons, and what opinions had been formed on the general merits of the system. The replies are on the whole very favourable to the system. Up to the present time 150 dispensaries have elected to obtain their medicines from private sources. Some Civil Surgeons obtain their supplies from wholesale dealers in England: in other places the committees choose their own purveyors or leave it to the medical subordinate, and the result is less satisfactory. Native vendors are employed who do not seem to command the Civil Surgeon's confidence, and there are recorded cases in which the supply of drugs received and accepted has been smaller than the quantity sanctioned and paid for. This of course can only occur when there is either collusion or gross neglect on the part of the native doctor in charge. In other places an inclination to purchase from local shopkeepers is reported, to which the Civil Surgeon makes strong and reasonable objection. It must be said, however, that all these cases are exceptional: they are not at all more numerous than would have been expected, and are within the corrective power of the District Surgeon. So far as the system of private purchase has gone, it has given satisfaction on the whole to local officers, and it is extending.

Azimgunge.
Tahirpore.

9. This table shews a difference of seven in the number of dispensaries at the beginning and end of the year resulting from the sanction of 11 new and the closure of four old dispensaries. Of the first group, two places, viz. Kishoregunge and Soopole, had previously had dispensaries, but they proved to be of no use to the sick-poor, and were closed by order of Government in 1881. The rest have been sanctioned, I conclude, as a concession to municipal independence. With the exception of Oolooberia there is, I think, no place on the list where it has been shewn that the sick-poor either desire a dispensary or will use one. The reasons for applying for sanction are probably the same as those which led in former years to the establishment of scores of dispensaries which evidently did not exist for the poor and which were in course of gradual abolition when local self-government was inaugurated. In some recent cases the object has been to provide for a particular native doctor, and his appointment being disallowed, the desire for a dispensary has ceased. Past experience does not support any sanguine expectation that the new dispensaries will be useful as medical charities; but the money cost of them to the State will be confined to the travelling charges of inspecting officers and an enlarged pension list for medical subordinates; but if the number should increase very largely, inspection will be found to cause inconvenience in sudder station by withdrawal of Civil Surgeons from important duties.

10. In resolution dated 7th May 1883, No. 3, the Government of India laid down a new method of classifying dispensaries adapted to the system of transfer to municipalities. This classification has been followed in statement No. I of the appendix. It was ordered at the same time that local Governments and Administrations should be free to adopt any other form of classification and any cross-divisions which they might consider most convenient for administrative purposes.

| | | | |
|---|---|---|---|
| Monthly, or more frequently... | 13 | Three times ... ... | 4 |
| Eleven times ... ... | 1 | Twice ... ... | 6 |
| Ten " ... ... | 6 | Once ... ... | 8 |
| Nine " ... ... | 6 | None held, or no record of them | 19 |
| Eight " ... ... | 6 | No committee ... ... | 27 |
| Seven " ... ... | 8 | Under municipalities ... | 102 |
| Six " ... ... | 9 | | |
| Five " ... ... | 2 | Total ... | 223 |
| Four " ... ... | 6 | | |

11. The meetings of committees in 1883 are shewn in the above statement On the theory of monthly meetings the record says but little for the sense of responsibility entertained by committees, but it is satisfactory to note that, with the total number greatly reduced by transfer, the proportion of dispensaries showing more frequent meetings is much larger than in the previous year.

TABLE No. 2.

*Shewing the work of Dispensaries grouped in the order of number treated.*

| | In-door. | | | | | | | | | | Out-door. | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | Under 25. | 25 to 50. | 50 to 75. | 75 to 100. | 100 to 250. | 250 to 500. | 500 to 750. | 750 to 1,000. | Upwards of 1,000. | Total. | Under 250. | 250 to 500. | 500 to 750. | 750 to 1,000. | 1,000 to 2,500. | 2,500 to 5,000. | 5,000 to 7,500. | 7,500 to 10,000. | Upwards of 10,000. | Total. |
| 1883 ... ... | 18 | 14 | 11 | 11 | 50 | 18 | 6 | 1 | 1 | 130 | .. | 1 | 3 | 11 | 75 | 75 | 32 | 10 | 16 | 223 |
| Percentage ... | 13·85 | 10·77 | 8·46 | 8·46 | 38·46 | 13·85 | 4·61 | ·77 | ·77 | ... | ... | ·45 | 1·35 | 4·93 | 33·63 | 33·63 | 14·35 | 4·48 | 7·17 | ... |
| 1882 ... ... | 21 | 13 | 8 | 9 | 53 | 20 | 7 | .. | 2 | 133 | 1 | 1 | 4 | 11 | 78 | 72 | 32 | 10 | 16 | 225 |
| Percentage ... | 15·75 | 9·77 | 6·01 | 6·77 | 39·85 | 15·04 | 5·26 | ... | 1·5 | ... | ·44 | ·44 | 1·78 | 4·89 | 34·67 | 32 | 14·22 | 4·44 | 7·11 | ... |

12. The insignificance of the house practice of dispensaries has always been marked in this return. It was very strongly marked in 1883. The number of dispensaries which received house-patients was reduced by three from that of the previous year and the general health of the province was better; but these

facts afford no explanation of the record in which the numbers of the more useful dispensaries fall and those of the less useful rise, and the entire number of patients are so small as to forbid any association of them with the general health of neighbourhoods, excepting such hospitals as those of Dacca, Durbhunga, Patna, and Cuttack.

## Table No. 3.

*Shewing grade of officers in charge of Dispensaries.*

| | 1883. | | 1882. | |
|---|---|---|---|---|
| House Surgeon, Dacca ... ... ... ... | | 1 | | 1 |
| Assistant Surgeon, first grade ... ... ... ... | 1 | | 4 | |
| Ditto, second " ... ... ... ... | 7 | | 10 | |
| Ditto, third " ... ... ... ... | 42 | | 43 | |
| | — | 50 | — | 57 |
| Medical graduate of East Indian Railway service ... ... | | 1 | | 1 |
| Civil hospital assistants ... ... ... ... | | 164 | | 157 |
| Native doctors (private practitioners) in charge of first class institutions ... ... ... ... ... | | 7 | | 7 |
| Total ... | | 223 | | 223 |

13. This table does not note the fact that the Civil Surgeons of Dacca and Cuttack are Superintendents of the Hospitals there, and that in many sudder stations the dispensaries are daily visited by Civil Surgeons. The change in the disposition of officers in 1883 was not important, nor is it likely that any great change in this particular will attend the working of the new sub-divisional scheme. Some sub-divisions will pass into the hands of superior officers in charge of dispensaries, but there will be little change of incumbency in the dispensaries themselves.

## Table No. 4.

*Inspection by Civil Surgeons.*

| | Daily or frequently. | More than four times | Four times. | Three times. | Twice. | Once. | Not inspected. | No information received. | Total. |
|---|---|---|---|---|---|---|---|---|---|
| Inspected by Civil Surgeon, 1883 .. ... | 50 | 6 | 12 | 23 | 67 | 51 | 10 | 4 | 223 |
| Ditto ditto, 1883 .. ... | 51 | 7 | 11 | 23 | 78 | 43 | 11 | 1 | 225 |

14. The record of inspections in 1883 does not compare favourably with that of 1882. Inspection reports were on the whole satisfactory in respect of points ascertainable in this manner. Order and cleanliness were general, and books were fairly well kept in most places; but there is still something to be done before hospital assistants will be induced to make true and uniform returns of their work. Frequent changes of person are unavoidable, and uniformity of practice difficult, to secure, even in the part of the work that is most clearly defined by rules.

## Table No. 5.

*Numbers of Patients treated in 1883 and seven previous years, and ratio per cent. of mortality among in-patients.*

| | In-patients treated. | Out-patients treated. | Total. | Mortality among in-patients per cent |
|---|---|---|---|---|
| 1876 ... ... ... ... ... ... ... ... ... .. | 23,757 | 829,804 | 853,561 | 16·96 |
| 1877 ... ... ... ... ... ... ... ... ... .. | 23,954 | 875,631 | 899,585 | 17·34 |
| 1878 ... ... ... ... ... ... ... ... ... ... | 28,473 | 927,783 | 956,256 | 20·01 |
| 1879 ... ... ... ... ... ... ... ... ... ... | 24,847 | 865,995 | 890,842 | 17·78 |
| 1880 ... ... ... ... ... ... ... ... ... ... | 23,567 | 888,095 | 911,662 | 15·17 |
| 1881 ... ... ... ... ... ... ... ... ... ... | 23,444 | 947,534 | 970,978 | 15·8 |
| 1882 ... ... ... ... ... ... ... ... ... .. | 23,468 | 934,155 | 957,623 | 15 75 |
| 1883 ... ... ... ... ... ... ... ... ... ... | 22,468 | 915,753 | 938,221 | 14·13 |

15. The total numbers here entered do not differ materially from those of previous years, nor do they shew any relation with the requirements of the province. That no connection between public health and dispensary practice has existed has been seen in districts visited by epidemic sickness. In such places, though local officers have made most urgent demands for medical aid, and Assistant Surgeons and hospital assistants have been scattered in numbers through their districts, the fixed dispensaries have as a rule remained as empty as in the healthiest years. They have given no indication of anything unusual, either before, during, or after very devastating sickness has prevailed. Nevertheless year after year a few scores of dispensary patients here and there are gravely put forward in district reports, as though a rise or fall in units were an event in the health of millions. I am bound to say, however, that a native subordinate, though he generally traces a fall in numbers to improvement in the public health, as generally finds that the cause of an increase is the growing popularity of the dispensary. The more valuable institutions have shewn clearly enough that they supply a public want by the manner in which their practice has varied with the public health.

16. The death-rate among dispensary patients has, as before pointed out, no technical meaning as a whole. The best of institutions includes some hospitals which can, if necessary, contribute useful facts of mortality; but the general figure includes also many houses which are mere refuges for dying pilgrims and others, where old and disabled paupers find a home. The appended notes on particular dispensaries give full information as to the circumstances which have determined high death-rates where they have occurred.

18. This table by the great diversity of rates recorded illustrates the remark just now made on the general death-rate in dispensaries. To give in detail explanations of the higher rates here would be to add uselessly to the length of this report by reproducing the facts noted with full particulars in the appended summaries of district reports.

TABLE No. 11.

*Sale of Cinchona Febrifuge in* 1883-84.

| Year. | Cinchona Alkaloid. Quantity sold. lb. | oz. | dr. | Value. Rs. | A. | P. |
|---|---|---|---|---|---|---|
| 1883-84 | 286 | 0 | 0 | 4,729 | 0 | 0 |
| 1882-83 | 423 | 8 | 0 | 6,967 | 0 | 0 |
| 1881-82 | 323 | 0 | 0 | 5,349 | 0 | 0 |

19. This statement has been introduced into the dispensary report, as the subject has interest, and, in common with some other matters affecting medical administration in the interior, finds no place of record elsewhere. The sale is

not connected with dispensary practice, but stands a sort of inverse relation to it, being directly determined by the prevalence or otherwise of climatic fevers. The latter certainly, as measured by the events in places of epidemic visitation, was not severe or widespread in 1883, and the sale of the febrifuge fell.

20. *Finance.*—The following table exhibits the income and expenditure of the dispensaries during the year 1883 :—

TABLE No. 12.—PART I.

| „ buildings or repairs ... ... ... | 42,369 | 6 | 9 |
| Invested during the year ... .. ... | 17,468 | 11 | 0 |
| Total Expenditure ... | 3,77,815 | 2 | 2 |
| Cash balance on 31st December 1883 ... | 73,935 | 13 | 3 |

21. *Opening balance.*—On 1st January 1883 there remained a cash balance of Rs. 67,217 from the preceding year. This amount is less than the closing balance of 1882 by Rs. 1,912. The closure of four dispensaries, from which no returns were received, accounts for Rs. 579, and one dispensary shewed Rs. 19 less than the amount in 1882. The remainder, viz. Rs. 1,314, is part of the total of several amounts which were omitted altogether in the returns of five existing dispensaries, all of which are municipal institutions. The total omission of these five dispensaries amounted to Rs. 2,017; but Rs. 704 of this has been balanced by small increases being shewn in the returns of eight other dispensaries, aggregating Rs. 6, and by Rs. 697 being returned by a newly established dispensary as an opening balance which were not shewn in the accounts of 1882. The Rs. 2,017 were absorbed into municipal funds, relieving them of so much expenditure on medical charities, but by their omission from the statement this relief is not made apparent.

22. *Receipts from Government.*—The total receipts from Government amounted to Rs. 39,511 in 1883 against Rs. 41,269 in the previous year and

Rs. 1,06,384 in 1881, or of the total expenditure 10·9 per cent., 11·9 per cent., and 28·4 per cent., respectively. These amounts are composed as follow:—

| | | 1881. | 1882. | 1883. |
|---|---|---|---|---|
| | | Rs. | Rs. | Rs. |
| Municipal institutions ... | ... | 78,303 | 24,434 | 25,017 |
| Other ditto ... | ... | 28,081 | 16,835 | 14,494 |
| Total | ... | 1,06,384 | 41,269 | 39,511 |

If we deduct from the former set of figures the cost of registers and forms and diet of police cases, as it constitutes contribution which Government will continue to give under any circumstances, we find that Government contributed to institutions that are now considered to be municipal Rs. 75,817 in 1881, Rs. 22,475 in 1882, and Rs. 22,834 in 1883. These figures are composed of the following items:—

| | | 1881. | 1882. | 1883. |
|---|---|---|---|---|
| | | Rs. | Rs. | Rs. |
| As salaries ... | ... | 61,797 | 18,421 | 6,190 |
| ,, special allowances | ... | 13,895 | 4,054 | 16,644 |
| ,, medicines ... | ... | 125 | ...... | ...... |

The lakh of rupees of Government contribution towards dispensaries situated within municipal limits, which was burdened on municipal funds by the orders of 20th February 1882, was not actual. The real amount was Rs. 75,817—the figure of 1881,—and of this Government was only relieved of Rs. 53,342 in 1882 and Rs. 52,983 in 1883. Under the terms of the Government resolution, Government aid should disappear altogether. This is what I anticipated in my report last year, but the Government contribution still continues, and in 1883 Rs. 6,190 were given towards salaries against Rs. 18,421 in 1882; and Rs. 16,644 as special allowances against Rs. 4,054. For the Rs. 6,190 given towards salaries there is no sufficient explanation. In a few cases special orders of Government have issued, which authorize Government payment under this head to be continued. Of the Rs. 16,644, Rs. 12,719 was apparently spent in giving the Mitford Hospital buildings a thorough repair in accordance with Government orders issued in 1882, Rs. 3,883 on the repairs of the buildings of the Pooree dispensary, and Rs. 42 as the cost of the travelling allowance of the Assistant Surgeon of the Sasseram dispensary on the occasion of his examination in Calcutta for promotion. This last item should not have appeared in the accounts of the Sasseram dispensary.

23. To the appendix I have added a financial statement of all dispensaries situated within municipal limits Of these several have not been as yet formally vested in municipalities, but I have counted only all those dispensaries towards the support of which municipalities have contributed as municipal institutions. The remaining 10 are exceptionally circumstanced, being largely endowed or entirely supported by rich proprietors. Of these, one—the Cuttack hospital,—the Government contributed Rs. 2,400 in 1883 towards its expenses.

24. The Government contribution towards dispensaries that are not considered municipal institutions consisted of the following items:—

| | | 1881. | 1882. | 1883. |
|---|---|---|---|---|
| | | Rs. | Rs. | Rs. |
| As salaries | ... | 25,680 | 14,930 | 12,231 |
| ,, registers and forms | ... | 979 | 495 | 665 |
| ,, Europe medicines | ... | 179 | 582 | 247 |
| For diet of police cases | ... | 99 | 158 | 103 |
| As special allowance | ... | 1,144 | 670 | 1,248 |
| Total | ... | 28,081 | 16,835 | 14,494 |

There was reduction in every item but two. The total fall from 1882 was Rs. 2,341, due to the closure of four Government aided dispensaries.

25. *Income from local sources—local or other funds.*—The income from local or other funds was Rs. 44,672, against Rs. 49,211 in 1882 and Rs. 45,695 in 1881.

Of these municipal institutions received Rs. 18,220 in 1883, Rs. 24,039 in 1882 and Rs. 17,845 in 1881. There was therefore a reduction under this head in municipal institutions to the amount of Rs. 5,819 in 1883 as compared with 1882. In the other institutions there was an increase of Rs. 1,280. In the accounts of several municipal institutions no figures are shewn in 1883 under this head, while such figures were given in the previous years. The sums which may have been received in these dispensaries may have been credited to municipal funds as municipal revenue, but as this class of income certainly helps to reduce the municipal expenditure, the omission of any portion of the total amount under its heading in the statement of account helps to shew in it increased municipal expenditure which did not actually come out of pure municipal funds.

26. *Subscriptions.*—Subscriptions from Europeans and natives amounted to Rs. 18,045 and Rs. 1,15,713 respectively. Comparison with the previous two years is shewn in the following table:—

| | 1881. | | 1882. | | 1883. | |
|---|---|---|---|---|---|---|
| | E. | N. | E. | N. | E. | N. |
| | Rs. | Rs. | Rs. | Rs. | Rs. | Rs. |
| Municipal institutions ... | 16,660 | 49,929 | 15,519 | 40,365 | 14,108 | 39,170 |
| Other ditto .. | 3,362 | 77,857 | 3,337 | 78,179 | 3,937 | 76,543 |
| Total ... | 20,022 | 1,27,786 | 18,856 | 1,18,544 | 18,045 | 1,15,713 |

We have therefore as total public subscriptions to dispensaries that are not considered municipal institutions Rs. 81,219 in 1881, Rs 81,516 in 1882, Rs. 80,480 in 1883. The small differences do not call for remark. In municipal institutions the entire subscriptions amounted to Rs. 66,589 in 1881, Rs. 55,884 in 1882, and Rs. 53,278 in 1883. Here the large yearly reductions are very noticeable. It is true that the public may have reduced their contributions, as it was probably felt that the charities should be supported out of municipal funds, which are obtained chiefly from the taxes locally imposed. This feeling will no doubt cause a reduction year by year under this head of income; but there is much reason to suppose that a large amount may have been received and absorbed as municipal revenue, but not shewn in the annual statement of account from an erroneous idea that it is not necessary to do so. I find in very many institutions nothing shewn under this head in 1883, though there were figures returned in the previous year, and nothing shown in 1882 and 1883, though large figures were returned in 1881, the year which was unaffected by the resolution of Government transferring the support of these medical charities on municipal bodies. Here again the omission of the figures under this head would have the effect of shewing increased municipal contribution which was not actually paid from pure municipal funds. In 1882 the fall amounted to Rs. 10,705, in 1883 to Rs. 2,606, or a total of Rs. 13,311 in these two years of municipal government.

27. *Sale of securities, &c.*—The amount received by sale of securities and withdrawal of deposits was Rs. 15,623 against Rs. 24,127 in 1882 and Rs. 17,942 in 1881. Of these amounts municipal institutions received Rs. 10,904, Rs. 19,074, and Rs. 13,695, respectively, amounts which materially relieved the municipal funds.

| | Municipal dispensaries. | | | Other dispensaries. | | |
|---|---|---|---|---|---|---|
| | 1881. | 1882. | 1883. | 1881. | 1882. | 1883. |
| Amount received from— | Rs. | Rs. | Rs. | Rs. | Rs. | Rs. |
| Sale of securities ... | 2,109 | 2,000 | 3,995 | ... | ... | ... |
| Deposits withdrawn ... | 11,586 | 17,074 | 6,909 | 4,247 | 5,053 | 4,719 |
| Total ... | 13,695 | 19,074 | 10,904 | 4,247 | 5,053 | 4,719 |

It appears that Government paper to the value of Rs. 4,000 was sold in the interests of municipal institutions in 1883 and of Rs. 2,000 in 1882. In 1883 securities to the value of Rs. 1,000 are said to have been made over to

the municipality of Satkhira. Whether this was effected by sale or not, is not reported. I have taken it merely as a transfer to their custody since it is excluded from the amount under the heading in question. I have therefore held it still to the credit of the dispensary. The question arises whether the municipal commissioners have the power of withdrawing invested capital of the medical charities under their care and of selling its Government securities. Rule 9, section III, of the Dispensary Rules provides, in the case of dispensaries vested in municipalities, that the subscriptions, donations, and the interest on endowments will be credited to the municipal funds; but as regards the investments it says that though they are transferred to and vested in the commissioners as trustees, they should be held in the custody of the Comptroller-General, apart from municipal funds. The proceeds of the sale of securities, being a class of income, are credited to municipal funds as all receipts are; and in time if this sale continues, all the amount now held apart from municipal funds will be absorbed in those funds.

28. *Interest on investments.*—The interest received on investments was Rs. 27,911 against Rs. 29,035 in 1882 and Rs. 33,430 in 1881, of which municipal institutions received respectively Rs. 17,506, Rs. 18,487, and Rs. 21,988. These large amounts materially assist municipal funds in the support of the medical charities, for the entire expenditure of which those funds are responsible.

29. *Municipal contribution.*—Municipalities contributed Rs 1,23,057 against Rs. 88,663 in 1882 and Rs 49,417 in 1881. The figure of 1881 represents voluntary contribution before the resolution of February 1882 imposed the increased charges estimated at a lakh of rupees. Subtracting this figure from the figures of the two subsequent years we find that, instead of the estimated lakh of rupees, only Rs. 73,640 and Rs. 39,246 were spent from municipal funds as a result of the resolution in each of the years respectively.* The total expenditure of municipal institutions, excluding the amount representing investments during the year, was Rs. 2,34,683 against Rs. 2,15,677 in 1882. The total income from other sources, including the opening cash balance, amounted to Rs. 1,61,317 in 1883 and Rs. 1,78,445 in 1882, so that the more correct figures of the total municipal contribution would be Rs. 73,366 in 1883 and Rs. 37,232 in 1882, if Rs. 8,118 and Rs. 13,025 were not invested in the years respectively, and Rs. 41,573 and Rs. 38,406 not held as cash closing balances. The investment of surplus money of municipal institutions is an accumulation which is virtually taken from municipal funds, and keeping large closing balances add to the municipal disbursement on paper. The amount of municipal contribution is therefore misrepresented in the statement of account, that is to say, it is not actual. This system of shewing the accounts should cease. The simple plan would be, since municipalities are responsible for all expenditure, to shew the correct municipal contribution which would be the difference of the total actual expenditure and the total income from other sources. But the figures drawn out under this examination to represent the more correct municipal contribution should be still smaller. I have shewn that an amount of Rs. 2,017, representing a portion of the correct opening cash balance, has been entirely omitted from the statement of account. If this were put in its place the municipal contribution for 1883 should have been Rs. 71,349 instead of Rs. 1,23,057—the amount returned. I have also shewn that it is very probable that large amounts of money received as subscriptions and from other local sources have been omitted in the financial statement. If this be true, as it appears to be, it is clear that if the amounts were entered, the municipal contribution would have been lessened still more, for the income of the dispensary would have increased by those amounts. It is very necessary therefore that a proper and uniform system of account should be submitted by all municipal institutions. The entire income of the dispensary is perhaps strictly speaking municipal revenue, and is credited to municipal funds; but the entire amount should certainly be shewn under the several headings of the financial yearly statement submitted to this office in accordance with rule 9 of section III of the Dispensary Manual, which requires that a separate account of the receipts of a municipal dispensary should be kept. An omission of any portion of it affects the correctness of the statement, and renders it useless for administrative purposes.

30. *Expenditure.*—The gross expenditure of the dispensaries in 1883 amounted to Rs. 3,60,347 against Rs. 3,45,759 in 1882 and Rs. 3,74,283 in 1881, exclusive of the amounts invested. The increase is to be observed in all items of expenditure, except of establishment, which shews a reduction of Rs. 6,972. Bazar medicines cost Rs. 10,258 against Rs. 9,437 in 1882, and Europe medicines Rs. 35,434 against Rs. 34,129. Medical stores were obtained from Government Store Department and from private druggists. Of the 223 dispensaries that remained open at the end of the year, 150 elected to obtain medicines from private sources. The value of medicines supplied to dispensaries entirely supported by Government was Rs. 247. The total amount advised by this office in 1883 for the recovery of the value of Government medical stores by the Accountant-General through the Collectors of the districts was Rs. 6,045, inclusive of Rs. 1,158, the value of cinchona febrifuge supplied from the Botanical Gardens. Deducting this amount, plus Rs. 247 mentioned above, the balance (Rs. 29,142) represents the estimated value of medical stores locally purchased by 150 dispensaries. Against this is contrasted Rs. 6,045—the value of medical stores purchased from the Government depôt by 68 dispensaries. The difference in the value of the former is more than double the value of the latter. The cost of diet was Rs. 33,608 against Rs 30,957 in 1882, or an increase of Rs. 2,651. The total daily average number of in-patients in 1883 was 1,054·9 against 1,037·9 in 1882, and the increase in the cost of their diet was apparently due to dearness of provisions in 1883. The average cost of each diet varied from two annas nine pies to six pies The expenditure on miscellaneous items was Rs 28,252 against Rs. 26,300 in 1882, and the building charges amounted to Rs. 42,369 against Rs. 27,540.

31. *Investments made during the year.*—The amount shewn as invested during the year was Rs. 17,468 against Rs. 19,758 in 1882 and Rs. 27,478 in 1881. The following table shews details:—

| | Municipal dispensaries. | | | Other dispensaries. | | |
|---|---|---|---|---|---|---|
| | 1881. | 1882. | 1883 | 1881. | 1882. | 1883 |
| | Rs. | Rs. | Rs. | Rs. | Rs. | Rs. |
| Amount expended for purchase of securities ... ... | 7,101 | 4,528 | 4,937 | 1,080 | ... | ... |
| Amount deposited in savings banks ... ... | 13,553 | 8,497 | 3,181 | 5,744 | 6,733 | 9,350 |
| Total ... | 20,654 | 13,025 | 8,118 | 6,824 | 6,733 | 9,350 |

Of the total amount shewn as invested during the year Rs. 4,937 only was spent for the purchase of papers of the value of Rs. 5,000 against Rs. 4,528 in 1882 for papers of the same value. These amounts are only to the credit of municipal institutions. The amount deposited in the savings banks was Rs. 12,531 against Rs. 15,230 in 1882 and Rs. 19,297 in 1881. In the dispensaries that are not municipal institutions deposits in the savings banks increase every year, but in municipal dispensaries they decrease in amount as is certainly expected. The decrease in 1882 was Rs. 5,056 and in 1883 Rs. 5,316. I have already pointed out that in municipal institutions deposits and investments should not be made, as surplus money is only available when larger contributions from municipal funds are given than is actually necessary for the support of the dispensary with the income from other sources.

32. *Closing cash balance.*—The closing cash balance amounted to Rs. 73,935, viz. of municipal institutions Rs. 41,573 and of other dispensaries Rs. 32,362. The former should not be shewn as it is municipal money, and it helps to swell the municipal contribution in the statement, which should be, as I have already pointed out, simply the amount necessary to complete the sum required for the expenditure that cannot be covered by the insufficient income from other sources.

### Table No. 12.—Part II.

33. *Total investments.*—The following statement shews this in detail:—

| Nature of investments. | Balance on 1st January 1883. | | | Investments obtained during 1883. | | | Investments sold or withdrawn during 1883. | | |
|---|---|---|---|---|---|---|---|---|---|
| | Municipal dispensaries. | Other dispensaries. | Total. | Municipal dispensaries. | Other dispensaries. | Total. | Municipal dispensaries. | Other dispensaries. | Total. |
| | Rs. | Rs. | Rs. | Rs. | Rs. | Rs. | Rs. | Rs. | Rs. |
| Government securities of 4, 4½, and 5 per cent. | 5,06,900 | 2,15,400 | 7,22,300 | 5,000 | ...... | 5,000 | 4,000 | *P*1,500 | 5,500 |
| Municipal debenture | 3,000 | ...... | 3,000 | ...... | ...... | ...... | ...... | ...... | ...... |
| Landed property ... | 15,120 | ...... | 15,120 | ...... | ...... | ...... | ...... | ...... | ...... |
| Money lent ... | 3,200 | 160 | 3,360 | ...... | ...... | ...... | ...... | ...... | ...... |
| Government savings banks. | 34,187 | 22,000 | 56,187 | 3,181 | 9,350 | 12,531 | 6,909 | 4,719 | 11,628 |
| Total ... | 5,62,407 | 2,37,560 | 7,99,967 | 8,181 | 9,350 | 17,531 | 10,909 | 6,219 | 17,128 |

| Nature of investments. | Balance on 31st December 1883. | | | Balance on 31st December 1882. | | | Balance on 31st December 1881. | | |
|---|---|---|---|---|---|---|---|---|---|
| | Municipal dispensaries. | Other dispensaries. | Total. | Municipal dispensaries. | Other dispensaries. | Total. | Municipal dispensaries. | Other dispensaries. | Total. |
| | Rs. | Rs. | Rs. | Rs. | Rs. | Rs. | Rs. | Rs. | Rs. |
| Government securities of 4, 4½, and 5 per cent. | 5,07,900 | 2,13,900 | 7,21,800 | 5,06,100 | 2,13,900 | 7,20,000 | 5,03,600 | 2,13,900 | 7,17,500 |
| Municipal debenture | 3,000 | ...... | 3,000 | 3,000 | ...... | 3,000 | 3,000 | ...... | 3,000 |
| Landed property ... | 15,120 | ...... | 15,120 | 15,120 | ...... | 15,120 | 15,120 | ...... | 15,120 |
| Money lent ... | 3,200 | 160 | 3,360 | 3,200 | 160 | 3,360 | 6,925 | 160 | 7,085 |
| Government savings banks. | 30,459 | 26,631 | 57,090 | 36,120 | 21,166 | 57,286 | 41,509 | 19,120 | 60,629 |
| Total ... | 5,59,679 | 2,40,691 | 8,00,370 | 5,63,540 | 2,35,226 | 7,98,766 | 5,70,154 | 2,33,180 | 8,03,334 |

*P*—Transferred to Baboo K. L. Pundit's Rest-House Fund.

The balance on 31st December 1882 was Rs. 8,01,406. This should be the balance at the beginning of 1883, on 1st January; but the figure shewn in the statement on this date is Rs. 7,99,967. The difference of Rs. 1,439 is accounted for as follows:—

| | | Rs. |
|---|---|---|
| Dispensaries which were abolished had a balance in 1882, but not in 1883... ... ... ... | | 2,639 |
| Ditto | which shew their balance less than 1882 ... | 2,015 |
| | | 4,654 |
| Ditto | which shewed no balance in 1882, but in 1883 ... | 3,162 |
| | | 1,492 |
| Ditto | which shew their balance more than in 1882 ... | 53 |
| | | 1,439 |

Though Rs. 17,531 were invested during the year, Rs. 17,128 were withdrawn, so that the difference in favour of a very small increase helped to swell the total investments by that amount, viz. Rs. 403. The total capital at the end of the year of all existing dispensaries was Rs. 8,00,370 against Rs. 7,98,766 in 1882 and Rs. 8,03,334 in 1881. Of these Rs. 2,40,691 belonged to non-municipal institutions in 1883, Rs. 2,35,226 in 1882, and Rs. 2,33,180 in 1881. The value of Government securities and investments in landed property, &c., remained the same. There was an increase therefore in saving banks deposits of Rs. 5,465 in 1882 and Rs. 2,046 in 1883.

The total capital at the end of 1883 of municipal dispensaries amounted to Rs. 5,59,679 against Rs. 5,63,540 in 1882 and Rs. 5,70,154 in 1881. The value of municipal debentures and landed property remained the same in the three years. The amount laid out in loans was Rs. 3,200 in 1883 against a similar amount in the preceding year and Rs. 6,925 in 1881. There was an increase in the value of Government securities of Rs. 1,800 in 1883 and of Rs. 2,500 in 1882, and a decrease in the bank deposits of Rs. 5,661 in 1883 and of Rs. 5,389 in 1882.

## EXTRACTS FROM REPORTS OF CIVIL SURGEONS, &c.

### Burdwan Division.

**Burdwan district.**

The Civil Surgeon says that there was considerable improvement in the public health during the year under report as shewn by statistics The mortality for the past three years was 41,010, or a rate of 27 63 per 1,000 in 1881, 49,297, or 35·41 in 1882, and 39,092, or 28·08 in 1883. Dr. R. D. Murray says that though it is satisfactory to note so marked an improvement, yet the death-rate must still be regarded as excessive. There was no change in the number of dispensaries, six of which were open at the end of the year: three were in charge of municipalities, viz. Burdwan, Cutwa, and Raneegunge. One, viz. Mancoor, was managed by a local committee, and may have to be closed for want of funds, and two, namely Chuckdighee and Mohata were under private management. Under the new rules of classification, three were in class II, two in class IIIA, and one in class IIIB. The Managing bodies are said to give a fair share of attention to the dispensaries. The dispensaries under municipalities are attended to at the ordinary meetings, and are, as a rule, says the Civil Surgeon, liberally dealt with. With the exception of the few native gentlemen, who entirely support certain charities, the well-to-do people seem to take little or no interest in and give no assistance to the dispensaries. The total number of patients treated fell from 32,890 in 1882 to 31,045 in 1883, the daily average being 263 against 300 in 1882. The dispensaries at Burdwan, Raneegunge, and Chuckdighee are in charge of Assistant Surgeons, and the rest are in charge of civil hospital assistants. The Maharajah of Burdwan supports two large dispensaries, one at Burdwan and the other at Culna, from which no returns are received.

*Burdwan.*—This is a municipal dispensary in class II of the new rules. The district officers, municipal commissioners, and vice-chairman frequently visited the institution, but did not record their minutes. The Civil Surgeon paid daily visits. There were treated 724 in and 11,877 out patients against 635 and 12,992 in 1882. The daily averages were 26 and 69 against 27 and 85, and were calculated on the actual attendance. There were 155 deaths, or 21·4 per cent. against 157 and 24·7 in 1882. The high mortality is said to be due to the large number of half-starved moribund people, chiefly up-country pilgrims who were admitted. There were performed 99 major and 800 minor operations resulting in three deaths. The total expenditure was Rs 4,190, of which Rs. 98 were paid by Government in registers and forms and for diet of police cases. Establishment cost Rs. 1,862 and the amount expended on European medicines was Rs 532 against Rs. 768 in 1882. Except cinchona febrifuge, medicines were purchased from private firms Dieting articles cost Rs. 842. The invested capital was Rs. 18,000, Rs. 725 were obtained as interest, Rs. 22 from local or other funds, Rs. 300 as subscriptions from Europeans and Rs. 3,045 from municipal funds.

*Cutwa.*—This is a municipal dispensary. Visited twice by the Magistrate, and frequently by the sub-divisional officer. The Civil Surgeon paid two visits. A first class civil hospital assistant is in charge, whose entire salary, viz. Rs. 55 per mensem, was paid by the municipality during the year. There were treated 74 in and 2,876 out patients with a daily average of 2·8 and 26. The numbers in 1882 were 99 and 4,461 with a daily average of 3 and 48 respectively. This diminution in the number of both in and out patients is attributed to the greater healthiness of the year, and the reduction of fever. The death-rate was 14 8 per cent. against 6 in 1882. The increase is said to be due to the admission of five moribund cases sent by the police. One major and 143 minor operations were performed. The total expenditure was Rs 1,396. Government contributed Rs. 18, viz. Rs. 5 as cost of forms and Rs. 13 for the diet of police cases. The invested capital was Rs. 500. From municipal funds Rs. 1,352 were obtained, from local or other funds Rs. 6, and as interest Rs. 20. Establishment cost Rs. 846. European medicines, which were purchased from private druggists, cost Rs. 109; bazar medicines, Rs. 25, diet Rs. 75, building and repairs Rs. 280, and miscellaneous items Rs. 60.

*Chuckdighee*—A class IIIA dispensary, entirely supported by Baboo Lolit Mohon Roy, the zemindar. Twice visited by the Civil Surgeon. There were 155 in and 5,818 out patients treated against 112 and 4,632 in 1882, the daily averages being five and 43 against four and 26. The death-rate was 10·3 per cent. against 9·8 in 1882. The principal diseases were malarious fever and spleen affections. Sixteen major and 359 minor operations were performed The total expenditure was Rs 2,565. Government gave no aid except forms which cost Rs 8. Medicines were purchased from private firms. Cinchona febrifuge to the value of Rs. 50 was obtained from Government. The total cost for European medicines was Rs. 355 and for bazar medicines Rs. 65. Establishment cost Rs. 1,682, and diet Rs 232.

*Mancoor.*—This is a class IIIB dispensary, Government contributing half the salary of the hospital assistant. It is managed by a committee which met six times during the year. Visited once by the Magistrate and twice by the Civil Surgeon. There were treated 4,465 out patients with a daily average of 37 against 4,138 and 35 in 1882. Five major and 278 minor operations were performed. There is an invested capital of Rs. 1,000 and a cash balance of Rs. 31 at the end of the year. The total expenditure was Rs. 597, of which Government contributed Rs. 156, viz. Rs. 150 as salaries and Rs. 6 for registers

and forms. The total income was Rs. 628, of which Rs. 40 were obtained as interest and Rs. 198 from native subscribers. Establishment cost Rs. 345, European medicines, which were purchased from private druggists, cost Rs. 186, bazar medicines Rs. 22, and miscellaneous items Rs. 43

*Raneegunge.*—A municipal dispensary. It was visited twice each by the Magistrate and Civil Surgeon. There were 276 in and 3,401 out patients treated against 296 and 3,143 in 1882. The daily average attendance was eight and 30 against nine and 31. The death-rate was 30·7 per cent against 39·5 in 1882. The mortality at this dispensary is great owing, it is said, to the number of admissions of moribund pilgrims on their way to Juggernath. Fifty two major and 461 minor operations are recorded The total expenditure was Rs 2,093, of which Government paid only Rs. 8 as cost of forms. Municipal funds contributed Rs. 1,304. Rs. 422 were received from Europeans, as subscriptions, and Rs. 359 from natives. Establishment cost Rs. 1,500. European medicines, which were purchased from private druggists, cost, Rs. 207, bazar medicines Rs. 55, diet Rs. 201, and miscellaneous items Rs. 126.

*Mahata*—A class IIIA dispensary under private management. There were no regular meetings, but three are recorded. Visited once by the Magistrate and Civil Surgeon. A civil hospital assistant is in charge, who is paid Rs 30 per mensem. There were treated 1,379 out-patients against 2,382 in 1882, the daily average attendance being 11 against 27. No in-patients. Minor operations numbered 62. The total expenditure was Rs. 5?7, of which Rs 5 represent cost of forms which was paid by Government. Establishment cost Rs 420. European medicines, which were purchased locally, cost Rs. 90, bazar medicines Rs 18, miscellaneous items Rs. 29.

**Bankoora district.** The Civil Surgeon states that the public health of the district was better than either of the two preceding years, the total number of recorded deaths being 21,121, or a rate of 20·27 per cent. of population against 33,559, or 32·2 in 1882 and 27,284, or 26 19 per cent. in 1881. There were four dispensaries working in the district during the year. Two of these, viz. at Bankoora and at Bishenpore, are in class II, in accordance with the new rule of classification, being entirely supported and managed by the municipalities of those towns. The institutions at Maharah and Ajodhya are in class III B under the management of local committees, Government paying the half-pay of the medical subordinates. All the dispensaries are in charge of civil hospital assistants. Two of these institutions, viz. Bankoora and Bishenpore receive both in and out door patients, the other two, viz. Maharah and Ajodhya, give only out-door relief. The number of patients treated was 310 in and 14 286 out door against 300 and 16,296 in 1882, the daily averages being 11 and 110 against 10 and 136 in 1882 respectively. The Civil Surgeon states that these figures may be accepted as correct. A fair amount of interest is said to be shewn by the managing bodies of all the four institutions, and the Bankoora dispensary seems to be much appreciated by the people.

*Bankoora.*—This is a municipal dispensary in class II managed by the local municipality. It was visited once by the Commissioner of the division, four times by the Magistrate, monthly by the municipal commissioners, and daily by the Civil Surgeon A civil hospital assistant is in charge. The number of patients treated was 229 in and 4,364 out against 214 and 4,614 in 1882 The daily average attendance was eight and 46 against eight and 54 respectively. There were 27 deaths, or 11·7 per cent. of cases treated. The Civil Surgeon says that "in an hospital which receives pilgrims going to Juggernath this death-rate is not heavy." Thirty-eight major and 639 minor operations were performed with one death only. The total expenditure was Rs 1,490, of which Rs 946 represent the cost of establishment, Rs. 111 of Europe medicines, and Rs. 86 of country medicines. Dieting of in-patients cost Rs 193. The amount expended on buildings was Rs. 29, and on miscellaneous items Rs. 125. Government contributed Rs. 5 for diet of police cases. Municipality paid Rs. 919, and Rs. 424 were obtained by sale of securities. Rs. 109 from local or other funds and Rs. 32 were derived as interest on investments At the end of the year the dispensary had a cash balance of Rs. 8 only.

*Bishenpore.*—It is a municipal dispensary and is in class II under the new rules Visited once by the Magistrate, five times by the sub-divisional officer, once by the Superintendent of Vaccination, and four times by the Civil Surgeon. A civil hospital assistant is in charge. The number of patients treated was 81 in and 2,866 out against 86 and 4,690 in 1882. The daily average attendance was two and 20 against two and 38 respectively. Patients represented by friends are not included in calculating the daily average There were 13 deaths against 17 in 1882. Five major and 212 minor operations were performed. The total expenditure was Rs. 856, of which Rs. 588 were expended on establishment, Rs 55 on English medicines, Rs. 38 on bazar medicines, Rs 108 on diet, and Rs. 22 on buildings and repairs. The expenditure on miscellaneous items was Rs. 36. Government paid Rs. 29 for diet of police cases. Municipality paid Rs. 760 and Rs. 12 were obtained as interest on investments.

*Maharah.*—It is a class IIIB dispensary under the management of a local committee which met twice during the year. No civil officer visited it. The Civil Surgeon visited it twice. A civil hospital assistant is in charge. The number of out-patients treated was 3,296 with a daily average of 20 against 2,867 and 21 in 1882 respectively. No in-patients. Twelve major and 83 minor operations were performed. The total expenditure was Rs. 401, whereof Government contributed Rs. 122 as half-pay of the hospital assistant. The cost of establishment was Rs. 280, of Europe medicines Rs. 50, and of bazar medicines Rs 26. The expenditure on miscellaneous items was Rs. 15. The dispensary had an opening cash

balance of Rs. 216, and the subscription from natives amounted to Rs. 480. Sum of Rs. 30 was received on account of interest on investments. The same amount was invested during the year.

*Adjodhya.*—It is a class IIIB dispensary managed by a committee which met four times. Visited once by the Magistrate and sub-divisional officer, and twice by the Civil Surgeon. A hospital assistant is in charge. Three thousand seven hundred and sixty out-patients were treated with a daily average of 22 against 4,125 and 22 in 1882. Represented patients were excluded in calculating the daily average. No inpatients. Seven major and 234 minor operations were recorded. The total expenditure was Rs. 761, whereof Government contributed Rs. 177 as half-pay of the medical subordinate. The expenditure on establishment was Rs. 393, on Europe medicines Rs. 118, on country medicines Rs. 14, and on buildings Rs. 3. The sum expended on miscellaneous items was Rs 16. The income from native subscriptions was Rs. 560, and Rs. ·17 were received as interest on investments. At the end of the year Rs. 217 were invested.

Beerbhoom district.

*Beerbhoom district.*—The public health of the district during the year under report was much better than that of the two years immediately preceding it. The total number of recorded deaths was 20,634 against 27,285 in 1882, 25,557 in 1881, 17,971 in 1880, 12,755 in 1879, and 17,253 in 1878. The diminution of mortality took place mainly under fever and cholera, the number of deaths from these diseases being 17,698 and 297 against 21,945 and 2,593 in 1882 respectively. There were three dispensaries working at the end of the year in the district In accordance with the resolution of Government of India, dated 7th May 1883—one of those (Soory) belongs to class II, being entirely supported by the local municipality—one (Hetampore) to class IIIA, supported entirely by the Rajah of Hetampore, and the other (Ramporehat) to class IIIB, the half pay of the medical officer of which is paid by Government. Of these Soory and Ramporehat receive both in and out door patients: Hetampore out-door patients only. There were treated 153 in and 17,433 out patients against 195 and 23,528 in the previous year The daily averages were four and 154 against five and 201 respectively. These were calculated on patients who personally attended for medicine and not from the number of days medicines were supplied. The dispensaries at Ramporehat and Hetampore were in charge of Assistant Surgeons, and at Soory under a civil hospital assistant. All the dispensaries are said to have fairly maintained their reputation for popularity. With regard to the interest taken by the managing committee, the Civil Surgeon states that the indifference of Hetampore committee is counterbalanced by the active interest shewn in other places.

*Soory.*—It is a (class II) municipal dispensary. Its entire expense is now borne by the municipality. The dispensary was visited twice by the Magistrate, 10 times by the municipal commissioners, and daily by the Civil Surgeon. There were treated 54 in and 8,907 out patients against 49 and 12,352 in 1882, the daily averages being one and 80 against one and 113 respectively The decrease in the number of out-patients is ascribed to the less prevalence of fever in the district. There were 11 deaths, or 20·37 per cent against 12 and 24·28 in the previous year. Of these, two are said to have died within 12 hours of admission though suffering from chronic illness. Major operations numbered 44, of which there were many important cases. Four hundred and six minor operations were performed. The total expenditure amounted to Rs. 1,413, whereof Government contributed Rs. 13 as cost of registers and forms. Rs. 924 represent the cost of establishment, Rs. 158 of Europe medicines, and Rs. 45 of bazar medicines. Rupees 22 were spent for dieting of patients, Rs. 140 on buildings and repairs, and Rs. 63 on miscellaneous items. The income of the dispensary was Rs. 18 from local sources, Rs. 33 as interest on investments, and Rs. 267 from European and native subscriptions. Rupees 140 were obtained by sale of securities. The municipality paid Rs. 912.

*Ramporehat.*—It is a class IIIB dispensary according to the new rules of classification of dispensaries, governed by a committee presided over by the sub-divisional officer. Seven meetings were held. The Civil Surgeon paid two visits. The Railway Assistant Surgeon continued in charge. He receives Rs. 25 per mensem from Government and Rs. 25 from the dispensary fund. The Civil Surgeon reports that "it is difficult to get him to pay greater attention to rules of the department and in the submission of returns. His annual report is very meagre, and does not contain any important medical facts." The number of patients treated was 99 in and 3,343 out door against 146 and 4,100 in 1882. The daily average attendance was three and 17 against three and 22 It has been calculated from the actual attendance. The in-patients in this dispensary are chiefly railway servants. There were seven deaths, or 7·07 per cent. Nine major and 232 minor operations were recorded. The total expenditure was Rs. 1 324, of which Rs. 838 represent the cost of establishment, Rs. 79 of English medicines, and Rs. 97 of bazar medicines. The expenditure on diet was Rs. 40, on buildings Rs. 155, and on miscellaneous items Rs. 115. Government paid Rs. 313 viz. Rs. 300 as salaries, Rs 6 as cost of forms and registers, and Rs. 7 for diet of police cases. Rs. 993 were obtained as subscriptions from Europeans and natives.

*Hetampore.*—A class III A dispensary, supported entirely by Rajah Ram Runjun Chuckerbutty. A nominal committee exists, but no meetings were held. Visited once by the Magistrate and twice by the Civil Surgeon. The establishment consists of, besides the Assistant Surgeon, a compounder on Rs. 8 and a cooly on Rs. 5. There were treated 5,183 out-patients with a daily average of 55 against 7,076 and 66 in 1882 Six major and 382 minor operations were performed. The total expenditure was Rs. 1,585, whereof Rs. 1,382 represent the cost of establishment and Rs. 155 of Europe medicines. Government paid Rs. 6 in forms and registers.

**Midnapore district.**

The Civil Surgeon has submitted a full and interesting report. He says that the year was a healthy one for Midnapore. The incidence of malarial fever was light, especially in the Ghatal sub-division, which usually suffers severely in this respect. During the year two out-door dispensaries were sanctioned and opened in the Ramjebonpore and Kherpye municipalities in the Ghatal sub-division, which were, however, not formally recognized and brought under Government control until the close of the year. There were therefore at the end of the year 1883, 11 dispensaries working in the district against nine in 1882. Of these, two are in class IIIA, three in class IIIB, and the rest are in class II, being municipal institutions. Of the 11 dispensaries working at the end of the year, four afforded in-door as well as out-door relief against three in 1882, the in-door ward at Ghatal having been reopened from 1st January 1883. Midnapore, Mysadul, and Contai dispensaries are in charge of Assistant Surgeons; the rest are under civil hospital assistants. The total number treated was 696 in and 40,885 out-patients against 729 and 48,252 in 1882. The daily average attendance was 35 and 284 against 31 and 332. These are exclusive of the patients treated at Ramjebonpore and Kherpye dispensaries, which were not brought in regular working order until the close of the year. These figures, the Civil Surgeon says, are fairly approximate, but not so reliable as those of 1882. The local committees met more punctually than in 1882, and shewed increased interest, though some of them at small and distant outlying stations have not yet come to appreciate their responsibilities. At Mysadul, the Committee neglected to place their surplus cash in the savings bank, and the result was a robbery of Rs. 62.

*Midnapore.*—A municipal dispensary. Visited once by the Commissioner, twice by the Magistrate, once by the Joint-Magistrate, and five times by the municipal commissioners. The Civil Surgeon visited daily or oftener when in the station. There were 527 in and 13,946 out-patients treated against 591 and 17,317 in 1882, the daily average attendance being 27 and 84 against 23 and 114. A third grade Assistant Surgeon was in charge, who was assisted by a supernumerary Assistant Surgeon during the greater part of the year. The Civil Surgeon attributes the decrease in the attendance of patients to the improvement of the health of the town, and to the diminution of fevers. The increase in the daily number of in-patients is ascribed to the greater amount of practical surgery. Besides the patients noted above, a daily average number of 12 paupers were lodged, clothed, and fed, and 25 paupers daily received alms in the shape of pice and clothing twice in the year, as provided for in the Pierce endowment. The death-rate among in-patients was 24 per cent. against 17 9 in 1882, the increase being chiefly due to a larger mortality from causes classed as "Other local diseases." The Civil Surgeon mentions that "moribund cases brought to the dispensary during the year have been shewn under 'Other local diseases.' This was not quite correct; stricter classification would have placed them under fevers, debility, bowel complaints, old age, &c. There were many such. One hundred and thirty-seven pilgrims were admitted during the year, of whom 42 died. These people only come into hospital when in an extreme state of destitution and disease" There were 68 major operations, of which the Civil Surgeon performed 40 and the Assistant Surgeon 28 against 103 in 1882 and 61 in 1881. The death-rate was 8 8 per cent. against 9·8 in 1882 and 15 in 1881. Four hundred and thirty-three minor operations were recorded. The total expenditure was Rs. 5,000, whereof Rs. 1,936 represent the cost of establishment, Rs. 1,010 of Europe medicines, and Rs. 124 of bazar medicines Rs. 1,200 was the cost of diet and Rs. 693 were spent on miscellaneous charges. Government contributed Rs. 33, viz. Rs. 23 as cost of forms and registers and Rs. 10 for diet of police cases. The total income of the dispensary was Rs. 6,886, which was composed, besides Government contribution, of Rs. 431 from local sources. Rs. 4,911 from municipality, Rs. 905 as subscription, and Rs. 537 as interest on investments. The dispensary had a cash balance of Rs. 1,886 at the end of the year, besides an invested capital of Rs. 19,379.

*Mysadul*—A class IIIA dispensary supported entirely by the Mysadul estate under the Court of Wards and managed by a committee; but all bills are countersigned by the Civil Surgeon before payment by the Collector. The committee met 14 times. No civil officer visited the dispensary during the year The Civil Surgeon visited only once. There were treated 42 in and 2,020 out-patients against 103 and 2,219 in 1882. The daily averages were two and 27 against four and 16. The Civil Surgeon says that "the large increase in the daily average of out-patients with a smaller number treated is suspicious." He entertains great doubt as to the correctness of the method adopted of calculating averages during the incumbency of the former Assistant Surgeon. He has, however, satisfied himself that the method followed by the present incumbent is correct. The death-rate was 23 8 against 12·6. Four major and 181 minor operations were recorded. The total expenditure was Rs. 1,676, whereof Rs. 1,403 represent the cost of establishment, Rs. 32 of Europe medicines, Rs. 12 of country medicines, and Rs 75 of diet. The expenditure on buildings was Rs. 6, and on miscellaneous items Rs. 97. Government contributed Rs. 6 as cost of forms and registers.

*Contai.*—A class IIIA dispensary. There is no municipality in the sub-division. The residents petitioned against the proposal of establishing one. The institution is managed by a local committee who held 10 meetings. The Civil Surgeon visited the dispensary only once. The hospital assistant in charge was replaced by a third grade Assistant Surgeon during the year at the request of the sub divisional officer. There were treated 2,066 out-patients against 2,355 in 1882, the daily average being 15 against 18. One major and 90 minor operations were performed. The total expenditure amounted to Rs. 823, of which Rs. 324 represent

the cost of establishment, Rs. 96 of Europe medicines, and Rs. 15 of country medicines. The expenditure on miscellaneous items was Rs. 26, and the outlay on buildings and repairs was Rs. 333. Government supplied forms and registers, the cost of which was Rs. 4. Subscriptions from Europeans and natives amounted to Rs. 402. Rs. 73 were obtained as interest on investments, and Rs. 346 by sale of securities

*Ghatal.*—A sub-divisional dispensary in class II under the management of the local municipality, in which it has been formally vested by Bengal Government letter No. 198, dated 22nd January 1884. The dispensary committee has been amalgamated with the municipal and the affairs of the institution are now considered at the municipal meetings. A second class hospital assistant in medical charge of the sub-division is in charge. Visited once by the Magistrate and the sub-divisional officer, and thrice by the Civil Surgeon. The in-door ward was reopened on 1st January 1883. There were 67 in-patients treated during the year with a daily average of 2·37. The number of out-patients treated was 3,612 against 4,615 in 1882, the daily averages being 31 against 27. The Civil Surgeon attributes the smaller attendance of out-patients to the healthiness of the circle in respect of fever during the year. There were 15 deaths among in-patients, or 22·3 per cent. One major and 266 minor operations were performed. The total expenditure was Rs. 752, whereof Rs. 364 were expended on establishment against Rs. 411 in the previous year. Though, on the reopening of the in-door ward, it was necessary to increase the establishment by a cook, and cooly and to raise the pay of the compounder, the total cost under this head did not exceed that of the previous year, as there was a saving of Rs. 10 monthly in the pay of the native doctor, who is now paid only Rs. 15 per mensem instead of Rs. 25, which is, however, contrary to the rule. Subscriptions are not forthcoming. This is a sufficient proof of the apathy of the inhabitants, among whom there are several rich mahajans and tradesmen. The entire cost of the dispensary was borne by the municipality, who paid Rs. 794. Government contributed Rs 8, viz. Rs. 6 as cost of forms and registers, and Rs. 2 for diet of police cases.

*Tumlook.*—A sub-divisional dispensary in class II under the management of the local municipality, in which it was formally vested in 1882. The affairs of the dispensary are considered at the municipal meetings. Visited once by the Magistrate and Civil Surgeon, and five times by the municipal commissioners. There were treated 60 in and 4,928 out-patients against 35 and 4,471 in 1882. The daily average was three and 30 against three and 28. There were five deaths among the in-patients, or 8·3 per cent. An outbreak of cholera is said to have occurred in the town, and nine cases were admitted in the dispensary from it. Nine major and 418 minor operations are said to have been performed by the civil hospital assistant. The total expenditure was Rs. 773, whereof Rs. 368 represent the cost of establishment, Rs 68 of Europe and Rs. 21 of country medicines. The expenditure on diet was Rs. 105, on buildings Rs. 113, and on miscellaneous items Rs. 77. Government supplied forms and registers, the value of which was Rs. 6. Municipality paid Rs. 239, and subscriptions from natives amounted to Rs 250. Rs. 23 were derived as interest on investments, and Rs. 648 by sale of securities. At the end of the year there was a cash balance of Rs. 424.

*Chunderkona.*—A class II sub-divisional dispensary formally vested in the municipality in January 188?. Visited once by the Magistrate, Deputy Magistrate of Ghatal, members of the municipal committee, and the Civil Surgeon. There were 6,360 out-patients treated against 6,420 in 1882, the daily averages being 29 against 32. The figures are exclusive of represented attendance. Seven major (all reduction of dislocations) and 91 minor operations are said to have been performed by the hospital assistant. The total expenditure was Rs. 1,010 against Rs. 441 in 1882. This was owing to the payment of the salary and other bills of the previous year. Bills are now being paid regularly Government paid Rs. 6 only—the value of forms and registers against Rs. 52 in 1882, which included a portion of the native doctor's pay. The expenditure on establishment was Rs. 569, on Europe medicines Rs. 257, and on bazar medicines Rs. 58. Rupees 81 were spent on buildings, and Rs. 45 on miscellaneous items. Government supplied forms, the value of which was Rs. 6. Municipality paid Rs. 1,051.

*Narajole.*—A class IIIB dispensary managed by a local committee who held six meetings against four in 1882. Visited once by the Magistrate and twice by the Civil Surgeon. Out-patients numbered 2,753 against 3,120 in 1882, the daily average being 26 and 32. The correct method of calculating the daily average was adopted from June. There were one major and 142 minor operations. The total expenditure was Rs. 1,064; of which Government contributed Rs 181, viz. Rs. 175 as salaries and Rs. 6 as cost of forms and registers. The expenditure on Europe medicines was Rs. 33, on bazar medicines Rs. 18, on buildings Rs. 29, and on miscellaneous items Rs. 40. Subscription from natives amounted to Rs. 440, and Rs. 433 were obtained by sale of securities. During the year Rs. 550 were invested.

*Garbetta.*—A class IIIB out-door dispensary managed by a committee which met 12 times. Visited once by the Deputy Sanitary Commissioner and the Deputy Magistrate, and twice by the Civil Surgeon. Government pays half the salary of the hospital assistant. There were treated 1,591 out-patients against 3,907 in 1882, the daily averages being 13 and 29 respectively. The Civil Surgeon attributes this reduction in the number treated more to the want of energy of the native doctor than to fluctuation in public health, for the number fell off in a striking manner from the date of his assuming charge, which did not happen to correspond with the commencement of the healthier season. Moreover, his method of calculating average attendance has been faulty. Eighty-seven minor operations are recorded against 192

in 1882. No major operations. The total expenditure was Rs. 512, of which Government contributed Rs. 163, viz. Rs. 157 as salaries and Rs. 6 as cost of forms and registers. The cost of establishment was Rs. 353, and of Europe medicines Rs. 68. Subscriptions from Europeans were Rs. 250 and from natives Rs. 111. At the end of the year there was a cash balance of Rs. 88.

*Dantoon.*—A class IIIB out-door dispensary, managed by a local committee, who held seven meetings. Visited once by the Joint-Magistrate and the Deputy Sanitary Commissioner, and twice by the Civil Surgeon. Out-patients numbered 3 609 against 3,828, the daily averages being 25 and 31. The fall in the daily average attendance, says the Civil Surgeon, was due to the method of calculating it, which was not quite correct up to August, and to the frequent changes in the native doctors during the year. Fifty-three minor operations were performed. The total expenditure was Rs 543, whereof Rs. 355 represent the cost of establishment, Rs. 64 of Europe medicines, and Rs. 27 of country medicines. The expenditure on buildings was nominal; on miscellaneous items Rs. 46. Government contributed Rs. 148, viz. Rs 144 as salaries and Rs. 4 as cost of forms and registers. Rupees 392 was realised by subscriptions. The committee were able to place Rs. 50 only in the savings bank. They have not been able to raise sufficient funds for the very much needed new building on the pilgrim road, towards the construction of which Government has sanctioned a grant of Rs. 500 in March 1884, a local zemindar having presented a suitable site for the purpose.

*Ramjebonpore.*—This is one of the two new municipal dispensaries which were opened in the district during the year 1883. Though the dispensary had a nominal existence under a local practitioner for some months, and its establishment was sanctioned in Bengal Government letter No. 563, dated 9th June 1883, it was not formally recognized till the 15th December 1883, when a civil hospital assistant was appointed in its charge. The Civil Surgeon did not visit the place, but says that the population of the town is 10,909, and as it usually suffers severely from malarial fever good work ought to be done.

*Kherpye.*—This is the second dispensary which was established in the district during the year. It is also a municipal dispensary. Like the one at Ramjebonpore it had existed for some time as a private institution. Its maintenance was sanctioned in Bengal Government letter No. 419, dated 19th May 1883. It was brought under Government supervision and control from the 15th November 1883. The Civil Surgeon inspected the institution once before it was formally recognized, and reports that he saw that there was a suitable building for the dispensary. It is a revival of a dispensary that had been closed in 1881. The population of the town is 6,295, and like Ramjebonpore suffers from malarious fevers.

With regard to both these institutions the Civil Surgeon says: "I am a little doubtful as to the success of these two institutions. Up to the time of writing (27th January 1884) neither of the municipalities have obtained a proper supply of medicines.

**Hooghly district.** The Civil Surgeon has submitted a complete report. The public health of the district during the year 1883 was, it is said, somewhat better than that of the preceding year. The total number of registered deaths was 14,204 against 16,378 in 1882 The total number of dispensaries in the district was four. One of these is managed by a local municipality, two are maintained in class I, and one is aided by Government. The dispensaries are said to be appreciated by the people and the managing bodies take considerable interest in their affairs. With regard to Jehanabad dispensary, however, the Assistant Surgeon reports that "it was fairly appreciated by the poor, but the well-to-do classes positively take no interest in it whatever, possibly because they obtain no appreciable benefits therefrom." I observe, nevertheless, that subscriptions are recorded. Three of these are in charge of Assistant Surgeons, viz. Emambarah hospital, Boinchee and Jehanabad dispensaries, and one, viz. the dispensary at Dwarbassiny, in charge of a civil hospital assistant. The total number of patients treated was 667 in and 22,232 out patients against 727 and 20,414 in 1882, the daily averages being 22 and 125 against 29 and 134. The Civil Surgeon says that he verified these figures from the registers and returns, and believes them to be correct. The prevailing disease was malarial fever and its complications.

*Emambarah hospital.*—This is a class IIIA institution under the management of a committee consisting of the Mutwalee, the local agents, and the Civil Surgeon. No regular committee meetings are held, but the accounts are checked monthly in the local Agent's office. Visited occasionally by the Magistrate and daily by the Civil Surgeon. There were treated 667 in and 11,951 out-door patients against 665 and 10,183 in 1882. The daily average numbers were 22 and 57 against 26 and 54. Represented persons were excluded in calculating the daily average attendance. There were 112 deaths against 132 in 1882. The large number of deaths is owing to moribund cases sent to the hospital by the police. Fifty-one major and 538 minor operations were recorded. The total expenditure was Rs. 7,109, of which Government paid Rs. 31 as registers and forms. Establishment cost Rs. 3,631. Europe medicines and bazar medicines Rs. 1,134 and Rs. 108 respectively. Diet Rs. 743, and miscellaneous items Rs. 1,491. European medicines were purchased from private dealers.

*Jehanabad.*—This dispensary is under the Jehanabad union, but managed by a committee (appointed by Government) who held eight meetings during the year. It has not yet been formally vested in that body, and is therefore in class IIIB. Visited once by the Magistrate and twice by the sub-divisional officer. The Civil Surgeon inspected it once, the place being difficult of access. A third grade Assistant Surgeon is in charge. Since the abolition of the in-door department in 1882 only out-patients have been treated. The total

number of out-patients treated was 2,889 against 3,670 in 1882. The daily average was 22 against 32. Though there were no regular in-patients, four deaths are reported. These were moribund cases sent to the dispensary by the police. Eighteen major and 140 minor operations were recorded. The total expenditure was Rs. 2,375, whereof Government paid only Rs. 15, viz. Rs. 7 as registers and forms and Rs. 8 for diet of police cases. There was an opening balance of Rs. 89. Rupees 977 were obtained from municipal funds, Rs. 44 as interest on investments, and Rs. 480 as subscriptions from natives. The invested capital in the beginning of the year was Rs. 1,122. An addition of Rs. 44 was made, but Rs. 800 were withdrawn for expenditure. At the end of the year the figure stands as Rs. 367. Establishment cost Rs. 2,105. European medicines, which were purchased from private druggists, cost Rs. 110, but Rs. 50 only are shewn. It is said that this amount was only paid for want of sufficient funds in the dispensary. Bazar medicines cost Rs. 39. Miscellaneous items Rs. 99, and building and repairs Rs. 25. There was a closing balance of Rs. 30.

*Behary Lall Charitable Dispensary. Boinchee.*—It is a class IIIA dispensary, managed by a committee consisting of the District Collector, the Deputy Inspector of Schools, and the Civil Surgeon, but no meetings are recorded. Visited once by the District Collector, once by the Joint-Magistrate of Hooghly, and twice by the Civil Surgeon. An Assistant Surgeon is in charge. It is an out-door institution, and the number treated was 3,590 against 3,561 with a daily average of 25 against 27. Three hundred and thirty-nine minor operations only are recorded. The total expenditure was Rs. 2,666, of which Rs. 6 was paid by Government as cost of forms, and Rs. 605 as salaries. The latter represents the difference of grade pay of the Assistant Surgeon who passed into the second grade, which could not be met from the dispensary fund, according to the terms of the endowment, under which only Rs. 100 is allowed. Establishment cost Rs. 2,220. European medicines, which were purchased locally, cost Rs. 375, bazar medicines Rs. 30, and miscellaneous items Rs. 41. The opening and the closing cash balance remained the same, viz. Rs 693.

*Dwarbassiny.*—A class IIIB dispensary. It is not situated within the limits of a municipality. The dispensary is managed by a committee who held 12 meetings during the year. Visited once by the District Magistrate and twice by the Civil Surgeon. There were treated 3,802 out-patients against 3,000 in 1882, the daily average being nearly the same for two years, viz. 20·5 against 20 9. Minor operations numbered 72. No major operations. The total expenditure was Rs. 724, whereof Government contributed Rs. 127, viz. Rs 120 for half the salary of the hospital assistant, and Rs. 7 as cost of registers and forms Rupees 11 were obtained as interest on investments, which aggregated at the end of the year to Rs. 343. Rupees 106 were withdrawn from invested capital Rupees 480 were received as subscriptions from natives. Establishment cost Rs. 438. European medicines, which were purchased from Government stores, cost Rs. 106, bazar medicines Rs. 20, and miscellaneous items Rs. 21. There is no closing cash balance, but an investment of Rs. 139 was made.

**Serampore sub-division.**

The public health of the sub-division was better than in the previous year. There was less cholera and fever and less sickness on the whole. There were four dispensaries working at the end of the year—three in class II managed by municipalities and one in class IIIB aided by Government. All these were in charge of civil hospital assistants. Of these, Serampore hospital receives both in and out door patients, the rest are out-door institutions The number of patients treated was 445 in and 14,588 out against 579 and 14,455 in 1882. The daily average numbers were 16 and 106 against 17 and 114 respectively. Of the outlying dispensaries, Boiddyabati is reported to be the most popular and largely attended.

*Serampore.*—It is a municipal dispensary and is in class II Visited once by the Magistrate. No visit of the sub-divisional officer is recorded. This dispensary is under the immediate charge of the civil medical officer, who visits it daily. The civil hospital assistant attached to the sub-divisional lock-up is also employed in the institution, and is paid Rs. 10 per mensem for it from the dispensary funds. The number of patients treated was 445 in and 4,312 out aganist 579 and 4,748 in the preceding year. The daily average numbers were 16 and 35·9 against 17 and 36 respectively. The decrease is ascribed to the better health of the district during the year. The daily average was calculated on the actual attendance. The number of deaths was 111, or 24·9 per cent. against 156, or 26·9 in 1882. The majority of these deaths were among the beggars, pilgrims, and up-country people in search of employment and debilitated from insufficient food. Thirty major operations were performed, most of which were important. Minor operations numbered 456. The total expenditure was Rs. 3,176, whereof Government contributed Rs. 38, viz. Rs 7 as cost of forms and Rs. 31 for the dieting of police case sent for treatment in the hospital. The cost of establishment was Rs. 912, of Europe medicines Rs. 249, and of bazar medicines Rs. 82 Diet cost Rs. 593. The expenditure on buildings and repairs was Rs. 1,131 and on miscellaneous items Rs. 178. Municipalty paid Rs. 1,250 and subscriptions realized from Europeans was Rs. 931; from natives Rs. 313.

*Rishra.*—A class II institution under the management of Serampore municipality, who hold monthly meetings, and oftener when required. There were 19 meetings in 1883. No visits of the civil officers is recorded. The civil medical officer paid several casual visits. Two inspection reports were, however, forwarded It is in charge of a hospital assistant. Out-patients numbered 3,877, against 2,661 in 1882, and the daily average was 20 against 17. It is calculated on the actual attendance of patients. Two hundred and sixty-eight minor operations were recorded. No major operations. The total expenditure was Rs. 669, of

which Government contributed Rs 6 only as cost of forms and registers. Rupees 530 were spent on establishment, Rs. 85 on English medicines, and Rs. 20 on country medicines. The expenditure on miscellaneous items was Rs. 34. Municipality paid Rs. 360 and Rs. 262, and Rs. 47 were realized as subscriptions from Europeans and natives respectively. There was a cash balance of Rs. 120 at the end of the year.

*Boidyabati.*—A municipal dispensary in class II. It was not visited by the civil officers. The civil medical officer paid several visits, but forwarded only two inspection reports. A civil hospital assistant is in charge. The number of out-door patients treated was 4,175 against 4,240 in 1882, the daily average being 30 and 34 respectively. There were no major operations. Minor operations numbered 285. The total expenditure was Rs. 793, of which Government paid Rs. 6 as cost of forms. The cost of establishment was Rs. 483. The amount paid for Europe medicines, obtained from Government stores, was Rs. 118. The cost in 1882 was Rs. 73. Bazar medicines cost Rs. 20, repairs to buildings Rs. 139, and Rs. 33 were paid for miscellaneous items. Municipality paid Rs. 540. Rupees 44 were obtained as interest on investments, Rs. 172 by sale of securities, Rs. 60 and Rs. 14 as subscriptions from Europeans and natives respectively. There was a cash balance of Rs. 876 at the end of the year.

*Bundipore.*—It is a class IIIB dispensary, supported by a single individual, aided by Government. The local committee who managed its affairs in the absence of the supporter no longer exists. The founder looks after it frequently personally. There has been a marked improvement in the conduct of the institution now. It was visited once by the sub-divisional officer of Serampore and twice by the civil medical officer. A civil hospital assistant is in charge. There were 2,224 out patients treated with a daily average of 20 against 2,806 and 26 in 1882. The decrease in the number of patients is ascribed to the better health of the district. No in-patients. Minor operations numbered 108. No major operations. The total expenditure amounted to Rs. 716, whereof Government contributed Rs. 103, viz. Rs. 5 as cost of forms and books and Rs. 98 as salary of the medical subordinate. The cost of establishment was Rs. 283. Europe medicines bought from Government stores cost Rs. 117 against Rs. 75 in 1882. Bazar medicines cost Rs. 31, and Rs 19 were paid for miscellaneous items. Subscriptions from natives amounted to Rs. 480, and Rs. 117 were obtained by sale of securities. Rupees 267 were invested during the year.

Howrah district.

*Ooterparah.*—It is a municipal dispensary from 29th April 1884 and is in class II. Under the special circumstances noticed in the previous report, Government has consented to pay the entire salary of a third grade officer. It is managed by a local committee who met three times during the year Visited twice by the Civil Surgeon. The number of patients treated was 280 in and 3,534 out against 258 and 3,601 in 1882. The daily average was 10·9 and 25 against 12 and 25 respectively. It has been calculated on the actual attendance of patients. There were 44 deaths, or a rate of 15·7 per cent. against 44 and 17·04 in the previous year. Eighteen major (chiefly setting of fractures and reduction of dislocations) and 370 minor operations were performed. The total expenditure was Rs. 2,831, of which Rs. 1,860, represent the cost of establishment. Government paid Rs 1,200, the entire pay of the medical officers. The amounts of European and native subscriptions was Rs 120 and Rs 1,811 respectively. Municipality paid nothing. The cost of Europe medicines was Rs. 97, of bazar medicines Rs. 69, and of diet Rs. 434. The outlay on buildings was Rs. 210, and on miscellaneous items Rs. 161.

## Presidency Division.

District of 24-Pergunnahs.

Dr. Jackson has submitted a full and complete report containing interesting criticisms on all matters of importance in the working of the dispensaries in the district. The general health of the district during the year 1883 was exceptionally good. Fever of a malarious type and cholera is stated to have prevailed in certain places. Of the 15 dispensaries reported to have been at work at the end of the previous year, the one at Alipore was converted into a police case hospital under Government order No. 1134, dated 3rd October 1882. Two new dispensaries were opened—one at Barripore on 4th July, sanctioned in Government letter No. 694, dated 27th March 1883, and the other at Baduria on the 20th July under Government order No. 77T—M, dated 19th April 1883—so that there were in all 16 dispensaries working in the district at the close of the year under report. Of these, six were in class II under the new rules of classification, having been formally made over to municipalities, four in class IIIA, being entirely under private management, and six in class IIIB, being under private management, but aided by Government and municipalities. Four were in charge of Assistant Surgeons and twelve under that of civil hospital assistants. The North Suburban Hospital and the dispensaries at Barisha, Diamond Harbour, Russapagla, Baraset, and Gobardanga treated both in-door and out-door patients; the rest are only out-door institutions. There were treated 936 in and 55,341 out-patients as compared with 1,048 and 53,961 in 1882 (excluding the figures of Alipore and Bistopore dispensaries, which had no part in 1883). The daily averages were 43 and 468 against 43 and 443 respectively. Taking the figures of those two dispensaries, the number of attendance in the two years would stand as 936 and 55,341 against 1,235 and 58,377 in 1882. The Civil Surgeon had no opportunity of verifying the figures, but thinks the returns far more reliable than they were as to number.

With regard to the interest shewn by the managing bodies towards these institutions, Dr. Jackson says: "I am of opinion that managing bodies take little or no interest in the dispensaries. The thing that most interests them is the getting a good man or some specially popular man (which means popular with them) put on as medical officer. Confidence in the European system of medicine increases among the better educated day by day, and when they agitate for a dispensary or are induced to take an active part regarding it, they do so, in my experience, simply to have medical help at hand for themselves and their families, and the man most liked is he who will devote himself heart and soul to their works and let the poor do as they can. In a time of cholera epidemic they will generally take an interest in the poorer people around, but ordinarily they care very little about the charitable uses of the institution. There were only 66 meetings against 97 in 1882 and 130 in 1881. This does not indicate an increasing interest. Many of these, moreover, are municipal gatherings in which the dispensary or its working may not be brought up at all." The Civil Surgeon believes that the people do appreciate the dispensaries when they get proper attendance. The dispensaries at Bhowanipore, Russa, Gobardanga, Naihati, and Harinavi are fairly appreciated by the neighbouring poor. In some of the others no one comes from the neighbourhood, and the numbers are mostly of people from outside villages. The Civil Surgeon could not visit the dispensaries during the year as he could wish. The order regarding *post mortem* examination being in all cases made by the Civil Surgeon himself, has prevented him to leave the station.

*North Suburban Hospital.*—This institution belongs to class IIIB, managed by a committee composed of Europeans and natives, of which Dr. Waldie, the Honorary Secretary, is said to take great interest. There were three meetings. No visits were paid by the civil officers of the district. The Civil Surgeon visited twice. Third grade Assistant Surgeon Jadub Krishna Sircar was in charge from beginning of the year up to 30th June 1883, when he made over charge to third grade Assistant Surgeon Namai Churn Chatterjee. As regards their fitness the Civil Surgeon says that "Jadub Krishna Sircar's qualification was above the average." "Nemai Churn Chatterjee I take to be an average man, but I have less knowledge of him than of the former." The entire pay of these Assistant Surgeons was paid by Government. There were treated 500 in and 4,207 out-patients against 606 and 4,534 in 1882, the daily averages were 25 and 36 against 27 and 37 respectively. The year was a healthier one and there was no epidemic of any disease save a slight outbreak of cholera in the filthiest quarters of Chitpore, which did not necessitate any special medical aid. There were 34 deaths, or a rate of 6·8 per cent. of the patients treated against 39 and 6·4 in the previous year. Six deaths occurred among patients admitted in a moribund condition. Eighty-eight cases of major operations were treated during the year, of which 85 were new, or 30 less than the number of 1882. There was no death after major operations. Minor operations numbered 498 against 535. The total expenditure was Rs. 8,832, of which Government contributed Rs. 1,304, viz. Rs. 1,200 as salary of the medical subordinate, Rs. 94 as diet of police cases, and Rs. 10 as cost of registers and forms. The cost of establishment was Rs. 2,253, of Europe medicines Rs. 74, and of bazar medicines Rs. 176. Dieting articles cost Rs. 1,039, and Rs. 342 were expended on miscellaneous items. Besides the Government contribution, the income from local sources amounted to Rs. 6,507. The financial condition of the dispensary is said to have improved. Excluding the cash balance and the invested money on 1st January 1883, the dispensary had an income of Rs. 7,810 from different sources, and an expenditure of Rs. 3,385, thus leaving a surplus of Rs. 3,926. The dispensary invested in 1883 Rs. 5,000 in Government promissory notes at 4 per cent. interest in addition to the Rs. 12,500 already invested. After the purchase of the Government promissory notes for Rs. 5,000 alluded to, the dispensary had Rs. 1,994 in cash at the end of the year 1883.

*Barisha.*—A class IIIB institution, managed, by the local municipality. It has not yet been formally vested in it. The dispensary affairs were discussed at the ordinary municipal meetings. No visits by any civil officer is recorded. The Civil Surgeon visited it twice. An Assistant Surgeon was in charge till 10th November 1883, when he was replaced by a civil hospital assistant, who is paid Rs 55 per month entirely by the municipality. There were treated 74 in and 5,245 out-patients against 101 and 5,008 in 1882, the daily averages were 1·9 and 33 against 2·8 and 31·9 in the previous year. In 1883 there were 12 deaths, or a rate of 16·2 against 19 or 18·8 in 1882. The prevailing disease was ague complicated with spleen. Twenty-three major and 376 minor operations were performed. The total expenditure was Rs. 2,462, whereof Rs. 2,067 represent the cost of establishment. The cost of Europe medicines paid for during the year was Rs. 72, and of bazar medicines Rs. 21; Rs 79 were spent for diet of patients. The expenditure on buildings was Rs. 157, and on miscellaneous items Rs. 58. Government contributed Rs. 8 on account of forms and registers The opening and the closing cash balance of this dispensary has not been shewn. The subscriptions amounted to Rs. 41, and the municipality had to pay Rs. 2,413 to cover the expenditure of Rs. 2,454.

*Bhowanipore.*—A municipal dispensary (class II). Visited twice by the Civil Surgeon. Third grade Assistant Surgeon Ram Moy Roy was in charge throughout the year, excepting for three months. Dr Jackson is of opinion that he is "an exceptionally able practitioner and good surgeon." He was paid Rs. 100 per month, half from the Suburban municipality and half from Government. There were treated 11,010 out-patients with a daily average of 86 against 10,351 and 76 in 1882. No in-patients. Cholera, fever, and small-pox are said to

have predominated to a certain exent in Bhowanipore and its surrounding places. Eighty-seven major and 1,314 minor operations were performed. The total expenditure was Rs. 2,016, whereof Government contributed Rs. 861, viz., Rs. 850 as pay and allowance of the medical subordinate and Rs 11 as cost of forms and registers. The cost of establishment was Rs. 1,788. Rupees 107 were spent on Europe medicines, obtained from private dealers, Rs. 62 on bazar medicines, and Rs. 47 on miscellaneous items. Municipality paid Rs. 898. Interest on investments amounted to Rs. 244, and Rs 12 were obtained from other sources. The dispensary has Rs 5,800 in Government promissory notes, of which Rs. 3,300 at 4 per cent. and Rs. 2,500 at 4½ per cent. interest.

*Agarparah or Khurdah.*—A (class II) municipal institution. There is a managing committee which met 10 times. The Cantonment Magistrate of Barrackpore visited the dispensary four times. The Civil Surgeon visited it once. A civil hospital assistant is in charge, who receives Rs. 30 per mensem from the municipality. It is an out-door institution. The number of patients treated were 1,598 with a daily average of 19 against 1,550 and 20 in 1882. One hundred and seventy-nine minor operations were performed. The total expenditure was Rs. 600, of which Rs 432 represented the cost of establishment, Rs. 47 of Europe medicines, and Rs 13 of bazar medicines. The expenditure on miscellaneous items amounted to Rs. 102. Government supplied registers and forms, the cost of which was Rs. 6 The cost of medicines obtained during the year from Government store, viz. Rs 27, were not paid for. Municipality paid the entire expense, viz Rs 594.

*Nawabgunge.*—This is a class IIIB institution, managed by the North Barrackpore municipality, but not yet formally vested in it. There is a separate dispensary committee which met 11 times during the year. The Civil Surgeon visited once. A civil hospital assistant is in charge, who is paid Rs. 35 per mensem by the municipality. It is an out-door institution. There were treated 1,689 out patients against 1,423 in 1882, the daily average being the same for both the years, namely 17. Minor operations numbered 146. The total expenditure was Rs. 563, whereof Rs 492 represent the cost of establishment. The cost of Europe medicines was Rs. 15 and of bazar medicines Rs 16 The amount expended on miscellaneous items was Rs. 40. The cost of forms obtained from Government was nominal. Municipality paid the entire expense.

*Diamond Harbour*—It is a class IIIA sub-divisional dispensary, managed by a committee which held five meetings during the year. Visited frequently by the sub-divisional officer and once by the Civil Surgeon. The civil hospital assistant in charge of the sub-division was in charge and received Rs. 10 from the dispensary fund There were treated 45 in and 1,263 out patients against 16 and 1,453 in 1882; the daily averages were one and eight against five and nine. Most of the in-door patients were sent up by the police. There were two deaths, or a rate of 4 4 per cent. of total treated against 3, or 18 7 in the previous year. Two of these deaths were cholera cases admitted in a moribund state. Ninety-two minor operations were performed. The financial condition of the dispensary was worse. The income was Rs. 354, exclusive of the value of registers and forms, which were supplied free by Government, and the total expenditure was Rs. 363. The expenditure exceeded the income by Rs. 9, which had to be met from the cash balance on 1st January 1883 The dispensary has Rs. 400 in Government promissory notes at 4 per cent interest. The establishment was not regularly paid month by month. The cost of it was Rs. 312, of Europe medicines Rs. 25, and of bazar medicines Rs 14. The amount spent on miscellaneous items was Rs. 12. Government contributed forms and registers, the cost of which was one rupee only. Nothing was paid for dieting, as the inpatients paid for their own feeding.

*Canning Town*—A class IIIA dispensary, supported and managed by a private committee, which met nine times during the year. The District Magistrate and the sub-divisional officer paid a visit each. A civil hospital assistant is in charge, whose entire pay was paid from the dispensary fund. There were treated 934 out-patients with a daily average of nine against 927 and seven in 1882. Minor operations numbered 50. No major operations. The total expenditure was Rs. 473, of which Rs. 375 were the cost of establishment, Rs. 44 of Europe medicines, Rs. 15 of bazar medicines. Rupees 16 were spent on miscellaneous items. Government contributed forms and registers, the cost of which was Rs. 4. The income of the dispensary was Rs. 448 which consisted of subscriptions from natives of Rs 240, from Europeans Rs. 190, and of interest on investments Rs. 18. The dispensary had a deposit of Rs. 505 in savings bank.

*Naihati.*—It is a class IIIB institution, supported and managed by the local municipality, but has not yet been formally vested in it. The Civil Surgeon paid one visit only. A civil hospital assistant is in charge who receives Rs. 50 per mensem from the municipality. There were treated 3,960 out-patients with a daily average of 30 against 4,828 and 35 in 1882. No in-patients. Three major and 169 minor operations were performed. The total expenditure was Rs 1,209, of which Rs. 804 were the cost of establishment, Rs. 157 of Europe medicine, and Rs 26 of bazar medicines. The expenditure on buildings was Rs. 192 and on miscellaneous items Rs 30 including Rs 7, the cost of forms and registers contributed by Government. The total income of Rs 1,243 consisted of Rs. 147 realized as subscription from natives, Rs. 96 obtained from other sources, and Rs. 1 000 paid by the municipality. The dispensary had Rs. 664 as cash balance on 31st December 1883.

*Russapagla.*—This is a class IIIA dispensary supported by private endowments and managed by a committee. No meetings were held during the year. Visited once by the District Mâgistrate and several times by the District Engineer. The Civil Surgeon paid seven visits. An Assistant Surgeon is in charge who received Rs. 100 per month from Prince Gholam Mahomed's Trust Fund on account of the dispensary, and Rs. 50 from Political Pensions Department on account of the Mysore family dispensary. There were treated 208 in and 6,214 out-patients against 198 and 6,064 in 1882; the daily averages were eight and 58 against seven and 61. There were 21 deaths, or 10·09 per cent. of treated against 25 and 12·6 in the previous year. Seventy-seven major and 439 minor operations were performed. The total expenditure was Rs. 3,637, whereof Rs. 2,144 represent the cost of establishment. No payment was made for Europe medicines obtained from the Government store during the year. Bazar medicines cost Rs. 69, and diet Rs. 427. The expenditure on buildings was Rs. 701 and on miscellaneous items Rs. 295, inclusive of Rs. 12 cost of registers and forms obtained from Government. The dispensary is entirely supported from interests of endowments of the late Prince Gholam Mahomed. The trust fund is under the management of Government. The dispensary has Rs. 1,32,000 in Government promissory notes at 4 per cent. interest. It had a cash balance of Rs. 7,167 in hand on 31st December 1883.

*Harinavi*—A municipal institution managed by Rajpore municipality. It was formally vested to that body in July 1884. There is a managing committee of the dispensary, which met only once during the year. Neither the civil officers nor Civil Surgeon visited the dispensary. A civil hospital assistant is in charge, who is paid Rs. 35 per month from the municipality. There were treated 6,507 out-patients with a daily average of 41 against 7,370 and 47 in 1882. No in-patients. Twelve major and 412 minor operations were performed. The total expenditure was Rs. 807, of which Rs. 588 represent the cost of establishment. Rupees 168 were paid for Europe medicines during the year Bazar medicines cost Rs. 20, and Rs. 30 represent the expenditure on miscellaneous items, inclusive of Government contribution of Rs. 12 in forms and registers. The income from other sources was Rs. 818, and the dispensary had a cash balance of Rs. 72 in hand on 31st December 1883.

*Baraset.*—A municipal dispensary (class II). The Commissioner of the division and the Magistrate of the district each visited the dispensary once, and the sub-divisional officer twice. The Civil Surgeon paid no visit. A second grade Assistant Surgeon was in charge. He received Rs. 25 per month from the municipality on account of dispensary, Rs. 125 from Government on account of the sub-division, and Rs. 50 per month from Government for the jail. There were treated 98 in and 4,076 out patients against 114 and 4,329 in 1882. The daily averages were five and 33 against four and 32 respectively. There were four deaths, or a rate of 4·08 per cent. against 10 and 8·7 in the previous year. Forty-eight major and 315 minor operations were performed. The total expenditure was Rs. 1,037, of which Rs. 513 were the cost of establishment and Rs. 63 of Europe medicines. Bazar medicines cost Rs. 60. The expenditure on diet was Rs. 180, on buildings Rs 150, and on miscellaneous items Rs. 66. Government contributed Rs. 12 in forms and registers. The income of the dispensary was Rs. 992, and there was a cash balance of Rs 35-8 on 1st January 1883, which was reduced to Rs. 2 on 31st December 1883. The dispensary had Rs. 1,000 in Government paper at 4 per cent. interest and Rs. 135 as deposit in savings bank. Municipality paid Rs. 589. Subscriptions from natives amounted to Rs. 356, and Rs. 45 were received as interest on investments

*Tara Sunker Chowdhuri's Dispensary at Taki.*—A class IIIB dispensary maintained by the local zemindar and aided by the municipality. It is managed by a committee which held 10 meetings during the year. Visited twice by the sub-divisional officer of Basirhat, and once by the Officiating Deputy Superintendent of Vaccination, Metropolitan Circle, and once by the Superintendent of Vaccination and Deputy Sanitary Commissioner. The Civil Surgeon paid no visits. A civil hospital assistant is in charge, who received Rs. 40 per month, half from municipal and half from dispensary funds. The number of out-patients treated was 984 against 1,452 in 1882, and the daily average 16 and 24 respectively. Three major and 140 minor operations were performed. The total expenditure was Rs. 775, of which Rs. 646 represent the cost of establishment, Rs. 61 of Europe medicines, and Rs. 13 of bazar medicines. The amount expended on buildings was Rs. 10, and on miscellaneous items Rs. 24, inclusive of the value of forms and registers supplied by Government, which was Rs. 6 The total income was Rs. 685. The dispensary had a cash balance of Rs 1,050 on 31st December 1883, viz. Rs. 500 in Government promissory notes and Rs. 550 in savings bank.

*Basirhat.*—A class IIIB dispensary aided by the local municipality, to which it has not yet been formally vested. Managed by a committee, which met six times during the year. It was visited once by the Commissioner of the division. The sub-divisional civil hospital assistant is in charge and receives Rs. 10 from the dispensary fund, Rs. 25 from Government for sub-division and Rs. 10 for executive charge of the jail. There were treated 1,041 out-patients with a daily average of 10 against 1,107 and nine in 1882. No in-patients. Three major and 61 minor operations were performed. The total expenditure was Rs. 471, of which Rs. 148 were the cost of establishment, Rs. 142 of Europe medicines paid for during the year, and Rs. 9 of bazar medicines. The amount expended on buildings was Rs. 151, and on miscellaneous items Rs. 20. No cost was incurred on account of diet during 1883 Government contributed forms and registers, the value of which was Rs. 4.

*Gobardanga.*—This is also a class IIIA dispensary managed by its proprietor Baboo Girija Prossonna Mukherjee, the local zemindar. There is no committee. No visits were paid either by civil officers or by the Civil Surgeon. A civil hospital assistant is in charge, whose entire pay is paid from the estate of the proprietor. There were treated 11 in and 4,523 out patients against 13 and 3,565 in 1882. The daily averages were ·8 and 35 against ·7 and 30 respectively. There was one death only in a case of cholera admitted in the last stage. Twenty major and 370 minor operations were performed The total expenditure was Rs. 1,141, of which Rs. 950 represent the cost of establishment, Rs 123 of Europe medicines paid for during the year, and Rs. 26 of bazar medicines. The expenditure on diet was Rs. 11, and on miscellaneous items Rs. 31. Government supplied forms and registers, the cost of which was Rs 7.

*Barrpore.*—This is one of the two municipal dispensaries which were opened during the year. It is in class II. A civil hospital assistant is in charge, who received Rs. 25 monthly from the municipality One thousand and eighty-seven out-patients were treated with a daily average of 24. There were 17 minor operations. The total expenditure was Rs. 479, of which Rs. 193 represent the cost of establishment. The value of Europe medicines obtained from private druggists was Rs. 157. Bazar medicines cost Rs. 5, and Rs. 123 were spent on miscellaneous items. Government paid nothing. The total income was Rs. 482, viz. Rs. 58 as subscription from natives and Rs. 424 as municipal contribution.

*Baduria.*—This is the other municipal dispensary opened during the year in the district Visited once by the sub-divisional officer. A civil hospital assistant is in charge, who is paid Rs. 25 monthly from the municipality. There were treated 1,003 out-patients with a daily average of six. Twenty-three minor operations were performed. The total expenditure was Rs. 532, of which Rs. 186 were the cost of establishment, Rs. 218 of Europe medicines obtained from private druggists, and Rs. 10 of bazar medicines. The amount expended on miscellaneous items was Rs 118. Municipality paid all the expenses.

**Khoolna district.**

The report has been submitted by Assistant Surgeon Deno Bundoo Dutt, who was in civil medical charge of the district throughout the year, except for three months from July. It is full and complete. It has been forwarded by the Commissioner of the division with useful remarks on the working of the institutions. The year under report has been stated to be an unhealthy one, though a comparison of mortuary returns for the two years shews that the year 1883 was healtheir than 1882, the total number of recorded deaths being 23,025 against 25,233, or 21 31 against 23 58 per 1,000 of population The total number of dispensaries working in the district at the end of the year was five. Of these three are in class IIIA and two in class IIIB. The dispensaries at Satkhira and Bagirhat received both in-door and out-door patients; the other three were only out-door institutions. All the institutions were in charge of civil hospital assistants. The total number of patients treated was 153 in and 7,532 out against 177 and 6,737 in 1882, the daily average, being (five and 75 against five and 75) the same for both years. With regard to these, the civil medical officer says that "the figures at the Khoolna dispensary may be accepted as correct; those of Bagirhat, Satkhira, and Dowlutpore as fairly trustworthy; but the records of Shamnugger dispensary did not appear to be reliable." The interest taken by managing bodies was, with some exceptions, nominal. Very few of the members of Khoolna dispensary took any special interest in its welfare. The same indifference was shewn by the managing committees at Shamnugger, Dowlutpore, and Bagirhat. At Satkhira, however, the municipal commissioners visited the dispensary from time to time, and shewed interest in the institution. From the relation of the figures of attendance to the state of public health the civil medical officer is of opinion that the charity in this district does not appear to be appreciated by the people.

*Khoolna.*—This is a class IIIA dispensary according to the new rules, managed by a committee presided over by the District Magistrate, which held 12 meetings during the year. Mr. Clay, the president of the committee, took great interest in its welfare, and paid Rs. 250 when its funds were in a miserable state of insufficiency. It was visited once by the Commissioner, and constantly by the Magistrate. The Assistant Surgeon in medical charge inspected it daily. A civil hospital assistant is in charge, who receives Rs. 10 only from the dispensary fund, and his grade pay from Government. The total number of out-door patients treated was 2,648 against 1,829 in 1882, the daily average number being 19 and 16 respectively No in-patients. Arrangements for their accommodation, reported in the previous report, were not made. Eleven major, of which only three were important, and 112 minor operations were performed The total expenditure was Rs. 547, whereof Government contributed Rs. 15, viz Rs. 13 for forms and registers, and Rs 2 for diet of police cases. The cost of establishment was Rs. 261, of Europe medicines obtained from private druggists Rs. 16 only, and of bazar medicines Rs 25. The amount expended on diet was Rs. 5, on buildings Rs. 162, and on miscellaneous items Rs. 77. The dispensary is maintained by subscriptions only, which amounted to Rs 538.

*Satkhira.*—This is a class IIIB dispensary aided and managed by the local municipality to which it has not yet been formally vested. It was visited once by the Commissioner of the division, twice by the District Magistrate; once by the sub-divisional office, and six times by the Municipal Commissioners. The Assistant Surgeon in medical charge of the district inspected it twice. The sub-divisional civil hospital assistant is in charge, and receives Rs. 10 from the dispensary fund. There were treated 108 in and 1,995 out patients against

122 and 1,884 in 1882. The daily averages were three and 10 against four and 13 respectively. There were six deaths, or a rate of 5·5 per cent. of the total treated against 12 and 9·8 in the previous year. Ten major operations, with one death, were performed. Minor operations numbered 140. The total expenditure was Rs. 898, whereof Government contributed Rs. 12, viz. Rs. 10 as cost of forms and registers, and Rs. 2 for diet of police cases. Rupees 463 represent the cost of establishment, Rs. 87 of Europe medicines, and Rs. 69 of country medicines. The expenditure on diet was Rs. 116, on buildings Rs. 65, and on miscellaneous items Rs. 99. Municipality paid all the expenses.

*Bagirhat.*—This is a class IIIA dispensary under the new rules of classification, managed by a local committee, which met six times during the year. It was visited once by the Commissioner of the division, and five times by the Assistant Surgeon in charge of the district. The civil hospital assistant attached to the sub-division is in charge, for which he gets Rs. 10 per mensem from the dispensary fund in addition to his grade pay from Government. There were treated 45 in and 946 out patients against 55 and 1,100 in 1882, the daily averages being the same for both the years, viz. 1 and six. The entire number of in-patients treated were, like those of the previous year, cases of injuries sent by the police and sub-divisional officer. There was only one death during the year against three in 1882. From the small number of attendance of patients in this institution, the Assistant Surgeon is of opinion that it did little or no work, and seemed not to have been appreciated by the people. Thirty-four minor operations were recorded against 55 in 1882. No major operations. The total expenditure was Rs. 496, whereof Government paid Rs. 4 for forms and registers. Nothing was paid for the dieting of patients as they defrayed their own expenses. Rupees 31 represent the cost of Europe medicines, which were obtained from private druggists. The cost of establishment was Rs. 287. The expenditure on buildings was Rs. 121, and on miscellaneous items Rs. 23.

*Dowlutpore.*—This is class IIIB dispensary under the new rules of classification, managed by a committee, which met seven times during the year under report. Visited once by the District Magistrate. The Assistant Surgeon in charge of the district inspected it once A civil hospital assistant is in charge, whose entire pay of Rs. 35 is paid by Government. The number of out-patients treated was 1,176 against 1,293 in 1882. The daily average was 15 and 17 respectively. No in-patients. One-hundred and thirty-seven minor operations were performed. No major operations. The total expenditure was Rs. 636, whereof Rs. 492 represent the cost of establishment. Government contribution amounted to Rs. 423, of which Rs. 420 were paid as salaries of the medical subordinate, and Rs. 3 as cost of forms and registers. The cost of Europe medicine obtained from private druggists was Rs. 95 against Rs. 75 in 1882, and of bazar medicines Rs. 13. The expenditure on miscellaneous items was Rs. 23. The income from local or other sources amounted to Rs. 612. Rupees 50 were realized as subscriptions from natives and Rs. 13 were received as interest on investments. No municipal contribution. At the end of the year there was a cash balance of Rs. 1,094.

*Shamnugger.*—This is a class IIIA dispensary supported entirely by Sreemutty Nistariny Dabya, and managed by a private committee which held 12 meetings during the year. No visits were paid by civil officers. The Assistant Surgeon inspected it once only, being in a remote place. The number of patients treated was 767 out-door against 721 in 1882, the daily average being 21 against 23 in the previous year. There were no in-patients. With regard to the daily average number the Assistant Surgeon says that "it does not represent the actual attendance, as no entries were made by the hospital assistant in his out-door register to distinguish the sick who received medicines through their friends." Sixty-seven minor operations are said to have been performed. No major operations. The total expenditure was Rs. 525, whereof Rs. 396 represent the cost of establishment. Government paid Rs. 3 as cost of forms and registers. Europe medicines were obtained partly from Government stores and partly from private druggists. The cost of both supplies was Rs. 79. Bazar medicines cost Rs. 23. The expenditure on miscellaneous items was Rs. 26. The dispensary was supported by local subscriptions, which amounted to Rs. 400. There was a cash balance of Rs. 468 at the end of the year.

**Nuddea district.**

The report of the Civil Surgeon has been forwarded by the Commissioner of the division with his usual remarks on the working of the dispensaries. The public health of the district was better than that of the previous year as is apparent from the mortuary returns, the death-rate among the general population being 36 against 40 in 1882. There were at the beginning of the year seven dispensaries open in the district. The dispensary at Bongong was transferred to Jessore in April last owing to the transfer of the Bongong sub-division to that district. The number of dispensaries was thus reduced to six at the close of the year. Of these the dispensary at Kooshtea is under the supervision of the Civil Surgeon of Goalundo, who has submitted a separate report. All the dispensaries in this district are under municipalities, and therefore, according to the new rules of classification, are in class II. The dispensary at Kishnaghur is under the charge of an Assistant Surgeon; the rest are in charge of civil hospital assistants. Those at Kishnaghur, Ranaghat, and Santipore receive both in-door and out-door patients; the rest are out-door institutions. The total number of patients treated at these dispensaries, including the one at Kooshtea, was 249 in and 13,864 out-door against 294 and 18,755 in the previous year The daily average was 10 and 140 against 14 and 213 in 1882 respectively. The decrease in the number of patients is due to the abolition of two dispensaries—Natuda and Bongong.

These figures, says the Civil Surgeon, are reliable. The local municipalities at Kishnaghur and Meherpore are said to take much interest in their institutions.

*Kishnaghur.*—This is a municipal dispensary in class II. There is a sub-committee to administer the affairs of the institution. This committee held nine meetings. Visited once by the Joint-Magistrate, twice by the Magistrate. The Civil Surgeon paid 157 visits. An Assistant Surgeon is in charge. There were treated 232 in and 5,843, out door patients against 243 and 8,640 in 1882, the daily averages being 10 and 50 against 11 and 84. The decrease in the number of out-patients is attributed to a greater healthiness of the town and its vicinity during the year under report. The death-rate was 12·06 against 14·4 in 1882. Twenty-four major and 477 minor operations were performed. The total expenditure was Rs. 2,924, whereof Rs. 1,646 represent the cost of establishment. Government contributed Rs. 11 as cost of registers and forms Europe medicines which were obtained from private sources, cost Rs. 399. Bazar medicines cost Rs. 32. Rupees 320 were spent for dieting of patients, and Rs. 101 represent expenditure on miscellaneous items, and Rs. 424 on buildings. The municipality paid Rs 1,503, and subscriptions from Europeans and natives amounted to Rs. 176 and Rs. 195 respectively. The dispensary had an opening cash balance of Rs. 1,033, but nothing has been shewn at the end of the year.

*Ranaghat.*—It is a municipal dispensary (class II). The local municipality manages its affairs in their ordinary meetings. There were 12 meetings held. The sub-divisional officer visited once, and the Civil Surgeon inspected it four times. A civil hospetal assistant is in charge. He gets his grade pay from Government and Rs. 10 from the municipality for dispensary charge. There were treated 14 in and 1,445 out patients against 11 and 1,388 in 1882. The daily averages were ·12 and 19 against ·33 and 18 respectively. There were four deaths among the in-patients against five in 1882. One hundred and thirteen minor operations were performed. The total expenditure was Rs 535, of which Government paid Rs. 7 in forms and register. Rs. 307 represent the cost of establishment, Rs. 164 of Europe medicines, which were obtanied from private dealers. Bazar medicines cost Rs. 10. Rupees 18 were expended on buildings, and Rs. 20 on miscellaneous items. The expense for dieting of patients was nominal. Municipality contributed Rs. 458 against Rs. 392 in 1882.

*Santipore.*—This is a municipal dispensary, and in class II according to the new rules of classification. Four meetings were held during the year. With the exception of the sub divisional officer, who paid one visit only, no other civil officer, visited the institution. The Civil Surgeon paid five vists. There were treated 1,399 out-patients with a daily average of 22 against 1,501 and 23 in 1882. The diminution is attributed to the healthiness of the year. There were no in-patients. One hundred and thirty-two minor operations were performed. A civil hospital assistant is in charge. The total expenditure was Rs. 878, whereof Government contributed Rs. 6 in forms and registers. Rupees 552 represent the cost of establistment. Rupees 55 were expended on Europe medicines obtained from private vendors Bazar medicines. cost Rs. 22, and Rs. 84 were spent on buildings. Rupees 45 were expended on miscellaneous items. Municipality paid Rs. 753, and Rs 119 were obtained on account of interest on investment.

*Ula dispensary.*—Is under the local municipality, and therefore in class II. Visited twice by the sub-divisional officer and three times by the Civil Surgeon. A civil hospital assistant is in charge, whose entire salary is now paid by the municipality. The number of out-patients treated was 1,837 with a daily average of 21 aganist 1,071 and 16 in the previous year. No in-patients. Eighty-seven minor operations are recorded. The total expenditure was Rs. 536, of which Rs. 421 represent the cost of establishment. Government contributed Rs. 5 as cost of forms and registers. The price of Europe medicines obtained from private sources, was not paid for during the year The cost of bazar medicines was Rs. 47. Rupees 8 represent expenses under miscellaneous items. Municipal contribution amounted to Rs. 560, and Rs. 60 were obtained as interest on investments. The invested capital at the end of the year was Rs. 1,652.

*Meherpore.*—It is under the local municipality, and is therefore in class II. Nine meetings were held. The commissioners paid 11 visits. It was visited once by the Magistrate and the sub-divisional officer. Civil Surgeon paid three visits. A civil hospital assistant in charge of the sub-division is in charge of the institution for which he gets Rs. 10 from the municipality. The number of patients treated was three in and 2,607 out against 5 and 2,256 in 1882. The daily averages were ·09 and 20 against ·06 and 18 respectively. There was no death. One major and 152 minor operations were performed. The total expenditure was Rs. 497. Government contributed Rs. 6 for diet of police cases and cost of forms and registers. The Civil Surgeon says that on account of the large stock remaining in hand, Europe medicines were not purchased during the year; but Rs. 153 have been shewn under that head in the cash statement. Rupees 300 represent the cost of establishment. Municipality paid Rs. 477 against Rs. 527 in 1882. The expenditure on miscellaneous items was Rs. 24, on bazar medicnies Rs. 7, and on buildings Rs. 11.

*Kooshtea.*—It was in class IIIB, aided and managed by the local municipality throughout the year. The institution now belongs to class II, having recently been formally vested in that body under the orders of Government conveyed in its letter No. 642T—M, dated 21st May 1884. The dispensary was under the supervision of the civil medical officer of Goalundo, who has submitted the report. Visited by the Magistrate of the district, the sub-divisional officer, and the Superintendent. The civil hospital

assistant of the sub-division is in charge, and receives Rs. 15 per mensem from the dispensary funds. There were treated 733 out-patients with a daily average of six against 979 and 10 in 1882. The cause of the falling off is said to be due to the removal of the dispensary from the town to its present site, and to the fact that the patients could not have received proper treatment for want of English medicines for which no money appears to have been spent during the year. Forty-two minor operations are said to have been performed. No major operations. The total expenditure was Rs. 325, of which Rs. 287 represent the cost of establishment, and Rs 8 of Bazar medicines. Europe medicines were not purchased during the year. The expenditure on buildings was Rs. 5, and on miscellaneous items Rs. 16. Government contributed Rs. 7 as cost of forms and registers. Municipality contributed Rs. 140 against Rs. 180 in 1882. Subscription from Europeans and natives amounted to Rs. 164, and Rs. 9 were obtained as interest on investments. From the steady falling off in the number of attendance, the civil medical officer says that its popularity is diminishing. The Magistrate of the district also remarks as follows:—"As far as the utility of this dispensary is concerned. it was doubtless a mistake to remove it to its present site; but had such not been done, I believe it would have been necessary to close the institution altogether. It seems to me that but very little interest is taken in this dispensary by any one but the sub-divisional officers, whose efforts to restore it to its once state of usefulness have hitherto been quite unsuccessful, and if better results are not shortly obtained can but end in the closing of the institution."

**Jessore district.**

The report of the Civil Surgeon in itself full and complete has been forwarded with covering letters from the Magistrate and Commissioner, reviewing the working of the institutions. The public health of the district is reported to have been a little better than that of the previous year The total number of recorded deaths was 47,765 against 51,648, shewing a decrease of 3,883 over the previous year. This is said to be mainly due to a falling off in the number of deaths from cholera, which was very considerable. The general mortality would have been still less had not the mortality from fever exceeded that of the preceding year and overbalanced portion of the reduction. Fever prevailed to a very great extent in the Sudder sub-division, where medicines were distributed to check the progress. There were at the beginning of the year six dipensaries open. The dispensary at Bongong was added to the list in April 1883, owing to the transfer of that sub-division from Nuddea to Jessore, but it was closed shortly after under Government order No. 903T—M, dated 13th August 1883, so that the number of dispensaries at the close of the year was the same as at the beginning, viz. six. Of these, one is under the local municipality, and therefore in class II; the other five were under local bodies and are in class IIIA. Two of these dispensaries receive both in and out door patients, the rest are out-door institutions only. One is in charge of an Assistant Surgeon, and the others are in charge of civil hospital assistants The total number of patients treated was 310 in and 16,138 out against 333 and 15,128 in 1882, the daily averages being 10 and 106 against nine and 102 respectively. The managing committees of the several dispensaries are said to take great interest in the working of their institutions.

*Jessore.*—This is a class II dispensary under the local municipality. There being no separate dispensary committee its affairs were considered at the municipal meetings. Visited twice by the Magistrate, and daily by the Civil Surgeon. An Assistant Surgeon is in charge. There were treated 295 in and 5,661 out patients against 322 and 5,416 in the previous year. The daily average attendance was 10, and 33 against nine and 35 respectively. There were 25 deaths against 17 in 1882. Of those, 10 were among moribund cases sent up by the police. Forty-four major and 471 minor operations were performed. The total expenditure was Rs. 2,409, whereof Rs. 1,605 was the cost of establishment. Government contributed Rs. 66, of which Rs. 56 were for diet of police cases and Rs. 10 for registers and forms. The cost of Europe medicines was Rs. 26 against Rs. 177 in 1882. This decrease is due to the price of the annual supply obtained from private sources not having been paid yet. Bazar medicines cost Rs. 179. The expenditure on diet was Rs. 274, on building Rs 64, and on miscellaneous items Rs. 222. Municipality paid Rs. 1,175. Subscription from Europeans was Rs. 114, from natives Rs. 781, and interest on investments was Rs. 109. There was an invested capital of Rs. 1,806 at the end of the year.

*Jhenidah.*—It is a sub-divisional dispensary in class IIIA under the management of a local committee, which met 13 times during the year. Visited once by the District Magistrate and twice by the Civil Surgeon. The sub-divisional hospital assistant, who receives his grade pay from Government, is in charge of the institution, and receives Rs. 10 from the dispensary funds. There were treated 1,548 out-patients with a daily average of 10 against 2,206 and 15 in 1882 No in-patients. One major and 60 minor operations were performed during the year. The total expenditure was Rs. 757, whereof Government contributed Rs 3 as cost of forms and registers. Rupees 164 represent the cost of establishment, Rs. 90 of Europe medicines, which were obtained from private druggists, and Rs. 23 of bazar medicines. The expenditure on buildings was Rs 19, and on miscellaneous items Rs 61. The dispensary was maintained by subscriptions from Europeans and natives, which amounted to Rs. 90 and Rs. 350 respectively. During the year Rs. 400 were invested.

*Magura.*—A sub-divisional dispensary in class IIIA under the management of a committee, which met eight times during the year. Visited once by the District Magistrate and twice by the Civil Surgeon. A hospital assistant is in charge, who receives his grade pay from Government, and Rs. 10 from the dispensary fund as an extra allowance.

There were treated 15 in and 2,472 out patients against six and 2,329 in 1882. The daily averages were ·33 and 11 against ·23 and 10 respectively. There were four deaths against none in the previous year. One major and 57 minor operations were recorded. The total expenditure was Rs. 508, whereof Rs. 341 represent the cost of establishments, Rs. 79 of Europe medicines, and Rs. 16 of bazar medicines. The cost of diet was Rs. 5. The expenditure on buildings was Rs. 25, and on miscellaneous items Rs. 22. Government paid Rs. 7, viz. Rs. 3 as cost of forms and registers, and Rs. 4 for diet of police cases. The income from European and native subscriptions was Rs. 65 and Rs. 312 respectively. Rupees 20 were obtained as interest on investments. The dispensary had a cash balance of Rs. 120 on 31st December.

*Narail.*—A sub-divisional dispensary in class IIIA managed by a committee, which held eight meetings during the year. Visited twice by the District Magistrate and Civil Surgeon. A civil hospital assistant is in charge, who receives his grade pay from Government and Rs. 15 from the dispensary fund as an extra allowance. The number of out-patients treated was 1,434 with a daily average of 14 against 1,038 and 10 in the previous year. No in-patients. Fifty-nine minor operations were performed. The total expenditure was Rs. 594, whereof Rs. 347 represent the cost of establishment, Rs. 66 of Europe medicines, and Rs. 11 of bazar medicines. Government contributed forms, the cost of which was Rs. 3.

*Sreedhurpore.*—It is a class IIIA dispensary under the management of a committee, which met nine times during the year. Visited once by the sub-divisional officer and twice by the Civil Surgeon. A civil hospital assistant is in charge, whose entire pay is paid from the dispensary fund. The number of out-door patients treated was 1,978 with a daily average of 18 against 1,945 and 15 in 1882. No in-patients. Two major and 86 minor operations were performed during the year. The total expenditure was Rs. 781, whereof Rs. 586 represent the cost of establishment, Rs. 91 of Europe medicines, and Rs. 8 of bazar medicines. The expenditure on buildings was Rs. 21, and on miscellaneous items Rs. 106. Government contributed forms and registers, the cost of which was Rs. 3. The dispensary had a cash balance of Rs. 1,080 at the end of the year.

*Chandra.*—A class IIIA dispensary managed by a committee recently formed which met only once during the year. No visits were paid by any civil officer. The Civil Surgeon made two inspections. A civil hospital assistant is in charge. The total number of out-door patients treated was 3,045 with a daily average of 19 against 2,194 and 15 in 1882. No in-patients. One hundred and seventeen minor operations were performed. The total expenditure was Rs. 656, whereof Government paid Rs. 74, viz. Rs. 71 for salary of hospital assistant and Rs. 3 for forms and registers. Europe medicines, obtained from private druggists, cost Rs. 133 against Rs. 65 in 1882. Rupees 35 were expended on miscellaneous items.

**Moorshedabad district.**

The report of the Civil Surgeon is full and complete. It has been forwarded by the Commissioner of the division with interesting remarks on the working of the institutions. The public health of the district during the year under report was much better than that of the previous year, the number of recorded deaths being 30,267 against 37,792 in 1882. Fever, as usual, caused the bulk of the mortality, viz. 26,734, though, it is reported, it did not break out in an epidemic form. There was a marked diminution in the number of deaths from cholera compared with previous year. The total number of dispensaries at the close of the year was five against six in the preceding year, the dispensary at Azimgunge having been removed from the list of dispensaries under Government supervison by the orders of Government contained in letter No. 540M, dated 6th June 1883. Under the present system of classification four of these are in class II and one in class IIIA. Of the five dispensaries, four are in charge of Assistant Surgeons, and the fifth under a graduate of the Medical College, formerly in Government employ. All the dispensaries received both in-door and out-door patients. There were treated in all the dispensaries 1,076 in and 34,009 out-patients against 1,138 and 34,076 in 1882, the daily averages being 59 and 241 against 53 and 244 respectively. These figures, says the Civil Surgeon, deserve every confidence. Of the five dispensaries, four were under municipalities, and one in charge of a private manager. The managing bodies of all the institutions shew as much interest in them as can reasonably be expected, and there is no doubt that they are appreciated by the people who resort to them for treatment.

*Berhampore.*—This is a municipal, and therefore class II dispensary under present rules of classification. Visited once by the Commissioner and several times by the District Magistrate. The Civil Surgeon visited it almost daily. An Assistant Surgeon is in charge, who receives his grade pay from the municipality. The total number of patients treated during the year was 393 in and 8,011 out against 408 and 7,787 in 1882, the daily averages being 23 and 50 against 18 and 49 in the previous year. There were 53 deaths, or a rate of 13·49 per cent. against 68 and 16·63 in the previous year. Twenty-five major and 463 minor operations were performed. The total expenditure amounted to Rs. 3,916, whereof Government contributed Rs. 34, viz. Rs. 9 as forms and registers, and Rs. 25 for diet of police cases. Rupees 1,965 represent the cost of establishment, Rs. 49 of bazar medicines, and Rs. 181 of Europe medicines obtained from private druggists against Rs. 403 in 1882. The expenditure on diet was Rs. 681, on buildings Rs. 800, and on contingencies Rs. 131. Municipality paid Rs. 469 against Rs. 232 in 1882. Subscriptions from Europeans and natives were Rs. 216 and Rs. 487 respectively. Interest on investments was Rs. 1,907. The dispensary has Rs. 46,650 invested in Government securities and in deposit in savings bank.

*City Moorshedabad.*—This is also a municipal dispensary in class II under the new rules of classification and was under the mangement of Lalbagh municipality, who considered its affairs at their monthly meetings. Visited once by the Commissioners and frequently by the sub-divisional officer. The Civil Surgeon paid monthly visits. An Assistant Surgeon is in charge, who gets his whole pay, Rs. 120 per mensem, from the municipality. The cost of minor establishment was Rs. 49 per month. The total number of patients treated was 300 in and 9,519 against 291 and 9,615 in 1882, the daily averages being 17 and 58 against 14 and and 57 respectively. Six midwifery cases were treated against eight in the previous year. The total number of deaths was 38, or a rate of 12·66 against 34 and 11·6 in 1882, the high rate being mainly due to cholera. Thirty-five major and 413 minor operations were performed. The total expenditure was Rs. 3,248, whereof Rs. 2,021 were expended on establishment, Rs. 300 on Europe medicines, which were obtained from private druggists, and Rs. 97 on bazar medicines. Dieting articles cost, Rs. 483, and Rs. 165 were spent on miscellaneous items. Government contributed Rs. 30, viz. Rs. 17 in registers and forms and Rs. 13 for diet of police cases. Municipality contributed Rs. 2,206 against Rs. 1,994 in 1882. Rupees 182 were received as interest, and Rs. 30 as subscriptions from Europeans; Rs. 800 from natives. At the end of the year there was a cash balance of Rs. 50. The invested capital was Rs. 2,900, and Rs. 887 were deposited in savings bank.

*Jungipore.*—This is a municipal (class II) institution. It was visited twice by the District Magistrate and three times by the sub-divisional officer. The Civil Surgeon paid three visits. A third grade Assistant Surgeon is in charge, who received Rs. 120 per mensem from the municipality. The total number of patients treated was 102 in and 5,661 out against 90 and 5,629 in 1882, the daily averages being eight and 43 against seven and 40 in the previous year. The number of deaths was eight or a rate of 7·8 per cent. against 11 and 12·2 in 1882 Fever was the most prevalent disease. Seven major—all reduction of dislocations—and 322 minor operations were performed. The total expenditure was Rs. 2,359 whereof Rs. 1,863 were expended on establishment, Rs. 152 on Europe medicines, obtained from private druggists, and on bazar medicines Rs. 58. Dieting articles cost Rs. 179, and Rs. 83 were spent on miscellanious items. Government paid Rs. 9 as cost of forms and registers. Municipality contributed Rs. 1,963 against Rs. 1,394 in 1882. Rupees 386 were received from other sources. Rupees 23 were invested during the year. The dispensary has an invested capital of Rs. 1,157 in Government paper and as deposit in savings bank.

*Kandi.*—It is a (class II) municipal dispensary visited by the Commissioner of the division and by the District Magistrate. The Civil Surgeon inspected the institution twice. A second grade Assistant Surgeon is in charge, who receives his grade pay from the dispensary fund. There were treated 139 in and 6,395 out-patients against 179 and 7,177 in 1882, the daily averages were four and 58 against six and 72 respectively. There were 19 deaths, or a rate of 13·6 per cent. against 15 and 8·3 in the previous year. Sixteen major and 211 minor operations were performed. The total expenditure was Rs. 2,716, whereof Government contributed Rs. 14 as cost of forms. Rupees 2,014 represent the cost of establishment, Rs. 201 of Europe medicines, which were obtained from private druggists, and Rs. 95 of bazar medicines. The expenditure on buildings was Rs. 18, and on miscellaneous items Rs. 73. Dieting articles cost Rs. 133. Municipality paid Rs. 1,629 against Rs. 1,509 in 1882. Receipts from other sources amounted to Rs. 1,073, and Rs. 182 were invested during the year. The dispensary has a capital of Rs. 2,389 as deposit in saving bank.

*Lalgola.*—This is a class III a institution entirely supported by Rae Jogendro Narain Roy, the local zemindar, who is reported to take much interest in its working. It was visited by the District Magistrate and the sub-divisional officer of Jungipore. Drs. Shircore and Nicholson paid one visit each. A graduate of the Calcutta Medical College, not in service of Government, is in charge, and receives Rs. 100 per mensem. There were treated 142 in and 4,423 out door patients against 170 and 3,868 in 1882, the daily averages being five and 29 against six and 25 respectively. The total number of deaths was five or a rate of 3·5 per cent. against eight and 4·8 in the previous year. Eleven major and 179 minor operations were performed during the year. The total expenditure was Rs. 2,197, whereof Rs. 1,584 represent the cost of establishment and Rs. 10 of bazar medicines. Europe medicines, obtained from private firm, cost Rs. 328 against Rs. 298 in 1882. The expenditure on dieting articles was Rs. 180, and Rs. 95 were spent on miscellaneous items. Government contributed Rs. 7 in forms and registers.

## Rajshahye and Cooch Behar Division.

*Dinagepore district.*

The public health of the district during the year under report was not so good as it was in 1882, the number of recorded deaths being 28,800 against 26,025. No epidemic appeared in any part of the district. There were five dispensaries in the district as in previous year. Under the new rules of classification one is in class II under the management of the local municipality, and four are in class IIIA under private committees. The sudder dispensary received both in-door and out-door patients; the rest are out-door institutions. All the dispensaries are in charge of civil hospital assistants. The total number of patients treated, including in and out door, was 9,101 against 8,325 in 1882. The daily average was 85 against 81. With the exception of the figures of Mohadebpore dispensary those of the others, says the civil medical officer, are trustworthy and fairly reliable. The hospital assistant of

the Mohadebpore dispensary seems not to have benefited by the previous reports against him. The managing bodies of the dispensaries at Dinagepore, Raigunge, and Baloorghat take interest in their institutions; those of the rest shew little or no interest.

*Dinagepore.*—A municipal dispensary in class II under the new rules of classification. There is a sub-committee of the municipal commissioners to check its accounts. It was visited by His Honor the Lieutenant-Governor with the Commissioner, and occasionally by the District Magistrate. The civil medical officer visited it almost daily. A civil hospital assistant is in charge, whose entire pay is paid by the municipality. The total number of patients treated was 261 in and 3,210 out door against 291 and 3,026 in 1882. The daily averages were 10 and 25 against nine and 23 respectively. This increase in the number of out-door patients is said to be due to the closure for some time of another dispensary in the town entirely supported by the Maharajah, and not to the increased local unhealthiness. There were 43 deaths against 56 in the previous year. Five major and 50 minor operations were performed. The total expenditure was Rs. 2,019, of which Government contributed Rs. 60 viz. Rs. 13 as cost of forms and registers, and Rs 47 for dieting of police cases. The cost of establishment was Rs. 1,210, of bazar medicines Rs. 41, of Europe medicines, which were obtained from Government stores, Rs. 155. Dieting articles cost Rs. 278 Rupees 88 were spent on miscellaneous items and Rs. 248 on buildings. . Municipality paid Rs. 1,260: There was a cash balance of Rs. 79 at the end of the year. The dispensary has an invested capital of Rs. 2,000 invested in Government securities.

*Raigunge.*—It is a class IIIA institution, managed by a committee who held 15 meetings during the year. The District Magistrate and civil medical officer paid a visit each. A second grade civil hospital assistant is in charge, who gets his entire pay from the dispensary fund. There were 1,660 out-door patients treated against 1,503 in 1882, the daily average being 21 against 19. Minor operations numbered 36. The total expenditure was Rs. 753, whereof Rs. 396 represent the cost of establishment. Rupees 57 were expended on Europe medicines. Government contributed Rs. 6 in forms and registers. Subscriptions from natives amounted to Rs. 725.

*Mohadebpore.*—This is a class IIIA dispensary under the management of a committee who held 12 meetings. Visited once by the Magistrate and civil medical officer. A civil hospital assistant is in charge, who receives his whole pay from the dispensary fund. There were treated 1,059 out-patients with a daily average of four against 923 and four in 1882. Fifteen minor operations were performed. The total expenditure was Rs. 736, whereof Rs. 489 represent the cost of establishment, Rs. 161 of Europe medicines, which were obtained from private dealers, and Rs. 18 of bazar medicines. Government paid Rs. 3 for forms. The diepensary has a deposit of Rs, 226 in savings bank and cash balance of Rs. 84.

*Chooramon.*—It is a class IIIA dispensary, supported by an estate under the Court of Wards, and managed by a committee who held monthly meetings. Visited once by the District Magistrate. The civil medical officer visited it on 1st January 1884. A civil hospital assistant is in charge, who gets his entire pay from the dispensary fund. There were 1,721 out-door patients treated with a daily average of 13 against 1,462 and 14 in the previous year. Goitre is the prevailing disease. One hundred and two minor operations were performed. The total expenditure was Rs. 443. Government contributed Rs. 5 on account of forms and registers. Rupees 396 represent the cost of establishment. The cost of Europe and bazar medicines was Rs. 7 and Rs. 11 respectively, and Rs. 29 were spent on miscellaneous items. Native subscriptions amounted to Rs. 480, and Rs. 272 were obtained by sale of securities. This dispensary is evidently useless.

*Baloorghat.*—It is a class IIIA institution, supported by an estate under the Court of Wards, and managed by a committee which held 10 meetings. Visited once by the District Magistrate and by the civil medical officer. A civil hospital assistant is in charge, who gets his whole pay, Rs. 30, from the estate. There were treated 1,190 out-patients with a daily average of 10 against 1,120 and 10 in 1882. Ague was the prevailing disease. Forty minor operations are said to have been performed. The total expenditure was Rs. 658, of which Government contributed Rs. 3 in forms and registers. The cost of establishment was Rs. 420. Europe medicines, obtained from Government store, cost Rs. 142, and Rs. 52 were spent on miscellaneous items. This dispensary is also useless.

**Rajshahye district.** The public health of the district during the year under report is said to have been worse than in the previous years. Fevers and their sequelæ and uncontrollable diarrhœa and dysentry, due to prolonged malarial saturation, prevailed severely and widely. Doorgapore outpost, which suffered severely from fever in 1882, suffered still more in 1883. Cholera prevailed "pretty extensively" in the district, but nowhere so severely as in Doorgapore. Cinchona febrifuge was sold in the district, a great quantity of which was taken by the European planters for their ryots. At the close of the year there were seven dispensaries in the district against eight in 1882, the one at Tahirpore having been closed during the year. Of these, one is in class II, viz Baulea, and the other six are in class IIIA. One is under an Assistant Surgeon, five under civil hospital assistants in Government service, and the seventh is under the charge of a private medical subordinate who is a licentiate of the Campbell Medical School. The dispensaries at Baulea and Nattore received both in and out patients; the rest are outdoor institutions only. The total number of patients treated was 340 in and 21,855 out against 329 and 25,997 in 1882. The daily averages were 13·9 and 222 against 15 and 282 respectively. The figures of Baulea dispensary, says the Civil Surgeon, may be accepted

as correct. He has, however, no confidence on those of the rest. Excepting the two proprietors, namely Rajah Kristendar Roy of Bolihar and Baboo Rajcoomar Sarkar of Karachmaria, the Civil Surgeon cannot name any others who take the slighest interest in the working of their dispensaries.

*Baulea.*—This is a municipal dispensary from April 1884, and belongs to class II under the new rules of classification. It is supported by the Prossonno Nath Fund with a contribution of Rs. 175 per mensem from the local municipality, and managed by a committee which met once during the year. The dispensary was visited once by the Commissioner, three times by the District Magistrate, and almost daily by the Civil Surgeon. The first grade Assistant Surgeon was replaced during the year by a third grade man at the request of the Prossonno Nath Fund Committee in order to clear up a debt that the fund owed to Government. The Baulea municipality have, however, now come forward with a proposal to reduce their contribution towards the dispensary on the plea that the dispensary has now a third grade man. This question is, however, still, under consideration, but if the Baulea municipality carry out their proposal the Prossonno Nath Fund will be as unable to clear up the debt due to Government as they were before the change of Assistant Surgeons took place. There were treated 239 in and 6,670 out door patients against 227 and 6,203 in 1882, the daily averages being 10 and 55 against 12 and 59. The deaths were 32, or 13·3 per cent. against 28 and 12·3 in 1882. Fifty-four major and 397 minor operations were performed. The total expenditure was Rs. 3,207, whereof Rs. 2,431 represent the cost of establishment, Rs. 296 of Europe medicines, and Rs. 70 on bazar medicines. Dieting articles cost Rs. 296. Rupees 11 were expended on buildings, and Rs. 102 on miscellaneous items. Government contributed Rs. 7 as cost of forms and registers.

*Nattore.*—It is a class IIIA dispensary supported by the Prossonno Nath Fund and managed by a committee,—who held no meetings during the year. It was visited once by the Magistrate of the district, and frequently by the sub-divisional officer. The Civil Surgeon inspected it twice. A civil hospital assistant is in charge, who is paid Rs. 60 per mensem from the fund, Government paying him Rs. 20 monthly for charge of the sub-division and subsidiary jail. There were treated 101 in and 3,655 out patients against 102 and 3,851 in 1882. The daily averages were three and 34 against two and 35 respectively. There were 26 deaths, or 25·7 per cent. of admissions against 21 and 20·5 in the previous year. Four major and 204 minor operations were performed. The total expenditure was Rs. 1,314. whereof Rs. 1,008 represent the cost of establishment, Rs. 145 of Europe medicines, and Rs. 29 bazar medicines. The cost of diet was Rs. 65. The amount expended on miscellaneous items was Rs. 67. Government paid Rs. 6 in forms and registers.

*Pootoah.*—A dispensary in class IIIA entirely supported by Ranee Monmohiney Debya. there is no committee. Visited once by the Joint-Magistrate and twice by the Civil Surgeon. A hospital assistant is in charge. The number of out-patients treated was 4,371 with a daily average of 29 against 4,439 and 33. No in-patients. Ten major, chiefly setting of fractures and reduction of dislocation, and 224 minor operations were performed. The total expenditure was Rs. 1,032, of which Rs. 900 were the cost of establishment, Rs. 94 of Europe medicines, and Rs. 17 of bazar medicines. The amount expended on miscellaneous items was Rs. 20. The cost of forms and registers obtained from Government was Rs. 6.

*Lallpore.*—It is a class IIIA dispensary entirely supported by Maharanee Shurut, Soondery. No committee. Seldom visited by Maharanee's officers. It was visited once by the sub-divisional officer of Nattore and twice by the Civil Surgeon. A civil hospital assistant is in charge, who gets Rs. 60 monthly from the dispensary fund. No in-patients. The number of out-door patients treated was 2,196 with a daily average 24 against 2,973, and 30 in 1882. Eight major—of little importance—and 110 minor operations were recorded. The total expenditure was Rs. 1,065, of which Rs. 885 were the cost of establishment, Rs. 119 of Europe medicines, and Rs. 42 of bazar medicines. Rupees 8 were spent on repairs of buildings, and Rs. 11 on miscellaneous items. Government contributed Rs. 6 for forms and registers.

*Kurruchmaria.*—A dispensary in class IIIA supported by Baboo Rajkumar Sarkar, the local zemindar, who takes a warm interest in its working There is no committee. A hospital assistant is in charge, who is paid Rs. 25 per mensem. Visited once by the sub-divisional officer of Nattore, and once by the Civil Surgeon. There were treated 1,796 out-patients with a daily average of 30 against 1,980 and 38 in 1882. No in-patients Minor operations numbered 48. No major operations. The total expenditure was Rs. 477, of which Rs. 335 represent the cost of establishment. Europe medicines cost Rs. 99, and Rs. 24 were spent on bazar medicines. The amount expended on miscellaneous items was Rs. 19. Goverment contributed Rs. 6 as cost of forms and registers.

*Kassimpore.*—A dispensary in class IIIA supported and managed by a private committee, which met 10 times during the year. Visited once by the sub-divisional officer of Nowgong. For press of work, the Cvil Surgeon failed to visit it. A hospital assistant is in charge, who gets Rs. 40 per mensem. There were treated 1,372 out-patients with daily average of 26 against 1,447 and 23 in 1882. No in-patients. Forty-two minor operations were performed. Total expenditure was Rs. 752, whereof Rs. 612 were the cost of etablishment. Europe medicines cost Rs. 84, and bazar medicines Rs. 27. Rupees 28 were spent on miscellaneous items. Government contributed Rs. 6 as cost of forms.

*Bullihar.*—A class IIIA disqensary entirely supported by Rajah Kristender Roy of Bollihar, who is reported to take a keen interest in the working of the institution, but

maintains it on a very expensive scale. There is no committee. It was visited once by the Magistrate of the district, once by the sub-divisional officer of Nowgong, and twice by the Civil Surgeon. A civil hospital assistant is in charge, who is paid Rs. 60 per mensem. No in-patients. There were treated 1,795 out-patients with a daily average of 20 against 1,780 and 24 in 1882. No major operation. Minor operations numbered 82. The total expenditure was Rs. 1,394, of which Rs. 864 represent the cost of establishment. Europe medicines were bought at cost of Rs. 422. (quinine being largely used). Bazar medicines cost Rs. 51. The expenditure on buildings was Rs. 26, and Rs. 31 were spent on miscellaneous items. Costs of forms and registers obtained from Government were Rs. 6.

Rungpore district.

The health of the district during 1883 appears to have suffered considerably from that of the preceding year. The total number of registered deaths was 38,058 against 28,311. Cholera and fever caused this increase, though neither of them is reported to have prevailed in an epidemic form. There were 12 dispensaries open at the close of the year against 11 in 1882, the one at Nelphamaree having come under Government supervision from August 1883 under the orders of Government contained in its letter No. 1011, dated 1st August 1883. Of these 12 dispensaries, four belong to class IIIB, under private committees though aided by Government and municipalities, and the remaining eight in class IIIA, being mananged and supported entirely by private committees. Two of these treated both in and out patients, the rest are out-door institutions. All the dispensaries are in charge of civil hospital assistants. The total number of patients treated was 342 in and 56,984 out patients against 357 and 52,219 in 1882. The daily averages were 13 and 235 against 13 and 216 respectively. The increase in the number of out-patients is ascribed to the greater amount of fever prevalent in the district. The figures, says the Civil Surgeon, are fairly accurate. With regard to the interest taken by the governing bodies of the institutions, the Civil Surgeon cannot give a definite opinion, being in the district only for a short time. The managing body of the dispensary at Ulipore is, however, reported to take greatest interest. He also says that "the natives resort to the dispensary readily for treatment, and where the medical officer is attentive to his duties and kind to the people, I have no doubt they are popular institutions."

*Rungpore.*—This is a class IIIB dispensary. The local municipality considers its affairs at their ordinary meetings. Visited once by the Commissioner and daily by the Civil Surgeon. A civil hospital assistant is in charge. who receives Rs. 55 per mensem from the dispensary fund. There were treated 306 in and 7,993 out patients against 317 and 7,256 in 1882. The daily averages were 10 and 22 against nine and 22 respectively. The increase in the number of out patients is said to be due to the prevalence of fever in the district. The death-rate was 17·3 per cent. as compared with 12·3 in 1882. This increase in mortality, the hospital assistant states, was due to a larger number of moribund cases brought in from the road side. Seven major and 103 minor operations were performed. The total expenditure was Rs. 2,232, whereof Rs. 1,117 represents the cost of establishment. The expenditure on European medicines obtained from Government stores was Rs. 139 and on bazar medicines Rs. 214. Diet cost Rs. 434, and Rs. 192 were spent on miscellaneous items. Government contributed Rs 3 in forms and registers. Municipality paid Rs. 1,009. Interest on investments amounted to Rs. 667, and European and native subscription were Rs. 180 and Rs. 373 respectively. The dispensary has an invested capital of Rs. 16,300.

*Mahigunge.*—This is a class IIIB dispensary aided and managed by the Rungpore municipality. It was visited by the Civil Surgeon several times. A civil hospital assistant is in charge. There were treated 5,873 out patients with a daily average of 17 against 5,113 and 14 in 1882,. The increase has said to be due to the greater amount of fever in the district. Minor operations numbered 156. No major operation. The total expenditure was Rs. 718, whereof Rs. 396 represents the cost of establishment, Rs. 114 of Europe medicines obtained partly from Government store and partly from private dealers, and Rs. 153 of bazar medicines. The expenditure on building was Rs. 12, and on miscellaneous items Rs. 43. Government contributed forms and registers, the cost of which was Rs. 3 Municipality paid Rs. 390, and Rs. 325 were obtained as subscriptions from natives.

*Ulipore.*—A class IIIA dispensary under the management of the agent of Moharanee Surnomoyee of Bahirbund, who supports it entirely. There is no dispensary committee. It was visited by the Civil Surgeon twice. A civil hospital assistant is in charge, who receives Rs. 70 per mensem from estate of the Moharanee. There were treated 36 in and 7,418 out patients against 37 and 5,405 in the previous year. The daily averages were three and 63 against three and 44 respectively. The death-rate was 13·8 per cent. against 5·4 in 1882. No explanation is given of this increased mortality. Fever endemic to the district was the prevailing disease. Sporadic cholera of less severity occurred at intervals. One hundred and seventy-three minor operations were performed. No major operation. The total expenditure was Rs. 2,240, whereof Rs. 1,144 were expended on establishment, Rs. 635 on European medicine obtained from private druggists, and Rs. 115 on bazar medicine. Dieting articles cost Rs. 208, and Rs. 138 were spent on miscellaneous items. Government paid Rs. 3-8 on account of register and forms. Native subscriptions amounted to Rs. 2,236.

*Kakina.*—It is a class IIIA out-door dispensary, supported and managed by the local zemindar, Baboo Mohima Runjun Roy. No committee. Visited once by the Civil Surgeon. A civil hospital assistant is in charge, who receives Rs. 40 per mensem Accommodation to in-door patients was withheld from the beginning of the year 1883. There

were treated 7,126 out-patients with a daily average of 11 against 5,816 and nine in 1882. Two major and 104 minor operations were performed. The total expenditure was Rs. 920, of which Rs. 669 represent the cost of establishment. Europe medicines were obtained from private sources at a cost of Rs. 199, and bazar medicines cost Rs. 38. The expenditure on miscellaneous items was Rs. 15. The cost of forms supplied by Government was Rs. 3. The dispensary is supported by native subscriptions which amounted to Rs. 916.

*Tushbunder.*—This is also a class IIIA out-door dispensary, managed and supported by Rai Romoni Mohun Chowdhery Bahadoor, the local zemindar. No dispensary committee. Visited once by the Civil Surgeon. A civil hospital assistant is in charge, who is not in Government service. There were treated 7,361 out-patients with a daily average of 23 against 6,724 and 21 in 1882. One hundred and twenty-six minor oparations were performed. No major operation. The total expenditure was Rs. 994, of which Rs. 576 represent the cost of establishment. The cost of English medicines obtained from private sources was Rs. 332, and of bazar medicines Rs. 48. The expenditure on buildings was Rs. 10 and on miscellaneous charges Rs. 28. Government contributed Rs. 3 on account of forms and registers.

*Battashim.*—It is a class IIIA out-door institution entirely supported by Baboo Luchmiput Sing of Moorshedabad. Visited once by the Civil Surgeon. A hospital assistant is in charge, who is paid Rs. 50 per mensem by the supporter. There were treated 3,338 out-patients with a daily average of 19 against 3,705 and 24 in 1882 No explanation has been given of the diminution. One hundred and twenty-five minor operations were performed. The total expenditure was 750, of which Rs. 616 represent the cost of establishment, Rs. 53 of English medicines, which were obtained from private druggists. Bazar medicines cost Rs. 73. Contingent expenses amounted to Rs. 7. Government contributed forms and registers, the cost of which was Rs. 3.

*Dimla.*—It is a class IIIA outdoor dispensary, managed by a committee, who held three meetings. It was visited neither by the Civil Surgeon nor by any civil officer. A civil hospital assistant is in charge, who is paid Rs. 35 monthly by the supporter. There were treated 2,583 out-patients with a daily average of 14 against 2,282 and 13 in 1882. Thirty-six minor operations were performed. The total expenditure was Rs. 641, of which Rs. 138 were spent on English medicines obtained from private dealers and Rs. 456 on establishment. The expenditure on bazar medicines was Rs. 26 and on miscellaneous items Rs. 21. Government paid Rs. 3 as cost of forms.

*Kurigram.*—It is a class IIIA out-door institutions situated at the head-quarters of the Kurigram sub-division and managed by a local committee presided over by the sub-divisional officer. Two meetings were held. It was twice inspected by the Civil Surgeon. A civil hospital assistant is in charge, who receives his sub-divisional and jail allowance at Rs. 25 and Rs. 10 respectively but nothing for charge of the dispensary. The Magistrate remarks that "the dispensary's share in the time of the medical officer has always been considered here as the Government subscription, paid in consideration of the committee's housing the Government civil stores and taking in police cases." There were treated 5,551, out-patients with a daily average of nine against 7,006 and 19 in 1882. In explanation of this difference, the hospital assistant states that 7,006 was not the correct number of patients shewn in the return of 1882; the exact number was 4,923. It would therefore appear that, owing to some clerical or other error in the returns of 1882, the attendance of 1883 shews a decrease, whereas it is actually an increase. One major and forty-three minor operations were performed. The total expenditure was Rs. 549, of which Rs. 264 represent the cost of establishment. Europe medicines were obtained from private druggists at a cost of Rs. 158 as compared with Rs. 100 in 1882. Rupees 22 were spent on bazar medicines. The expenditure on buildings was Rs. 22, and on miscellaneous items Rs. 40. Government paid Rs. 3 in forms and registers.

*Saptana.*—It is a class IIIA dispensary, supported out of the estate of late Rai Annada Prosad Chowdhery of Kassim Bazar, and managed by his agent. Visited by the Civil Surgeon twice. A civil hospital assistant is in charge, who is paid Rs. 30 monthly. The total number of out-patients treated was 2,115 with a daily average of 11 against 2,493 and 11·96 in 1882. Thirty minor operations were recorded. The total expenditure was Rs. 591, of which Rs. 427 represent the cost of establishment, Rs. 64 of English medicines, which were obtained from private sources, and Rs. 22 of bazar medicines. Buildings and repairs cost Rs. 50, and Rs. 27 were spent on miscellaneous items. Government paid Rs. 3 in forms and registers. The income from native subscriptions was Rs. 587.

*Dinhatta.*—It is a class IIIB dispensary, supported from the estate of late Baboo Jogendro Narain Rai Chowdhery, and managed by his agent. No dispensary committee. No meetings. The Civil Surgeon visited it twice. A civil hospital assistant is in charge, half of whose pay is paid by Government. There were treated 4,084 out-patients with a daily average of 20 against 3,334 and 17 in 1882. Fifty-nine minor operations were performed. The total expenditure was Rs. 779, of which Rs. 363 were the cost of establishment. Government paid Rs. 153, viz. Rs. 3 on account of forms and registers, and Rs. 150 as pay of the hospital assistant. Europe medicines were obtained from private dealers at a cost of Rs. 67, and Rs. 30 were spent on bazar medicines. The expenditure on miscellaneous items was Rs. 19. Besides a cash balance of Rs. 205, Rs. 300 were invested during the year.

*Gyabanda.*—It is a class IIIB sub-divisional dispensary supported by local fund, and managed by a committee presided over by the sub-divisional officer, which met once

during the year. Visited once by the Civil Surgeon. A civil hospital assistant is in charge, who receives Rs. 10 from Government for the charge. There were treated 2,439 with a daily average of 12 against 3,085 and 17 in 1882. One major operation—a reduction of dislocation—and 14 minor operations were performed. The total expenditure was Rs. 325, whereof Rs. 228 was the cost of establishment. Europe medicines were not bought during the year. Bazar medicines cost Rs. 15, and Rs. 11 were spent on buildings, and Rs. 8 on miscellaneous items. Government paid Rs. 121, viz. Rs. 120 as allowance at Rs. 10 per month to the civil hospital assistant, and Re. 1 as cost of forms. Besides a cash balance of Rs. 134 at the end of the year, Rs. 64 were invested.

*Nelphamaree.*—The dispensary was opened on the 1st August 1883 under Government orders conveyed in its letter No. 1011, dated 1st August 1883. It is supported by local funds, and managed by a committee presided by the sub-divisional officer. The committee held monthly meetings. Both the Magistrate and the Civil Surgeon visited twice. The hospital assistant in charge of the sub-division is in charge, and gets Rs. 10 for it from the dispensary fund. The number of patients treated since its opening was 1,103, and the daily average was 10. Nineteen minor operations were performed. The funds, &c., of the late Bagdogra dispensary, together with those of a private dispensary which existed at Nelphamaree prior to the opening of the present one, were transferred to its credit. The total income of the dispensary was Rs. 1,094. The cost of establishment was Rs. 101. The Europe medicines of the two institutions being sufficient for its use, none were purchased during the year. Cost of bazar medicines was Rs. 3, and Rs. 100 were spent on buildings. The miscellaneous items amounted to Rs. 13. There was a cash balance of Rs. 801, and Rs. 75 were invested during the year.

Bogra district.

The general health of the district during the year under report was a little better than that of the previous year, and though nearly equal to that of 1881, it was worse than that of the other preceding years. The number of the registered deaths was 15,887 against 17,662 in 1882, 15,349 in 1881, and 13,163 in 1880. Both the Civil Surgeon and civil officers agree in saying that this increase in mortality is not only due to excessive sickness, but also to the improved registration. There were three dispensaries working in the district at the end of the year, two of these are in class II and the third is in class IIIA. The dispensaries at Bogra and Sherepore treated both in-door and out-door patients, and that at Nowkhilla is an out-door institution only. All the dispensaries are in charge of civil hospital assistants. The total number of patients treated was 108 in and 8,110 out against 97 and 8,022 in 1882, the daily averages being four and 69 against three and 71 respectively. The Civil Surgeon examined the registers and returns of the institutions in his inspection, and is of opinion that the figures are not far from being correct. The managing bodies of all the dispensaries are reported to take a lively interest in them and they are greatly appreciated by the people.

*Bogra.*—It is a municipal dispensary. Visited once by the Commissioner, three times by the Magistrate of the district, and daily by the Civil Surgeon. A civil hospital assistant is in charge who receives Rs. 60 per mensem from municipal funds. There were treated 103 in and 5,375 out-patients against 84 and 4,805 in 1882, the daily averages being three and 42 against three and 35 respectively. The increase in the number of out-patients is attributed to the general prevalence of fever. There were 20 deaths, or a rate of 19·4 per cent. against 22 and 26·1 in the previous year. Twenty-two major and 136 minor operations were performed. The total expenditure was Rs. 1,209, of which Rs. 969 were the cost of establishment. English medicines were obtained from Government store at a cost of Rs. 75, and Rs. 23 were spent on bazar medicines. Dieting articles cost Rs. 63. The expenditure on buildings was Rs. 37, and on miscellaneous items Rs. 40. Government contributed forms and registers, the value of which was Rs. 3. Of the total income of Rs. 1,268, municipality paid Rs. 240, Rs. 130 were derived as interest on investments, and Rs. 255 were obtained by sale of securities. Subscriptions from Europeans and natives were Rs. 117 and Rs. 423 respectively.

*Nowkhilla.*—A class IIIA dispensary, entirely supported by late Raja Pramatha Nath Roy, Rai Bahadoor of Dighapatiah, and managed by a private committee, who met nine times during the year. The Civil Surgeon visited it thrice. A civil hospital assistant is in charge, who is paid Rs. 50 from the dispensary fund. There were treated 1,501 out-patients with a daily average of 18 against 1,667 and 21 in 1882. Two major and 96 minor operations are said to have been performed. The total expenditure was Rs. 860, whereof Rs. 775 represent the cost of establishment. The cost of English medicines obtained from Government store was Rs. 43, and Rs. 13 were spent on bazar medicines. The amount expended on miscellaneous items was Rs. 29. Government supplied forms and registers, the cost of which was Rs. 3.

*Sherpore.*—A municipal institution. Visited thrice by the Magistrate, twice by the Deputy Magistrate, once by the vice-chairman of the municipality, and twice by the commissioner. The Civil Surgeon inspected it twice. A civil hospital assistant is in in charge, who receives Rs. 25 from the municipality. There were treated 1,234 out-patients with a daily average of nine against 1,550 and 14 in the previous year. The decrease is attributed to the greater healthiness of the year. There was no regular in-door ward, but the poor and helpless patients suffering from dangerous diseases were occasionally admitted. The total number of such men were five against 13 in the previous year; the daily averages were ·38 and ·35 respectively. Of the five admitted four died; this was due to the cases being admitted in moribund condition. Twenty-three minor operations were performed. No major operation. The total expenditure was Rs. 805 of which Rs. 390 represent the cost of establishment,

Rs. 17 of Europe medicines obtained from Government stores, and Rs. five of bazar medicines. Rupees 177 were spent on buildings, and Rs. 102 on miscellaneous items. The patients were fed at the cost of the hospital assistant. Government supplied forms and registers, the value of which was Rs. 2. Of the total income of Rs 886, municipality paid Rs. 510. Interest on investment was Rs. 49. Native and European subscriptions amounted to Rs. 231.

Pubna district.

The general health of the district during the year under review was worse than that of the four preceding years as evidenced by the mortuary returns, the number of recorded deaths being 32,148 against 30,627 in 1882, 17,943 in 1881, 10,794 in 1880, and 10,261 in 1879. The gradual increase is ascribed to the prevalence of malarious fever in the district. There were two dispensaries as in 1882. Both of these are in class II and received in-door and out-door patients. The dispensary at Sirajgunge is under the charge of an Assistant Surgeon, and the other at Pubna under that of a civil hospital assistant. The total number of patients treated was 333 in and 7,415 out door against 405 and 4,767 in 1882. The daily averages were 13 and 77 against 14 and 39 respectively. These figures, says the Civil Surgeon, were tested in his inspections and in his office and are reliable. The municipal commissioners of both the localities are said to take much interest in these institutions, and the increased attendance of patients shew their enhanced popularity.

*Pubna.*—It is a municipal dispensary. Visited twice by the Commissioner of the division and several times by the Magistrate, but of which only two are recorded. The Civil Surgeon visited it daily. A hospital assistant is in charge, who is paid Rs. 55 per mensem by the municipality. There were treated 158 in and 3,010 out patients against 252 and 2,166 in 1882. The daily averages were six and 36 against 10 and 18 respectively. The decrease in the number of in patients is said to be due to strictly select admissions. The death-rate was 11·3 per cent. against 13·09 in 1882. Eighteen major, which are said to have been performed by the Civil Surgeon, and 169 minor operations were performed. The total expenditure was Rs. 1,319, of which Government contributed Rs. 10, viz. Rs. 6 for forms and registers, and Rs. 4 for diet of police cases. Rupees 911 represent the cost of establishment, Rs. 108 of English medicines obtained from Government stores and locally, and Rs. 47 of bazar medicines. Dieting articles cost Rs. 100. The expenditure on buildings was Rs. 63, and on miscellaneous items Rs. 88. Municipality paid Rs. 1,307. The opening and closing cash balance of the dispensary was not shewn.

*Serajunge.*—A municipal dispensary (class II). Visited frequently by the sub-divisional officer. The Civil Surgeon paid two visits. An Assistant Surgeon is in charge, who receives Rs. 120 per mensem from the municipality. There were treated 175 in and 4,405 out patients against 153 and 2,601 in 1882. The daily averages were seven and 41 against four and 20 respectively. The increase in the number of patients is ascribed to the better working of the institution. The death-rate among in-patients was 16 per cent. against 18·3 in the previous year. Twenty-two major and 239 minor operations were performed against eight and 197 in 1882. The total expenditure was Rs. 2,853, of which Rs. 1,890 represent the cost of establishment. The cost of Europe medicines obtained from private druggists was Rs. 328 against Rs. 98 in 1882. The increase was due to private indents which were not submitted to the Civil Surgeon for check. The expenditure on bazar medicines was Rs. 55, on diet Rs. 254, and on miscellaneous items Rs. 107. Rupees 218 were spent towards buildings. Government supplied forms and registers, the cost of which was Rs. 6. Municipality paid Rs. 1,810, and subscription from natives and Europeans were Rs. 472 and Rs. 564 respectively.

Darjeeling district.

The Civil Surgeon reports that the general health of the district during the year under report was not good. Cholera prevailed throughout the district. There were four dispensaries at the end of the year. One of these belongs to class II, being a municipal institution, and one to class I, being entirely supported by Government, the third to class IIIB and the fourth to class IIIA, supported by local fund. All the dispensaries are in charge of civil hospital assistants. The dispensaries at Darjeeling and Kurseong treated both in-door out-door patients throught the year, and that at Siligoree for the month of December only on the receipt of the Government order regarding its maintenance from the one anna cess fund. Kalimpoong dispensary is an out-door institution only. The total number of patients treated was 291 in and 9,507 out against 251 and 9,672 in 1882, the daily averages being 15 and 42 against 14 and 50 respectively. These figures are reported to be accurate. There are no special dispensary committees or private managers. With the exception of Kurseong dispensary all seem to be fairly appreciated by the peopie.

*Darjeeling.*—A class IIIB dispensary, supported entirely by the local municipality though not formally vested in it. It is managed by a sub-committee of the Municipal Commissioners to whom the duty of inspecting the dispensary it assigned. It was visited by the Commissioner of the division, by the Officiating Surgeon-General, and by the Sanitary Commissioner of Bengal. The Civil Surgeon visited it daily. A hospital assistant is in charge, who receives Rs. 65 per mensem, his grade pay, including the hill allowance of Rs. 10 from the municipality and Rs. 25 monthly from Government for charge of civil station and police hospital, besides other allowances for extra charges. The total number of patients treated was 248 in and 4,912 out against 215 and 4,014, the daily average being 11 and 17 against 13 and 16 respectively. The number of deaths during the year was 56 against 35 in 1882. The chief eason of increase is said to be due to 11 deaths from small-pox against none in 1882.

Intestinal worms—chiefly round worms—are very frequent in the district: 1,081 cases of it were treated. Malarious fevers come next, of which 945 cases were treated. Thirteen major operations were performed, all by the Civil Surgeon, with no death. Minor operations numbered 84, and were performed by the hospital assistant. The total expenditure was Rs. 2,745, of which Rs. 1,402 represent the cost of establishment, Rs. 108 were paid for English medicines, and Rs. 103 for bazar medicines. Dieting articles Rs. 587. The expenditure on miscellanenus items was Rs. 544. Government supplied forms and registers, the cost of which was Rs. 3. Municipality paid Rs. 1,698. Subscriptions from Europeans was Rs. 944, and from natives Rs. 100.

*Kurseong.*—A municipal dispensary from 1884, having been formally vested in the local municipality by Government in its letter No. 610T—M, dated 17th May 1884, there is no separate dispensary committee. The institution is under the supervision of the civil medical officer of Kurseong, Dr. Harris, who, as well as the Assistant Commissioner in charge of the sub-division, visits it very frequently. It was visited once by the Commissioner of the division, twice by the Deputy Commissioner, and once by the sub-divisional officer. The Sanitary Commissioner of Bengal inspected it once during the year. The Civil Surgeon of Darjeeling paid only one visit. A civil hospital assistant is in charge, who gets his grade pay of Rs. 25 and hill allowance of Rs. 10 per mensem from the municipality and Rs. 20 monthly from Government on account of sub-division and sub-jail. There were treated 35 in and 860 out patients against 36 and 1,115 in 1882. The daily average was one and six against one and nine respectively. The falling off in the number of out-patients is said by the Civil Surgeon to be due to the removal of the dispensary from the bazar to the distant sub-divisional buildings and to the existence in the bazar of two private dispensaries where, the civil hospital assistant says, patients are treated without charge. The civil officer does not, however, agree with the Civil Surgeon in attributing the first as a cause of the decrease. The number of deaths was 10 against 11 in 1882. Ten major, five of which were performed by the civil medical officer, and 11 minor operations were performed. The total expenditure was Rs. 903, whereof Rs. 568 were expended on establishment. The cost of English medicines, obtained locally and from Government stores, paid for during the year was Rs. 75. Bazar medicines cost Rs. 7. The expenditure on diet was Rs. 29, on buildings Rs. 154, and on miscellaneous items Rs. 69. Government paid Rs. 14, namely Rs. 5 for diet of police cases, and Rs. 9 as cost of forms and registers. Municipality paid Rs. 889 against Rs. 333 in 1882.

*Kalimpong.*—It is a class I dispensary entirely supported by Government and is situated at a police outpost in the hill tracts. There is no committee. The Deputy Commissioner visited the dispensary twice and the Civil Surgeon once. A civil hospital assistant is in charge, who is paid Rs. 40, viz. grade pay Rs. 20, hill allowance of Rs. 10, and sub-divisional allowance of Rs. 10 per mensem from Government. No in-patients. There were treated 2,275 out-patients with a daily average of six against 2,663 and eight in 1882. The falling off was chiefly in the number of worm cases, viz. 431 against 1,130 in 1882. There were no operations, major or minor. The total expenditure was Rs. 667 against Rs. 689 in 1882, of which Rs. 393 represent the cost of establishment.

*Siligoree.*— It was stated in the previous report that the charge of this dispensary was entirely taken over by Government owing to the abolition of the estates improvement fund. But as a portion of it, the one anna cess fund, was still raised in the Terai, and that the fund was specially destined for sanitary improvements, representations were made to Government to the effect that the Siligoree dispensary should be supported by that fund and not by Government. Orders of Government sanctioning the retransfer of the dispensary to the local fund and that all amounts drawn from 1st April 1882 were to be refunded to Government were received. It was, however, too late to effect the change before the close of the year. The institution should therefore be considered a class IIIA institution entirely supported by local funds. There was no committee. It was visited three times by the Deputy Commissioner and frequently by the sub-divisional officer. The civil medical officer of Kurseong paid three visits and the Civil Surgeon of Darjeeling inspected the institution once only, as he did not think a second visit necessary. A civil hospital assistant is in charge, who drew from Government Rs. 45 per mensem as follows, viz. Rs. 25 his grade pay for charge of the sub-division, Rs. 10 for charge of the jail, and Rs. 10 for dispensary. But from November 1883, when the retransfer was sanctioned, he was paid Rs. 35 per mensem only from Government, viz. his grade pay of Rs. 25 and jail allowance of Rs. 10, the dispensary allowance of Rs. 10 being paid from local funds. The in-door ward was opened in December. There were treated eight in-patients with a daily average of 2 09. Two of these died. The number of out-patients treated was 1,270 against 1,880, and the daily average was 12 against 16. Three major and 42 minor operations were performed. The total expenditure was Rs. 555, whereof Government contributed Rs. 190, viz. Rs. 4 for cost of forms and registers, Rs. 26 as special allowance, and Rs. 160 as pay of the hospital assistant. The amount of these two latter items, viz., Rs., 186 will be refunded to Government. Establishment cost Rs. 207. Nothing was paid for Europe medicines obtained from Government stores during the year. The expenditure on diet was Rs. 9, on bazar medicines Rs. 12, on buildings Rs. 283, and on miscellaneous items Rs. 44. The income during the year consisted of Rs. 183 received from local funds and Rs. 179 obtained by sale of securities.

Julpigoree district.

The general health of the district was bad on account of cholera which prevailed with unprecedented severity and fatality during the year. Excluding cholera the sickness was much on par with former years, the number of recorded deaths being 10,818, of which 2,430 were due to cholera alone against 8,924 in 1882. There were at the end of the year four dispensaries in the district, the same as in the previous year; one belongs to class II, two to class IIIA, and the fourth to class IIIB. All the institutions are under the charge of hospital assistants. The dispensaries at Julpigoree, Titalyah and Alipore treated both in-door and out-door patients: the one at Boda out-door patients only. The total number of patients treated was 339 in and 8,777 out against 295 and 8,301 in the previous year, the daily averages being 13 and 65 against 12 and 62 respectively. These figures, says the Civil Surgeon, may be acceptedas correct. The Civil Surgeon reports very unfavourably on the managing bodies as to the interest taken by them in the institutions, and says if the well-to-do people took a more lively interest in the welfare of the patients then no doubt the dispensaries would become more popular.

*Julpigoree.*—A class IIIB dispensary governed by the Julpigoree union headed by the Deputy Commissioner, which held 10 meetings. It has not yet been formally vested in it. Visited once by the Commissioner and occasionally by the Deputy Commissioner and District Superintendent of Police. The Civil Surgeon visits it daily. A hospital assistant is in charge, who is paid Rs. 55 monthly by the union and Rs. 10 by Government for attendance on the normal school. There were treated 288 in and 4,268 out patients against 247 and 4,383 in 1882. The daily averages were 11 and 23 against nine and 26 respectively. The number of deaths was 70, or a rate of 24·3 per cent. against 60 and 24·29 in 1882. The large mortality is said to be due to the majority of cases being admitted in a dying condition. Twelve major and 143 minor operations were performed. The total expenditure was Rs. 2,422, of which Rs. 949 represent the cost of establishment; Rs 227 of Europe medicines obtained from Government stores and by private purchase on indents checked by the Civil Surgeon. The cost of bazar medicines was Rs. 67 and of diet Rs. 323. The expenditure on buildings was Rs 753 and on miscellaneous items Rs. 104. The income consisted of Rs. 435 paid by the municipality, Rs. 548 obtained by sale of securities, and of Rs. 377 and Rs. 1,021 realized as subscription from Europeans and natives respectively. Government gave forms, the cost of which was Rs. 4.

*Boda.*—A class IIIA dispensary under the management of a local committee, which held seven meetings. Visited once by the District Superintendent. The Civil Surgeon paid three visits. A civil hospital assistant is in charge. There were treated 1.515 out-patients with a daily average of 16 against 1,287 and 12 in 1882. No in-patients. Ninety-five minor operations are recorded. The total expenditure was Rs. 752, of which Rs. 515 were expended on establishment, Rs. 144 on Europe medicines, and Rs. 13 on bazar medicines. The expenditure on buildings was Rs. 54 and on miscellaneous items Rs. 25. The amount of local subscriptions amounted to Rs. 810. Government contributed nothing.

*Titalyah.*—A class IIIA dispensary entirely supported by the Chaklajat estate of Cooch Behar and governed by a committee who met only once during the year. Visited once by the District Superintendent of Police and three times by the Civil Surgeon. A civil hospital assistant is in charge. There were treated 36 in and 2,350 out patients against 37 and 2,159 in 1882, the daily averages were 1·9 and 18 against 2·8 and 17 respectively. There were eight deaths, or a rate of 22 per cent. against 13·5 in the previous year. Eighty-three minor operations are stated to have been performed, but the Civil Surgeon places no reliance on the figure. The total expenditure was Rs. 682, of which Rs. 504 represent the cost of establishment and Rs. 93 that of diet. The amount expended on bazar medicines was Rs. 52 and on miscellaneous items Rs. 33. The cost of Europe medicines obtained from Government store was not paid during the year. Government contributed nothing. The amount of local subcriptions was Rs. 682.

*Alipore, Buxar.*—The report was submitted by Dr. Creton, the Military Surgeon of Buxa, Bhootan, who is superintendent of the dispensary, and conducts the civil duties of the station. It is under the new rules of classification, in class IIIB. A hospital assistant is in charge. There were treated 15 in and 644 out patients against 11 and 472 in 1882. The daily averages were ·6 and seven against ·5 and five respectively. There were two deaths during the year. One major operation only was performed. The institution was visited by the Commissioner, Deputy Commissioner, and District Superintendent of Police. The sub-divisional officer at Alipore paid constant visits. The total expenditure was Rs. 411, of which Rs. 195 was expended on establishment, Rs. 59 on Europe medicines and Rs. 9 on bazar medicines. The cost of diet was Rs 36. The expenditure on buildings was Rs. 85 and on miscellaneous items Rs. 11. Government contributed Rs. 120 as pay of hospital assistant and forms, the cost of which was nominal. At the end of the year there was a cash balance of Rs. 145.

## Orissa Division.

Cuttack district.

The Civil Surgeon says that the general health of the district was good during the year, which was one of plenty and prosperity as compared with previous years. Cholera was less prevalent. There are eight dispensaries in the district and in Tributary Estates. Of these two were in class I, two in class II, one in class IIIA and three in class IIIB. Two Assistant

Surgeons and six civil hospital assistants. There were treated 892 in and 39,468 out patients against 1,031 and 41,105 in 1882, the daily averages being 55 and 320 against 52 and 315 respectively. Greater interest is said to be taken in the institutions by the members of the committees, and people are reported to be more alive to their nature and usefulness.

*Cuttack General Hospital.*—A class IIIB institution supported principally by the Unnochutter fund, and managed by an executive committee, which met twice during the year. A first grade Assistant Surgeon is in charge, whose entire sal ry is paid by Government. The hospital was visited daily by the Civil Surgeon and by the district officials on four occasions. There were treated 551 in and 5,378 out patients against 583 and 5,824 in 1882, the daily averages being 40 and 28 against 35 and 29 respectively. The number of deaths in the hospital was 83 against 94 in 1882. Many of the deaths were of pilgrims, who it is said were brought in by the police in the last stage of illness. Thirty-nine major and 293 minor operations were performed. Three deaths resulted after operation. The total expenditure was Rs. 7,844, of which Rs. 3,492 was the cost of establishment, Rs. 489 of English and Rs. 117 of country medicines. The expenditure on diet was Rs. 1,168 and on miscellaneous items Rs. 2,578 which includes the payments made to paupers and pundahs under Unnochutter rules. Government contributed Rs. 2,412, namely Rs. 2,400 as salaries and Rs. 12 as cost of forms and registers. Municipality paid Rs. 5,728. The interest on investments was Rs. 314. Of Rs. 2,500, the invested capital of the hospitals, Rs. 1,500 were transferred to Baboo K. L. Pundit's rest house fund. There was a cash balance of Rs. 1,133 at the end of the year.

*Cuttack branch dispensary.*—A class IIIB out-door institution visited by the Civil Surgeon daily. The chairman and vice-chairman are said to have visited it during the year. A hospital assistant is in charge. There were treated 11,111 out-patients against 11,297 in 1882, the daily averages being 140 and 148 respectively. Seventeen major and 474 minor operations were performed. The total expenditure was Rs. 1,034, whereof Rs. 636 was the cost of establishment, Rs. 249 of Europe, and Rs 89 of bazar medicines. The expenditure on buildings was nominal, viz. Rs. 2, and on miscellaneous items Rs. 57. Government paid nothing. The total income was Rs. 1,768, of which municipality paid Rs. 1,034 against Rs. 150 in 1882. Interest on investments was Rs. 22 but the invested capital has not been shewn. At the end of the year there was a cash balance of Rs. 734.

*Jajpore.*—A municipal dispensary since July 1884, when it was formally vested to the municipality, in charge of the hospital assistant of the sub-division. The Civil Surgeon inspected it three times. The sub-divisional officer paid several visits, and the Commissioner and Magistrate one each. There were treated 43 in and 1,782 out-patients against 65 and 2,120 in 1882, the daily averages being one and 21 against two and 24 respectively. The number of deaths was 13—the same as the previous year. The medical officer reports that the people still object to the use of Europe medicines generally, and do not come for treatment till the disease reaches a serious stage, and in some cases till it is well nigh incurable. Eleven major and 128 minor operations were performed. The total expenditure was Rs. 978, whereof Rs 463 was the cost of establishment, Rs. 105 of Europe, and Rs. 16 of bazar medicines. The cost of diet was Rs. 28. The expenditure on buildings was Rs. 111 and on miscellaneous items Rs. 53. Government paid Rs. 96, namely Rs. 80 as part of pay of the medical subordinate, Rs. 9 as cost of forms, and Rs. 7 for diet of police cases. Municipality paid Rs. 254. From native subscription and local funds only Rs. 43 were obtained Rs. 200 which was deposited during the year were also withdrawn.

*Kendrapurah.*—A municipal dispensary since August 1884, when it was formally vested to the local municipality. The hospital assistant of the sub-division is in charge. Visited three times by the Civil Surgeon and four times by district officers. There were treated 25 in and 2,239 out-patients against 26 and 1,844 in 1882, the daily averages being ·62 and 27 against 1·4 and 25 respectively. The attendance is said to represent but a small fraction of the sickness outside the institution, for many from caste prejudice will not go to the dispensary. Only the very poor and destitute apply for medical aid. Four deaths occurred among in-patients. Twenty five major and 78 minor operations are recorded. No deaths followed any operation. The total expenditure was Rs. 968, of which Rs. 564 represent the cost of establishment, Rs. 125 of Europe medicines, and Rs. 20 of country medicines. Diet cost Rs. 10. The expenditure on buildings and repairs was Rs. 116, and on miscellaneous items Rs. 132. Government paid Rs. 111, namely Rs. 100 as salaries, Rs. 9 as cost of forms and registers, and Rs. 2 for diet of police cases. Municipality paid Rs. 661, against Rs. 700 in 1882. Subscription from natives was Rs. 257. There was a cash balance of Rs. 326 at the end of the year.

*Dhurmsala.*—A class IIIB dispensary under the management of a committee consisting of the same members as the Cuttack General Hospital committee with the addition of the manager of the Darpan estate in which the institution is situated. A civil hospital assistant was in charge. Visited three times by the Civil Surgeon, once by the Commissioner, once by the Magistrate, and once by the sub-divisional officer. There were treated 131 in and 4,340 out patients against 173 and 4,125 in 1882, the daily averages being four and 36 against five and 34 respectively. Among in-patients 15 deaths occurred against 31 in 1882. Three hundred and twelve minor operations are recorded. No major operation. The total expenditure was Rs. 1,372, whereof Rs. 813 represent the

cost of establishment, Rs. 150 of Europe medicines, and Rs. 48 of bazar medicines. The cost of diet was Rs. 151. The expenditure on buildings and repairs was Rs. 139, and on miscellaneous items Rs. 71. Government paid Rs. 310, namely Rs. 300 as salaries and Rs. 10 for forms and registers.

*Dhenkanal.*—A class IIIA institution, entirely maintained by the Tributary Estate of Dhenkanal. The manager of the estate is said to look into all matters of importance affecting the dispensary under the orders of the Superintendent of the Tributary Mehals. Steps were taken to form a dispensary committee, but a sufficient number of educated residents could not be obtained. No visits were paid by the civil officer during the year. The Civil Surgeon paid three visits. An Assistant Surgeon is in charge. There were treated 125 in and 8,249 out patients against 150 and 9,959 in 1882, the daily averages being seven and 38 against seven and 47 respectively. The death-rate among in-patients was 1·6 per cent. against four in the previous year. The in-door department is said to represent only a small proportion of the sickness of the surrounding countries. It supplies the wants of the very poor who alone seek admission and provides for emergencies and accidents. One hundred and forty-one minor operations are recorded. No major operation. The Civil Surgeon says that he does not agree with the Assistant Surgeon that no good field for operations exists at Dhenkanal. Cases of stone in bladder, tumours, and deformities after accidents are common about the hill states, and should be attracted to an institution so well furnished as the Dhenkanal dispensary. The total expenditure was Rs. 3,071, of which Rs. 2,387 represent the cost of establishment, Rs. 294 of Europe medicines, and Rs. 41 of bazar medicines The cost of diet was Rs. 193. The expenditure on miscellaneous items was Rs. 156. Government supplied forms and registers, the cost of which was Rs. 10

*Ungul.*—A dispensary in class I, entirely supported by Government. It is situated in the Government estate of Ungul. No residents of sufficient influence are said to be available here to form a dispensary committee. The tehsildar manages the institution under the orders of the Superintendent, Tributary Mehals. Visited once by the Assistant Superintendent, Tributary Mehals. No visit was paid by the Civil Surgeon. A civil hospital assistant is in charge. There were treated 17 in and 4,470 out patients against 34 and 3,704 in 1882, the daily averages being 1·1 and 22 against 1·8 and 19 respectively. Only one death occurred among in-patients. One major and 25 minor operations were performed. The total expenditure was Rs. 631, of which Rs. 499 was the cost of establishment, and Rs. 45 of Europe medicines.

*Bisipara.*—A dispensary in class I, entirely supported by Government. It is situated in the Government Khond Mehal Estate. There is no dispensary committee. The tehsildar manages the institution under the orders of the Superintendent, Tributary Mehals. It is at a great distance from Cuttack, and not easy of access. No visit was paid by the Civil Surgeon. A hospital assistant is in charge. The place is said to be eminently malarious. There were treated 1,899 out-patients against 2,232 in 1882, the daily averages being five and six respectively. The total expenditure was Rs. 473, of which Rs. 429 was the cost of establishment, and Rs. 19 of bazar medicines.

Balasore district.

The Civil Surgeon says the public health was good during the year. There was no severe epidemic, and the total mortality from cholera was considerably below that of the previous year. There are three charitable dispensaries in the district, all in class IIIB. In two both in-door and out-door patients are treated, and in one only out-door. There were treated 334 in and 6,949 out patients against 387 and 7,010 in 1882, the daily averages being nine and 47 against nine and 53 respectively. Three hospital assistants were in charge.

*Balasore Pilgrim Hospital.*—A class IIIB dispensary. Visited by the Civil Surgeon daily, and by the Commissioner once. There were treated 206 in and 1,965 out patients against 243 and 2,075 in 1882, the daily averages being six and nine against five and 11 respectively. The death-rate among in-patients was 23·7 per cent. against 32 in 1882. Fifteen major and 54 minor operations were performed. No deaths resulted. The total expenditure was Rs. 1,162, whereof Rs. 693 was the cost of establishment, Rs. 84 of Europe medicines, and Rs. 20 of country medicines. The cost of diet was Rs. 173. The expenditure on buildings was Rs. 26, and on miscellaneous items Rs. 165. Government paid Rs. 39, namely Rs. 30 for salaries, and Rs. 9 as cost of registers and forms. Municipality contributed Rs. 460 against Rs. 495 in 1882. There was a cash balance of Rs. 2,827 at the end of the year. The hospital has an invested capital of Rs. 2,048.

*Bhuddruck.*—A class IIIB dispensary under the management of a committee which met eight times during the year. Visited twice by the Civil Surgeon. There were treated 128 in and 2,275 out patients against 144 and 2,273 in 1882, the daily averages being three and 15 for both years. There were 18 deaths among in-patients. Fifteen major and 69 minor operations. The total expenditure was Rs. 1,000, whereof Rs. 658 was the cost of establishment, Rs. 148 of Europe, and Rs. 18 of country medicines. The cost of diet was Rs. 113, the expenditure on buildings was Rs. 10, and on miscellaneous items Rs. 51. Government paid Rs. 577 of which Rs. 466 were for salaries and Rs. 11 for forms and registers, and Rs. 100 as special allowance. There was a cash balance of Rs. 720 at the end of the year.

*Shamanund dispensary.*—A class IIIB dispensary. A committee existed, but no meetings were held during the year. The secretary, who is son of the founder of the institution, attends to its wants. Visited frequently by the Civil Surgeon and also by the Magistrate and Commissioner. There were treated 2,709 out-patients against 2,662 in 1882, the daily averages being 23 and 26 respectively. No in-patients are treated. Minor operations numbered 178.

One major operation. The total expenditure was Rs. 594, of which Rs. 474 represent the cost of establishment, Rs. 87 of Europe, and Rs. 16 of bazar medicines. The expenditure on miscellaneous items was Rs. 16. Government supplied forms, the value of which was Rs. 3. Municipality paid Rs. 300 against Rs. 200 in 1882. There was a cash balance of Rs. 661 at the end of the year.

Pooree district.

The Civil Surgeon says that the public health of the district was somewhat better in 1883 than in 1882, cholera and fever having been less prevalent and fatal. There were three dispensaries in the district—one in class I and two in class IIIB, all of which received both in-door and out-door patients. There were treated 559 in and 12,326 out patients against 635 and 10,452 in 1882, the daily averages being 18 and 72 against 22 and 69 respectively. The Civil Surgeon believes that all the returns represent fairly the entries in the registers, but he regrets to state that some inaccuracy has found its way into the out-door register of the Pooree dispensary. All the dispensaries were in charge of civil hospital assistants. The managing bodies generally are said to take an interest in the wellbeing of the institutions. The poorer classes of the resident population are said to appreciate these charities, but the well-to-do classes as a rule do not appreciate them.

*Pooree.*—A class IIIB dispensary managed by the local municipality. Visited daily by the Civil Surgeon, twice by the Magistrate, and once by the Commissioner. There were treated 369 in and 4,190 out patients against 377 and 3,750 in 1882, the daily averages being 12 and 32 against 14 and 29 respectively. An error in the mode of calculating the daily average of out-patients was detected in October last. It amounted to about ·28. The correction was made in the figure of average attendance, but the Civil Surgeon says it was not possible to apply the correction to the sub-heads men, women, and children. There were 100 deaths among in-patients against 119 in 1882. Seventeen major and 447 minor operations were performed. No deaths resulted after operation. The total expenditure was Rs. 5,823, whereof Rs. 1,205 represent the cost of establishment, Rs. 59 of Europe, and Rs. 69 of country medicines. The cost of diet was Rs. 496. The expenditure on buildings was Rs 3,883, received as a special allowance from Government. Rs. 98 were spent on miscellaneous items. Government also paid Rs. 7 for forms and registers. Municipality paid Rs. 1,569. There was a cash balance of Rs. 337 at the end of the year.

*Piplee.*—A class IIIB dispensary under the management of the Pooree lodging-house committee which met nine times during the year. Visited three times by the Civil Surgeon, twice by the Magistrate, and once by the Assistant Superintendent of Police. There were treated 113 in and 1,688 out patients against 127 and 1,781 in 1882, the daily averages being two and 15 against two and 17 respectively. There were 20 deaths among in-patients against 33 in 1882. One major and 106 minor operations were performed. As regards the former the Civil Surgeon says it was the removal of a non-malignant tumour, but as its position and size are not clearly given, it is not certain whether the operation should be classed as major or minor. There were no deaths after operation. The total expenditure was Rs. 1,082, of which Rs. 828 was the cost of establishment, Rs. 14 of Europe, and Rs. 29 of bazar medicines. The cost of diet was Rs. 76, the expenditure on buildings was Rs. 72, and on miscellaneous items Rs. 63. Government paid Rs. 303, namely Rs. 300 as salaries and Rs. 3 as forms and registers. From local funds were obtained Rs. 779.

*Khorda.*—A class I dispensary entirely supported by Government. It is under the management of a branch committee, which met seven times during the year. Visited 13 times by the sub-divisional officer, twice by the Civil Surgeon, once by the Commissioner, and once by the Magistrate. There were treated 77 in and 6,448 out patients against 131 and 4,921 in 1882, the daily averages being three and 23 against five and 21 respectively. The increase in the out-door attendance is said to be mainly due to annual increase in the number of skin diseases. There were five deaths among in-patients against 11 in 1882. The house-patients are not wholly composed of pilgrims, as in the two pilgrim dispensaries of the district. Five major and 163 minor operations were performed. No deaths after operation. The total expenditure was Rs. 677, of which Rs. 333 represent the cost of establishment.

## Dacca Division.

Dacca district.

The public health of the district is reported to have been better than that of the preceding year, the recorded death-rate per 1,000 of population being 23·9 against 29·6 in the town of Dacca and 19·3 against 20·19 in the rural circles. The number of dispensaries was the same as in 1882, viz. nine. Under the new rules of classification of dispensaries two belong to class II, five to class IIIA, and two to class IIIB. Excepting the Mitford Hospital at Dacca, which is under the charge of an apothecary, and the dispensary at Maluchi, which is under that of an Assistant Surgeon, all the dispensaries are in charge of civil hospital assistants. Of these the Mitford Hospital and the dispensaries at Joydebpore, Moonshegunge, Naraingunge, and Maluchi received both in-door and out-door patients; the rest are out-door institutions only. There were treated in all 1,987 in and 39,697 out patients against 1,754 and 39,738 in 1882; the daily averages were 99 and 261 against 93 and 217 respectively. The Civil Surgeon believes the statistics of the Mitford Hospital to be perfectly trustworthy, but does not speak of his confidence on the others. Two of these dispensaries are managed by municipalities and the rest (seven) by private committees. Regarding the interest taken in these institutions by the governing bodies,

the Civil Surgeon say: "As in former years the control of the committees over the affairs of the dispensary was in most cases purely nominal. In some, as at Bhagyakul, they are left entirely to the civil hospital assistant, none of the members of the committee residing on the spot, and visiting it only once or twice a year. In others, as at Boliati, though the nominal committee never meets, the gentleman who supplies the funds takes a keen interest in its well-being and visits it frequently. In the case of those which have been handed over to municipalities, there will no longer be formal meetings of hospital committees, the affairs of the dispensary being discussed at municipal meetings. In some of the dispensaries, as at Maluchi, the committee meets with great frequency."

*Mitford Hospital.*—A municipal hospital from 1st April 1882, but the complete transfer of the funds, &c., to the municipality has not yet been made, though that body now contributes the whole of the amount formerly paid by Government, viz. Rs. 5,085 in addition to the sum of Rs. 3,600 per annum, which it was already paying. On the 23rd April 1883 the old Mitford Hospital committee was dissolved, and the affairs of the hospital passed into the hands of the municipal committee, and they will now be considered at general meetings of that body. The Civil Surgeon visits the hospital daily when in the station. First grade apothecary G. H. Campbell continued in charge. He was assisted in his work by the four teachers of the medical school, two civil hospital assistants permanently attached to the hospital, and by the supernumerary Assistant Surgeons and civil hospital assistants who were attached to it. There were treated 1,719 in and 16,155 out patients against 1,512 and 17,203 in 1882, the daily averages were 86 and 101 against 82 and 120 respectively. The decrease in the number of out-patients is attributed to the absence of malarious fever in the district during the year. The number of deaths among in-patients was 218, or a rate of 12·6 per cent. of the total treated against 246 or 16·2 in the previous year. The lower death-rate was due to the comparatively small number of cholera cases, of which only 34 were treated with 15 deaths against 108 and 72 in 1882. The number of major operations performed was 148 against 136 in 1882. Of these 23 were performed by the Superintendent and 125 by the medical subordinates. Only 11 deaths resulted from these operations, or 7·4 per cent. against 8·8 in the previous year. Minor operations numbered 2,571. The new female ward was opened in April. It gives accommodation to 24 patients. The repairs to the buildings which were undertaken by Government in the previous year were completed during the year at a cost of Rs. 12,719. This amount has been entered as a special allowance from Government. The total income of the hospital during the year, excluding Government contribution for registers and repairs to the buildings, was Rs. 15,901, of which the municipality paid Rs. 9,024, and the rest were obtained from interest on investments and other local sources. The total expenditure was Rs. 16,291, shewing an excess of Rs. 390 over the income. The cost of establishment was Rs. 8,894, of Europe medicines Rs. 1,091, and of bazar medicines Rs. 129. The expenditure on diet was Rs. 4,598, and on miscellaneous items Rs. 1,579. The municipality has voted to set aside a sum of Rs. 3,000 annually to meet quadrennial repairs to the building. At the end of the year there was a cash balance of Rs. 2,929, and a capital of Rs. 1,69,800 wholly invested in Government papers. All this money with the exception of Rs. 100, which the purveyor holds as a permanent advance, was paid to the chairman of the municipality on the 18th of January 1884, and in his hands the whole funds of the hospital are now vested.

*Naraingunge.*—A municipal dispensary. Visited twice by the Civil Surgeon, but by no civil officer. A civil hospital assistant is in charge. There were treated 74 in and 3,639 out-patients against 74 and 4,008 in 1882; the daily averages were three and 18 against two and 22 respectively. The number of deaths among in-patients was 15, or a rate of 20·3 per cent. Fourteen major—chiefly reductions of dislocations—and 193 minor operations were performed. The total expenditure was Rs. 1,395, whereof Rs 812 represent the cost of establishment. The cost of Europe medicines, which were obtained from private dealers on indents checked by the Civil Surgeon, was Rs. 293 against Rs. 81 in 1882. With regard to this high expenditure under this head, the Civil Surgeon says as follows:—"In the case of Naraingunge the indents seem to have been very extravagant, but as they were passed by the governing body and checked by the Civil Surgeon at the time nothing can be said. I took the opportunity of examining the stock in hand at Naraingunge the other day, and found a large proportion of the bottles remaining unopened, and there will probably therefore be a considerable balance in hand when the time for making out the new indent arrives." The cost of bazar medicines was Rs. 76. Diet cost Rs. 110, and miscellaneous charges Rs. 101. The Naraingunge municipality paid Rs. 1,400; it intends to open a dispensary at Madangunj, a village of large and growing dimension on the opposite side of the river. Government paid Rs. 14, namely Rs. 12 in forms and registers and Rs. 2 for diet of police cases.

*Moonshegunge.*—This is a class IIIA sub-divisional dispensary under the management of a committee which met seven times during the year. It was visited once by the Commissioner, thrice by the District Magistrate, and five times by the sub-divisional officer. Civil Surgeon paid only one visit. The civil hospital assistant in charge of the sub-division is in charge and received Rs. 10 monthly from the dispensary funds in addition to Rs. 35 for sub-division and Rs. 10 for lock-up from Government. He used to get Rs. 45 per mensem for sub-division from Government: this has been reduced to Rs. 35 since September

last. There were treated 13 in and 2,819 out patients against 16 and 2,630 in 1882, the daily averages were 32 and 14 against 93 and 14 respectively. Of the 13 in-patients 10 were police cases. There were no deaths. 340 minor operations were performed. No major operation. The total expenditure was Rs. 688, of which Rs. 288 represent the cost of establishment, Rs. 135 of Europe medicines, and Rs. 20 of bazar medicines. The amount expended on buildings was Rs. 17. The cost of forms obtained from Government was Rs. 3.

*Manickgunge.*—A class IIIA sub-divisional dispensary under the management of a committee which met six times during the year. Visited once by the Commissioner, twice by the Magistrate, and once by the Civil Surgeon. A hospital assistant is in charge who is paid Rs. 10 per mensem from the dispensary fund. Two thousand and ninety-six out-patients were treated against 2,460 in 1882. The daily average was the same for both the years. No in-patients. Malarious fevers were the prevailing disease. One hundred and twenty-six minor operations were performed. No major operation. The total expenditure was Rs. 521, of which Rs. 250 were the cost of establishment, Rs. 50 Europe medicines, and Rs. 13 of bazar medicines. The expenditure on buildings and repairs was Rs. 162, and on miscellaneous items Rs. 33. Government contributed forms and registers, the cost of which was Rs. 6.

*Maluchi.*—A class IIIA dispensary supported by an estate and managed by a committee which met 17 times during the year. Visited once by the sub-divisional officer and once by the Civil Surgeon. A third grade Assistant Surgeon was in charge, who received Rs. 100 per mensem from the dispensary funds. There were treated 141 in and 3,673 out patients against 137 and 3,149 in 1882, the daily averages were eight and 29 against seven and 23 respectively. Malarious fever was the prevailing disease and was the cause of nearly half the number of out-patients treated. The death-rate was 9·2 per cent. against 5·1 in the previous year. Eight major and 90 minor operations were performed. The total expenditure was Rs. 3,555, whereof Rs. 1,798 was the cost of establishment, Rs. 95 of Europe medicines, and Rs 28 of bazar medicines. Diet cost Rs. 395. The expenditure on buildings and repairs was Rs. 165, and on micellaneous items Rs. 62. The cost of forms received from Government was Rs. 13. Rupees 1,000 was invested during the year.

*Joydebpore.*—This is a class IIIA dispensary managed and entirely supported by Kumar Rajendra Narain Roy Chowdhuri of Bhawul. There is a dispensary committee which met twice during the year. Visited once by the Civil Surgeon. A hospital assistant is in charge, who receives Rs. 60 per mensem from the dispensary funds. There were treated 40 in and 2,703 out patients against 15 and 2,491 in 1882; the daily averages were ·94 and 15 against ·67 and 16 respectively. Malarious fever and spleen affections were the prevailing diseases. There were five deaths against two in 1882. Three major and 174 minor operations were performed. The total expenditure was Rs. 1,292 of which Rs. 933 represent the cost of establishment, Rs. 256 of Europe medicines, and Rs. 20 of bazar medicines. The expenditure on diet was Rs. 38, and on miscellaneous charges Rs. 45. Government paid Rs. 9 as cost of forms and registers.

*Bhaoyakul.*—A class IIIA dispensary. A nominal committee exists, which has not met for several years. The affairs of the dispensary are left in the hands of the civil hospital assistant in charge. It was visited once by the Civil Surgeon. Two thousand nine hundred and five out-patients were treated with a daily average of 15 against 2,288 and 11 in 1882. No in-patients. Malarious fever was the prevailing disease. Eight major and 172 minor operations are said to have been performed. Besides the hospital assistant, who is paid Rs. 30 monthly, the subordinate establishment consists of a compounder on Rs. 8 and a servant on Rs. 4. The total expenditure was Rs. 619, of which Rs. 378 represent the cost of establishment, Rs. 161 of Europe medicines, and Rs. 9 of bazar medicines. The expenditure on buildings and repairs was Rs. 29 and on miscellaneons items Rs 42. The cost of forms and registers supplied by Government was Rs. 6. The income of the institution was Rs. 711 from private sources. It is reported that the establishment is not paid regularly. At the end of the year payment of Rs. 141 was in arrears viz Rs. 126 on account of establishment and Rs. 15 on account of bazar medicines and other charges.

*Joinsher.*—It is a class IIIB institution, managed by a committee which met only once during the year. It was visited once by the Civil Surgeon. A civil hospital assistant is in charge, who received Rs. 30 per mensem, half from Government and half from the dispensary funds. There were no inpatients. Two-thousand three hundred and seventy-four out-patients were treated with a daily average of 21·9 against 2,456 and 22·4 in 1882. Goitre seems to have been the prevailing disease. Eight major and 572 minor operations are said to have been performed. The total expenditure was Rs. 643, whereof Rs. 396 represent the cost of establishment, Rs. 77 of Europe medicines, and Rs. 79 of bazar medicines. The expenditure on miscellaneous items inclusive of a house rent of Rs. 60 was Rs. 91. Government contributed Rs. 184, namely Rs. 180 as half pay of the medical subordinate and Rs. 4 as cost of forms and registers. The dispensary had an income of Rs. 459 from native subscriptions.

*Boliati.*—This is also a class IIIB institution under the management of a committee which never meets. It is actually managed by Baboo Josoda Lal Rai Chowdhuri, the secretary, who pays all the expenses except the half pay of the medical subordinate, which is paid by Government. It was inspected once by the Civil Surgeon. Besides the hospital assistant, who gets Rs. 25 monthly, there is a compounder on Rs. 7-8 and a cooly on Rs. 5.

No in-patients. There were treated 3,333 out-patients with a daily average of 24 against 3,05 5and 19·9 in 1882. Goitre and malarious fever were the principal diseases. One hundred minor operations were performed. The total expenditure was Rs 598, of which Rs. 516 represent the cost of establishment. The cost of Europe medicine was Rs. 42 and of bazar medicine Rs. 17. The expenditure on miscellaneous items was Rs. 24. Government contributed Rs. 156, namely Rs. 150 as half pay of the hospital assistant and Rs. 6 as cost of forms and registers. The income from native subscriptions was Rs. 755. There was a cash balance of Rs. 157 at the end of the year.

Furreedpore district.

The general health of the district during the year under report, as evidenced by the mortuary returns, was slightly better than that of the two years immediately preceding it, though fevers and cholera prevailed in certain places as intensely as in the previous year. There were three dispensaries working in the district, throughout the year, viz. one at Furreedpore, one at Madaripore and the third at Goalundo. This latter is under the superintendence of a civil medical officer of its own, who has submitted a separate report. The dispensaries at Furreedpore and Madaripore are under the local municipalities, and are therefore under the new rules of classification in class II. The one at Goalundo is in class IIIB. All the dispensaries are in charge of civil hospital assistants and received both in-door and out door patients. There were treated in all 545 in and 12,413 out patients against 543 and 10,138 in 1882. The daily averages were 22 and 52 against 19 and 43 respectively. The managing bodies seem to take very little interest in them, but the Civil Surgeon believes that they are appreciated by the people for whose benefit they are established

*Furreedpore.*—This is a municipal dispensary and is in class II. It was visited twice by the Commissioner, several times by the District Magistrate, and daily by the Civil Surgeon. A civil hospital assistant is in charge, who is paid Rs. 30 per month by the municipality. There were treated 221 in and 6,094 out patients against 224 and 5,944 in 1882. The daily averages were 10 and 22 against eight and 22 respectively. There were eight deaths among in-patients, or 3·6 per cent. against 13 and 5·8 in the previous year. The number of deaths does not, however, include the two cases which were brought into the hospital in a moribund condition and died within an hour or two. Cases of malarious fever and enlarged spleen were most numerous. Fourteen major, of which eight were performed by the Civil Surgeon, were recorded with one death. Minor operations numbered 131. The total expenditure was Rs. 1,370, of which Rs. 638 represent the cost of establishment. The expenditure on bazar medicines was Rs 74 and on Europe medicines Rs. 152, whereof Rs. 57 was paid for previous year's supply. The cost of diet was Rs. 270. The expenditure on buildings and repairs was Rs. 107, and on miscellaneous items Rs. 128, Government contributed Rs. 165, namely Rs. 154 for diet of police cases and Rs. 11 in forms and registers. Municipality paid Rs 902 against Rs. 708 in 1882. Subscriptions from Europeans fell from Rs 90 to Rs. 75, but from natives rose from Rs. 174 to Rs. 228.

*Madaripore.*—Is a municipal dispensary, class II. It was visited once by the District Magistrate and thrice by the sub-divisional officer. Prevalence of fever in the town prevented the Civil Surgeon from paying more than one visit. The civil hospital assistant of the sub-division is in charge and receives Rs. 10 per mensem from the dispensary funds. There were treated 139 in and 4,446 out patients against 153 and 2,614 in 1882. The daily averages were four and 11 against three and six respectively. There were two deaths among in-patients, or a rate of 1·4 per cent. against three and 1·9 per cent. in the previous year. One hundred and four minor operations were performed. No major operation. The total expenditure was Rs. 770, whereof Rs. 225 represent the cost of establishment. Rs. 223 were spent on buildings and repairs. The cost of Europe medicines obtained from private druggists was Rs. 180, and of bazar medicines Rs. 50. The expenditure on diet and miscellaneous items was Rs. 11 and Rs. 81 respectively. Government contributed Rs. 22, of which Rs. 11 was the cost of the forms and Rs. 11 of diet of police cases. Municipality paid Rs. 669 against Rs. 280. Native subscriptions amounted to Rs. 78 only.

*Goalundo.*—A class IIIB dispensary under the management of a committee which met only once during the year. The sub-divisional officer and the civil medical officer of Goalundo, who is also the Superintendent, visited the dispensary frequently. The civil hospital assistant of the sub-division is in charge, who receives Rs. 10 monthly from the dispensary funds. There were treated 185 in and 1,873 out patients against 166 and 1,580 in 1882, the daily averages being eight and 18 against seven and 14 respectively. The civil medical officer believes in the accuracy of these figures. The death-rate was 29·7 against 39·1 in 1882. There were 9 major operations, of which 7 were performed by the civil medical officer. Minor operations numbered 85. The total expenditure was Rs. 1,469, whereof Rs. 600 was the cost of establishment. Europe medicines were obtained from private druggists at a cost of Rs. 277 against Rs. 123 in 1882. The cost of bazar medicine was Rs. 52. Dieting articles cost Rs. 206, and Rs. 63 were spent on miscellaneous items. The expenditure on buildings was Rs. 256. Government contributed Rs. 7, viz. Rs. 3 as cost of forms and registers and Rs. 4 for dieting police cases. Municipality paid Rs. 205. The income from other sources was Rs. 1,064, and Rs. 320 were obtained by sale of securities.

Backergunge district.

The district is reported by the Civil Surgeon to have been remarkably healthy during the year under report—healthier than for years past. There was no epidemic, no scarcity, no extensive cause of unusual sickness and mortality. The total number of dispensaries working

Backergunge District at the end of the year was three, namely Barisal, Perozepore, and Bhola, all of which received both in-door and out-door patients. Two are in class IIIB and managed by private committees and one in class II. There were treated 312 in and 11,019 out patients against 202 and 8,511 in 1882, the daily averages being 12 and 50 against eight and 45 respectively. The dispensary at Barisal is in charge of an Assistant Surgeon, the other two under that of hospital assistants. The interest of the managing bodies is reported to be at present increaseing at head-quarters, but slight at outlying dispensaries. Though the dispensaries are said to be appreciated by the mass of the people, fear and loss of dignity are said to stand much in the way of their attendance in them—a feeling fostered by kobirajes.

*Barisal.*—A municipal dispensary since July 1884, when it was formally vested to that body. Under the managment of a committee which held no meeting during the year. Visited twice by the District Magistrate and daily by the Civil Surgeon. A third grade Assistant Surgeon is in charge, whose salary of Rs. 100 per mensem is paid by the municipality. There were treated 266 in and 6,157 out-patients against 167 and 5,799 in 1882. The daily averages were 10 and 24 against six and 28 respectively. There were 16 deaths, or a rate of 6 per cent. against 17 or 10 per cent. in the preceding year. Six of these deaths occurred in persons admitted in a moribund condition. Twenty-seven major and 274 minor operations were performed. The total expenditure was Rs. 2,916 of which Rs. 1,489 was the cost of establishment. Rupees 255 of Europe medicines brought from England against Rs. 318 in 1882, and Rs. 109 of bazar medicines. The cost of diet was Rs. 311. The expenditure on building and miscellaneous items was Rs. 113 and Rs. 280 respectively. Government contributed Rs. 8, viz. Rs. 3 for forms and Rs. 5 for diet of police cases. The municipality paid Rs. 1,304 against Rs. 949 in 1882. The income from other sources was Rs. 92, from interest Rs. 384, and from subscription Rs. 1,357. Rupees 360 were invested during the year.

*Perozepore.*—This is a class IIIB institution, managed by a committee which met twice during the year. Visited four times by the District Magistrate, seven times by the Civil Surgeon, and frequently by the sub-divisional officer. A civil hospital assistant is in charge. There were treated 13 in and 2,115 out-patients against 21 and 1,727 in 1882. The daily averages were ·5 and 11 against ·8 and nine in the previous year. Seventy minor operations were performed. No major operation. The total expenditure was Rs. 721, whereof Rs. 240 was the cost of establishment. Bazar medicines were obtained at a cost of Rs. 34. The cost of Europe medicines paid for during the year was Rs. 54. Diet cost Rs. 4 only. The expenditure on buildings was Rs. 336, and on miscellaneous items Rs. 40. The Civil Surgeon has evidently little confidence in the figures. Government paid Rs. 6, viz. Rs. 4 for diet of police cases and Rs. 2 as forms and registers. Municipality paid Rs. 120. Native subscription amounted to Rs. 313.

*Bhola.*—It is also a class IIIB dispensary governed by a committee presided over by the sub-divisional officer. There were four meetings during the year. It was visited twice by the Magistrate and frequently by the sub-divisional officer. The Civil Surgeon made five inspections. The civil hospital assistant of the sub-division is in charge, who receives Rs. 55 in all. There were treated 33 in and 2,747 out-patients against 14 and 985 in 1882, the daily averages being one and 14 against three and seven respectively. There were no deaths. One hundred and six minor operations were performed. No major operation. The total expenditure was Rs. 489, whereof Rs. 238 represent the cost of establishment, Rs. 84 of Europe medicines, and Rs. 20 of bazar medicines. Rupees 5 were spent on diet, and Rs. 29 represent the expenditure on buildings and miscellaneous items. Government paid Rs. 91, namely Rs. 84 as salaries and Rs. 2 as cost of forms, and Rs. 5 for diet of police cases.

**Mymensingh district.**

The public health of the district in 1883 was as bad as it was in the previous year, though the district enjoyed a comparative immunity from cholera it suffered greatly from malarious fever. The number of dispensaries was the same as in 1882, namely 15. None were opened or closed during the year. Of the 15 dispensaries five are in class II, nine in class IIIA, and one in class IIIB. Four are managed by municipalities, two by private persons, and the rest (nine) by private committees. The dispensaries at Mymensingh, Tangail and Kishoregunge treat in-door and out-door patients regularly, and Netrokona and Jamalpore occasionally; the rest are out-door institutions only. Two dispensaries—Mymensing and Tangail—are in charge of third grade Assistant Surgeons; two—Kukurmari and Jamurki—in charge of private native doctors, and all the others in charge of civil hospital assistants. The total number of patients treated was 353 in and 32,418 out against 355 and 28,993 in 1882, the daily average attendance being 15 and 240 against 14 and 215 respectively. The Civil Surgeon believes the annual returns to be fairly trustworthy, though in two of the dispensaries—Netrokona and Jamurki—represented patients were included in calculating the daily average attendance. With perhaps two exceptions the supervision of the governing bodies on their dispensaries was nominal, and the interest only superficial. All the dispensaries obtained their Europe medicines from private druggists on indents previously sanctioned by the Civil Surgeon. Excepting Kukurmari the Civil Surgeon visited all the dispensaries: Muktagacha and Ramgopalpore four times, Jamalpore three times, Tangail and Pingna twice; the rest only once, to which he says it was impracticable to pay two visits without neglecting other and more important work at head-quarters.

*Mymensingh.*—This is a municipal dispensary since June 1884. It is aided and managed by the local municipality. Visited once by the Judge and frequently by the Civil Surgeon.

Two of the municipal commissioners visit the dispensary once or more monthly. A third grade Assistant Surgeon was in charge. There were treated 152 in and 4,000 out patients against 187 and 4,116 in 1882, the daily averages being five and 34 against six and 37 respectively. The mortality among in-patients was not so high as in the previous year, being 13·8 per cent. against 21·3. There were six major operations, five of which were performed by the Civil Surgeon. Minor operations numbered 179. The total expenditure was Rs. 3,007, of which Rs. 2,140 were the cost of establishment. The expenditure on Europe medicines was Rs. 109, on bazar medicines Rs 39, on diet Rs. 143, and on buildings Rs. 4 only. The amount spent on miscellaneous items was Rs. 93. Government contributed Rs. 29, viz. Rs. 13 as cost of forms and registers and Rs. 16 for diet of police cases. Municipality paid Rs. 805, and the amounts received from European and natives were Rs. 337 and Rs. 603 respectively, and Rs. 430 were withdrawn during the year. The total invested capital of the dispensary, inclusive of Rs. 478 of the year under report, was Rs. 15,314.

*Sherepore.*—A municipal dispensary since June 1884, when it was formally vested to the local municipality. Visited once by the sub-divisional officer and once by the Civil Surgeon. A civil hospital assistant is in charge. It is an out-door institution. One thousand six hundred and thirty-three out-patients were treated against 972 in 1882 with a daily average of 13 against seven. The increase is attributed to the greater popularity of the present medical officer. Sherepore continues to be in the most wretched sanitary condition, due more to the apathy of the commissioners than to want of funds. Goitre is the most prevailing disease; nearly half the number of patients were treated for this disease. Four major and 50 minor operations were performed. The total expenditure was Rs. 659, of which Rs. 396 was the cost of establishment. Europe medicines cost Rs. 44, of which Rs. 4 only were paid during the year. The cost of country medicines was Rs. 14. The expenditure on buildings was Rs. 151 and on miscellaneous items Rs. 70. Government paid Rs. 9 as cost of forms and registers. Municipality paid Rs. 480 against Rs. 70 in 1882. At the end of the year the invested capital was Rs. 528.

*Ramgopalpore.*—A class IIIA dispensary under the management of a nominal committee consisting of the Magistrate, the Civil Surgeon, and Baboo Kashi Kishor Roy, the supporter. Visited four times by the Civil Surgeon. The dispensary building is in a worse state of repairs. A civil hospital assistant is in charge, who is paid Rs. 25 per month. There is a minor establishment consisting of a compounder at Rs. 10 and a sweeper at Rs. 5 under him. There were treated 3,085 out-patients with a daily average of 14 against 2,617 and 16 in 1882. Malarious fever was the most common disease. Three major—all reduction of dislocation—and 242 minor operations were treated. The total expenditure was Rs. 677, whereof Rs. 516 represent the cost of establishment, Rs. 83 of Europe medicines, and Rs. 19 of bazar medicines. Government paid Rs. 9 for forms and registers. The income from native subscriptions was Rs. 200, and Rs. 283 were obtained by sale of securities, and Rs. 33 were derived as interest on investments.

*Tangail.*—A class IIIA dispensary governed by a committee which met four time during the year. An Assistant Surgeon is in charge, who receives Rs. 120 permonth. It was visited twice by the Magistrate, twice by the sub-divisional officer, and twice by the Civil Surgeon. There were treated 156 in and 2,934 out patients against 150 and 2,741 in 1882, the daily averages being seven and 20 against six and 19 respectively. There were nine deaths among the in patients against six in the previous year. Malarious fever was the prevailing disease. Nine major and 81 minor operations were performed. The total expenditure was Rs. 3,125, of which Rs. 2,226 represent the cost of establishment, Rs. 234 of Europe, and Rs. 24 of bazar medicines. The cost of diet was Rs. 210. The expenditure on buildings was Rs. 304, and on miscellaneous items Rs. 126. Government paid Rs. 61, namely Rs. 9 for forms and registers, and Rs. 52 for diet of police cases. The expenses were met from subscriptions from natives which amounted to Rs. 3,116.

*Gopalgunge*—This is a class IIIB dispensary, managed by a committee which met seven times. Visited three times by the sub-divisional officer and twice by the Civil Surgeon. A civil hospital assistant is in charge who receives Rs. 20 per mensem, half of which is paid by Government. There were treated 2,411 out-patients against 1,497 in 1882, with a daily average of 20 against 10. The transfer of the institution to Pingua in March was attended with good results. One hundred and twenty minor operations were performed. No major operation. The total expenditure was Rs. 605, of which Rs. 337 was the cost of establishment, Rs. 143 of Europe medicines, and Rs. 13 of bazar medicines. The expenditure on buildings was Rs. 44 and on miscellaneous items Rs. 45. Government paid Rs. 144, namely Rs. 9 as cost of forms and registers and Rs. 135 as salaries. Municipality paid nothing.

*Jamurki.*—A class IIIA dispensary, managed by Mr. Weatherall, agent of Nawab Ashanullah of Dacca. Visited once by the sub-divisional officer, and once by the Civil Surgeon. A private native doctor is in charge. Two thousand seven hundred and seventy-three out-door patients were treated against 2,402 in 1882. The daily average was the same as in previous year, viz. 14. Malarious fever was the prevailing disease. Four major and 198 minor operations were performed. The total expenditure was Rs. 1,172, where of Rs. 908 was the cost of establishment, and Rs. 126 of Europe medicines, and Rs. 8 of bazar medicines. Government paid Rs. 9 as cost of forms and registers.

*Jhawail.*—This is also a class IIIA dispensary under a private manager, the representative of Raja Jotindra Narain Rai of Putia, Rajshahye. Visited twice by the sub-divisional officer and once by the Civil Surgeon. A civil hospital assistant is in charge, who receives

Rs. 30 per month. There were treated 2,328 out-patients against 1,843 in 1882 with a daily average of 26 against 18. No in-patients. Forty-six minor operations were returned. The total expenditure was Rs. 740, of which Rs. 529 were spent on establishment, Rs. 121 on Europe medicines, and Rs. 18 on bazar medicines. Government contributed Rs. 9 as cost of forms and registers.

*Kerotia.*—It is a class IIIA dispensary, supported by Mahomed Alikhan and managed by a committee which met seven times. Visited once by the sub-divisional officer and once by the Civil Surgeon. A civil hospital assistant is in charge, who receives Rs. 50 per month. Besides the hospital assistant there is a compounder on Rs. 12, a dresser on Rs. 7, and a chapprassee on Rs. 5. The dresser is not needed, but the supporter does not wish to dismiss him. Four thousand one hundred and ninty-nine out-door patients were treated with a daily average of 17 against 3,953 and 15 in 1882. These figures, says the Civil Surgeon, are somewhat exaggerated. Nine major and 128 minor operations were recorded. The total expenditure was Rs. 1,168, of which Rs. 879 were spent on establishment, Rs. 194 on Europe medicines against Rs. 236 in the previous year, and Rs. 18 on bazar medicines. Government paid Rs. 9 as cost of forms and registers.

*Hybutnugger or Kishoregunge.*—A municipal dispensary since June 1884. The municipality contributes liberally towards it. It is managed by a committee which met 14 times during the year. A civil hospital assistant is in charge, who received Rs. 27 a month. The committee has resolved to appoint an Assistant Surgeon on Rs. 75 a month who will be in charge of the dispensary alone and have nothing to do with the medical charge of the sub-division or sub-jail. In-patients were entertained from September last and the number treated was 26, and the daily average 2·7. Out-door patients numbered 1,611 against 1,598 in 1882, and the daily average was 16 against 17. Four major and 111 minor operations were recorded. The total expenditure was Rs. 1,133, of which Rs. 558 represent the cost of establishment, Rs. 55 of Europe medicines, and Rs. 27 of bazar medicines. Government paid Rs. 46, namely Rs. 9 for forms and registers, and Rs. 37 as salaries. Municipality paid Rs. 525.

*Netrokona.*—A class IIIA dispensary, supported by Sreemutty Bissessuri Debya Chowdhurani, of Gouripore, and managed by a committee, which met 10 times. Visited once by the Magistrate of the district, twice by the sub-divisional officer, and once by a Civil Surgeon. A civil hospital assistant is in charge, who receives Rs. 35 a month. There were treated 10 in, and 2,004 out-patients against six and 2,006 in 1882, the daily average being five and 13 against three and 12 respectively. There was only one death among the in-patients. Seven major and 114 minor operations were returned. The total expenditure was Rs. 514, whereof Rs. 360 represent the cost of establishment, Rs. 91 of Europe medicines, and Rs. 7 of bazar medicines. In-patients dieted at their own expense. Government contributed forms and registers, the cost of which was Rs. 9.

*Jamalpore.*—A class II institution under the local municipality. No visits are recorded. A civil hospital assistant is in charge, who receives Rs. 30 a month. There were nine in and 615 out patients against 12 and 774 in 1882, the daily averages being ·3 and two against ·3 and four respectively. There were two deaths against three in the previous year. No major operation. Minor operations numbered 18. Although the dispensary has been in existence for years, the people have had much less faith in treatment practised at the dispensary than as practised by the kabirajes and hakims. The total expenditure, was Rs. 723, whereof Rs. 362 were spent on establishment and Rs. 180 on buildings and repairs. The expenditure on miscellaneous items was Rs. 40. The cost of Europe medicines Rs. 50, was not paid. Government paid Rs. 5 as cost of forms and registers. Municipality paid Rs. 200 against Rs. 215 in 1882. The income from local subscriptions was Rs. 451.

*Muktagacha.*—A class IIIA dispensary, supported by an endowment of Rs. 12,000 from Raja Surja Kanto Acharjee, and managed by a committee which met 9 times. Visited once by the Magistrate and four times by the Civil Surgeon. A civil hospital assistant is in charge, who receives Rs. 30 a month. One thousand six hundred and eighty out patients were treated with a daily average of 17 against 1,622 and 14 in 1882. Two major—reduction of dislocations—and 128 minor operations were performed. The total expenditure was Rs. 965, whereof Rs. 444 were spent on establishment, Rs. 71 on Europe medicines, and Rs. 18 on bazar medicines. Government paid Rs. 5 as cost of forms and registers.

*Bazitpore.*—A municipal dispensary from June 1884, when it was formally vested in the local municipality by Government in its letter No. 776T—M, dated 5th June 1884. It was under the management of a committee, which held two meetings up to March, when it was transferred to the municipality. The sub-divisional officer and the Civil Surgeon paid one visit each. A civil hospital assistant is in charge, who receives Rs. 25 a month. There were treated 1,417 out-patients against 1,347 in 1882 with a daily average of 7·1 against 7·6. Minor operations numbered 67. No major operation. The total expenditure was Rs. 529, whereof Rs. 372 were spent on establishment, Rs. 50 on Europe medicines, and Rs. 19 on bazar medicines. Government paid Rs. 5 as cost of forms. Municipality paid Rs. 140, and native subscriptions amounted to Rs. 387.

*Ambarea.*—It was transferred to class IIIA on 15th November under Government orders No. 1349 of the same date. It is now supported by Baboo Hem Chunder Chowdhuri of Ambaria, who has increased his monthly contribution from Rs. 60 to Rs. 70, and managed bay nominal committee of which no meetings are recorded. Visited once by the Civil

Surgeon. A civil hospital assistant is in charge, who received Rs. 20 a month up to 14th November. Since then he has been drawing Rs. 40 a month. This has not been explained. No in-patients. One thousand four hundred and ten out-patients were treated with a daily average of 13 against 1,258 and 12 in 1882. Eighteen minor operations were performed. No major operation. The total expenditure was Rs 726, of which Rs. 542 represent the cost of establishment; Rs. 135 of Europe medicines. Government contributed Rs. 118, whereof Rs. 5 was the cost of forms and registers and Rs. 113 as salaries.

*Kukurmari.*—A class IIIA dispensary, supported by the late Rajah Promotho Nath Roy of Dighapati in Rajshahye, and managed by a committee, which met four times. No visits were paid by civil officers or by Civil Surgeon, who, however, attempted a visit, but returned after four days' journey, learning that it will take another five days to reach the place. A civil hospital assistant is in charge. Only 318 out-patients were treated with a daily average of seven against 247 and six in 1882. One major reduction of dislocation and 25 minor operations are said to have been performed. "The dispensary" says the Civil Surgeon, is useless and will most probably soon be closed. The supporter in December wrote to say he wished to abolish it, as the people made no use of it. The total expenditure was Rs. 683, of which Rs. 628 was spent on establishment, and Rs. 29 on Europe medicines. Government paid Rs. 5 as forms and registers.

## Chittagong Division.

Chittagong district.

The Civil Surgeon says that the public health of the district as compared with the last few years was good. Cholera was present more or less for the first seven months of the year, but the mortality from it was not great. There is only one dispensary in the district and that at the sudder station. The sub-divisional officer of Cox's Bazar is endeavouring to establish a dispensary in that municipality, where it is said the want of medical charity is greatly felt.

*Chittagong Dispensary.*—A municipal institution in charge of an Assistant Surgeon. Visited daily by the Civil Surgeon, but seldom or never inspected it is said by the Civil officers. There were treated 347 in and 6,415 out patients against 320 and 6,447 in 1882, the daily averages being 15 and 33 against 14 and 35 respectively. There were 34 deaths, among in-patients against 25 in the previous year. Ninety-one major and 363 minor operations were performed with six deaths. The European wards of the hospital are said to have been very useful for the treatment of sailors and others, fifty-seven of whom were admitted. Four deaths occurred among them. The Civil Surgeon says:—"As the port increases the number of sailors admitted will increase, and in an unhealthy year it will be difficult to find room for the cases requiring treatment, as the practitioners amongst the shipping are the most unmitigated quacks, and their presumed cheapness their only qualification." The hospital receipts are paid into the municipal fund, and all expenditure met therefrom. No separate accounts are kept. The total expenditure was Rs. 5,117, of which Rs. 2,873 represent the cost of establishment, Rs. 211 of Europe, and Rs. 88 of bazar medicines. The cost of diet was Rs. 939. The expenditure on buildings was Rs. 345 and on miscellaneous items Rs. 660. Government paid Rs. 87, namely Rs. 10 for registers and forms and Rs. 77 for diet of police cases Municipality paid Rs. 2,717. The income from local or other funds was Rs. 1,407, and that from subscriptions from Europeans and native, was Rs. 610 and Rs. 296 respectively.

Noakholly district.

The Assistant Surgeon in civil medical charge of the district says that the general health of the district was comparatively very fair. There were three dispensaries working during the year. The establishment of a dispensary at Sundeep was sanctioned by Government, but the institution was not opened by the end of the year Of the three dispensaries, one is in class II, one in class IIIA, and the third in class IIIB. One of the dispensaries gives relief both to in and out door patients. The other two to out-patients only. All were in charge of hospital assistants. There were treated 130 in and 5,180 out-patients against 149 and 4,165 in 1882, the daily averages being four and 134 against five and 37 respectively. The Assistant Surgeon says that the figures shewn in the returns are reliable, and that the managing bodies have taken interest in all matters connected with the welfare of the different institutions. The Magistrate, however, remarks in regard to the Fenny dispensary committee that he has "not been impressed with the interest taken by members of the committee in the institution." The dispensaries are said to be generally appreciated by the people, but not quite up to the expectations of the managing bodies.

*Noakholly.*—A municipal dispensary visited daily by the Assistant Surgeon, 60 times by the municipal Commissioners, 27 times by the Magistrate, and once by the Commissioner. A first class hospital assistant was in charge. There were treated 130 in and 2,618 out patients against 149 and 2833 in 1882, the daily averages being four and 14 against five and 16 respectively. There were four deaths among in-patients against five in the preceding year. Twenty major and 153 minor operations were performed. No deaths resulted after operation. The total expenditure was Rs. 1,238 whereof Rs. 967 represent the cost of establishment, Rs. 10 of Europe medicines, which were obtained from private dealers, and Rs. 35 of bazar medicines. The cost of diet was Rs. 129. The expenditure on buildings was Rs. 50 and on miscellaneous items Rs. 72. Government paid Rs. 26, viz Rs. 13 as forms and registers, Rs. 13 for diet of police cases. Municipality contributed Rs. 108 against

Rs. 912 in 1882. Subscriptions from Europeans and natives were Rs. 172 and Rs. 769 respectively.

*Dulal Bazar.*—A class IIIA dispensary from 11th September 1883. Managed by the supporter. Visited twice by the Assistant Surgeon. A third class hospital assistant was in charge. There were treated 938 out-patients against 612 in 1882, the daily averages being five and four respectively. Seventy-nine minor operations were performed. No major operation. The Magistrate notes that when he visited the dispensary in January 1884, it appeared to him to be extremely badly carried on. Medicines were few in number, and instruments old and unserviceable. The total expenditure was Rs. 511, of which Rs. 396 was the cost of establishment; Rs. 93 of Eupore medicines, which were obtained from private dealers. The cost of bazar medicines was nominal, viz. Re. 1 only. The expenditure on miscellaneous items was Rs. 21. Government paid Rs. 128, viz. Rs. 3 as cost of forms and registers and Rs. 125 for salaries.

*Fenny.*—A class IIIB dispensary, governed by a local committee, which met 12 times during the year. The Magistrate, sub-divisional officer, and the Assistant Surgeon each visited the institution three times. The third class hospital assistant of the sub-division is in charge. There were treated 1,624 out-patients against 720 in 1882, the daily averages being 14 and 16 respectively. Twelve major and 21 minor operations were performed. No deaths resulted after operation. The total expenditure was Rs. 1,616, whereof Rs. 277 was the cost of establishment, Rs. 215 of Europe medicines, inclusive of the cost of the supply for the year 1882. The cost of bazar medicines was Rs. 15. The expenditure on miscellaneous items was Rs. 124. Government paid Rs. 124—Rs. 120 as salaries and Rs. 4 as cost of forms and registers. Subscriptions from Europeans and natives were Rs. 720 and Rs. 269 respectively. Rupees 543 were invested during the year.

Tipperah district.

The public health of 1882 was recorded as having been worse than that of 1881. The Civil Surgeon says that judging from the statistical returns the standard of health during 1883 was practically identical with that which obtained in 1882, and that apart from deductions from statistics, there is reason to think that the health of the district was averagely good, except that cholera was unusually fatal and prevalent during the first five months. He also says that it is doubtful whether the increase in returned rate during 1882 and 1883 was not largely due to a slightly nearer approach to accuracy in registration. There were four dispensaries working during the year, of these two are municipal institutions and are in class II; the other two are in class IIIA. Two of these received in-patients. There were treated 194 in and 7,438 out patients against 102 and 5,944 in 1882, the daily averages being nine and 66 against three and 53 respectively. The figures, the Civil Surgeon says, are probably correct. All the dispensaries are in charge of hospital assistants. Considerable interest is said to be taken in the institutions both by the municipalities and the private managers. The people shew a fair amount of appreciation, but the Civil Surgeon says there is still room for improvement.

*Commillah.*—A municipal dispensary in charge of a hospital assistant. Several visits were paid by the district officer; none by the divisional officer. The medical officer visited the institution daily. There were treated 156 in and 2,453 out patients against 93 and 2,193 in 1882, the daily averages being seven and 18 against two and 17 respectively. The death-rate among in-patients was 7·05 per cent. against 12·9 in the previous year. Twenty-eight major and 257 minor operations were performed with only one death. The total expenditure was Rs. 1,112, whereof Rs. 574 represent the cost of establishment. The cost of Europe medicines was Rs. 72. Government paid Rs. 102, viz. Rs. 5 as cost of forms and registers and Rs. 97 for diet of police cases. There was a cash balance of Rs. 4,533 on 1st January 1883, and securities of Rs. 2,000 were sold during the year. At the end of the year there was cash balance of Rs. 6,256, and the invested capital was reduced to Rs. 3,000 from Rs. 5,000 in the previous year. Municipality paid nothing.

*Brahmanberia.*—A municipal dispensary in charge of the hospital assistant of the sub-division. Visited once by the medical officer only. There were treated 38 in and 1,074 out patients against nine and 1,112 in 1882, the daily averages being nine and 10 against two and 15 respectively. Four deaths occurred among in-patients. Two major and 137 minor operations were performed. No death resulted after operation. The total expenditure was Rs. 523, of which Rs 330 was the cost of establishment, Rs. 100 of Europe medicines obtained from private dealers, and Rs. 26 of country medicines. The cost of diet was Rs. 11. The expenditure on buildings was Rs. 15, and on miscellaneous items Rs. 40. Government paid Rs. 5 as cost of forms and registers. Municipality paid Rs. 300 against Rs. 227 in 1882. At the end of the year there was a cash balance of Rs. 116 against Rs. 168 on 1st January 1883.

*Ramchunderpore.*—A class IIIA dispensary under the management of Nowab Ashanoollah Khan of Dacca. Visited once by the medical officer. A hospital assistant was in charge. There were treated 2,929 out-patients against 1,006 in 1882, the daily averages being 30 and 10 respectively. Ten major and 181 minor operations were performed with only one death. The total expenditure was Rs. 688, of which Rs. 544 was the cost of establishment, Rs. 99 of Europe, and Rs. 23 of bazar medicines. Government supplied registers and forms, the cost of which was Rs. 6.

*Jaffergunge.*—A class IIIA dispensary under the management of the agents of the supporter, Rajah Harendra Krishna Bahadoor. Visited once by the medical officer. A hospital assistant was in charge. There were treated 982 out-patients against 1,633 in

1882, the daily averages being six and 10 respectively. Seventy-four minor operations were performed. No major operations. The total expenditure was Rs. 413, of which Rs. 396 was the cost of establishment, and Rs. 6 of country medicines. Nothing was paid for Europe medicine, as the supply of the previous year was sufficient. Government paid Rs. 4 as cost of forms and registers.

PATNA DIVISION.

Patna district.

There was a great improvement in the health of the district in 1883 as compared with the previous year. The Civil Surgeon remarks that "fevers were not so prevalent. Cholera was not so fatal. Bowel and all other diseases shew a decline, and small-pox alone exhibits a slight increase." Five dispensaries worked in the district throughout the year, all of which were under the management of municipalities, excepting the one at Dinapore, which was managed by a private committee. Four were in class II and two in class IIIB. All the dispensaries treated both in-door and out-door patients, and were with the exception of one in charge of Assistant Surgeons. There were treated 2,288 in and 47,205 out patients in all against 2,248 and 50,348 in 1882. The daily averages were 128 and 444 against 117 and 468 respectively. All the dispensaries are said to be appreciated by the people for whom they are intended. The municipalities are generally wanting in interest towards the institutions belonging to them.

*Bankipore Dispensary, or Temple Medical School*—Is a class IIIB dispensary under the management of the Patna municipality, but has not yet been formally vested in it. It was visited by the Surgeon-General in July, by Deputy-Surgeon General Dr. Simpson in August, and by the Sanitary Commissioner of Bengal. The Civil Surgeon paid constant visits. No civil officer visited it during the year. Second grade Assistant Surgeon Ramkali Gupta is in medical charge. He is assisted by the other Assistant Surgeons and civil hopital assistants attached to the Temple medical school in hospital work. The minor establishment costs Rs. 105 per mensem. There were treated 902 in and 15,494 out patients against 1,052 and 16,382 in 1882; the daily averages were 65 and 109 against 69 and 113 respectively. The decrease in the number of patients is attributed to the healthiness of the year. There were 92 deaths, or 10·19 per cent. against 105, or 9·89 in 1882. Ninety-three major operations were performed with four deaths. The number of minor operations was 1,045. The total expenditure was Rs. 7,062, whereof Rs. 4,123, was the cost of establishment, Rs. 245 of bazar medicines. The cost of Europe medicines for 1883 was not paid for. Rupees 13 was paid only for those that were locally purchased. The cost of diet was Rs. 2,044, and the outlay on miscellaneous items was Rs. 636. The total income was Rs. 9,098, whereof Government contributed Rs. 130, namely Rs. 18 for registers and forms and Rs. 112 for diet of police cases. Municipality paid Rs. 6,932 against Rs. 4,802 in 1882. Subscriptions from Europeans and natives were Rs. 134 and Rs. 125 respectively. Rupees 76 were received on account of interest and Rs. 508 were withdrawn during the year. There was a cash balance of Rs. 2,037 at the end of the year. The establishment of a new female hospital with lying-in-wards in connection with the Bankipore hospital is in contemplation. The Maharani of Tikari has given the site and raw materials, and the natives of Behar have subscribed over Rs. 7,000 towards the erection of the building. The matter was laid before the Government from whom an additional grant hac been applied for. But want of funds has prevented compliance with the application.

*Patna City Dispensary.*—A class II dispensary under the local municipality. Visited once by a muncipal commissioner and twice by the Assistant Superintendent of Police. The Civil Surgeon inspected it once a month. A second grade Assistant Surgeon was in charge. The cost of minor establishment was Rs. 66 per month as in the previous year. There were treated 563 in and 14,426 out door patients against 400 and 15,106 in 1882, the daily averages being 30 and 154 against 16 and 167 respectively. There were 127 deaths, or a rate of 22·5 per cent. against 103, or 25·75 in 1882. The largest number of deaths took place among the cases of dysentery who were admitted in the last stages of the disease and were generally moribund. There were 53 major operations against 41 in 1882 and 43 in 1881. Minor operations numbered 1,965 against 1,632 in 1882. The total expenditure was Rs. 3,673, whereof Rs. 2,661 represent the cost of establishment. The cost of bazar medicines was Rs. 141 and of Europe medicines Rs. 122, of which only Rs. 5 was paid during the year; the balance Rs. 117 has not yet been paid. The outlay on diet was Rs. 639 and on miscellaneous items Rs. 227. The total income was Rs. 5,161. Government contributed Rs. 18 for forms and registers, and the municipality Rs. 3,617 against Rs. 1,846 in 1882. Subscriptions from natives was Rs. 306. The interest of the invested capital was Rs. 425. The dispensary had a cash balance of Rs. 1,487 at the end of the year, and a capital of Rs. 20,500 invested in 4 per cent. Government paper.

*Barh.*—This is also a class II dispensary under the local municipality. It was inspected twice by the Civil Surgeon. A third grade Assistant Surgeon is in charge. The inhabitants of Barh are very much dissatisfied with him as he is a Hindu. The new sub-divisional scheme will lead to his being replaced. The cost of minor establishment is Rs. 36 per mensem. There were treated 260 in and 5,394 out patients against 291 and 7,360 in 1882. The daily averages were eight and 52 against eight and 70 respectively. The number of deaths was 15, the same as in 1882. Three major operations—all amputations—with one death and 453 minor operations were performed. The total expenditure was

Rs. 2,520, whereof Rs. 1,721 was the cost of establishment, Rs. 222 of Europe medicines, and Rs. 50 of bazar medicines. Dieting of patients cost Rs. 175. The outlay on buildings was Rs. 194, and the expenditure on miscellaneous items was Rs. 159. Government contributed Rs. 18, namely Rs. 12 for forms and registers. and Rs. 6 for dieting of police cases. The income from subscriptions was Rs. 803, and the municipality paid Rs. 1,699 against Rs. 985 in 1882.

*Behar.*—This is likewise a class II dispensary under Behar municipality. Visited by the District Magistrate and Superintendent of Police. The Civil Surgeon inspected twice. There were several changes amongst the Assistant Surgeons in charge. The minor establishment cost Rs. 42 per mensem. There were treated 152 in and 5,187 out patients against 170 and 5,491 in 1882. The daily averages were nine and 47 against 11 and 45 respectively The falling off in the attendance is attributed partly to the greater healthiness of the year and partly to the changes amongst the Assistant Surgeons. There were 20 deaths, or a rate of 13·1 per cent. against 19 and 11·1 in 1882. Twenty-seven major operations with one death and 206 minor operations were performed. The total expenditure was Rs. 3,463, whereof Rs. 2,345 was the cost of establishment, Rs. 448 of Europe medicines, and Rs. 69 of bazar medicines. Rupees 278, were spent for diet of patients and Rs. 204 on buildings and repairs. The expenditure on miscellaneous items was Rs. 120. Government contributed Rs. 89, namely Rs. 12 for forms and registers and Rs. 77 for diet of police cases. Municipality paid Rs. 2,258 against Rs. 1,957 in 1882. The income from subscriptions was Rs. 609. The dispensary had an opening balance of Rs. 507, but no cash balance at the end of the year. No investments.

*Dinapore.*—A class IIIB dispensary, managed by a committee which held six meetings during the year. It is under the superintendence of the staff surgeon. The Civil Surgeon of Patna visited it twice. A first class civil hospital assistant is in medical charge, who received Rs. 55 from Nizamut fund, Rs 25 from dispensary fund, and Rs. 10 from Government, in all Rs. 90 a month. The cost of minor establishment is Rs. 31 per mensem. There were treated 411 in and 6,704 out patients against 335 and 6,002 in 1882. The daily averages were 14 and 80 against 11 and 72 respectivaly. There were 33 deaths, or a rate of 8·03 against 48 and 11·9 in 1882. Sixty-three major operations with no death and 539 minor operations were performed. The total expenditure was Rs. 2,084, of which Rs. 1,326 was the cost of establishment, Rs. 41 of bazar medicines, and Rs. 232 of Europe medicines against Rs. 134 in 1882. The expenditure on diet was Rs. 200 and on buildings and repairs Rs. 100. The amount expended on miscellaneous items was Rs. 184. The total income of the dispensary was Rs. 2,421, of which Government paid Rs. 12 as cost of forms and registers. Rupees 12 were obtained from local funds, Rs. 80 from interest, and Rs. 860 from Europeans and native subscriptions. Municipality paid Rs. 1,140 The dispensary had a cash balance of Rs. 336 at the end of the year, and a capital of Rs. 2,000 invested in 4 per cent. Government paper.

**Gya district.** The general health of the district compares unfavourably with that of the previous year. The number of registered deaths being 44,928 against 41,416 in 1882. There were five dispensaries working in the district at the end of the year, of which four were under the control of local municipalities, and one under private management. One of these was in class II, three in class III B, and the fifth in class IIIA. Two of the dispensaries were under the charge of Assistant Surgeons and three under civil hospital assistants. All the dispensaries received in and out patients. There were treated 506 in and 13,566 out patients against 587 and 12,743 in 1882. The daily averages were 20 and 171 against 22 and 171 respectively. The Civil Surgeon says that the averages of two dispensaries were not correctly calculated, while those of the others may be looked upon as correct. The managing bodies are said to take little interest in the working of the dispensaries, and the people generally do not appreciate the benefits of European treatment.

*Gya Pilgrim Hospital.*—A class II dispensary under local municipality. Visited once by the Commissioner of the division and by the Officiating Surgeon-General, Bengal, several times by the District Magistrate, and daily by the Civil Surgeon. A third grade Assistant Surgeon was in charge, who drew Rs. 100 monthly from the municipality. The cost of minor establishment was Rs. 72-8 per mensem. There were treated 314 in and 5,494 out patients against 371 and 5,054 in 1882; the daily averages were 13 and 74 against 12 and 65 respectively. The death-rate was 23·8 per cent. against 31·26 in 1882. A majority of the deaths were among patients admitted in a moribund condition. Forty-eight major, with four deaths and 598 minor operations were performed. The total expenditure was Rs. 4,451, of which Rs. 2,654 represent the cost of establishment, Rs. 86 of bazar medicines, and Rs. 226 of Europe medicines. The cost of diet was Rs 232, and Rs. 103 were expended on miscellaneous items. The outlay on buildings was Rs. 1,150. The total income was Rs. 15,317, of which R. 12 was received from Government on account of forms and registers, Rs. 387 as interest of the invested capital, Rs. 256 as subscription from Europeans and natives, Rs. 4,299 from Lodging-house fund. Municipality paid Rs 2,000. At the end of the year there was a cash balance of Rs. 10,866 and a capital of Rs. 9,500 invested in Government paper.

*Tikaree.*—This is a class IIIA dispensary entirely supported by the Maharanee of Tikaree. There is no committee. The dispensary is managed by the Maharanee's agent. Visited twice

by the District Magistrate and four times by the Civil Surgeon. A third grade Assistant Surgeon is in charge, who is paid Rs. 100 monthly. The subordinate establishment costs Rs. 27-8 monthly. There were treated 57 in and 3,808 out-patients against 64 and 3,620 in 1882, the daily averages being two and 50 against four and 51 respectively. The daily averages were calculated on the actual attendance of patients There were only two deaths among the in-patients, or a rate of 3·5 per cent. against five, or 7·8 in the previous year. Five major and 134 minor operations were performed. The total expenditure was Rs. 2,485, of which Rs. 1,517 represent the cost of establishment, Rs 133 of Europe medicines, and Rs. 41 of bazar medicines. The cost of diet was Rs. 102, and Rs. 123 were spent on miscellaneous items. Government paid Rs. 14 as cost of forms and registers. The dispensary has an invested capital of Rs. 2,700.

*Nawada.*—It is a class IIIB dispensary under the new rules of classification, managed and aided by the local union to which it has not yet been formally vested. There is a separate dispensary which did not meet during the year. The Civil Surgeon visited the dispensary twice. A civil hospital assistant was in charge, who is paid Rs. 10 monthly from the dispensary funds. The minor establishment cost Rs. 16 per mensem. There were treated 53 in and 978 out-patients against 72 and 1,004 in 1882; the daily averages were 1·7 and 11 against two and 12 respectively. The daily averages were calculated on the actual attendance. The death-rate among in-patients was 7·5 against 11·1 per cent. in the previous year. Fifty-four minor operations were performed. No major operation. The total expenditure was Rs. 497, of which Rs. 296 was the cost of establishment; Rs. 12 of bazar medicines. English medicines were obtained from private druggists on indent checked by the Civil Surgeon at a cost of Rs. 86. The cost of diet was Rs. 36, and Rs. 47 were spent on miscellaneous items. The outlay towards buildings and repairs was Rs. 20. The total income was Rs. 982, of which Government contributed Rs. 10 for forms and registers. Municipality paid Rs. 120 against Rs. 90 in 1882. Native subscription amounted to Rs. 358, and Rs. 40 were obtained as interest on investment. At the end of the year there was a cash balance of Rs. 485 and a deposit of Rs. 173 in the savings bank. There is a capital of Rs. 1,000 invested in Government securities.

*Aurangabad.*—A class IIIB dispensary aided by the local union and managed by a committee which met only once during the year. Visited once by the District Magistrate and three times by the Civil Surgeon. A civil hospital assistant is in charge, who received Rs. 25 monthly from Government for the sub-division and Rs. 10 from the municipality for the dispensary charge. The monthly cost of the subordinate establishment is Rs. 14. The number of patients treated was 37 in-door and 1,135 out-door against 39 and 1,307 in 1882. The daily averages were one and 13 against one and 20 respectively. Although there was an epidemic of cholera in the sub-division, the hospital returns do not shew it. The death-rate for the year was 29·6 per cent. against 20·6 in the previous year. No major operation. Minor operations numbered 34. The total expenditure was Rs. 446, of which Rs. 262 was the cost of establishment and Rs. 20 of bazar medicines. English medicines were obtained from private druggists at a cost of Rs. 55. The cost of diet was Rs. 29. The expenditure on buildings and repairs was Rs. 44 and on miscellaneous items Rs. 36. The total income was Rs. 928, which was derived from the following sources, viz. Rs. 11 from Government on account of forms and registers, Rs. 255 from the municipality against Rs. 72 in 1882, Rs. 356 from subscription and Rs. 12, being the unclaimed pay of the late compounder. At the end of the year there was a cash balance of Rs. 482. There is no invested capital.

*Jehanabad.*—This is also a class IIIB institution under the local union and the management of a committee which met three times during the year. The Civil Surgeon visited it three times. A civil hospital assistant was in charge, whose entire pay was borne by the municipal and dispensary funds. The subordinate establishment cost Rs. 24 monthly. There were treated 45 in and 2,151 out-patients against 41 and 1,758 in 1882; the daily averages were one and 21 against one and 22 respectively. Here represented patients were included in calculating the daily average for some portion of the year. The death-rate for the year was 6·6 per cent. against 12 in the previous year. Two major and 85 minor operations were performed. The total expenditure was Rs. 1,041 of which Rs. 775 was the cost of establishment, Rs. 18 of bazar medicines, and Rs. 109 of Europe medicines, which were obtained from private druggists on indents checked by the Civil Surgeon. The cost of diet was Rs. 5 only. The outlay on buildings and repairs was Rs. 27, and the expenditure on miscellaneous items Rs. 106. The total income of the dispensary was Rs. 1,429. Government contributed Rs. 12 for forms and registers. Municipality paid Rs. 362. Rupees 55 and Rs. 634 were obtained as subscriptions from Europeans and natives respectively. At the end of the year there was a cash balance of Rs. 388 and a deposit of Rs. 781 in the savings bank.

**Shahabad district.**

The Civil Surgeon has submitted a full and complete report. The district during the year 1883 was, in the opinion of the public, remarkably healthy, excepting local outbreak of cholera. This popular opinion was held out by the statistics of the district and dispensaries, the number of total deaths being 36,930 against 49,185 in the previous year. There were seven dispensaries working at the end of the year, of which one is a State hospital, and therefore in class I—one in class II, being a municipal institution—one in class IIIA, being a private institution—and the rest in class IIIB, aided and managed

by local municipalities. Four were in charge of Assistant Sergeons and three under that of civil hospital assistants. All the dispensaries treated both in-door and out-door patients. There were treated 690 in and 37,169 out patients against 790 and 44,397 in 1882, the daily averages being 34 and 361 against 32 and 453 respectively. The Civil Surgeon believes these figures are trustworthy and afford a fair criterion of public health. The municipal bodies take but little active interest in the welfare of the dispensaries, though they all wish well to the institutions. The dispensaries are largely appreciated by the people, but it must be admitted that they are not so popular as in other parts of India. The Beharees as a rule are very conservative people and resort to English treatment when the native methods by the hakeems fail.

*Arrah.*—This is a class IIIB dispensary under the new rules of classification. It is aided and managed by the local municipality. There is a separate sub-committee to supervise over its affairs, by whom monthly meetings were held. Visited twice by the District Magistrate and 12 times by the municipal commissioners. The Civil Surgeon paid daily visits. An Assistant Surgeon is in charge, who gets Rs. 120 per mensem from the municipality. There were treated 212 in and 7,996 out patients against 265 and 9,513 in 1882; the daily averages were 11 and 63 against 11 and 68 respectively. The falling off in the number of patients is attributed to the greater healthiness of the year. There were 25, deaths or a rate of 11·7 against 38 and 14·3 in the previous year. Fifty-one major and 700 minor operations were performed. The total expenditure was Rs. 4,654, of which Rs. 1,727 was the cost of establishment. English medicines were obtained from private druggists on indents checked by the Civil Surgeon at a cost of Rs. 160. bazar medicines cost Rs. 154. The expenditure on diet was Rs. 279 against Rs. 189. The excess was due to a larger number of poverty-striken, anæmic and emaciated persons, for whom the diet consisted largely of milk. Rupees 83 were spent on buildings and repairs, and Rs. 2,251 on miscellaneons items, of which Rs. 2,041 were taken by the municipality for payments made by them on account of the dispensary in former years. Government contributed Rs. 35, viz. Rs. 6 in forms and registers and Rs. 29 for diet of police cases. The total income was Rs. 4,654, which consisted of Rs. 1,573 from municipality, Rs. 340 as interest, Rs. 1.995 by sale of securities, and Rs. 710 subscriptions from Europeans and natives. There was an invested capital of Rs. 7,500 at the end of the year.

*Sasseram.*—A municipal dispensary (class II) maintained by municipality and Sasseram endowment fund which, ordinarily contributes Rs. 100 a month, but in 1883 gave an extra sum of Rs. 759 for completing the new dispensary buildings. It was visited twice by the District Magistrate and eight times by the sub-divisional officer. The Civil Surgeon paid two visits. A second grade Assistant Surgeon is in charge, who receives Rs. 170 per month from the dispensary fund and Rs. 20 a month from Government for the lock-up. There were treated 136 in and 7,075 out patients against 157 and 8,614 in 1882; the daily averages were seven and 114 against five and 141 respectively. The diminution in the number of patients is attributed to the comparative healthiness of the year. There were 19 deaths, or a rate of 13·9 against 25 and 15·9 in the previous year. Nineteen major and 417 minor operations were performed. The total expenditure was Rs. 6,419, of which Rs. 2,427 was the cost of establishment, Rs. 175 of Europe medicines, which were obtained from private druggists on indents checked by the Civil Surgeon, and Rs. 181 of bazar medicines. The expenditure on diet was Rs. 212 and on miscellaneous items Rs. 294. The outlay on the new buildings was Rs. 3,130. Government contributed Rs. 358, viz. Rs. 300 the pay of a third grade Assistant Surgeon who held charge of the dispensary during the absence on privilege leave of the permanent incumbent, Rs. 7 for forms and registers, Rs. 8 for diet of police cases and Rs. 42 for travelling allowance of the Assistant Surgeon to Calcutta and back for examination for promotion to the second grade. The income from local sources was Rs. 3,159, and from subscription Rs. 1,242. Municipality paid Rs. 1,660.

*Doomraon.*—A class IIIA dispensary entirely supported and managed by the Maharajah of Doomraon. Visited once by the Commissioner of Patna Division and three times by the District Magistrate. The Civil Surgeon paid three visits. A third grade Assistant Surgeon is in charge. There were treated 111 in and 631 out patients against 113 in and 7,571 in 1882; the daily averages were seven and 67 against four and 75 respectively. The diminution in the number of attendance of patients is attributed to the comparative healthiness of the year. There were 21 deaths, or a rate of 18·4 against 16 and 14 in the previous year. This high rate is ascribed to the large number of moribund cases admitted during the year. Forty-eight major and 645 minor operations were performed. There were three deaths after operation. The total expenditure was Rs. 2,184, of which Rs. 1,631 was the cost of establishment, Rs. 132 of Europe medicines, which were obtained from private druggists, and Rs. 40 of country medicines. The cost of diet was Rs. 268 against Rs. 99 in 1882. The increase was due partly to the larger daily number of in-patients and partly to the higher price of food. The expenditure on miscellaneous items was Rs. 113. Government contributed Rs. 9, namely Rs. 8 as cost of forms and registers, and Re. 1 only for diet of police cases.

*Jugdispore.*—A class IIIB institution under the new rules. This is maintained by the municipality and local zemindars Messrs. Burrows, Thomson, and Mylne, and managed by

the municipality. It was visited twice by the District Magistrate; frequently by the vice-chairman of the municipality. The Civil Surgeon inspected twice. A civil hospital assistant is in charge, who received Rs. 40 a month for the dispensary. There were treated 52 in and 5,603 out patients against 38 and 6,326 in 1882; the daily averages were one and 24 against five and 32 respectively. This reduction in the number of persons treated is said to be due, as in other dispensaries, to the improved state of public health. There was only one death among the in patients, or a rate of 1·9 per cent. against three and 7·8 in the previous year. Six major and 235 minor operations were performed. The total expenditure was Rs. 1,237, of which Rs. 1,010 was the cost of establishment. Europe medicines were obtained from private druggists on indents checked by the Civil Surgeon at a cost of Rs. 128. The cost of country medicines was Rs. 23 and of diet was Rs. 21. The expenditure on buildings and repairs was Rs. 7 and on miscellaneous items Rs. 48. Government contributed forms and registers, the value of which was Rs. 3. The income from European subscription was Rs. 618. Municipality paid Rs. 616.

*Bhubooah.*—A class IIIB dispensary, mainly supported and managed by the local municipality. There is no separate committee. It was visited once by the District Magistrate and three times by the sub-divisional officer. The Civil Surgeon could not pay more than one visit as the journey to it from the head-quarters is difficult and expensive and takes three or four days. The civil hospital assistant of the sub-division is in charge and receives Rs. 10 as an extra allowance for the dispensary work. The minor establishment consists of a compounder on Rs. 10, a cook, bhisty, and sweeper on Rs. 3 each. There were treated 59 in and 3,065 out patients against 70 and 4,002.; in 1882, the daily averages were two and 30 against two and 38 respectively. There were four deaths, or a rate of 6·7 against three and 4·2 in the previous year. One hundred and ninety-six minor operations were performed. No major operation. The total expenditure was Rs. 851, of which Rs. 342 represent the cost of establishment. Europe medicines were obtained from private druggists on indents checked by the Civil Surgeon at a cost of Rs. 118. The cost of bazar medicines was Rs. 35 and of diet Rs. 25. The expenditure on buildings was Rs. 268 and on miscellaneous items Rs. 63, Government supplied forms and registers, the cost of which was Rs. 3. Municipality paid Rs. 471 againt Rs. 228 in 1882, and the income from native subscription was Rs. 377.

*Buxar.*—This is a class IIIB dispensary, managed by the local municipality, but not yet formally vested in it. It was visited once by the Commissioner of the division and three times by the District Magistrate and sub-divisional officer. The Civil Surgeon inspected it twice. A civil hospital assistant is in charge, who receives Rs. 30 per month from the dispensary fund and Rs. 10 from Government for the lock-up The minor establishment consists of a compounder on Rs. 8 per month, and a cook, bhisty, and sweeper on Rs. 4 each, and a washerman Re. 1 a month. There were treated 99 in and 4.221 out patients against 111 and 5,162 in 1882. The daily averages were three and 43 against five and 69 in the previous year. Here was also a falling off in the number of patients due to the improvement in the public health of the district during the year. There were 13 deaths, or a rate of 13·1 per cent. against 29 and 26·1 in the previous year. Four major and 333 minor operations were performed. The total expenditure was Rs. 933, whereof Rs. 612 was the cost of establishment. Europe medicines were obtained from a private druggist at a cost of Rs. 98. The cost of bazar medicines was Rs. 38 and of diet Rs. 24. The expenditure on buildings was Rs. 99 and on miscellaneous items Rs. 62. Government supplied forms and registers, the value of which was Rs. 3. Municipality paid Rs. 796 against Rs. 615 in 1882.

*Dehree.*—This is a State hospital entirely supported by Government, chiefly for the employés of the Irrigation Department at Dehree, and is therefore in class 1 of the new rules. It is managed by the Assistant Surgeon in charge and the officers of the Public Works Department at Dehree. Visited twice by the Civil Surgeon. Besides the Assistant Surgeon, who receives Rs. 150 per month, there is a compounder on Rs. 8, a cook on Rs. 5, and a sweeper on Rs. 4-8 a month. There were treated 21 in and 3,178 out-patients against 36 and 3,209 in 1882, the daily averages being ·9 and 18 against one and 27 respectively. There were three deaths, or a rate of 14·2 per cent. against 11 and 30·5 in the previous year. Three major and 142 minor operations were performed. The total expenditure was Rs. 2,295, of which Rs. 2,010 was the cost of establishment. The cost of English medicines was Rs. 188, and of bazar medicines Rs. 16. The expenditure on diet was Rs. 42 and on miscellaneous items Rs. 39.

**Mozufferpore district.**

Having been absent from the district for nine months during the year 1883 on furlough, the Civil Surgeon is unable to give any definite opinion on the health of the district, but says that it appeared to have been "fairly good." "Cholera did not prevail to any marked extent, and there were less deaths from malarious disease reported than during the previous year." There were four dispensaries at the end of the year, three of which are in class II under the control and management of local municipalities and one in class IIIA managed by a private committee. Two are under Assistant Surgeons and two under that of civil hospital assistants. In three of them both in-door and out-door patients were treated, and in one, namely Soorsund, only out-patients. The total number of patients treated was 483 in and 27,739 out against 419 and 24,536 in 1882, the daily averages being 21 and 181 against 22 and 170 respectively. These figures were verified with the monthly returns and can be relied upon.

*Mozufferpore*.—A class II dispensary under the local municipality. The dispensary matters are discussed at the ordinary meetings of that body. It was visited four times by the District Magistrate, once by the Joint-Magistrate, and daily by the Civil Surgeon. There were several changes in the Assistant Surgeons in charge. There were treated 240 in and 11,735 out-patients against 219 and 12,584 in 1882 the daily averages being 11 and 71 against 14 and 83 respectively. The falling off in the number of out-door patients is attributed to the frequent changes of the medical officer. The death-rate among in-patients was 10·08 against 13·2 in the previous year. Goitre as usual is the most common disease. Sixty-five major and 519 minor operations were performed. The total expenditure was Rs. 4,276, of which Rs. 2,541 represent the cost of establishment. Europe medicines were obtained from private druggists at a cost Rs. 321. The cost of bazar medicines was Rs. 151, dieting of patients cost Rs. 442, and Rs. 475 were spent on buildings and repairs. The expenditure on miscellaneous items was Rs. 346. Government contributed to Rs. 16, namely Rs. 12 as cost of forms and registers and Rs. 4 for diet of police cases. Municipality paid Rs. 4,260 against Rs. 3,690 in 1882.

*Hajeepore*.—It is a class II dispensary under the local municipality. It was visited once by the District Magistrate, once by the Sub-Deputy Collector, and four times by the sub-divisional officer. The Civil Surgeon inspected twice. A civil hospital assistant was in charge. There were treated 118 in and 6,261 out-patients against 92 and 5,104 in 1882, the daily averages being 4·5 and 39 against four and 35 respectively. The rate of mortality was 5·9 against 6·5 in the previous year. Eleven major and 251 minor operations are said to have been performed. The total expenditure was Rs. 1,261, of which Rs. 960 was the cost of establishment. Europe medicines were obtained from private druggists at a cost of Rs. 133. Bazar medicines cost Rs. 25 The expenditure on diet was 78, on buildings Rs. 26, and on miscellaneous items Rs. 38. Government contributed only Rs. 3 as cost of forms and registers. Municipality paid Rs. 1,258.

*Soorsund*.—It is a class IIIA dispensary, managed by a local committee, which held no meetings. It was visited once by the sub-divisional officer. The Civil Surgeon seems to have paid no visit. The dispensary is situated at a distance over 40 miles from the civil station and during 1883 the heavy floods rendered a journey to it almost impossible. A civil hopital assistant is in charge, who received his pay of Rs. 35 a month from the dispensary funds. There were no in-patients. Four thousand nine hundred and fifty-five out-patients were treated with a daily average of 49 against 3,632 and 36 in 1882. Minor operations numbered 105. No major operation. The total expenditure was Rs. 846, whereof Rs. 539 was expended on establishment, Rs. 153 on Europe medicines obtained from private druggists, Rs. 53 on bazar medicines, and Rs. 88 on buildings. The expenditure on miscellaneous items was Rs. 13 only. Government supplied forms and registers, the cost of which was Rs. 2. The income from interest on investment was Rs. 702 and from native subscription Rs. 10 only.

*Sitamarhi*.—A dispensary in class II under the local municipality. It was visited once by the Commissioner of the division, once by the District Magistrate, and five times by the sub-divisional officer. The Civil Surgeon inspected it only once. A second grade Assistant Surgeon was in charge, who drew Rs. 150 a month—Rs. 90 from Government and Rs. 60 from the dispensary funds. He is reported to be very unpopular with every class of the community. The minor establishment costs Rs. 26 a month. There were treated 125 in and 4,788 out-patients against 108 and 3,216 in 1882, the daily averages being five and 20 against 4 and 15 respectively. Goitre is most common: 3,471 cases of it were treated. The death-rate among in-patients was eight against 4·6 in the previous year. Eight major and 32 minor operations were performed. The total expenditure was Rs. 2,474, of which Rs 2,031 represent the cost of establishment. Europe medicines were obtained from private druggists at a cost of Rs. 123. Bazar medicines cost Rs. 29, diet Rs. 106, and contingencies Rs. 97. The outlay on buildings was Rs. 87. Government paid Rs. 993, of which Rs. 990 was on account of salary of the medical officer and Rs. 3 on account of forms and registers. Municipality had to pay nothing. The income consisted of Rs. 90, as interest on investments, Rs. 50 from Europeans, and Rs. 1,099 from natives as subscriptions.

**Durbhunga district.** The general health of the district as compared with last year is said to have somewhat improved, but the year 1883 must still be considered as an unhealthy one, as the recorded number of deaths was more than any of the years in the quinquennial period except 1882, the number of deaths being 35,575 against 44,722 in 1882, 31,158 in 1881, 23,550 in 1880, and 29,438 in 1879. Fever prevailed widely in the district, and cholera broke out in several places. In Madhubani sub-division it was, however, so severe that special aid had to be given, and remedies freely distributed through the agency of police and indigo planters, &c. The number of dispensaries was the same as in the previous year, namely five. Of these two were in class II and three in class IIIA. Two were under private management, one under that of a committee, and two were under the local municipalities. The dispensaries at Durbhunga and Madhubani were under Assistant Surgeons; the rest were in charge of civil hospital assistants. All the dispensaries received both in-door and out-door patients. There were treated 763 in and 42,398 out patients against 719 and 41,718 in 1882, the daily averages being 38 and 250 against 36 and 234 respectively. Besides the dispensaries mentioned above, there is a hospital at Somastipore for the employés of the Tirhoot State Railway.

*Durbhunga.*—This is class IIIA dispensary, entirely supported by the Maharajah of Durbhunga. There is no committee. It was visited daily by the Civil Surgeon, often by Colonel Money, Manager, Raj Dhurbhunga. The Sanitary Commissioner and the Inspector-Generals of Jails also visited the institution. There were several changes among the Assistant Surgeons in charge. There were treated 375 in and 13,631 out patients against 389 and 15,053 in 1882, the daily averages being 23 and 82 against 23 and 86 respectively There were 45 deaths against 46 in the previous year. Majority of deaths occurred among patients brought in in a moribund state Forty-two major, of which five ended fatally, and 430 minor operations were performed. The total expenditure was Rs. 7,121, of which Rs. 4,079 were expended on establishment, Rs. 1,774 on Europe medicines, which were brought from England, Rs. 162 on bazar medicines, and Rs. 803 on diet. Rupees 303 were spent on miscellaneous items. Government contributed Rs. 16, namely Rs. 11 as cost of forms and registers and Rs. 5 for diet of police cases.

*Naraya.*—A class IIIA dispensary supported by Raj Durbhunga. Visited twice by the Civil Surgeon. There were several changes among the Civil Surgeon. There were several changes among the civil hospital assistants in charge, who was paid Rs. 50 per mensem. Accommodation for in-patients was provided for the first time from November last, and 11 patients were treated with the daily average of 1·5. The number of out-patients was 4,325 against 4,126 in 1882, the daily averages being 27 and 28 respectively. There was one death among the in-patients. Fifteen major and 54 minor operations were performed. The total expenditure was Rs. 967, of which Rs. 838 were expended on establishment, Rs. 56 on country medicines, Rs. 5 on diet, and Rs 68 on miscellaneous items. Government contributed forms and registers, the cost of which was Rs. 5. Europe medicines were supplied from the main Raj dispensary.

*Tajpore.*—This is a class IIIA dispensary managed by a committee of which the Joint-Magistrate is the vice-chairman. Six meetings were held during the year. It was inspected once by the Civil Surgeon. The civil hospital assistant of the sub-division is in charge. One hundred and five in and 8,711 out-patients were treated against 116 and 7,418 in 1882, the daily averages being two and 56 against two and 39 respectively. There were four deaths, or 3 per cent. against seven or 6 per cent. in the previous year. One hundred and fifty-seven minor operations were performed. No major operation. The total expenditure was Rs. 805, of which Rs. 442 were expended on establishment, Rs. 106 on Europe medicines, Rs. 55 on bazar medicines, and Rs. 70 on diet. The amount expended on buildings was 43, and on miscellaneous items Rs. 62. Government contributed Rs. 8, of which Rs. 7 was the value of forms and registers and Re. 1 for diet of police cases. The income from local sources was Rs. 27 as interest, Rs. 184 as European, and Rs. 584 as native subscription.

*Roserah.*—A municipal dispensary inspected once by the Collector of Dhurbhunga and twice by the Civil Surgeon. A civil hospital assistant was in charge. There were treated 64 in and 4,935 out-patients against three and 5,120 in 1882, the daily averages being one and 43 against 008 and 40 respectively. There were four deaths among the in-patients. Three major and 69 minor operations were performed. The total expenditure was Rs. 999, whereof Rs. 536 represents the cost of establishment. The cost of Europe medicines was Rs. 154, of bazar medicines Rs. 77. The expenditure on buildings was Rs. 94 and on miscellaneous items Rs. 137. Government contributed Rs. 5 as cost of forms and registers. The income from native subscriptions was Rs. 323 and municipality paid Rs. 633 against Rs. 934 in the previous year.

*Madhubani.*—A municipal dispensary from January 1884. It was visited twice by the Civil Surgeon. An Assistant Surgeon is in charge, who drew Rs. 100 per mensem, half of which was contributed by Government. This payment towards the pay of the medical officer has been discontinued from 1st January 1884 as the institution has been formally vested in the local municipality under orders of Government in its letter No. 214, dated 23rd January 1884. There were treated 208 in and 10,796 out patients against 211 and 9,701 in 1882, the daily averages being eight and 40 against nine and 39 respectively. There were 10 deaths against 13 in the previous year. Twenty-five major and 376 minor operations were performed. The total expenditure was Rs. 2,570, of which Rs. 1,666 was expended on establishment, Rs. 184 on Europe medicines, and Rs. 40 on country medicines. Diet cost Rs. 153, and Rs. 365 were spent on miscellaneous items, inclusive of Rs. 330 refunded to the municipality. The outlay on buildings and repairs was Rs. 161. Government contributed Rs. 1,002, of which Rs. 7 were for forms and registers and Rs. 995 for salaries. Of this Rs. 600 was on account of pay for the year 1883 and Rs. 395 for 1882 erroneously drawn from municipality previous to the order of investment of the institution to that body. The income from subscriptions was Rs. 1,604. Municipality paid Rs. 240.

Sarun district.

The public health of the district is said to have been much on a par with that in the preceding year. Although there were fluctuations in the number of deaths from different diseases in 1883 as compared with the previous year. There were six dispensaries in the district as in the previous year, three of which were in class II and were under the municipal control and management; three others in class IIIA and under private management: two were in charge of Assistant Surgeons, and four others under that of hospital assistants. The dispensaries at Chupra, Sewan, and Hutwa treated both in-door and out-door paients; the other three were out-door institutions only. The total number of in-door patients

was 497 against 594 in 1882, the daily averages being the same for both the years, namely 36. The number of out-door patients was 59,746 against 61,876 with the daily average of 440 against 521 in the previous year. A fair amount of interest was evinced by managing bodies in the dispensaries generally, and the institutions are said to be much appreciated by the people.

*Chupra.*—This is a municipal dispensary. Visited often by the Magistrate who, however, recorded one visit only. The Civil Surgeon visited daily. A third grade Assistant Surgeon was in charge, who received Rs. 120 per month from the municipal funds. There were treated 227 in and 15,005 out patients against 265 and 17,307 in 1882, the daily averages being 17 and 155 against 19 and 185 respectively. The death-rate of in-patients was 13·6 against 14·3 in 1882. The high rate of mortality is said to be due to the many moribund cases and injuries, ending fatally, brought in by the police. Fifty-six major with five deaths and 552 minor operations were performed. The total expenditure was Rs. 4,668, of which Rs. 2,257 was the cost of establishment and Rs. 160 of bazar medicines. The cost of Europe medicines purchased from private firms was Rs. 1,134 inclusive of the price of cinchona febrifuge obtained from Government store The sum includes the payment of Rs. 384 incurred for the purchase of English medicines towards the close of 1882. The cost of diet was Rs. 523 and the expenditure on miscellaneous items was Rs. 520. Government contributed forms and registers, the cost of which was Rs. 34. At the close of the year there was a cash balance of Rs. 100 and an invested capital of Rs. 17,700. Municipality paid Rs. 1,481. The income from European and native subscriptions amounted to Rs 621, from local funds Rs. 1,824, and Rs. 708 as interest on investments.

*Sewan.*—A municipal dispensary. It is in class II under the new rules of classification. Visited once by the Magistrate of the district and occasionally by the sub-divisional officer The Civil Surgeon inspected the dispensary twice. There were several change among the civil hospital assistants in charge. Minor establishment cost Rs. 25 monthly. There were treated 118 in and 7,985 out patients against 154 and 8,118 in 1882, the daily averages were four and 60 against four and 82 respectively. The deaths among in-patients were 13 against eight in 1882 and the percentage 11 against 5·1, the increase being due to moribund cases sent in by the police. Twenty-two major and three hundred and seventy-eight minor operations were performed. The total expenditure was Rs. 1,479, of which Rs. 912 were expended on establishment. English medicines were purchased from private firm at a cost of Rs. 363 on indents checked by the Civil Surgeon, bazar medicines cost Rs. 28, and the diet of in-patient Rs. 59. The expenditure on buildings was Rs. 21 and on miscellaneous items Rs. 96. Government contributed Rs. 17 as cost of forms and registers. Municipality aid Rs. 370. The income from local subscriptions was Rs. 851.

*Hutwa.*—A class IIIA dispensary, entirely supported by the Maharajah of Hutwa No dispensary committee. It was visited twice by the Magistrate of the district, twice by the sub-divisional officer of Gopalgunge, and once by the sub-divisional officer of Sewan. The Civil Surgeon visited it twice. There were several changes among the Assistant Surgeons in charge. The cost of subordinate establishment was Rs. 28 per month. There were treated 152 in and 11,979 out patients against 175 and 13,784 in 1882; the daily averages were 15 and 76 against 12 and 101 respectively. The death-rate amongst in-patients was 9·8 against 13·7 in the previous year. Eighteen major and 317 minor operations were performed. The total expenditure was Rs. 5,299, of which Rs. 2,813 was the cost of establishment and Rs. 290 of bazar medicines. English medicines were obtained on an indent checked by the manager from England at a cost of Rs. 1,309. The cost of diet was Rs. 477, and Rs. 352 were spent on repairs to the dispensary buildings. The expenditure on miscellaneous items was Rs. 56. Government contributed forms and registers, the cost of which was Rs. 16.

*Gopalgunge.*—A branch dispensary of Hutwa in class IIIA. It is entirely supported by the Maharajah of Hutwa and managed by his manager. No dispensary committee. Visited twice by the District Magistrate and by the Civil Surgeon. A civil hospital assistant is, in charge, who received Rs. 30 from the Maharajah for the dispensary and Rs. 10 from Government for the charge of the sub-division. No in-patients. Fourteen thousand three hundred and nine out patients were treated with a daily average of 62 against 11,900 and 58 in 1882. No major operation. One hundred and fifty-six minor operations were performed. The total expenditure was Rs. 1,019, of which Rs 528 represent the cost of establishment. Europe medicines were supplied from the Hutwa dispensary at a cost of Rs. 266. Rupees 78 were expended on bazar medicines, Rs. 96 on miscellaneous items, and Rs. 51 on buildings. Government paid Rs. 10 as cost of forms and registers.

*Bhore.*—This is also a class IIIA dispensary, entirely supported by the Maharajah of Hutwa. There is no dispensary committee. The District Magistrate visited it once and the sub-divisional officer of Gopalgunge twice. The Civil Surgeon paid two visits. A civil hospital assistant was in charge and received Rs. 30 a month from the Raj. No in-patients. There were 5,882 out patients treated with a daily average of 38 against 5,139 and 38 in 1882. Minor operations numbered 66. No major operation. The total expenditure was Rs. 882, of which Rs 516 was the cost of establishment. Europe medicines were supplied from the Hutwa dispensary, the cost of which was Rs. 239. The expenditure on bazar medicines was Rs. 85; on buildings and on miscellaneous items Rs. 27. Government contributed forms and registers, the value of which was Rs.8.

*Revilgunge.*—A municipal dispensary. No dispensary committee. It was visited once by His Honor the Lieutenant-Governor and suite, once by the Commissioner, four times by the Magistrate of the district, once by the Joint-Magistrate, and eight times by the vice-chairman of the municipality, who takes great interest in the institution. The Civil Surgeon inspected it twice. A civil hospital assistant was in charge. The subordinate establishment consists of a compounder on Rs. 10 and a chuprasee on Rs. 5. No in-patients. Four thousand five hundred and eighty-six out-patients were treated with a daily average of 47 against 5,628 and 55 in 1882 Minor operations numbered 240. The total expenditure was Rs. 1,711, of which Rs. 780 was the cost of establishment. Rs. 758 were paid for Europe medicines during the year. This amount, however, includes the payment of Rs. 389 on account of English medicines purchased towards the close of 1882. The cost of bazar medicines was Rs. 48, and although there were no in-patients Rs. 21 were spent for dieting half-starved and indigent out-patients. The expenditure on buildings was Rs. 36, and on miscellaneous items was Rs. 68. Government contributed forms and registers, the cost of which was Rs. 11. Municipality paid Rs. 1,435. Subscription from natives amounted to Rs. 238.

**Chumparun district.**

The public health of the district as shewn by the mortuary returns was not good in 1883. There was a considerable increase in mortality, not only over that of last year, but over the preceding six years, the number of registered deaths being 25,683 against 23,934 in 1882 and 21,377 in 1881. The general impression is that the year was healthy and that the increased mortality was due to an improved registration. Cholera was much less. There were four dispensaries in the district as in the previous year. One was in class II and three in class IIIB. Two were managed by local municipalities and two by private committees. The dispensaries at Motihari, Bettiah, and Bagaha treated both in-door and out-door patients : the one at Burhurwa is an out-door institution. Two were in charge of Assistant Surgeons and two under hospital assistants. The total number of patients treated was 380 in-door and 36,226 out-door against 330 and 38,068 in 1882; the daily averages were 18 and 196 against 14 and 183 respectively. Not being in the district during the year, the Civil Surgeon is unable to express any opinion as to the interest shewn by the governing bodies.

*Motihari.*—A municipal dispensary. There is no separate dispensary committee. It was visited once by His Honor the Lieutenant-Governor and the Sessions Judge, occasionally by the District Magistrate, and almost daily by the Civil Surgeon. A third grade Assistant Surgeon is in charge, who drew Rs. 120 per mensem from the municipality. There were treated 149 in and 12,063 out patients against 179 and 20,927 in 1882, the daily averages being seven and 55 against seven and 72 respectively. The falling of in the number of attendance is attributed by the medical subordinate to the healthiness of the year and to the fact of the railway coolies being provided with medical treatment by the contractors; but the Civil Surgeon says "this is unsatisfactory." There were 20 deaths against 29 in 1882. Goitre is the prevailing disease. Twenty-four major operations with 3 deaths and 293 minor operations were performed. The total expenditure was Rs. 2,392, whereof Rs. 1,754 was the cost of establishment; Rs. 200 of Europe medicines obtained from Government store and from private dealers on indents checked by the Civil Surgeon. The outlay on bazar medicines was Rs. 73 and on buildings Rs. 103. Dieting of patients cost Rs. 170 and miscellaneous items Rs. 92. Government contributed Rs. 11 as cost of forms and registers. The income of the dispensary from subscriptions was Rs. 1,737, from local funds Rs. 121, and from interest Rs. 45. Municipality paid Rs. 577 against Rs. 762 in 1882. The dispensary has a capital of Rs 1,000 invested in Government paper at 4½ per cent.

*Bettiah.*—A class IIIB dispensary situated within the limits of a municipality which contributes towards its support and manages its affairs. It has not yet been formally vested in that body. Visited by the sub-divisional officer several times. The Civil Surgeon inspected it four times. A third grade Assistant Surgeon is in charge. There were treated 138 in and 9,557 out patients against 76 and 7,790 in 1882, the daily averages being six and 70 against three and 57 respectively. There were 20 deaths, or a rate of 14·4 per cent. against nine and 11 per cent. in the previous year. Goitre is the most common disease. Fifteen major with two deaths and 543 minor operations were performed against two and 376 in 1882. The total expenditure was Rs. 2,497, of which Rs. 1,771 was the cost of establishment, Rs. 145 of Europe medicines obtained from private druggists on indents checked by the Civil Surgeon, and Rs. 75 of bazar medicines. Dieting articles cost Rs 195. The expenditure on miscellaneous items was Rs. 311. Government contributed Rs. 11 as cost of forms and registers The total income of the dispensary was Rs. 2,497, of which Rs. 391 were paid by the municipality and Rs. 2,095 were obtained from local subscriptions.

*Burhurwa.*—A dispensary in class IIIB under the management of a Committee, which held two meetings during the year. Visited once by the District Magistrate and twice by the Civil Surgeon. A civil hospital assistant is in charge, who gets Rs. 20 monthly, half from Government and half from the dispensary fund. There were no in-patients. Six thousand six hundred and eight out-patients were treated with a daily average of 31 against 5,977 and 27 in 1882. Minor operations numbered 180. No major operation. The total expenditure was Rs. 1,186, of which Rs. 341 was the cost of establishment and Rs. 66 of bazar medicines. English medicines were obtained from the Government store at the end of the year, and were not paid for. Rupees 17 was paid for cinchona febrifuge. The outlay on buildings was Rs. 27,

and on miscellaneous items Rs. 94. Government contributed Rs. 123, namely Rs. 119 as half pay of the hospital assistant and Rs. 4 as cost of forms and registers. The income of the dispensary from local subscriptions was Rs. 1,198 and from interest Rs. 67. At the end of the year the cash balance was Rs. 889 against Rs. 697 in 1882. Rupees 640 was invested during the year.

*Bagaha.*—This is also a class IIIB dispensary managed by a committee. No meetings were held. Visited once by the Magistrate of Chumparun, twice by the Joint-Magistrate of Bettiah and the Civil Surgeon. A civil hospital assistant was in charge. There were treated 93 in and 7,998 out patients against 75 and 3,374 in 1882. The daily averages were four and 39 against three and 25 in the previous year. There were 15 deaths among in-patients against 12 in 1882. Goitre was the most common disease. Eighteen major operations were performed without a single death. Minor operations numbered 163. The total expenditure was Rs. 845, whereof Rs 569 was the cost of establishment, Rs. 67 of Europe medicines, inclusive of cinchona febrifuge, and Rs. 41 of bazar medicines. Diet cost Rs. 89. The expenditure on buildings and miscellaneous items was Rs. 13 and Rs. 65 respectively. Government contributed Rs. 173, namely Rs. 165 as half-pay of the hospital assistant and Rs. 8 as cost of forms and registers. Subscriptions from Europeans and natives were Rs. 288 and Rs. 480 respectively. There was a cash balance of Rs. 413 at the end of the year.

## Bhagulpore Division.

**Monghyr district.** The general health of the district during the year 1883 shewed considerable improvement, the number of registered deaths being 19,475 against 28,985 in 1882. There was a slight prevalence of cholera. Fever prevailed extensively in some localities. There were no changes in the number of dispensaries. Three dispensaries worked in the district as in 1882. One of these is in class II and managed by the local municipality; the other two are in class IIIA and are under private management. The dispensary at Monghyr is in charge of an Assistant Surgeon; those at Khuruckpore and Jamui are under civil hospital assistants. Two of the dispensaries, namely Monghyr and Khurruckpore treated both in-door and out-door patients: the one at Jamui is an out-door institution. There were treated 715 in and 23,667 out patients against 680 and 22,700 in 1882; the daily averages were 44 and 166 against 41 and 165 respectively. The Civil Surgeon found no reason to doubt the correctness of these figures. The managing bodies of Monghyr and Khuruckpore dispensaries are said to take much interest in them.

*Monghyr.*—A municipal dispensary. The new dispensary was completed during the year at a cost of Rs. 31,000 and formally opened by His Honor the Lieutenant-Governor in August last, but was not occupied until November. The Civil Surgeon visited the dispensary daily. A second grade Assistant Surgeon was in charge, but a third grade man acted for him for two months at the end of the year, when he was absent on sick leave. Besides the Assistant Surgeon there is a subordinate establishment which costs Rs. 73 monthly. There were treated 598 in and 16,804 out patients against 576 and 15,986 in 1882; the daily averages were 39 and 121 against 36 and 117 respectively. There were 52 deaths, or a rate of 8·7 per cent. against 51 and 8·8 in 1882. The mortality is largely increased by the numerous patients brought in by the police in a moribund condition. There were 150 major and 1,693 minor operations performed Three deaths occurred after operation—two in lithotomy and one in ascitis. The total expenditure was Rs. 6,528, whereof Rs. 2,572 was the cost of establishment. Europe medicines were obtained from private druggists on indents checked by the Civil Surgeon at a cost of Rs. 476. The cost of bazar medicines was Rs. 379. Dieting of in-patients cost Rs. 1,528, and Rs. 669 was expended on miscellaneous items. The outlay on buildings was Rs. 903. Government contributed Rs. 68, namely Rs. 15 for forms and registers and Rs. 53 for diet of police cases. Municipality paid all the expenses. There was a capital of Rs. 6,500 invested in Government securities.

*Khuruckpore*.—A class IIIA dispensary entirely supported by the Maharajah of Durbhunga, and is under the management of the assistant manager of the Raj. Visited thrice by the Civil Surgeon. A civil hospital assistant is in charge. There were treated 117 in and 4,790 out patients against 104 and 4,809 in 1882; the daily averages were five and 28 against four and 30 respectively. There were four deaths among in-patients against 10 in 1882. One hundred and sixteen minor operations were performed. The total expenditure was Rs. 1,125, of which Rs. 880 was the cost of establishment. The cost of bazar medicines Rs. 74 and of diet Rs. 120. The cost of Europe medicines, which was supplied by manager, Raj Durbhunga, was not known. The expenditure on miscellaneous items was Rs. 51. Government contributed Rs. 8 for forms and registers.

*Jamui.*—A class IIIA dispensary, managed by a committee presided over by the subdivisional officer, Jamui. The committee met four times. Visited twice by the Civil Surgeon. A new building for the dispensary was constructed during the year at a cost of Rs. 663. A civil hospital assistant is in charge. No in-patients. Two thousand and seventy-three out-patients were treated with a daily average of 16 against 1,905 and 16 in the previous year. One hundred and sixty-one minor operations were performed. No major operation. The total expenditure was Rs. 1,290, of which Rs. 504 was the cost of establishment. English medicines were obtained from Government at a cost of Rs. 46 which was not

paid during the year. Bazar medicines cost Rs. 33. The expenditure on buildings was Rs. 688 and on miscellaneous items Rs. 65. Government contributed Rs. 3 as cost of forms and registers.

Bhagulpore district.

The general health of the district is said to have been much better than that of the preceding year, the number of registered deaths being 34,880 against 38,148 in 1882. There were no epidemics in the district. There were six dispensaries working at the end of the year. The dispensary at Soopoole, which was closed in 1882, having been reopened during the year under the orders of Government in its letter No. 1202M, dated 11th October 1882. The dispensary at Barari supported by Baboo Hory Mohon Thakur was to have been placed under Government supervision, but the necessary formalities were not completed Of the six dispensaries two are in class II, three class IIIA, and one in class IIIB, two are managed by municipalities. three by local committees, and one is under private management. The dispensaries at Bhagulpore and Muddhepoorah are in charge of Assistant Surgeons; the rest are under hospital assistants. Excepting Protabgunge and Soopoole dispensaries all the institutions treated both in-door and out-door patients. There were treated 437 in and 14,724 out patients against 521 and 12,666 in 1882; the daily averages were 26 and 120 against 24 and 119 respectively. With the exception of Muddhepoorah and Colgong dispensaries, the figures may be accepted as fairly correct. Generally speaking the interest shewn by the managing bodies in these dispensaries is small, but they seem to be more appreciated by the people than in former years.

*Bhagulpore.*—It is a municipal dispensary. There was no separate dispensary committee. Visited by His Honor the Lieutenant-Governor in August, twice by the Commissioner of the division, and four times each by the Magistrate and Joint-Magistrate of the district. The Civil Surgeon visited it daily. There were several changes amongst the Assistant Surgeons in charge. The minor establishment cost Rs 28 per month. There were treated 247 in and 4,561 out patients against 298 and 4,149 in 1882; the daily averages were 15 and 37 against 17 and 45 in the previous year. There were 37 deaths, or a rate of 14·9 per cent. against 52 and 17·4 in 1882. Thirty-three major and 489 minor operations were performed. The total expenditure was Rs. 2,914, of which Rs. 1,561 was the cost of establishment. Europe medicines were obtained from private firm at a cost of Rs. 68, and Rs 149 was paid for country medicines. The cost of diet was Rs. 515. The expenditure on buildings was Rs 146 and on miscellaneous items Rs. 351. Government supplied forms and registers, the value of which was Rs. 11, and paid Rs. 7 for dieting police cases. Municipality paid Rs. 1,307 against Rs. 1,389 in 1882. Subscriptions from Europeans and natives were Rs. 349 and Rs. 294 respectively. Rupees 821 were received from local funds and Rs. 125 as interest. There was an investment of Rs. 2,322 at the end of the year.

*Banka.*—A class IIIB sub-divisional dispensary, managed by a committee which met three times during the year. Visited twice by the Commissioner of the division and once by the District Magistrate. The Civil Surgeon inspected the dispensary four times. A civil hospital assistant is in charge, who receives from Government Rs. 25 for dispensary, Rs. 10 for sub-division, and Rs. 10 for lock-up. The minor establishment consists of a compounder on Rs. 10, a cook on Rs. 4, and a sweeper on Rs. 3 per month. There were treated 69 in and 1,532 out patients against 61 and 1,406 in 1882, the daily averages being four and 16 against two and 13 respectively. There were nine deaths, or a rate of 13·04 as compared with eight and 13 in the previous year. Thirty-nine minor operations were performed. No major operation. The total expenditure was Rs. 1,555, of which Rs. 543 represent the cost of establishment. The cost of Europe medicines, obtained from private druggists, was Rs. 130, of bazar medicines Rs 24, and of diet Rs. 78. The expenditure towards buildings and repairs was Rs. 24, and on miscellaneous items Rs. 40. Government contributed Rs. 356, namely Rs. 9 in forms and registers and Rs. 340 as salaries of the hospital assistant and Rs. 7 for diet of police cases. The income from other sources was Rs. 521. Municipality paid nothing.

*Colgong.*—A municipal dispensary since August 1884, when it was formally vested to the local municipality. Visited twice by the Magistrate, once by the Deputy Magistrate, and eight times by the municipal commissioners. The civil surgeon inspected the dispensary four times. A civil hospital assistant was in charge. Arrangements for the treatment of in-patients were made in June, and five patients were treated with a daily average of ·08 There were 1,997 out-patients treated against 2,282 in 1882; the daily averages were 21 and 27 respectively. There were no deaths. Four minor operations were performed. No major operation. The total expenditure was Rs. 798, of which Rs. 480 was the cost of establishment and Rs. 106 of Europe medicines, which were obtained from private druggists inclusive of Rs. 42 paid for the balance on this head for 1882. The cost of country medicines was Rs. 33, and of diet Rs. 3 only. The expenditure towards buildings was Rs. 140 and on miscellaneous items Rs. 23. Government supplied forms and registers, the cost of which was Rs. 6. Municipality paid Rs. 498, and the income from subscriptions amounted to Rs. 199 and from interest Rs. 13, and Rs. 46 were obtained by sale of securities. The total investment at the end of the year was Rs. 349.

*Muddehpoorah.*—A class IIIA dispensary managed by a private committee which held six meetings. Visited once by the District Magistrate and three times by the Civil Surgeon. An Assistant Surgeon was in charge who received Rs. 120 per month from the dispensary

fund and Rs. 20 from Government for the jail. The minor establishment costs Rs. 25 a month. There were treated 116 in and 2,682 out patients against 162 and 3,603 in 1882; the daily averages were six and 18 against five and 20 respectively. Nine deaths occurred among in-patients against 12 in the previous year. There were 32 major and 176 minor operations. The total expenditure was Rs. 1,741, of which Rs. 1,321 represent the cost of establishment, and Rs. 102 of Europe medicines obtained from private druggists, and Rs. 31 of bazar medicines. Diet cost Rs. 130. The expenditure on buildings was Rs. 26 and on miscellaneous items Rs. 130. Government contributed Rs. 11 for forms and registers. The income of the dispensary consisted of Rs. 250 from Europeans, Rs. 1,051 from natives, Rs. 50 from local funds, and Rs. 120 as interest on investments. There was a cash balance of Rs. 823 and Rs. 3,000 as invested capital.

*Protabgunge.*—A class IIIA dispensary, managed and entirely supported by Rai Dhunput Singh Bahadoor. There is no committee. Visited once by the District Magistrate and once by the sub-divisional officer. The Civil Surgeon inspected it three times. A civil hospital assistant was in charge, whose entire pay is paid by the proprietor. There were treated 2,117 out-patients with a daily average of 15 against 1,226 and 12 in 1882. No in-patients. Eighteen minor operations were performed. No major operation. The total expenditure was Rs. 944, of which Rs. 482 was the cost of establishment, Rs. 145 of Europe medicines and Rs. 66 of country medicines. The expenditure on buildings was Rs. 210 and on miscellaneous items Rs. 41. Government contributed forms and registers, the cost of which was Rs. 4.

*Soopole.*—This dispensary was reopened on 15th February in class IIIA under the Government order No. 1202M, dated 11th October 1882. It is managed by a committee which held six meetings. Visited four times by the sub-divisional officer and three times by the Civil Surgeon. The sub-divisional civil hospital assistant was in charge and received Rs. 10 as an extra allowance from the dispensary funds. The minor establishment consists of a compounder at Rs. 10, a peon at Rs. 4, and a sweeper at Re. 1 per month. One thousand eight hundred and thirty-five out-patients were treated with a daily average of 12. Twenty-seven minor operations were performed. No major operation. The total expenditure was Rs. 644, of which Rs. 267 was the cost of establishment, Rs. 101 of Europe medicines, and Rs. 12 of country medicines. The expenditure on buildings and miscellaneous items was Rs. 7 and Rs. 22 respectively. Government supplied forms and registers, the value of which was Rs. 6.

**Purneah district.**

The public health of the district during the year 1883 was as bad as in the previous year, and fever prevailed as usual throughout the district. Three dispensaris worked in the district throughout the year, two of which were in class II and managed by municipalities and one in class IIIA under private committee. All the dispensaries were in charge of civil hospital assistants. The dispensaries at Purneah and Kissengunge treated both in-door and out-door patients: Bussantpore dispensary only out-door patients. There were treated 179 in and 9,217 out-patients against 170 and 7,317 in 1882; the daily averages were six and 45 against seven and 39 respectively. The figures were tested by the civil medical officer, who says that they are reliable. The interest of the municipal committees in their institutions has not increased, and the poor in general appreciate the institutions more for surgical than for medical relief.

*Purneah.*—It is a municipal dispensary. Visited by the Commissioner of the division, Magistrate of district, and vice-chairman of the municipality once each. The Civil Surgeon visited it almost daily. A civil hospital assistant is in charge. There were treated 166 in and 4,655 out-patients against 140 and 3,284; in 1882; the daily averages were six and 30 against six and 23 respectively. Goitre is the most common disease: 2,253 cases of it were treated against 1,014 in the previous year. There were 38 deaths against 29 in the previous year. Thirty-two major and 75 minor operations were performed. The total expenditure was Rs. 1,494, of which Rs. 1,162 represent the cost of establishment. Europe medicines were obtained from private dealers at a cost of Rs. 101. The cost of bazar medicines was Rs. 23. Dieting of in-patients cost Rs. 120. The expenditure on buildings and miscellaneous charges was Rs. 59 and Rs. 29 respectively. Government paid Rs. 107—sick leave allowance of the hospital assistant. Municipality paid nothing. The dispensary was supported by subscription from Europeans and natives, which amounted to Rs. 547, from interest Rs. 340, and by sale of securities of Rs. 500. There was an invested capital of Rs. 8,547 at the end of the year.

*Kissengunge.*—This is also a municipal dispensary visited by the Commissioner and the District Magistrate once each. The Civil Surgeon inspected twice. A civil hospital assistant is in charge who receives Rs. 10 monthly from Government for subsidiary jail in addition to his grade pay from the municipality. Though the dispensary is intended to afford out-door relief, there were treated 13 in and 2,704 out-door patients against 16 and 2,534 in 1882; the daily averages were four and six against five and seven respectively. There were three deaths against three in the previous year. Eight major and 26 minor operations were performed. The total expenditure was Rs. 635, whereof Rs. 299 were expended on establishment The cost of Europe medicines was Rs 11 and of bazar medicines Rs. 7. Dieting of in patients cost Rs. 10. The expenditure on buildings was Rs. 70 and on miscellaneous items Rs. 31. Government supplied forms and registers, the value of which was Rs. 2. Municipality paid Rs. 100 against Rs. 124 in 1882. Subscriptions from natives was Rs. 249. Interest on investments amounted to Rs. 207. Rupees 1,890 was the invested capital of the dispensary at the end of the year.

*Bassantpore.*—This is a class IIIA dispensary managed by a committee presided over by the sub-divisional officer. Visited twice by the civil medical officer. A civil hospital assistant is in charge, who receives his grade pay of Rs. 25 a month from Government for sub-division, and Rs. 10 as dispensary allowance from dispensary funds. There were treated 1,858 out-patients with a daily average of eight against 1,499 and eight in 1882. No in-patients. Twenty-one minor operations were recorded. No major operation. The total expenditure was Rs. 557, of which Rs. 192 were expended on establishment. The cost of Europe medicines was Rs. 13 and of bazar medicines Rs. 9. The expenditure on buildings was Rs. 35 and on miscellaneous items Rs. 41. Government paid nothing.

**Maldah district.**

The report was submitted by Dr. J. Wilson, who joined the district on the 23rd December 1883. The public health of the district was better than that of the preceding year, the number of registered deaths being 12,841 against 14,827. There were two dispensaries working at the end of the year both of which were in class II under municipal management and in charge of civil hospital assistants. In the dispensary at English Bazar both in-door and out-door patients were treated; in the other only out-door patients. There were treated 127 in and 9,705 out patients against 144 and 10,435 in 1882, the daily averages being four and 70 against five and 72 respectively. The figures of both the dispensaries were found correct and reliable. No active interest seems to have been displayed by either municipalities in the working of these institutions. The people shew a fair appreciation of their value.

*Maldah—English Bazar Dispensary.*—This is a municipal dispensary in class II. Visited once by the Commissioner, twice by the Deputy Magistrate, and six times by the Magistrate of the district. The civil medical officer visited the dispensary daily. A civil hospital assistant is in charge. There were treated 127 in and 6,906 out patients against 144 and 7,083 in 1882; the daily averages were four and 49 against five and 49 respectively. There were 17 deaths, or a rate of 13·3 per cent. against 35 or 24·3 in 1882. Twenty-six major and 297 minor operations were performed. The total expenditure was Rs. 1,195, whereof Rs. 559 was the cost of establishment, Rs. 242 of English medicines, Rs. 54 of bazar medicines, and Rs. 124 of diet. The expenditure on buildings was Rs. 97 and on miscellaneous items Rs. 62. Government paid Rs. 6, namely Rs. 4 for forms and registers and Rs. 2 for diet of police cases. Municipality paid Rs. 600. Subscriptions from Europeans and natives amounted to Rs. 441.

*Maldah town.*—A municipal dispensary. The Magistrate of the district visited it once and the Civil Surgeon eight times. A civil hospital assistant is in charge. Two thousand seven hundred and ninty-nine out-door patients were treated with a daily average of 20 against 3,352 and 22 in 1882. No in-patients. Two major and 113 minor operations were performed. The total expenditure was Rs. 625, of which Rs. 442 was the cost of establishment. The cost of Europe medicines, chiefly obtained from Government store, was Rs. 39, and of country medicines Rs. 32. The outlay on buildings was Rs. 58 and on miscellaneous items Rs. 26. Government contributed Rs. 3 in forms and registers. Municipality paid Rs. 547. Subscription from natives was Rs. 189 and Rs. 28 was the amount of interest.

**Sonthal Pergunnahs district.**

The general health of the district was not good in 1883. Fevers of malarial character prevailed in the district for the greater part of the year. There were local outbreaks of cholera too. The number of registered deaths was 19,648 against 17,335 in 1882. Five dispensaries worked in the district throughout the year, of which one is in class II and under municipal control, two in class IIIB, and two in class IIIA and are managed by private committees. All the dispensaries were in charge of civil hospital assistants. With the exception of the dispensary at Jamtara all the others treated both in-door and out-door patients. There were treated in all 281 in and 7,288 out patients against 407 and 6,652 in 1882; the daily averages were 10 and 63 against 14 and 56 respectively. "These figures," says the Civil Surgeon, "may be accepted as fairly correct." The managing bodies are said to take a fair interest in the affairs of the dispensaries with the exception of Jamtara and Godda, at which places the sub-divisional officers see that the business is not neglected. The institutions do not seem to be well appreciated from the attendance of patients. Besides these there are three missionary dispensaries receiving Rs. 10 per month from Government, but submit no returns and are not under the control of the Civil Surgeon.

*Doomka.*—A class IIIB dispensary. There is no municipality in Doomka. The dispensary is under the management of a committee which held nine meetings. Visited twice by the Commissioner and Deputy Commissioner of the division, thrice by the sub-divisional officer, and almost daily by the Civil Surgeon. The first class civil hospital assistant in charge was replaced by a second class man during the year. The former received Rs. 30 from Government and Rs. 25 from dispensary; the latter Rs. 10 from Government and Rs. 25 from dispensary; but from December last his entire pay of Rs. 35 is paid by the dispensary fund. The cost of minor establishment is Rs. 25 a month. There were treated 85 in and 2,721 against 102 and 2,308 in 1882, the daily averages being four and 25 against three and 21 respectively. The decrease of in-patients was said to be owing to more careful selection of cases for admission. There were nine deaths against 18 in the previous year. Nine major and 152 minor operations were performed. The total expenditure was Rs. 1,517, of which Rs. 882 were the cost of establishment, Rs. 129 of Europe medicines obtained from private druggists on indents checked by the

Civil Surgeon, and Rs. 35 of country medicines. The cost of diet was Rs. 90. The outlay on buildings and on miscellaneous items was Rs. 11 and Rs. 52 respectively. The total income was Rs 1,576, of which Government paid Rs. 481, namely Rs. 4 as cost of forms and registers, Rs. 299 as part of pay of the medical subordinate, Rs 8 for dieting of police cases, and Rs. 170 as a special allowance, being the aid of Rs 10 per month including Rs. 50 due from previous year continued by Government, formerly paid out of the "Estate Improvement Fund" now abolished The dispensary had a closing balance of Rs. 58 in hand and an invested capital of Rs. 1,732.

*Deoghur.*—This is a municipal dispensary visited once by the Commissioner of the division, three times by the Deputy Commissioner, several times by the sub-divisional officer, and four times by the Civil Surgeon. The civil hospital assistant of the sub-division is in charge and receives Rs. 60 from the dispensary fund and Rs 10 from Government. The minor establishment costs Rs. 24 per month. There were treated 90 in and 1,821 out patients against 174 and 1,689 in 1882; the daily averages were 2 9 and 13 against 4·6 and 11 respectively. The falling off in the number of in-patients is said to be due to the lesser number of pilgrims. The number of deaths was 37, or a rate of 41 11 per cent. against 69, or 39 6 in the previous year The mortality as usual was very high, being due to the large number of serious cases admitted, the majority of which were brought to the hospital in a moribund state. Fourteen major and 100 minor operations were performed. The total expenditure was Rs. 2,249, of which Rs. 991 represent the cost of establishment, Rs. 92 of Europe medicines obtained from private dealers, and Rs. 15 of bazar medicines. The cost of diet was Rs. 65. The expenditure on buildings was Rs. 1,022 and on miscellaneous items Rs. 64. The total income was Rs. 2,269, of which Government paid only Rs. 2 for forms and registers. The municipality paid Rs 1,054. The subscription from Europeans and natives amounted to Rs. 150 and Rs. 936 respectively. Interest on investment was Rs. 107. The invested capital of Rs 3,000 was not touched.

*Godda.*—It is a class IIIB dispensary as it continues to receive the aid of Rs 10 per month from Government, formerly paid out of the "Estate Improvement Fund." It is managed by a committee which held eight meetings during the year. Visited once by His Honor the Lieutenant-Governor of Bengal, once by the Commissioner of the division, twice by the Deputy Commissioner and occasionally by the sub-divisional officer. The Civil Surgeon inspected the dispensary thrice. The civil hospital assistant of the sub-division is in charge and receives Rs. 10 monthly for it from the dispensary funds. The minor establishment costs Rs. 17 monthly. There were treated 19 in and 829 out patients against 32 and 802 in 1882; the daily averages were eight and nine against two and nine respectively. There were three deaths among in-patients against one in the previous year. No major operation. Minor operations numbered 36. The total expenditure was Rs. 1,494, of which Rs. 348 was the cost of establishment. Europe medicines were obtained from private druggists at a cost of Rs. 23 only. The cost of bazar medicine was Rs. 15 and diet of in-patients Rs. 21. The outlay on buildings was Rs. 489 and on miscellaneous items Rs. 20. Government paid Rs. 196, namely Rs. 6 for forms and registers; Rs. 190 as special allowance. The old dispensary building was sold for Rs. 700 to the Police Department. Subscription from natives was Rs. 356, interest on investment Rs. 76, and Rs. 100 were withdrawn. There was an invested capital of Rs. 2,238 at the end of the year.

*Jamtarra.*—A class IIIA dispensary under the management of a local committee which held four meetings during the year. Visited twice by the Deputy Commissioner and six times by the sub-divisional officer. The Civil Surgeon inspected it four times. The civil hospital assistant of the sub-division is in charge, and receives Rs. 10 monthly for it from the dispensary fund. No in-patients One thousand one hundred and twenty-two out-patients were treated against 975 in 1882; the daily averages were 6·9 and 6·5 respectively. Two major and 81 minor operations were performed. The total expenditure was Rs. 328, whereof Rs. 162 was the cost of establishment. Rupees 11 were paid for Europe medicines, but no payment was made for those obtained from Government store for the year. Country medicines cost Rs 2 and buildings Rs. 3. The amount expended on miscellaneous items was Rs. 34. Government supplied forms and registers, the cost of which was very insignificant. The chief income of the dispensary was derived from subscriptions which was Rs. 354 against Rs. 139 in 1882. The dispensary had a closing balance of Rs. 91 and an invested capital of Rs. 548 at the end of the year.

*Rajmehal.*—It is a sub-divisional dispensary in class IIIA managed by a committee which held eight meetings. Visited once by the Lieutenant-Governor, once by the Commissioner of the division, twice by the Deputy Commissioner, and occasionally by the sub-divisional officer. The Civil Surgeon inspected the dispensary four times. The civil hospital assistant of the sub-division is in charge and receives Rs. 10 per mensem as an extra allowance from the dispensary fund The minor establishment costs Rs. 29 per month. There were treated 87 in and 795 out patients as compared with 99 and 878 n 1882, the daily averages being three and seven against four and six respectively. There were 18 deaths, or a rate of 20 per cent. against 23 and 23 2 per cent. in the previous year. Fifty-five minor operations were performed. No major operation. The total expenditure was Rs. 551, of which Rs. 402 was the cost of establishment and Rs. 73 of diet. Europe medicines were obtained from Government store and were not paid for during the year. Bazar medicines cost Rs. 6, and Rs 47 were spent on miscellaneous items. The total income was Rs. 569 of which Government

contributed Rs. 11, namely Re. 1 in forms and registers and Rs. 10 for dieting police cases. The sum derived from private contributions was Rs. 289 against Rs. 531 in 1882, and the arrears have risen from Rs. 139 to Rs. 268. The financial condition of the dispensary is therefore not in a good state, and the Civil Surgeon says that "if some measures are not soon adopted by the committee to increase the income the dispensary must be closed," and the Commissioner remarks as follows:—"The reduction of the dispensary to a out-door one, as ordered by the Deputy Commissioner, is certainly right. I only question whether it should not be closed altogether. I have written to the Deputy Commissioner that the cook and regular sweeper may be discharged."

CHOTA NAGPORE DIVISION.

**Manbhoom district.**

The Civil Surgeon says the year under review was very healthy, there being no epidemic of any consequence. There are three dispensaries in the district, one of which is in class II, and two in class IIIA. There were treated 536 in and 7,848 out patients against 573 and 7,429 in 1882, the daily averages being 20 and 69 against 19 and 65 respectively. The slight falling off in the number of inpatients, the Civil Surgeon says, might be due to healthiness of the year. He believes the figures compiled by the hospital assistants can be relied on.

*Purulia.*—A municipal dispensary. A sub-committee consisting of six members, all members of the municipality, exists. The Deputy Commissioner and members are said to take great interest in all matters concerning the institution. The Deputy Commissioner, besides the monthly visits on committee-day, went round at intervals. The Civil Surgeon visited the dispensary daily. A second grade civil hospital assistant is in charge. The collecting peon was during the year detected embezzling money and was prosecuted and sentenced to 10 months' rigorous imprisonment with a fine of Rs. 20. The plan now adopted for collecting subscriptions is through the municipal tax collector. There were treated 298 in and 4,806 out patients against 322 and 4,429 in 1882, the daily averages being 13 and 41 against 12 and 39 respectively. The diseases prevailing most among out-patients were ophthalmia, fever, and skin affections. There were 32 deaths among in-patients against 55 in 1882. Thirty major and 288 minor operations were performed. Of the former the Civil Surgeon performed 19. There were three deaths after operation. The total expenditure was Rs. 2,386 exclusive of the amount invested during the year. Rupees 1,140 were expended on establishment, Rs. 40 on bazar medicines, Rs. 96 on Europe medicines, Rs. 195 on diet, Rs. 102 on miscellaneous charges, Rs. 811 on repairs to building. The dispensary building is said to be most needlessly massive and costs a great deal to keep in proper repair. Government contributed Rs. 66, viz. Rs. 16 for registers and forms and Rs. 50 for diet of police cases. Municipal funds contributed Rs. 880, Europeans subscribed Rs. 117, and natives Rs. 968. Rupees 33 were obtained as interest on the investment, and Rs. 31 from local or other funds. Of the investment of Rs. 332, only Rs. 26 remained at the end of the year. The closing cash balance stood at Rs. 68.

*Pandra.*—A Class IIIA dispensary. The Pandra estate, which defrays the expenses of the institution, is in chancery. Litigation continues, and it is uncertain, says the Civil Surgeon, what the future of the dispensary will be. It is under the management of a committee which met eight times during the year. Inspected by the Civil Surgeon twice. The native doctor who is in charge is not in the Government service. There were treated 128 in and 1,876 out patients against 137 and 1,868 in 1882, the daily averages being three and 17 against three and 16 respectively. There were seven deaths against 13 in 1882. Three major and 68 minor operations were recorded. The total expenditure was Rs. 942 exclusive of the amount invested during the year. Government contributed Rs. 14 for registers and forms. Establishment cost Rs. 726, bazar medicine Rs. 10, Europe medicines Rs. 90, diet Rs. 68, and miscellaneous items Rs. 48. At the end of the year there was an invested capital of Rs. 303.

*Gobindpore.*—A class IIIA sub-divisional dispensary in charge of the hospital assistant of the sub-division. It is under the management of a committee who met regularly every month during the year The Civil Surgeon inspected it on two occasions. There were 110 in and 1,166 out patient against 114 and 1,132 in 1882; the daily average being three and nine for both years. There were 25 deaths against 24 in the previous year. The dispensary is said to be resorted to by numbers of pilgrims who are admitted exhausted and in the last stage of disease. Five major and 42 minor operations were performed. The total expenditure was Rs. 544 exclusive of the amount invested during the year, of which Government contributed Rs. 12 for registers and forms. Rupees 579 were obtained from subscriptions, Rs. 17 from local and other funds, and Rs. 11 as interest. Establishment cost Rs. 370, bazar medicines Rs. 14, Europe medicines Rs. 27, diet Rs. 54, miscellaneous items Rs. 60, repairs Rs. 17. At the end of the year there was an invested capital of Rs. 450.

**Hazaribagh district.**

The Civil Surgeon says that the year under review was a morderately healthy one, although the deaths recorded were in excess of most years. He attributes the increase in the death-rate to improvement in registration. There are three dispensaries in the district, two of these are in class II and one in class IIIB. There were treated 176 in and 7,425 out patients against 158 and 5,732 in 1882, the daily averages being 11 and 90 against 11 and 68 respectively. The Civil Surgeon believes the figures of the dispensaries to be correct. All the dispensaries are in charge of civil hospital assistants; two of them are managed by the municipality, and one by a local committee. The people of the

district, the Civil Surgeon says, have never shewn much appreciation of the institution, but he thinks there was some improvement in this respect in the past year.

*Hazaribagh.*—A municipal dispensary. No visit was paid to it by any civil officer. The Civil Surgeon is said to have visited frequently. There were treated 168 in and 4,585 out patients against 156 and 3,111 in 1882, the daily averages being nine and 61 against 10 and 43 respectively. Twenty-three deaths occurred among in-patients. Forty-three major and 115 minor operations were performed. Four deaths occurred after operations. The total cost amounted to Rs. 1,758, of which Government contributed Rs. 11 as cost of forms and registers. The cost of establishment was Rs. 684, of Europe medicine Rs. 30, of bazar medicine Rs. 59, of diet Rs. 264. The expenditure on buildings was Rs. 600 and on miscellaneous items Rs. 121. Municipality paid Rs. 1,156. Subscriptions amounted to Rs. 591.

*Chatra.*—A municipal dispensary. Visited by the Civil Surgeon once and by the munsif frequently. There were treated eight in and 1,639 out patients against two and 1,746 in 1882, the daily averages being one and 14 against six and 14 respectively. One hundred and sixty-four minor operations were performed. No major operation. The total cost amounted to Rs 750, of which Government contributed Rs. 6 for registers and forms. The expenditure on establishment was Rs. 379, on Europe medicines Rs. 243, on bazar medicines Rs. 9, on buildings Rs. 44, and on miscellaneous items Rs. 75. Municipality paid Rs. 582. Subscriptions from natives was Rs. 162. There was a cash balance of Rs. 597 at the end of the year.

*Burhi.*—A class IIIB dispensary governed by a local committee which met once only during the year. Two visits were paid by the Civil Surgeon. One thousand two hundred and one out-patients were treated against 875 in 1882, the daily averages being 14 and 11 respectively. Eighty-three minor operations were performed. No major operation. The total cost was Rs. 1,117, of which Government contributed Rs. 186, viz. Rs. 180 for salaries and Rs. 6 for forms. The expenditure on establishment was Rs. 396, on Europe medicines Rs 28, on bazar medicines Rs. 4, on miscellaneous items Rs. 89. Subscriptions from Europeans and natives were Rs. 554, and Rs. 6 was obtained as interest on investments. There was a cash balance of Rs. 100 at the end of the year and Rs. 600 were invested.

**Lohardugga district.**

The Civil Surgeon says that the general health of the district including the sub-division of Palamow was better than in the previous year judging from the mortuary returns furnished by the police; but as registration is so defective it is impossible to place any reliance on the figures or to draw comparisons one year with another. There are three dispensaries in the district, one in class II, the other two in class IIIB. There were treated 239 in and 5,678 out patients against 218 and 4,368 in 1882, the daily averages being 11 and 53 against 13 and 44 respectively. The figures of the Ranchee dispensary, the Civil Surgeon says, may be taken as correct and he has no reason to doubt the accuracy of the figures of the other dispensaries. Two of the dispensaries are under municipal control, and one is governed by a local committee. The Civil Surgeon is of opinion that a fair amount of interest is taken in the institutions by the various managing bodies.

*Ranchee.*—A municipal dispensary. Visited almost daily by the Civil Surgeon and occasionally inspected by the civil officers. A civil hospital assistant was in charge. There were treated 100 in and 3,332 out patients against 108 and 2,401 in 1882, the daily averages being five and 31 against six and 26 respectively. The total number of deaths among the in-patients was 35 as compared with 23 in 1882. The chief cause of death is said to be dysentery among pilgrims admitted in a hopeless condition. There were seven major and 156 minor operations performed. The total expenditure amounted to Rs. 1,308, whereof Rs. 731 represent the cost of establishment, Rs. 177 of Europe medicines, which were obtained from private druggists, and Rs. 79 of bazar medicines. The cost of diet was Rs. 165. The expenditure on buildings was Rs. 6, and on miscellaneous items Rs. 150. Government paid Rs. 33 namely, Rs. 7 for forms and Rs. 26 for diet of police cases. Municipality paid Rs. 380.

*Palamow (Daltongunge).*—A dispensary in class IIIB in charge of the Assistant Surgeon of the sub-division, who receives his dispensary allowance from Government. Managed by a local committee which met only once during the year. From this it would appear that very little interest is taken in the institution by the members. Visited frequently by the Assistant Commissioner of the sub-division and by the Deputy Commissioner when on tour. Inspected only once by the Civil Surgeon. There were treated 139 in and 1,389 out patients against 110 and 1,462 in 1882, the daily averages being six and 12 respectively for both years. There were six deaths among the in patients as compared with three in 1882. Thirteen major and 76 minor operations are recorded. The total expenditure was Rs. 1,141, of which Rs. 540 was the cost of establishment, Rs. 197 of Europe medicines, which were obtained from private druggists, and Rs. 24 of bazar medicines. The cost of diet was Rs. 143. The expenditure on buildings was Rs. 150 and on miscellaneous items Rs. 87. Government paid Rs. 301, namely Rs. 300 for salaries and Re. 1 as cost of forms. Municipality paid Rs. 25 only. Subscriptions from Europeans was Rs. 114 and from natives Rs. 617.

*Lohardugga.*—A class IIIB dispensary. This is under the management of a local committee which met four times during the year. Visited by the Deputy Commissioner once and twice by the Civil Surgeon. A civil hospital assistant is in charge. There were treated 957 out patients against 505 in 1882, the daily averages being nine and six respectively. The Civil Surgeon says there is no doubt that the institution has increased very much in popularity. Twenty-nine minor operations are recorded. No major operations. The total expenditure was Rs. 564, of which Rs. 420 was the cost of establishment, Rs. 84 of Europe

medicines, and Rs. 5 of country medicines. The cost of diet was nominal. The expenditure on buildings was Rs. 13 and on miscellaneous items Rs. 40. Government paid Rs. 2 as cost of forms and registers and diet of police cases. Municipality paid all the expenses.

**Singbhoom district.**

The Civil Surgeon says that the health of the district on the whole was better than in the previous year. There is only one dispensary in the district at the sudder station.

*Chyebassa.*—A municipal dispensary under the management of a local committee which met seven times during the year. The Deputy Commissioner paid frequent visits and the Civil Surgeon visited it daily. The jail hospital assistant is in charge. There were treated 1,873 out-patients against 1,803 in 1882, the daily averages being 21 and 22 respectively. Ophthalmia is said to be the principal disease from which patients frequent the dispensary, and represents 46·6 per cent. of the cases. Seven major and 53 minor operations were performed. The total expenditure was Rs. 820, of which Rs. 204 was the cost of establishment and Rs. 31 of bazar medicines. Payments for Europe medicines were not made during the year. The cost of diet was Rs. 29. The expenditure on buildings were Rs. 301 and on miscellaneous items Rs. 60. Government paid Rs. 28, viz. Rs. 6 as cost of forms and Rs. 22 for diet of police cases. Municipality paid Rs. 120 against Rs. 240 in 1882.

In conclusion I beg to say that the report was written by Dr. Payne.

I have the honour to be,

SIR,

Your most obedient servant,

A. J. COWIE,

*Offg. Surgeon-General for Bengal.*

Reg. No. 3615J—254—21-8-84.

## MUNICIPAL DEPARTMENT

### MEDICAL.

DARJEELING, THE 22ND OCTOBER 1884.

## RESOLUTION.

READ—

Report on the Charitable Dispensaries in Bengal for the year 1883.

Read also—

The Report for 1882, and the Resolution recorded upon it.

1. The only important features in the administration of charitable dispensaries in Bengal during the year 1883 have been the transfer of a large number of dispensaries to the management of municipalities, the opening of some new dispensaries, and the re-opening of others which had been closed as useless or for financial reasons.

2. The old system under which the Government guaranteed an appointment as Assistant Surgeon to every student who passed the Licentiates' Examination has been brought to an end. This system led to the accumulation of a large number of Assistant Surgeons for whom no employment could be found, and who were naturally much discontented with their position and prospects. No new admissions were made during the year.

3. It is satisfactory to notice the favourable account given of the students trained in the Campbell School. The number of its pupils is said to have steadily increased, and at the close of 1883 it was 190, or only 10 less than the maximum number allowed. It is noticeable that, though fewer men are now required from this class for the Government service, the demand from tea plantations, railways, and other sources of employment is increasing. The results obtained at the Temple Medical School, Patna, were less satisfactory. It was hoped that this school would supply a better class of men for service in Behar, and in particular that it would offer special attractions to Mahomedan students. These expectations have not been fulfilled. The want of a knowledge of English has impaired the usefulness of the men trained here, and the Surgeon-General also states that the professional qualifications and conduct of some of the most promising men have been seriously noticed. The Lieutenant-Governor has read this unfavourable report with much regret, and he requests that the Surgeon-General will be good enough to make further enquiries into the matter, and lay before Government any proposals which he may think advisable in order to remove the evils complained of. In consequence of the circumstances just alluded to, vacancies in the public service were filled during the past year almost exclusively from Sealdah. The class of men now appointed to the Hospital Assistant Service is generally superior to that formerly admitted. Those with higher educational qualifications are now entering the Medical Service. The men of the earlier recruitment were in many respects unfit for their duties in education, discipline, and professional attainments. The remarks of the Surgeon-General upon this point deserves notice. He says:—

> Of the old service of Hospital Assistants I cannot report favourably. There are good men among them, but the average is very low indeed, and the difficulty of carrying on the duties of this branch of the service is often very great from the number of men it contains, who have no sense of duty whatever, who evade or defiantly protest their inability to obey orders which happen to be unpalatable to them, and who employ every artifice of falsehood and chicanery to gain their ends. The work and liabilities of such men fall of necessity on the shoulders of better men, and then my inability to punish adequately or get rid of habitual offenders forces me to sanction injustice to the working men of the service, and prevents me from using the opportunity of raising the character and quality of the service which would otherwise be afforded by the presence of superior men waiting for admission.

4. An important reform was introduced during the year into the medical administration of sub-divisions. There are numerous sub-divisions in the Province, at the head-quarters of which there are dispensaries in class I, supported by municipal or other local anthorities, or by private persons. It had frequently been found possible to amalgamate the medical charge of the sub-division with that of the dispensary, and to entrust both duties to a single officer. No definite rule, however, existed as to the adjustment of the medical officer's pay and allowances. A distinct principle has now been laid down to regulate this adjustment. All sub-divisions in the Province have been arranged in seven classes, according to the class of medical officer required for Government work alone. For the highest class fully qualified uncovenanted surgeons have been provided. These are comparatively few in number. The lowest class, which is the most numerous, includes those sub-divisions in which the medical work of Government is of no special importance: these have been placed in charge of Civil Hospital Assistants of the third class. The intermediate classes comprise sub-divisions which will be placed in charge of various grades of Assistant Surgeons and Civil Hospital Assistants. The grade pay of the medical officer appointed by Government for the charge of the sub-division, whether he be Surgeon, Assistant Surgeon, or Civil Hospital Assistant, will in all cases be borne entirely by Government. If the managers of a class I dispensary at the head-quarters of a sub-division desire to utilize the services of the Government officer for the charge of their dispensary, they are permitted to do so on payment to him of the authorized dispensary allowance (Rs. 20 for an Assistant Surgeon and Rs. 10 for a Civil Hospital Assistant), and are not required to contribute anything towards his grade pay. If they desire to have an officer of higher professional qualifications than the officer appointed by the State, Government undertakes to provide one, if available, on condition of their making up the difference in his grade pay and allowances. In every case the sub-division constitutes the substantive charge, and the dispensary is a mere adjunct. This reform is now in process of introduction.

5. The number of dispensaries that remained open on the 31st December 1882 was 223. Eleven institutions were newly established, and four were closed or abolished during the year. There were thus 230 open on the 31st December 1883. Of the 11 dispensaries newly opened, two were established at places where there had been such institutions before, which had been closed for various reasons. The Surgeon-General remarks:—

With the exception of Ulubaria, there is, I think, no place on the list where it has been shown that the sick-poor either desire a dispensary or will use one. The reasons for applying for sanction are probably the same as those which led in former years to the establishment of scores of dispensaries which evidently did not exist for the poor, and which were in course of gradual abolition when Local Self-Government was inaugurated. In some recent cases the object has been to provide for a particular native doctor, and his appointment being disallowed, the desire for a dispensary has ceased. Past experience does not support any sanguine expectation that the new dispensaries will be useful as medical charities; but the money cost of them to the State will be confined to the travelling charges of inspecting officers and an enlarged pension list for medical subordinates; but if the number should increase very largely, inspection will be found to cause inconvenience in sudder station by withdrawal of Civil Surgeons from important duties.

6. It is no doubt the case that charitable dispensaries in Bengal are not as a rule resorted to by the people as largely as might be wished, and the Surgeon-General shows in his report that the attendance at all but a few hospitals bears no relation to the presence or absence of epidemic disease in the district. This, however, is a defect which time and experience alone can remove. There are distinct signs that the value of European medical science is surely making itself felt and appreciated; and the Lieutenant-Governor would be unwilling to take any action which might have the effect of discouraging its progress. It is possible that in some cases dispensaries may be opened for other than the highest motives, and occasionally there may be misuse of public money by the Committees. But Mr. Rivers Thompson would prefer to deal with each case on its merits, and to assume, in the absence of positive evidence to the contrary, that the local public and the local authorities are the best judges of purely local wants.

7. One hundred and two dispensaries were managed by municipal bodies, while the remainder (101) were, as before, in charge of Special Committees. Among the latter class comparatively little interest is said to have been evinced by the managing bodies, and the attendance at meetings was poor.

8. The following table exhibits the amount of work done by the dispensaries during the past two years:—

| | Indoor. | | | | | | | | | | Outdoor. | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | Under 25. | 25 to 50. | 50 to 75. | 75 to 100. | 100 to 250. | 250 to 500. | 500 to 750. | 750 to 1,000. | Upwards of 1,000. | Total. | Under 250. | 250 to 500. | 500 to 750. | 750 to 1,000. | 1,000 to 2,500. | 2,500 to 5,000. | 5,000 to 7,500. | 7,500 to 10,000. | Upwards of 10,000. | Total. |
| 1883 ... ... | 18 | 14 | 11 | 11 | 50 | 18 | 6 | 1 | 1 | 130 | ... | 1 | 3 | 11 | 75 | 75 | 32 | 10 | 16 | 223 |
| Percentage ... | 13·85 | 10·77 | 8·46 | 8·46 | 38·46 | 13·85 | 4·61 | ·77 | ·77 | .. | ... | ·45 | 1·35 | 4·93 | 33·63 | 33·63 | 14·35 | 4·48 | 7·17 | ... |
| 1882 ... .. | 21 | 13 | 8 | 9 | 53 | 20 | 7 | ... | 2 | 133 | 1 | 1 | 4 | 11 | 78 | 72 | 32 | 10 | 16 | 225 |
| Percentage ... | 15·75 | 9·77 | 6·01 | 6·77 | 39·85 | 15·04 | 5·26 | ... | 1·5 | ... | ·44 | ·44 | 1·78 | 4·80 | 34·67 | 32 | 14·22 | 4·44 | 7·11 | ... |

9. The total number of dispensaries which received in-door patients was 130 against 133 in the previous year. The returns still show that the house practice of dispensaries is insignificant; and, as the Surgeon-General observes, the number of patients treated cannot be accepted as a criterion of the general health of the neighbourhood in which the dispensaries are situated. According to the returns, the larger and more useful institutions would appear to have been less resorted to than the smaller and less useful ones. The alleged improvement in the general health of the Province affords no explanation of this.

10. Less attention was paid to the inspection of dispensaries by Civil Surgeons in the year under report than in the previous years. The number of dispensaries visited once a day or frequently was 50; 51 were visited once only, 67 were twice visited, 23 three times, 12 four times, and six more than four times. Ten dispensaries were not inspected at all. The returns of work submitted by Civil Hospital Assistants are stated to be unsatisfactory and unreliable. The Surgeon-General observes that "frequent changes of person are unavoidable, and uniformity of practice difficult to secure, even in the part of the work that is most clearly defined by the rules." The gradual improvement in the quality of this class of officers will, it may be hoped, do much to remove this unsatisfactory state of things. In the meantime something can be done by increased attention to inspection.

11. The following table shows the total number of patients treated during the past 10 years and the ratio of mortality among in-patients:—

| Year. | In-patients treated | Out-patients treated. | Total. | Mortality among in-patients per cent. |
|---|---|---|---|---|
| 1876 ... ... ... ... ... ... | 23,757 | 829,804 | 853,561 | 16·96 |
| 1877 ... ... ... ... ... ... | 23,954 | 875,631 | 899,585 | 17·34 |
| 1878 ... ... ... .. ... ... | 28,473 | 927,783 | 956,256 | 20·01 |
| 1879 ... ... ... ... ... ... | 24,847 | 865,995 | 890,842 | 17·78 |
| 1880 ... ... ... ... ... ... | 23,567 | 888,095 | 911,662 | 15·17 |
| 1881 ... ... ... ... ... ... | 23,444 | 947,534 | 970,978 | 15·8 |
| 1882 ... ... ... ... ... ... | 23,468 | 934,155 | 957,623 | 15·75 |
| 1883 ... ... ... ... ... ... | 22,468 | 915,753 | 938,221 | 14·13 |

These figures do not show that there was any material change in the number of persons to whom medical aid was afforded. The percentage of mortality among in-patients was, however, the lowest of all the years in the series. The Surgeon-General rightly observes that no connection exists between the public health and dispensary practice, and it would be absurd to gauge the former by the results of the latter. In districts visited by epidemic sickness, "though local officers have made most urgent demands for medical aid, and Assistant Surgeons and Hospital Assistants have been scattered in numbers through their districts, the fixed dispensaries have as a rule remained as empty as in the healthiest years. They have given no indication of anything unusual, either before, during, or after very devastating sickness has prevailed."

12. The proportion of the number of patients treated to the total population of each division was as follows:—

| Division. | Number of patients treated per cent. of population. 1882. | 1883. |
|---|---|---|
| Burdwan ... ... ... ... | 2·26 | 2 |
| Presidency ... .. ... ... | 1·89 | 1·66 |
| Rajshahye ... .. ... ... | 2·05 | 2 05 |
| Orissa ... ... ... ... | 1·41 | 1·45 |
| Dacca ... ... ... ... | 1·005 | 1·1 |
| Chittagong ... ... .. ... | ·5 | ·58 |
| Patna ... ... ... ... | 1·92 | 1 84 |
| Bhagulpore ... ... ... ... | ·84 | ·87 |
| Chota Nagpore ... ... ... | ·49 | ·56 |

The percentage of the entire province was 1·26 against 1·38 in the previous year. Of the total number of patients treated, 59·75 per cent. were adult males, 17·02 per cent. were females, and 23·22 per cent. were children of both sexes. The percentage of European patients was ·06; that of Eurasian patients was ·28, of Mahomedan patients 31·37, of Hindus 66·24, and of other sects 2·04. The mortality among in-patients was highest at Sherepore and Deoghur, where the death-rate was 80 and 41·11 per cent. respectively, and lowest at Jagdishpore and Dhenkanal, where the death-rate was 1·92 and 1·6 respectively.

13. The quantity of cinchona febrifuge sold during the year was 286℔. against 423℔. and 3oz. in 1882, the sale proceeds in both years being Rs. 4,729 and Rs. 6,987 respectively. There was thus a considerable reduction in the quantity of febrifuge sold. Referring to this reduction the Surgeon-General remarks:—"The sale is not connected with dispensary practice, but stands in a sort of inverse relation to it, being directly determined by the prevalence or otherwise of climatic fevers. The latter certainly, as measured by the events in places of epidemic visitation, was not severe or widespread in 1883, and the sale of the febrifuge fell."

The following table exhibits the income and expenditure of the dispensaries during the year under review:—

| *Income.* | Rs. | A. | P. |
|---|---|---|---|
| Cash balance on 1st January 1883 ... ... | 67,217 | 4 | 2 |
| From Government— | | | |
| As salaries ... ... ... ... | 18,420 | 5 | 5 |
| Registers and forms ... ... ... | 1,558 | 1 | 11 |
| European medicines ... ... ... | 247 | 1 | 6 |
| For diet of police cases .. ... ... | 1,393 | 4 | 9 |
| Special allowance ... ... ... | 17,892 | 9 | 5 |
| Total ... | 39,511 | 7 | 0 |
| From local or other funds ... ... ... | 44,672 | 7 | 7 |
| Municipal funds ... ... ... ... | 1,23,057 | 3 | 7 |
| Interest on investments .. ... .. | 27,910 | 12 | 8 |
| Sale of securities or withdrawal of deposits | 15,623 | 5 | 8 |
| European subscriptions ... ... ... | 18,045 | 2 | 11 |
| Native ditto ... ... ... | 1,15,713 | 3 | 10 |
| Total Income ... | 4,51,750 | 15 | 5 |
| *Expenditure.* | | | |
| On establishment ... ... ... | 2,10,424 | 12 | 6 |
| Bazar medicines ... ... ... ... | 10,257 | 13 | 6 |
| European medicines, whether from Government store or purchased otherwise ... ... ... | 35,434 | 8 | 11 |
| Diet .. ... ... ... | 33,608 | 10 | 7 |
| Miscellaneous charges ... ... ... | 28,251 | 2 | 11 |
| Buildings or repairs .. ... ... | 42,369 | 6 | 9 |
| Invested during the year .. ... ... | 17,468 | 11 | 0 |
| Total Expenditure ... | 3,77,815 | 2 | 2 |
| Cash balance on 31st December 1883 .. ... | 73,935 | 13 | 3 |

The opening balance of the year under report is shown to be less than the balance at the close of the previous year by Rs. 1,912. This is accounted for by the omission of five municipal dispensaries from the returns, the closure of one institution from which no return has been received, and the fact that one dispensary showed Rs. 19 less than the amount shown last year.

14. The total receipts from Government amounted to Rs. 39,511 against Rs. 41,269 in 1882, thus showing a decrease of Rs. 1,758. Of this amount, Rs. 25,017 was contributed to municipal dispensaries. After deduction of the cost of registers and forms, and of diet in police cases, which the Government would contribute under any circumstances, the contribution towards municipal dispensaries amounted to Rs. 22,834 against Rs. 22,475 in 1882. Of this, Rs. 6,190 represents salaries of medical officers and Rs. 16,644 special allowances, including Rs. 12,719 spent in repairing the Mitford Hospital, Rs. 3,883 spent on the repairs of the Pooree Dispensary, and Rs. 42 travelling allowance to the Assistant Surgeon in charge of Sasseram Dispensary on the occasion of his visit to Calcutta to appear at the departmental examination. The Government contribution towards dispensaries not vested in municipalities amounted to Rs. 14,494 against Rs. 16,835 in the previous year, thus showing a decrease of Rs. 2,341.

15. The receipts from local sources other than municipalities amounted to Rs. 44,672 against Rs. 49,211 in the previous year. Of this Rs. 18,220 was received by municipal institutions. The amount of subscriptions received from Europeans was Rs. 18,045, and from natives Rs. 1,15,713. Of these sums, Rs. 53,278 were paid in aid of municipal dispensaries and Rs. 80,480 in aid of other institutions. It is believed that subscriptions to a large amount were received and absorbed in municipal revenues, and that these have not been shown in the annual statement from an erroneous idea that it is not necessary to do so. This should be definitely ascertained and remedied before the submission of the next report. The amount received by the sale of securities and withdrawal of deposits was Rs. 15,623 against Rs. 24,127 in 1882. Government paper to the value of Rs. 4,000 was sold in the interest of municipal institutions, and securities to the value of Rs. 1,000 are said to have been made over to the Satkhira Municipality, but it does not appear whether this was done by sale or otherwise. It is, however, doubtful whether the Municipal Commissioners are competent to withdraw the invested capital of medical charities under their care, and to sell the securities deposited in their favour. Rule 9, section III of the Dispensary Rules provides that in case of dispensaries vested in municipalities, the subscriptions, donations, and interest on endowments, although transferred to and vested in the Commissioners, should be held in the custody of the Controller-General, apart from municipal funds. The Lieutenant-Governor will be glad to have a report on the subject. The interest on investments amounts to Rs. 27,911 against Rs. 29,035 in 1882, showing a decrease of Rs. 1,124, of which no explanation has been given.

16. The amount contributed by municipalities was Rs. 1,23,057 against Rs. 88,663 in 1882 and Rs. 49,417 in 1881. The municipal contribution includes income from other sources besides the opening cash balance. The total expenditure of municipal institutions during the year, exclusive of investments, was Rs. 2,34,683 against Rs. 2,15,677 in 1882.

17. The gross expenditure on dispensaries, exclusive of the amounts invested, was Rs. 3,60,347 against Rs. 3,45,759 in 1882. There was increase under every head of expenditure, excepting establishment, under which there was a decrease of Rs. 6,972. The cost of bazar medicines was Rs. 10,258 against Rs 9,437 in 1882, and that of European medicines was Rs. 35,434 against Rs. 34,129 in the preceding year. The value of medicines supplied to dispensaries entirely supported by Government was Rs. 247. The cost of diet was Rs. 33,608 against Rs. 30,957 in the year before. The increase of Rs. 2,651 under this head is due to the dearness of provisions. The average cost of each diet varied from 2 annas 9 pies to 6 pies.

BENGAL SECRETARIAT PRESS.

1885.

# Report on the Charitable Dispensaries

UNDER THE

# GOVERNMENT OF BENGAL,

## FOR THE YEAR 1884.

FROM THE INSPECTOR-GENERAL OF CIVIL HOSPITALS, BENGAL,

TO THE SECRETARY TO THE GOVERNMENT OF BENGAL,
MEDICAL AND MUNICIPAL DEPARTMENT.

*Calcutta, the* 11*th September* 1885.

SIR,

I HAVE the honour to submit, for the information of the Hon'ble the Lieutenant-Governor, my administration report on the charitable dispensaries of Bengal for the year 1884.

2. Statement I exhibits the new system of classification, as laid down by the Government of India in their Resolution No. 3—163-74, dated the 7th May 1883. This system divides the several institutions into the following classes, viz., those supported by Government; those guaranteed or maintained by local funds; and those maintained by private individuals or societies or aided by provincial or local funds.

3. The number of dispensaries which have been transferred to the management of municipalities during the year 1884 was 23. There are, however, 25 dispensaries more situated within municipal limits, which have not yet been formally transferred under the management of municipal bodies; 24 of these, therefore, have been put in class IIIB and one in class IIIA.

TABLE NO. 1.

| | |
|---|---|
| Remained open on 31st December 1883 ... ... ... | 230 |
| Established during the year* ... ... ... ... | 4 |
| Total ... | 234 |
| Abolished or closed during the year† ... ... ... | 4 |
| Remaining on 31st December 1884 ... ... ... | 230 |

| | |
|---|---|
| *Bali. | †Mysadul. |
| Patuakhally. | Hitampore. |
| Nuxulbari. | Paguldighi. |
| Chanchal. | Kukurmari. |

4. On the 31st December 1883 there were 230 dispensaries open. During the year four new ones were established, viz., one at Bali, in the Howrah

district; one at Patuakhally, in Backergunge; one at Nuxulbari, in Darjeeling; and one at Chanchal, in Maldah. The undermentioned institutions were closed in the year, viz., one at Mysadul, in the Midnapore district; one at Hetampore, in the Beerbhoom district; and two, at Paguldighi, and at Kukurmari, in the Mymensingh district. The total number open on the 31st December 1884 was 230.

The returns of three dispensaries, viz., Beraria, Bali, and Chanchal, were not received.

5. During the year the following transfers and recruitments have been made to the service :—

| | | |
|---|---|---|
| Assistant Surgeons received by transfer from the Imperial list ... ... ... ... | | 21 |
| Civil hospital assistants admitted into service ... | | 29 viz :— |
| From Campbell Medical School ... ... | 20 | |
| „ Patna ditto ... ... ... | 2 | |
| „ Dacca ditto ... ... ... | 5 | |
| „ Cuttack ditto ... ... ... | 2 | |

During 1885 additional men will be required, the strength of the department having fallen. The strength of the service of Assistant Surgeons is calculated on the number of sanctioned appointments, plus a reserve of 15 per cent. on that number. This reserve is insufficient to meet all demands, and it should be raised to 20 per cent., as in the case of Civil Hospital Assistants.

6. In his Annual Report for 1883, Dr. Payne commented unfavourably on the professional ability and conduct of some of the most promising men admitted into the service from the Patna Medical School, and generally pronounced the recruitment from that school as unsatisfactory. In his Resolution on the Report, the Hon'ble the Lieutenant-Governor requested me to institute further enquiries into the matter, and lay before Government any proposals which I may think advisable, in order to remove the evils complained of. I have scrutinized the subject most carefully, but I have failed to find on what special grounds Dr. Payne's animadversions are founded.

Dr. Shaw says :—" As regards the professional training of students in the Temple Medical School, from my past connection with it, and with the Dacca Medical School, I think I am justified in stating that it does not fall short of that of the other medical schools in Bengal; and the examinations are always of a very searching character, none being passed out of the school, but those who come up to the standard of qualification, which is a high one."

" It must, however, be confessed that the raw material as it comes to us in Behar is not easy to work with. * * * * Education is not so generally advanced in Behar * * * * * and it has therefore been thought advisable to meet the capabilities of lads brought up in these districts by a low standard of general education, all that is really insisted upon being ability to read and write Urdu or Behar-Hindi with fluency, and a knowledge of arithmetic up to proportion and dictation. There is only one instance of a lad coming up with the University entrance qualification, and only two or three on an average every year can furnish the middle-English-scholarship examination certificate. Only about five per cent. of the whole number of pupils (151 on 1st April last) can read and write English with anything like fluency, and less than 20 per cent. can read and write it a little." Dr. Shaw, however, does not think that much good would accrue by the appointment of an English teacher to the school, because the pupils are too advanced in years to take kindly to the study of the language, and they have no time to devote to it.

7. Dr. Shaw has in contemplation the raising of the standard of entrance examination, and he anticipates good results from this step. He further purposes to increase the license fee to Rs. 10. Hitherto admission to the school was made far too easy. A number of scholarships will be given, varying from Rs. 4 to Re. 1 per mensem, to such students of the first year as may be found, on an examination (to be held when the classes are opened for the sessions, which will take place this year on the 21st June), to have a creditable knowledge of English. There will be in all ten scholarships. In this way it is hoped to attract a better class of pupils, whose early training will make them all the fitter to enter on their course of studies. The number of applicants will doubtless diminish, but the standard of education will be raised. There will be smaller classes, but better and more intelligent pupils.

8. I may here add that during the year under report no complaints have been made to this office of the professional inefficiency of the Patna men now in the service. Doubtless their general want of a knowledge of English, and inability to converse in Bengalee, are drawbacks to their employment in the southern and eastern districts of the province; but the steps which Dr. Shaw is now taking to raise the standard of education in the Patna School, and the excellent encouragement he is giving to all the students to study English, will, I trust, effect the desired end; and we shall soon cease to hear invidious distinctions being drawn between the men recruited from Patna and those of any other medical schools in the province.

9. The number of occasions on which committees assembled is shown below:—

*Meetings of Committees in* 1884.

| | | | |
|---|---|---|---|
| Monthly or more frequently ... | 12 | Three times ... ... | 7 |
| Eleven times ... ... | 9 | Twice ... ... | 4 |
| Ten " ... ... | 2 | Once ... ... | 7 |
| Nine " ... ... | 2 | None held, or no record of them | 23 |
| Eight " ... ... | 9 | No committee ... ... | 29 |
| Seven " ... ... | 4 | Under municipalities ... | 102 |
| Six " ... ... | 9 | | |
| Five " ... ... | 4 | Total ... | 229 |
| Four " ... ... | 9 | | |

It is evident from these figures that the interest shown by committees is not very great. There has been a slight decrease in the total number of meetings as compared with that of 1883. It is believed that, municipal bodies meet monthly, but there is no record of this. If, therefore, the 102 municipal institutions are deducted from the total number of dispensaries as well as the 29 that had no committee, it is found that of the remaining 98, the committees of only 12 acted up to a full sense of their responsibilities, while 23 abstained from meeting altogether. At least there is no record to show that they did so.

TABLE No. 2.

*Showing the work of Dispensaries grouped in the order of number treated.*

| | Indoor. | | | | | | | | | | Outdoor. | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | Under 25. | 25 to 50. | 50 to 75. | 75 to 100. | 100 to 250. | 250 to 500. | 500 to 750. | 750 to 1,000. | Upwards of 1,000. | Total. | Under 250. | 250 to 500. | 500 to 750. | 750 to 1,000. | 1,000 to 2,500. | 2,500 to 5,000. | 5,000 to 7,500. | 7,500 to 10,000. | Upwards of 10,000. | Total. |
| 1884 ... ... | 16 | 14 | 11 | 16 | 43 | 23 | 5 | 3 | 1 | 132 | 2 | ... | 3 | 11 | 68 | 79 | 36 | 11 | 19 | 229* |
| Percentage ... | 12·12 | 10·61 | 8·33 | 12·12 | 32·58 | 17·42 | 3·79 | 2·27 | ·76 | ... | ·87 | ... | 1·31 | 4·80 | 29·69 | 34·5 | 15·72 | 4·80 | 8·30 | ... |
| 1883 ... ... | 18 | 14 | 11 | 11 | 50 | 18 | 6 | 1 | 1 | 130 | .. | 1 | 3 | 11 | 75 | 75 | 32 | 10 | 16 | 223 |
| Percentage ... | 13·85 | 10·77 | 8·46 | 8·46 | 38·46 | 13·85 | 4·61 | ·77 | ·77 | ... | ... | ·45 | 1·35 | 4·93 | 33·63 | 33·63 | 14·35 | 4·48 | 7·17 | ... |

* Out of the four dispensaries that were closed, returns of medical statistics from two were received and the figures are included in the statement.

10. The total number of dispensaries which received house-patients was 132, or an increase of two over that of 1883. It has been pointed out in previous reports that the rise and fall in the number of dispensaries, and the entire number of patients treated in them being so small, consisting largely in some places of police cases, lepers, disabled paupers, and outcastes, no conclusions can be drawn from them as to the general health of neighbourhoods, save perhaps in such hospitals as those at Dacca, Durbungha, Patna, and Cuttack. The total number of patients treated in these institutions varies but little from year to year—

TABLE No. 3.

*Showing grade of officers in charge of Dispensaries.*

| | 1884. | | 1883. | |
|---|---|---|---|---|
| House Surgeon, Dacca ... ... ... | | 1 | | 1 |

| ditto, second „ ... ... ... | 20 | | 7 | |
| ditto, third „ ... ... ... | 31 | | 42 | |
| | — | 52 | — | 50 |
| Medical Graduate of East Indian Railway service ... | | 1 | | 1 |
| Civil Hospital Assistants ... ... ... | | 168 | | 164 |
| * Native doctors (private practitioners) in charge of first class institutions ... ... ... | | 7 | | 7 |
| Total ... | | 229 | | 223 |

11. The change in the disposition of officers in 1884 has not been important. There was, however, generally a feeling among local bodies to change their medical subordinates, who had earned a higher salary by virtue of departmental promotion for men of lower grades. This occurred in sub-divisional stations, and some of the medical incumbents were removed in consequence from their appointments, in accordance with the subdivisional scheme sanctioned by Government in the early part of 1884. A few of the medical subordinates thus removed were put to supernumerary duty and ultimately to appointments having less allowances, thus causing them pecuniary loss and no little discouragement.

In October 1884 the Secretary of State granted a well-deserved concession to that class of medical subordinates called supernumerary Assistant Surgeons. It was decided that supernumerary service should count towards leave and pension under the rules, and thus the unfavourable position in which supernumeraries were placed formerly in this respect has been altered and the disadvantages felt have been removed.

TABLE No. 4.

*Inspections by Civil Surgeons.*

| | Daily or frequently. | More than four times. | Four times. | Three times. | Twice. | Once. | Not inspected. | No information received. | Total. |
|---|---|---|---|---|---|---|---|---|---|
| Inspected by Civil Surgeons, 1884 ... | 50 | 4 | 11 | 32 | 72 | 41 | 17 | 2 | 229 |
| Ditto, ditto 1883 ... | 50 | 6 | 12 | 23 | 67 | 51 | 10 | 4 | 223 |

12. The figures here presented compare favourably with those of 1883. The improvement is not very great, it is true, but still it is gratifying to note

that the duty of inspection is not falling away. Seventeen dispensaries were not visited during the year; of this number eleven belonged to the district of the 24-Pergunnahs; 50 were visited "daily or frequently"; 4 more than four times; 11 four times; 32 three times; 72 twice; 41 once only, and on information was received regarding two dispensaries. The inspection reports have been carefully drawn up, and are closely searching in their interrogations. They show, on the whole, a fairly satisfactory state of things. I observe a considerable interest evoked in sanitary matters, which is a healthy sign, and one which it is to be hoped Civil Surgeons will continue to encourage. The books were, with a few exceptions, well kept, instruments clean, and generally the working of the institutions would appear to have been well done.

TABLE No. 5.

*Numbers of patients treated in* 1884 *and seven previous years, and ratio per cent. of mortality among in-patients.*

| | In-patients treated. | Out-patients treated. | Total. | Mortality among in-patients per cent. |
|---|---|---|---|---|
| 1877 ... ... ... ... ... ... ... ... ... | 23,954 | 875,631 | 899,585 | 17·34 |
| 1878 ... ... ... .. ... ... ... ... ... | 28,473 | 927,783 | 956,256 | 20·01 |
| 1879 ... ... ... ... .. ... ... ... ... | 24,847 | 865,995 | 890,842 | 17·78 |
| 1880 ... ... ... ... . ... .. ... ... | 23,567 | 888,095 | 911,662 | 15·17 |
| 1881 ... ... ... ... ... ... ... ... ... | 23,444 | 947,534 | 970,978 | 15·8 |
| 1882 ... ... ... ... ... ... ... ... ... | 23,468 | 934,155 | 957,623 | 15·75 |
| 1883 ... ... ... .. ... ... ... ... ... | 22,468 | 915,753 | 938,221 | 14·13 |
| 1884 ... ... ... ... .. ... ... ... ... | 25,077 | 965,555 | 990,632 | 14·75 |

13. The total numbers entered here show an increase of 52,411 over the work done in 1883, and if the figures are to be trusted, they represent a total number of sick as attending the dispensaries larger than those of any previous year in the list. This increase of attendance, with the exception of the Bhagulpore and Burdwan Divisions, which give a slight falling off, is pretty evenly distributed throughout the divisions in the country. I do not conclude from this that the public health in 1884 was worse than in 1883, but rather, I would place the increase to the more careful method adopted in recording entries, following on the greater attention paid by inspecting officers in scrutinizing the dispensary returns.

14. In the towns and villages, where independent medical men have set up in private practice, we no longer look for the attendance at our dispensaries of those who can afford to pay for medical advice and medicines. In some situations, not all shown in these returns, the falling off of patients at our public charities, and the slow growth of attendance at others, are no criterion that there is any real diminution in the benefits conferred on the sick poor, or that the European systems of medicine and surgery are held in less esteem by the people; but may, with every reason, be received as evidence of the fact that, whereas formerly, the better classes, having no alternative, sought relief during illness at our public hospitals, now engage for themselves and families the services of private practitioners.

15. Independent medical men have established themselves in practice throughout the country; and while many are succeeding well, the majority may be said to be gaining a fair and honourable livelihood by the exercise of their profession.

16. In Calcutta, besides numerous general practitioners, and some specialists, almost every chemist's and druggist's establishment has a medical man attached to it. Here, too, dentistry is very generally practiced. Advice and medicines in many of these shops are given gratis to the poor, and minor operations are extensively performed.

17. All this healthful outcome of our medical educational system is satisfactory. It would be unreasonable, however, to expect that, coincident with this progress, there can be any large or rapid increased attendance of patients at our public charities. This outside relief is already telling in some directions, and nowhere perhaps has it produced a greater effect than at the Medical College Hospital itself.

## TABLE No. 6.

*Total medical aid afforded by Government in Bengal.*

18. The total number of "indoor" and "outdoor" patients returned as treated in our public charities, "provincial" and "urban," during 1884 was 1,247,677, as against 1,197,939 in 1883, or an increase of the former over the latter of no less than 49,738 patients. I have already stated that I consider much of this increase due to greater attention to the records of attendance. Grave doubts have been expressed from year to year on the genuineness of the figures recorded in these tables. The returns have been considered fictitious and erroneous, sufficiently so to forbid the acceptance of the totals entered, as a record of real work accomplished. In the present table there is less reason to question their accuracy. The increase has been too evenly spread over the greater number of the dispensaries in the country. This is significant, and, considering all I have said in the preceding paragraphs, the amended results attained may be viewed, as a matter of encouragement, or as an assurance of further improvement to come.

## TABLE No. 8.

*Showing proportion of male and female adults, and of children treated in* 1884.

| | Purulia | 8·67 |
| | Palamow | 6·76 |

19. The total number of the sick poor treated at all the institutions in the year 1884 amounted to 1·49 per cent. of the whole population; ·89 were adult males; ·25 were adult females; and ·35 were children of both sexes; while the percentages according to nationality were ·001 Europeans, ·003 Eurasians, ·46 Mahomedans, ·99 Hindus, and ·03 "others."

20. The death-rates recorded in table 10 are very diverse. The mortality among "in-patients" was greatest in the Goalundo Dispensary, in the Dacca Division being 51·98, per cent., while the lowest occurred at Dhenkanal in the Orissa Division. The analysis of the figures presented in this table I shall not attempt, as my doing so could lead to no useful purpose. The mortality which takes place in these hospitals is no measure of the sickness prevailing in particular localities, nor does it bear on any other point which death-rates are known to illustrate. It represents the deaths very largely, which happen among exhausted pilgrims, decrepit paupers, and moribunds brought to the dispensaries as the only places of refuge open to them, by the police.

## TABLE No 11.

*Sale of Cinchona Febrifuge in Bengal districts.*

| YEAR. | CINCHONA ALKALOID. | | CRYSTALLINE CINCHONA FEBRIFUGE. | | TOTAL. | |
|---|---|---|---|---|---|---|
| | Quantity sold. | Value. | Quantity sold. | Value. | Quantity sold. | Value. |
| | lb. oz. dr. | Rs. A. P. | lb. oz. dr. | Rs. A. P. | lb. oz. dr. | Rs. A. P. |
| 1884 ... ... ... | 256 4 9 | 4,360 12 2 | 0 8 8 | 12 15 6 | 256 13 1 | 4,382 11 8 |
| 1883 ... ... ... | 346 9 5 | 5,844 3 6 | ...... | ...... | 346 9 5 | 5,844 3 6 |
| 1882 ... ... ... | 347 15 8 | 5,846 15 8 | ...... | ...... | 347 15 8 | 5,846 10 8 |

21. The falling off in the sale of cinchona febrifuge still continues. The amount sold in 1884 was 256lbs. 13ozs., valued at Rs. 4,382-12, against 346lbs. 9ozs., valued at Rs. 5,844 in 1883, or showing a decrease in the receipts under this head of Rs. 1,461. For this falling off in the sales of the febrifuge in the districts I can advance no satisfactory reason. It would appear, however, that dispensaries continue to purchase the drug from Government in increasing quantities, as the following table shows :—

*Sale of Cinchona Febrifuge to Provincial Charitable Dispensaries.*

| YEAR. | CINCHONA ALKALOID. | | CRYSTALLINE CINCHONA FEBRIFUGE. | | TOTAL. | |
|---|---|---|---|---|---|---|
| | Quantity sold. | Value. | Quantity sold. | Value. | Quantity sold. | Value. |

| Invested during the year ... ... ... | 12,650 | 3 | 3 |
| Total expenditure | 3,62,362 | 12 | 5 |
| Cash balance on 31st December 1884 ... | 51,636 | 15 | 4 |

23. *Opening balance.*—On 1st January 1884 there remained a cash balance of Rs. 71,421 from the preceding year. This amount is less than the closing balance of 1883 by Rs. 2,514. The closure of four dispensaries accounts for Rs. 122 and three dispensaries shewed a total deficit of Rs. 939. The remainder, viz. Rs. 1,453, is part of the amount which was omitted altogether in the return of the Bankipore dispensary, which is a municipal institution. This omission amounted to Rs. 2,036, but Rs. 583 of this has been balanced by an equivalent amount, which appears in the return of a newly-established dispensary, and which was not shown in the accounts of 1883. The Rs. 2,036 were absorbed into municipal funds, relieving them of so much expenditure on the charity, but by their omission from the statement this relief is not made apparent.

24. *Receipts from Government.*—The total receipts from Government amounted to Rs. 18,651 in 1884, against Rs. 39,511 in the previous year, and Rs. 41,269 in 1882, or of the total expenditure 5·3 per cent., 10·9 per cent., and 11·9 per cent. respectively. These amounts are composed as follows:—

| | 1882. | 1883. | 1884. |
|---|---|---|---|
| | Rs. | Rs. | Rs. |
| Municipal institutions ... ... | 24,434 | 25,017 | 5,761 |
| Other do. ... ... | 16,835 | 14,494 | 12,890 |
| Total ... | 41,269 | 39,511 | 18,651 |

If we deduct from the former set of figures the cost of registers and forms, and diet of police cases, as it constitutes contribution, which Government will continue to give under any circumstances, we find that Government contributed to institutions, that are now considered to be municipal, Rs. 22,475 in 1882, Rs. 22,834 in 1883, and Rs. 3,106 in 1884. These figures are composed of the following items:—

| | 1882. | 1883. | 1884. |
|---|---|---|---|
| | Rs. | Rs. | Rs. |
| As salaries ... ... | 18,421 | 6,190 | 3,032 |
| ,, Special allowances ... ... | 4,054 | 16,644 | 74 |
| ,, Medicines ... ... | ...... | ...... | ...... |

Under the terms of Government resolution, dated 20th February 1882, Government aid towards municipal institutions should disappear altogether, but it still continues; and in 1884, Rs. 3,032 were given towards salaries, against Rs. 6,190 in 1883, and Rs. 74, as special allowances, against Rs. 16,644. Of the Rs. 3,032, given towards salaries, Rs. 2,300 were given to the dispensaries at Ooterpara, Fenny, Palamow, and North Subarban hospital under special orders of Government, which authorize the payment under this head to be continued; Rs. 300 to Bhowanipore dispensary, before the municipality there agreed to pay the full pay of the Assistant Surgeon; Rs. 72 to Modhubani dispensary towards pay of the medical subordinate before the institution was included within municipal limits; and Rs. 360 to Sitamarhi dispensary towards the pay of the Assistant Surgeon, before his withdrawal from that charge in favour of a hospital assistant who was appointed in his stead at the request of the municipality. Of the Rs. 74 given as special allowances towards municipal institutions, Rs. 24 were spent in repairing the *post-mortem* shed kept up for judicial and medico-legal purposes at Balasore, and Rs. 50 were spent on repairs to the dispensary building at Pooree by the Public Works Department.

25. The Government contribution towards dispensaries that are not considered municipal institutions consisted of the following items:—

| | 1882. | 1883. | 1884. |
|---|---|---|---|
| | Rs. | Rs. | Rs. |
| As salaries ... ... | 14,930 | 12,231 | 10,823 |
| ,, registers and forms ... | 495 | 665 | 549 |
| ,, Europe medicines ... ... | 582 | 247 | 279 |
| For diet of police cases ... | 158 | 103 | 153 |
| As special allowances ... ... | 670 | 1,248 | 1,086 |
| Total ... | 16,835 | 14,494 | 12,890 |

There was reduction in every item but two. The total fall from 1883 was Rs. 1,604. The decrease under the head of salaries was mainly due to the withdrawal of Government aid from those institutions, whose financial condition rendered it necessary to place them in class IIIA of the rules and to the closure of one Government aided dispensary.

26. *Income from local sources—Local or other funds.*—The income from local or other funds was Rs. 35,906 against Rs. 44,672 in 1883, and Rs. 49,211 in 1882. Of these, municipal institutions received Rs. 9,340 in 1884, Rs. 18,220 in 1883, and Rs. 24,039 in 1882. There was, therefore, a reduction under this head in municipal institutions to the amount of Rs. 8,880 in 1884, as compared with 1883. In the other institutions there was an increase of Rs 113.

27. *Subscriptions.*—Subscriptions from Europeans and Natives amounted to Rs. 16,483, and Rs. 1,11,086, respectively. Comparison with the previous two years is shown below:—

| | 1882. | | 1883. | | 1884. | |
|---|---|---|---|---|---|---|
| | E. | N. | E. | N. | E. | N. |
| **Municipal institutions ...** | **15,519** | **40,365** | **14,108** | **39,170** | **13,650** | **33,786** |
| **Other ditto ...** | **3,337** | **78,179** | **3,937** | **76,543** | **2,833** | **77,300** |
| **Total ...** | **18,856** | **118,544** | **18,045** | **115,713** | **16,483** | **111,086** |

We have, therefore, as total public subscriptions to dispensaries that are not considered municipal institutions, Rs. 81,516 in 1882, Rs. 80,480 in 1883, and Rs. 80,133 in 1884. In municipal institutions the entire subscriptions amounted to Rs. 55,884 in 1882, Rs. 53,278 in 1883, and Rs. 47,436 in 1884. This shows a fall of Rs 5,842, as compared with 1883, and in 1883 of Rs. 2,606 with 1882. With reference to the falling off in the amount of private support for 1883, it was said in the last report that there was "much reason to suppose that a large amount may have been received and absorbed as municipal revenue, but not shown in the annual statement of account from an erroneous idea that it is not necessary to do so." Subsequent correspondence has revealed the fact that Rs. 2,464, received as subscriptions during 1883, were actually omitted under that head If this amount be added to the amount shown as subscription in that year, the actual amount of subscriptions for 1883 would have been Rs. 55,742. The difference therefore between this figure and that of 1884, viz., Rs. 47,436, which also appears correct, is Rs. 8,306. This fall is a large one. but it was expected for the reason given before.

28. *Sale of securities, &c.*—The amount received by sale of securities and withdrawal of deposits was Rs. 15,769, against Rs 15,623 in 1883, and Rs. 24,127 in 1882. Of these amounts municipal institutions received Rs. 8,994, Rs. 10,904, and Rs. 19,074, respectively.

| | Municipal dispensaries. | | | Other dispensaries. | | |
|---|---|---|---|---|---|---|
| | 1882. | 1883. | 1884. | 1882. | 1883. | 1884. |
| | Rs. | Rs. | Rs. | Rs. | Rs. | Rs. |
| Amount received from— | | | | | | |
| Sale of securities ... | 2,000 | 3,995 | 4,812 | ... .. | ...... | 1,980 |
| Deposits withdrawn ... | 17,074 | 6,909 | 4,182 | 5,053 | 4,719 | 4,794 |
| Total ... | 19,074 | 10,904 | 8,994 | 5,053 | 4,719 | 6,774 |

It appears that Government paper, to the value of Rs. 4,800, was sold in the interests of municipal institutions in 1884 and of Rs. 4,000 in 1883. The question as to whether these sales should or should not be made by municipal bodies is under the consideration of Government.

29. *Interest on investments*—The interest received on investments was Rs. 27,914 against Rs. 27,911 in 1883, and Rs. 29,035 in 1882, of which municipal institutions received respectively Rs. 18,300, Rs. 17,506, and Rs. 18,487.

30. *Municipal contributions.*—Municipalities contributed Rs. 1,16,766 against Rs. 1,23,057 in 1883, and Rs 88,663 in 1882. There was a fall of Rs. 6,291 under this head as compared with 1883. This fall is probably due to a better adjustment of the accounts in 1884, with reference to what was noticed last year on the subject.

31. *Expenditure.*—The gross expenditure of the dispensaries in 1884 amounted to Rs. 3,49,712 against Rs. 3,60,347 in 1883, and Rs. 3,45,759 in 1882, exclusive of the amounts invested. Thus there was a decrease of Rs. 10,635 in 1884 as compared with 1883. The fall is to be observed in all items of expenditure, except European medicines, diet and miscellaneous charges. The cost of establishment was Rs. 2,04,270 against Rs. 2,10,424, and of bazar medicines Rs. 9,581 against Rs. 10,257 in 1883. Europe medicines shewed an increase of Rs, 5,955, being Rs. 41,389 against Rs. 35,434. Medical stores were obtained from Government Store Department and from private druggists. Of the 227 dispensaries, whose accounts are given in the statement, 170 elected to obtain medicines from private sources. The value of medicines supplied to dispensaries entirely supported by Government was Rs. 279. The total amount advised by this office in 1884 for the recovery of the value of Government medical stores by the Accountant-General through

the Collectors of the districts was Rs. 6,576 inclusive of Rs. 1,788, the value of cinchona febrifuge supplied from the Botanical Gardens. Deducting this amount, plus Rs. 279 mentioned above, the balance Rs. 34,534 represent the estimated value of medical stores locally purchased by 170 dispensaries. Against this is contrasted Rs. 6,576, the value of medical stores purchased from Government depôt by 52 dispensaries. The cost of diet was Rs. 38,893 against Rs. 33,608, or an increase of Rs. 5,285. The total daily average number of in-patients was 1,165·77 against 1,054·9 in 1883; and the increase in the cost of their diet was apparently due to the increase in the daily average number of in-patients. The average cost of each diet varied from two annas nine pie to seven pie. Miscellaneous charges shewed only an increase of Rs. 21, and building charges amounted to Rs. 27,305 against Rs. 42,369 in 1883.

32. *Investments made during the year.*—The amount shown as invested during the year was Rs. 12,650 against Rs. 17,468 in 1883, and Rs. 19,758 in 1882.

The following table shows details:—

| | Municipal dispensaries. | | | Other dispensaries. | | |
|---|---|---|---|---|---|---|
| | 1882. | 1883. | 1884. | 1882. | 1883. | 1884. |
| | Rs. | Rs. | Rs. | Rs. | Rs. | Rs. |
| Amount expended for purchase of securities ... | 4,528 | 4,937 | .... | .... | .... | 2,687 |
| Amount deposited in Savings Banks ... | 8,497 | 3,181 | 1,052 | 6,733 | 9,350 | 8,911 |
| Total ... | 13,025 | 8,118 | 1,052 | 6,733 | 9,350 | 11,598 |

33. *Closing cash balance.*—The closing cash balance amounted to Rs. 51,636, viz., of Municipal institutions Rs. 22,624, and of other dispensaries Rs. 29,012.

TABLE No. 12—PART II.

34. *Total Investments.*—The following statement shews this in detail:—

| Nature of investments. | Balance on 1st January 1884. | | | Investments obtained during 1884. | | | Investments sold or withdrawn during 1884. | | | Balance on 31st December 1884. | | | Balance on 31st December 1883. | | | Balance on 31st December 1882. | | |

| Government Savings Bank. | 30,422 | 25,901 | 56,323 | 1,052 | 8,911 | 9,963 | 4,182 | 4,794 | 8,976 | 27,292 | 30,018 | 57,310 | 30,459 | 25,882 | 56,341 | 36,120 | 20,216 | 56,336 |
| Total ... | 5,59,642 | 2,37,461 | 7,97,103 | 1,052 | 11,611 | 12,663 | 8,982 | 6,794 | 15,776 | 5,51,712 | 2,42,278 | 7,93,990 | 5,59,679 | 2,37,442 | 7,97,121 | 5,63,540 | 2,31,776 | 7,95,316 |

The balance on 31st December 1883 was Rs. 8,00,370. This should be the balance at the beginning of 1884 on 1st January, but the figure shewn in the

statement on this date is Rs. 7,97,103. The difference of Rs. 3,267 is accounted for as follows :—

| | Rs. |
|---|---|
| Dispensaries which were abolished had a balance in 1883, but not in 1884 ... ... ... ... | 3,250 |
| Ditto which shew their balance less than in 1883 ... | 47 |
| | 3,297 |
| Ditto which shew their balance more than in 1883 ... | 30 |
| | 3,267 |

Though Rs. 12,663 were invested during the year, Rs. 15,776 were withdrawn, so that the difference in favour of a large decrease reduced the total investments by that amount, viz. Rs. 3,113. The total capital at the end of the year of all existing dispensaries was Rs. 7,93,990, against Rs. 7,97,121 in 1883, and Rs. 7,95,316 in 1882. Of these, Rs. 2,42,278 belonged to non-municipal institutions in 1884, Rs. 2,37,442 in 1883, and Rs. 2,31,776 in 1882. The value of Government securities shewed an increase of Rs. 700 against the two previous years. The value of investments in landed property, &c., however, remained the same. The deposits in the Savings Banks shewed an increase of Rs. 4,136 in 1884 and Rs. 5,666 in 1883.

The total capital at the end of 1884 of municipal dispensaries amounted to Rs. 5,51,712 against Rs. 5,59,679 in 1883, and Rs. 5,63,540 in 1882. The value of municipal debentures, landed property, and the amount of investments on loans remained the same in the three years. There was a decrease in the value of Government securities of Rs. 4,800 in 1884, and an increase of Rs 1,800 in 1883. The deposits in the Savings Banks also shewed a decrease of Rs. 3,167 in 1884, and of Rs. 5,661 in 1883.

35. On taking over charge of the officiating post of Surgeon-General for Bengal, I found that the work of checking and controlling the half-yearly returns of surgical instruments and hospital appliances and necessaries of all the civil medical institutions was not being done, as laid down in Government of India, Military Department, No. 75SF, dated 26th October 1881. The "partial" check alluded to in paragraph 26 of the Annual Dispensary Report for 1882 I failed to comprehend. That a proper check is very necessary is beyond question, but I found it was impossible to have it exercised with the establishment at my command, and for this reason the work is still undone.

36. I regret exceedingly the delay which has taken place in the submission of the Administration Reports; but it has been unavoidable. Permit me to recall my letter No. 6821, dated 6th October 1884, and Dr. Simpson's letter No. 1823, dated 12th March 1885, to your address, in which it was clearly represented, after the most careful and searching inquiry, that the office establishment was not equal to the entire work required to be performed by it. To this insufficient strength, and to the general increasing work to be accomplished, must be attributed the failure to carry out some duties, and the delay in the performance of others.

37. The following extracts from the Civil Surgeon's Annual Reports exhibit the working of each dispensary :—

# EXTRACTS FROM REPORTS OF CIVIL SURGEONS, &c.

## Burdwan Division.

Burdwan district.

The Civil Surgeon says that the year 1884 is considered to have been an unusually healthy one in this district, and this is confirmed by the mortuary statistics collected, the returns of the district jail and police force, and by public opinion. The mortality for the past three years was 49,297, or a rate of 35·41 per 1,000 in 1882; 39,092, or 28·08 in 1883; and 33,198, or 23·85 in 1884. There were six dispensaries at work during the year, the same as in 1883. Three in class II were in charge of municipalities, viz, Burdwan. Cutwa and Raneegunge. One in class IIIB, viz., Mancoor, was managed by a local committee, and two in class IIIA, viz., Chuckdighee and Mohata, were under private management, the same as in the previous year. The dispensaries under municipalities are reported to have a good deal of attention paid to them by the committee members, and, as a rule, are liberally dealt with; with the exception of those who are interested in supporting certain private dispensaries, the general public seem to give very little attention to such institutions. Four dispensaries received both out and in-door patients, viz., Burdwan, Cutwa, Raneegunge and Chuckdighee. Two afforded out-door relief only, Mahata and Mancoor. The total number of patients treated at all the six dispensaries was 28,801 in 1884, against 31,045 in 1883, the daily average being 264, against 263 in 1883. Three dispensaries were in charge of Assistant Surgeons viz., Burdwan, Chuckdighee and Raneegunge, and the rest in charge of Civil Hospital Assistants. The Maharaja of Burdwan supports two large dispensaries for out and in-door patients, one in the centre of the Burdwan bazar and the other at Culna, from which no returns are received

An Assistant Surgeon was deputed to this district for special duty in connection with famine relief operations. He was employed in inspecting the parts of the country where scarcity was most felt, and administering relief to any urgent cases he came across. The Assistant Surgeon afforded medical relief to some 500 persons in his journey round the district

*Burdwan.*—This is a municipal dispensary in class II. The dispensary business is conducted at the ordinary municipal meetings, which are frequently held. The Magistrate paid one visit, and a Deputy Magistrate, who is also a Municipal Commissioner, visited it twice. Certain Municipal Commissioners are selected monthly to visit the dispensary. The Civil Surgeon paid daily visits. There were treated 825 in and 10,170 out-patients, against 724 and 11,877 in 1883. The daily averages were 29 and 80, against 26 and 69. There were 147 deaths, or 17·81 per cent., against 155 and 21·4 in 1883. The high mortality continued, though much less than in 1883. A great many of the patients admitted were miserable half-starved looking pilgrims from up-country, and some were in a moribund condition There were performed 50 major and 600 minor operations, resulting in three deaths. The total expenditure was Rs. 5,017, of which Rs. 100 were paid by Government, viz., Rs. 14 as cost of registers and forms, and Rs. 86 for diet of police cases. Establishment cost Rs. 1,980, European medicines, which were purchased from private firms Rs. 633, and cinchona febrifuge Rs. 354. Dieting articles cost Rs. 1,263. Rs 725 were obtained as interest; Rs. 24 from local or other funds; Rs. 225 as subscriptions from Europeans; and Rs. 3,944 from municipal funds. At the end of the year the investde capital was Rs. 18,000,

*Cutwa.*—This is a municipal dispensary in class II. Visited once by the Magistrate and thrice by the sub-divisional officer. The Civil Surgeon paid two visits. A first class civil hospital assistant was in charge from 1st January to 17th July, when he was relieved by a 3rd grade civil hospital assistant, who continued in charge for the rest of the year. His salary, viz. Rs. 25 per mensem, was paid by the municipality. There were treated 94 in and 2,802 out-patients, with daily averages of 3 and 27. The numbers in 1883 were 74 and 2,876, and 2·8 and 26 respectively. The death-rate was 13·8 per cent., against 14·8 in 1883. Two major and 139 minor operations were performed. The total expenditure was Rs. 1,132, whereof Establishment cost Rs. 748; Europe medicines, which were purchased from private druggists, cost Rs. 117; bazar medicines Rs. 26; diet Rs. 64; building and repairs Rs. 127; and miscellaneous items Rs. 47. Government contributed Rs. 10 as cost of registers and forms. Municipality paid Rs. 1,102 and Rs. 20 were obtained as interest. At the end of the year the invested capital was Rs. 500.

*Chuckdighee.*—A class IIIA dispensary, entirely supported from the legacy, amounting to Rs. 10,000, bequeathed by the late Baboo Sharoda Prosad Rai. Visited twice by the Civil Surgeon. There were treated 189 in and 4,746 out patients against 155 and 5,818 in 1883, the daily averages being 6 and 31, against 5 and 43. The death-rate was 13·2 per cent. against 10·3 in 1883. The principal diseases were malarious fever, spleen, abscesses, skin diseases and rheumatic affections. Thirty-three major and 444 minor operations were performed. The total expenditure was Rs. 2,397. Government gave no aid except forms, which cost Rs. 12. Cinchona febrifuge to the value of Rs. 66-13 was purchased from Government. Establishment cost Rs. 1,071, European medicines Rs. 171, bazar medicines Rs. 64, and diet Rs. 257.

*Mancoor.*—This is a class IIIB dispensary. Government contributed half the salary of the civil hospital assistant. It is managed by a committee, which met eight times during the year Visited twice by the Magistrate and twice by the Civil

Surgeon. There were treated 4,075 out-patients, with a daily average of 35, against 4,465 and 37 in 1883. Six major and 244 minor operations were performed. The total expenditure was Rs. 1,393, of which Government contributed Rs. 150, viz., Rs. 143 as salaries, and Rs. 7 as registers and forms. Establishment cost Rs. 468 and European medicines, which were purchased from private druggists, Rs. 77. Cinchona febrifuge to the value of Rs 99 was obtained from Government. The expenditure on bazar medicines was Rs. 36 and on miscellaneous items Rs. 53. The total income was Rs. 1,416, of which Rs, 52 were obtained as interest, and Rs. 210 from native subscribers. There was an invested capital of Rs. 659, and a cash balance of Rs. 23, at the end of the year.

*Raneegunge.*—A municipal dispensary in class II. It was visited once by the Magistrate and twice by the Civil Surgeon. The sub-divisional officer paid frequent visits. There were 293 in and 3,507 out-patients treated against 276 and 3,401 in 1883. The daily average attendance was 8 and 27, against 8 and 30. The death-rate was 35 5 per cent. against 30·7 in 1883. The mortality at this dispensary is due, it is said, to the number of admissions of exhausted and moribund pilgrims. Thirty-six major and 423 minor operations were recorded. The total expenditure was Rs. 2 061, whereof Establishment cost Rs. 1,323 and European medicines, which were purchased from private druggists, Rs. 128; cinchona febrifuge to the value of Rs 33 was obtained from the Superintendent, Royal Botanical Gardens, Howrah; the cost of bazar medicines was Rs. 47; and of diet Rs. 181. The expenditure on building and repairs was Rs. 158; and on miscellaneous items Rs. 189. Government paid only Rs. 12 as cost of registers and forms. Municipal funds contributed Rs. 1,447. Rs. 307 were received from Europeans as subscriptions, and Rs. 295 from natives.

*Mohata.*—A class IIIA dispensary under private management. There were no regular meetings, but three were recorded. Visited once by the Magistrate and twice by the Civil Surgeon. A civil hospital assistant was in charge, who was paid Rs. 30 per mensem. There were treated 1,600 out-patients against 1,379 in 1883; the daily averages being 14·76 against 11. No in-patients. Minor operations numbered 54. The total expenditure was Rs. 568, of which Rs. 420 represent cost of establishment. European medicines, which were purchased locally, cost Rs 95; bazar medicines Rs. 20; and miscellaneous items Rs. 33. Government contributed Rs. 7 as cost of registers and forms.

**Bankoora district.** The Civil Surgeon states that the general health of the district has much improved. The total number of recorded deaths being 19,032, or a rate of 18·27 per cent. of population, against 21,121, or 20·27 in 1883; and 33,559, or 32·2 per cent. in 1882. There were four dispensaries at work in the district during the year. Two of these, viz., one at Bankoora and another at Bishenpore, were in class II, being under the municipalities of those towns. The institutions at Maliarah and Ajodhya were in class IIIB, and under the management of local committees, Government paying the half pay of the medical subordinates. All the dispensaries were in charge of civil hospital assistants. Two of these institutions, viz., Bankoora and Bishenpore, treated both in and out-door patients; the other two, viz., Maliarah and Ajodhya, only out-door. The number of patients treated was 425 in and 15,307 out-door against 310 and 14,286 in 1883, the daily averages being 17 and 122 against 11 and 110 in 1883 respectively. The Civil Surgeon states that these figures may be accepted as correct. A fair amount of interest is said to be shown by the managing bodies of all the four institutions.

*Bankoora.*—This is a municipal dispensary in class II, managed by the local municipality. It was visited four times by the Magistrate, frequently by the Municipal Commissioners, and daily by the civil Surgeon. A civil hospital assistant was in charge. The number of patients treated was 372 in and 4,682 out, against 229 and 4,364 in 1883. The daily averages were 15 and 52 against 8 and 46 respectively. There were 37 deaths, or 9·94 per cent. of cases treated. The Civil Surgeon says that these deaths, for the most part, occurred in pilgrims to Juggernath, who, worn out by disease and want, crawled to the hospital to die. One hundred and ninety-seven major and 796 minor operations were performed, with five deaths. The total expenditure was Rs. 2,120, of which Rs. 954 represent the cost of establishment, Rs. 414 of Europe medicines, and Rs. 141 of country medicines. Dieting of in-patients cost Rs. 355. The expenditure on miscellaneous charges was Rs. 69, and on buildings Rs. 186. Government contributed Rs. 69, viz., Rs. 22 as cost of forms, and Rs. 47 as diet of police cases treated. Municipality paid Rs. 1,444, and Rs. 550 were obtained by withdrawal of deposits; Rs. 22 from local or other funds, and Rs. 26 were derived as interest on investments. At the end of the year the dispensary had no cash balance.

*Bishenpore.*—It is a municipal dispensary, and is in class II. Visited once by the Magistrate, frequently by the sub-divisional officer, and three times by the Civil Surgeon. A civil hospital assistant was in charge. The number of patients treated was 53 in and 4,801 out against 81 and 2,866 in 1883 The daily averages were 1.83 and 32·86, against 2 and 20 respectively. There were 8 deaths against 13 in 1883. Fifteen major and 262 minor operations were performed. The total expenditure was Rs. 975, of which Rs. 561 were expended on establishment, Rs. 244 on English medicines, Rs. 34 on bazar medicines, Rs. 69 on diet, and Rs. 24 on buildings and repairs. The expenditure on miscellaneous items was Rs. 42, Government paid Rs. 17, viz, Rs. 7 for diet of police cases and Rs. 10 for register and forms, municipality paid Rs. 946, and Rs. 13 were obtained as interest on investments.

*Makarah.*—It is a class IIIB dispensary under the management of a local committee, which met only once during the year. It was visited once by the District Magistrate and twice by the Civil Surgeon. A civil hospital assistant was in charge. The number of out-patients treated was 2,806, with a daily average of 16 against 3 296 and 20 in 1883 respectively. No in-patients. Eleven major and 98 minor operations were performed. The total expenditure was Rs. 449, whereof Rs. 244 represent the cost of establishment. Rs. 119 of Europe medicines and Rs. 30 of bazar medicines. The expenditure on miscellaneous items was Rs. 25. Government contributed Rs. 96, viz. Rs. 88 for salary and Rs. 8 for registers and forms. Subscriptions from natives amounted to Rs. 480. Sum of Rs. 31 was received as interest on investments, which were invested during the year. The dispensary had a cash balance of Rs. 605 and an invested capital of Rs. 862 at the end of the year.

*Ajodhya.*—It is a class IIIB dispensary managed by a committee, which met four times during the year. Visited once by the Magistrate and thrice by the Civil Surgeon. A civil hospital assistant is in charge. Three thousand and eighteen out-patients were treated with a daily average of 21·60 against 3,760 and 22 in 1883. No in-patients. Seven major and 182 minor operations were performed. The total expenditure was Rs. 588. Government contributed Rs. 150 as half pay of the medical subordinate. The expenditure on establishment was Rs. 295, on Europe medicines Rs. 105, on country medicines Rs. 12, on buildings Rs. 9, and on miscellaneous items was Rs. 41. The income from native subscriptions was Rs. 360, and Rs. 24 were received as interest on investments. During the year Rs. 124 were invested.

**Beerbhoom District.**

The public health of the district during the year under report is stated to have made a decided improvement on that of the year preceding it. The total number of recorded deaths was 20,668 against 20,634 in 1883 and 27,285 in 1882, and 25,557 in 1881, and though the district mortality shows an excess of 34 over 1883, the Civil Surgeon says that "it must be borne in mind that cholera, which is an exotic disease, numbered nearly 1,000 more victims this year than the last and contributed to keep up the death rate; otherwise fever deaths which constitutes the standard of unhealthiness was less." There were three dispensaries at work in the beginning of the year in the district, viz., Soory, Rampore Hat, and Hetampore. The latter receded from Government supervision and established itself as an independent institution. At the end of the year there remained only two dispensaries; one of these (Soory) belonged to class II, being under the local municipality, and the other at Rampore Hat to class IIIB, the half-pay of the medical officer of which is paid by Government. Both these dispensaries received in and out door patients. There were treated 154 in and 12,385 out patients against 153 and 17,433 in the previous year. No comparison can be made of the latter, inasmuch as the figures of 1883 referred to joint number of three institutions, and in the current year to that of two only. The daily averages were 4 and 102 against 4 and 154 respectively. These were calculated on patients who personally attended for medicine, and not from the number of days medicines were supplied. The dispensary at Rampore Hat was in charge of an Assistant Surgeon, and at Soory under a civil hospital assistant. The municipal members at the Sudder station are said to take active interest in the institution. The zeal and interest of the Rampore Hat Committee, says Dr. Roy, are on the wane.

*Soory.*—It is a class II municipal dispensary. Visited once by the Commissioner of the division, eleven times by the Municipal Commissioners, and daily by the Civil Surgeon. There were treated 55 in and 8,964 out patients against 54 and 8,907 in 1883; the daily averages being 2 and 81 against 1 and 80 respectively. There were 10 deaths, or 18·18 per cent. against 11, or 20·37 in the previous year. The heavy death-rate was, it is reported, owing to the selection exercised in the admission of patients for treatment, only those having been received who were seriously ill, such as requiring a serious operation, or were too weak to attend. Thirty-seven major and 359 minor operations were performed. The total expenditure amounted to Rs 1,613. Government contributed Rs. 25, viz. Rs. 21 as cost of forms and registers, and Rs. 4 for diet of police cases. Rs. 940 represent the cost of establishment, Rs. 292 of Europe medicines, and Rs. 50 of bazar medicines; Rs. 43 were spent for dieting of patients; Rs. 191 on buildings and repairs, and Rs. 96 on miscellaneous items. The total income of the dispensary was Rs. 1,613, European and native subscriptions were Rs. 197, Rs. 18 were received from local or other funds. Municipality paid Rs. 1,372. There was an invested capital of Rs. 783 in the beginning of the year, which was left untouched.

*Rampore Hat.*—It is a class IIIB dispensary, governed by a committee presided over by the sub-divisional officer. Owing chiefly to pressure of work on account of famine, Dr. Roy believes, the affairs of the institution did not receive due attention this year from that body. Only three meetings were held. It was inspected once by the District Magistrate and thrice by the Civil Surgeon. The Railway Assistant Surgeon continued in charge. He received Rs. 25 per mensem from Government, and Rs. 25 from the dispensary fund. The number of patients treated was 99 in and 3,421 out door against 99 and 3,343 in 1883. The daily average attendance was 2 and 21 against 3 and 17. The in-patients in this dispensary are chiefly railway servants. There were three deaths or 3·03 per cent. Four major and 229 minor operations were recorded. The total expenditure was Rs. 1,107, of which Rs. 840 represent the cost of establishment, Rs. 71 of English medicines, and

Rs. 76 of bazar médicines. The expenditure on diet was Rs. 9, on buildings Rs. 35, and on miscellaneous items Rs. 75. Government paid Rs. 304, viz., Rs. 300 as salaries, Rs. 4 as cost of registers and forms, Rs. 732 were obtained as subscriptions from Europeans and natives. The subscriptions this year have fallen short by Rs. 270. The expenses have been more than the income, and the dispensary contracted debts to the amount of Rs. 71 by the end of the year.

Midnapore district.

The Civil Surgeon says that, with the exception of rather severe local outbreaks of cholera, the year was a healthy and favourable one for the people of the district. There were at the end of the year 10 dispensaries working in the district. Of these, six were in class II, being municipal institutions, and four in class IIIB. Of the 10 dispensaries, three afforded in-door as well as out-door relief. A few pilgrims were also sheltered and dieted at Gurbetta, but there was no regular in-door establishment there. Midnapore, Contai, Tumlook, and Ghatal dispensaries were in charge of Assistant Surgeons. The rest were under civil hospital assistants. The total number of patients treated was 608 in and 40,447 out against 696 and 40,885 in 1883. The daily averages were 34 and 306 against 35 and 284. Those figures, the Civil Surgeon says, were more reliable than those of 1883, and on the whole as correct. The affairs of the dispensaries under municipalities were as usual transacted by the municipal committees. The local committees of the other institutions met fairly regularly as in 1883. With regard to the interest taken by managing bodies, the Ghattal and Narajole dispensaries were not visited at all by any member of the Committee. Ramjebunpore and Chunderkona only once. Dantoon, Contai, and Midnapore each three times. Khirpye and Gurbetta are said to have been visited often, but the visits were not recorded, while Tumlook was visited 26 times.

*Midnapore.*—A municipal dispensary in class II, visited once by the Magistrate and three times by the Municipal Commissioners. The Civil Surgeon visited daily or oftener. There were 502 in and 10,998 out patients treated against 527 and 13,946 in 1883, the daily averages were 29 and 67 against 27 and 84. A second grade Assistant Surgeon was in charge, who was assisted by a supernumerary civil hospital assistant. The Civil Surgeon attributes the decrease in the attendance of out-patients to the improvement of the health of the town and its vicinity as regards fever. The increase in the daily average number of in-patients was chiefly in respect of females, 8·42 against 6·07. Besides the patients noted above, a daily average of 12 paupers were lodged, clothed, and fed as in 1883, and 25 paupers daily received alms in the shape of pice and clothing twice in the year, as provided for in the Pierce endowment. The death-rate among in-patients was 29 per cent. against 24 in 1883; the increase is said to have been chiefly due to the greater number of cholera cases. There were 150 deaths altogether, of which 28 were from cholera; the others were as usual from dropsy, bowel-complaints, debility, leprosy, &c. The death-rate must always be high where so many incurable and moribund cases are admitted as they are here. Sixty-five pilgrims were admitted during the year, of whom 17 died against 42 in 1883. The Civil Surgeon says that two circumstances may account for this improvement in health of pilgrims traversing the district in common with improvement of public health generally, and the use of the pilgrims' road outside the town having been more strictly enforced. The medical officer suspects that sick pilgrims are now more often carried on by their friends along this road, who would otherwise have come into hospital. The Civil Surgeon states that "the error in classification pointed out in last year's return in respect of 'other local diseases' has not been repeated, and the adoption of a more correct method of classification has caused some difference under certain other heads." There were 114 major operations: one half of them were performed by the Civil Surgeon and the remainder by the Assistant Surgeon. The death-rate was 8·7 per cent. against 8·8 in 1883 and 9·8 in 1882. Four hundred and thirty-four minor operations were recorded. The total expenditure was Rs. 4,581, whereof Rs 2,007 represent the cost of establishment, Rs. 178 of Europe medicines, and Rs. 120 of bazar medicines Rs. 1,263 was the cost of diet, and Rs. 697 were spent on miscellaneous charges. Government contributed Rs. 67, viz. Rs 18 as cost of forms and registers, and Rs. 49 for diet of police cases. The total income of the dispensary was Rs. 4,581 including Government contribution. Rs. 16 were obtained from local sources. Rs. 1,118 from municipality, Rs. 963 as subscription, and Rs. 530 as interest on investments. The dispensary had an invested capital of Rs. 19,379 at the end of the year.

*Contai.*—A class IIIB dispensary. There is no municipality in the sub-division. The institution is managed by a local committee, which held 11 meetings. Visited once by the District Magistrate, thrice by the sub-divisional officer and thrice by the members of the Committee. The Civil Surgeon inspected once. An Assistant Surgeon was in charge. There were treated 1,757 out-patients against 2,066 in 1883, the daily average being 10 against 15. Two major and 59 minor operations were performed. The total expenditure amounted to Rs. 644, of which Rs. 401 represent the cost of establishment, Rs 84 of Europe medicines which were obtained from a private vendor, and Rs. 12 of country medicines. The expenditure on miscellaneous items was Rs. 46, and on buildings and repairs Rs. 21. Government supplied forms and registers, the cost of which was Rs. 6. Subscriptions from Europeans and natives amounted to Rs. 397. Rs. 63 were obtained as interest on investments, and Rs. 150 by withdrawal of deposits. Rs. 79 were invested during the year. The financial condition of this dispensary is good. The Magistrate suggests the opening of an in-patient ward, but the Civil Surgeon does not think that there is

a demand for it, and judging by the results elsewhere, Dr. Tomes doubts much whether the benefits afforded would be at all commensurate with the extra outlay involved.

*Ghatal.*—A sub-divisional dispensary in class II under the management of the local municipality. The affairs of the institution are transacted at the municipal meetings. An Assistant Surgeon in medical charge of the sub-division was in charge. Visited twice by the sub-divisional officer. The Civil Surgeon inspected the dispensary twice. There were treated 68 in and 3,392 out-patients against 67 and 3,612 in 1883, the daily averages being 3 and 34 against 2 and 31. There were 14 deaths among the in-patients, or 20·58 per cent. against 15, or 22·3 in the previous year. Eight major and 179 minor operations were performed. The total expenditure was Rs. 1,059, whereof Rs. 487 were expended on establishment, Rs. 219 on Europe medicines, which were obtained from a private firm, and Rs 21 on country medicines. The expenditure on diet was Rs. 108, on buildings and repairs Rs. 149, and on miscellaneous items Rs. 73. The entire cost of the dispensary was borne by the municipality, who paid Rs. 950. Government contributed Rs. 28, viz, Rs. 11 as cost of forms and registers, and Rs. 17 for diet of police cases. No subscriptions.

*Tumlook.*—A sub-divisional dispensary in class II under the management of the local municipality. The affairs of the dispensary are considered at the municipal meetings. Visited twice by the Magistrate, once by the Civil Surgeon, and 26 times by the Chairman and Municipal Commissioners. An Assistant Surgeon was in charge. There were 38 in and 4,852 out patients treated against 60 and 4,928 in 1883. The daily averages were 1 and 32 against 3 and 30. The attendance was correctly recorded by the Assistant Surgeon. There were eleven deaths among the in-patients, or 28·9 per cent. against 8·3 in 1883, but in that year there were no cholera in-patients. There was an outbreak of cholera in the town of Tumlook. Fifty-five cases were treated at or by the dispensary, seven cases were admitted as in-patients, of whom four died. No major operations; 443 minor operations were performed during the year. The total expenditure was Rs. 862, whereof Rs. 450 represent the cost of establishment, Rs. 155 of Europe, and Rs. 25 of country medicines. The expenditure on diet was Rs. 44, on buildings and repairs Rs. 109; and on miscellaneous items Rs. 78. Government supplied forms and registers, the value of which was Rs. 11. Municipality paid Rs 150, and subscriptions from natives amounted to Rs. 257-12. Rs. 20 were obtained from local funds.

*Chunderkona.*—A class II dispensary under the management of the local municipality. Visited once by the Magistrate. The Deputy Magistrate or sub-divisional officer of Ghatal visited it once. The Vice-Chairman and one of the Municipal Commissioners visited the institution once. The Civil Surgeon inspected it twice. The dispensary affairs were transacted at the municipal meetings, of which there were 15 during the year. There were 5,784 out-patients treated against 6,360 in 1883, the daily average being 26 against 29. Seven major (all reduction of dislocations) and 86 minor operations are said to have been performed by the civil hospital assistant. The total expenditure was Rs. 700. Government paid Rs 11, the value of forms and registers. The expenditure on establishment was Rs. 466, on Europe medicines Rs. 148, and on bazar medicines Rs. 25. Rs. 25 were spent on buildings, and Rs. 36 on miscellaneous items. Municipality paid Rs. 634.

*Narajole.*—A class IIIB dispensary managed by a local committee who held five meetings against six in 1883. Once visited by the Magistrate, and once by the Civil Surgeon. Out patients numbered 3,020 against 2,753 in 1883, the daily average being 30 and 26. No major operations. One hundred and sixty-five minor operations were performed. The total expenditure was Rs. 808, of which Rs. 457 represent the cost of establishment. Government contributed Rs. 221, viz., Rs. 210 as salaries and Rs. 11 as cost of forms and registers. The expenditure on Europe medicines was Rs. 110, on bazar medicines Rs. 26, on buildings Rs. 13, and on miscellaneous items Rs. 39. Subscriptions from natives amounted to Rs. 480; Rs. 55 were obtained by withdrawal of deposits, and Rs. 37 as interest on investments. During the year Rs. 162 were invested.

*Gurbetta.*—A class IIIB out-door dispensary managed by a committee, which met 11 times. Once visited by the Magistrate. The members of the committee did not record any single visit, but they are said to have held their meetings at the dispensary. The Civil Surgeon inspected the institution twice. Government paid half the salary of the hospital assistant. There were treated 1,430 out-patients against 1,591 in 1883, the daily averages being the same as in the previous year, viz 13. There has been a steady falling off in the attendance at the dispensary during the past few years, due more to the want of zeal in the officers in charge, than to improvement of public health. One hundred and four minor operations are recorded against 87 in 1883. No major operations. The total expenditure was Rs. 524, of which Rs. 357 represent the cost of establishment. Government contributed Rs. 151, viz. Rs. 145 as salaries, and Rs. 6 as cost of forms and registers. The cost of Europe medicines was Rs. 53 and of bazar medicines Rs. 9, Rs. 42 were spent on buildings, and Rs. 57 on miscellaneous items. Subscriptions from Europeans were Rs. 240, and from natives Rs. 138. Rs. 6 were received as interest on investments. At the end of the year there was a cash balance of Rs. 104.

*Dantoon.*—A class IIIB out-door dispensary managed by a local committee, with the Munsiff as Vice-Chairman, as at Gurbetta, who held seven meetings. Twice visited by the District Magistrate, thrice by the members of the committee. The Civil Surgeon inspected it once. Out-patients numbered 2,867 against 3,609, the daily averages being 20

and 25. The fall in the daily average attendance, says the Civil Surgeon, was due to the improvement in the health of the circle. Eighty-three minor operations were performed. No major operations. The total expenditure was Rs. 593, whereof Rs. 320 represent the cost of establishment, Rs. 133 of Europe medicines, and Rs. 31 of country medicines. The expenditure on buildings was Rs. 5, and on miscellaneous items Rs. 42. Government contributed Rs. 135, viz., Rs 124 as salaries, and Rs. 11 as cost of forms and registers. Rs. 415 were realized as subscriptions. Rs. 60 were obtained by withdrawal of deposits and annas 13 and pies 6 were obtained as interest on investments. Rs. 61 were invested during the year. There was a cash balance of Rs. 39 at the end of the year. The dispensary is a tumbled-down mud hut off the main thoroughfare. Early in the year, the Civil Surgeon says that he asked the Magistrate to go up for a Government contribution towards the erection of a good pucca building on a site upon the pilgrim road. The Magistrate supported the Civil Surgeon's recommendation, and Government has sanctioned a grant of Rs. 500 in March 1884. Local contributions have been promised to that extent, and a site given free of cost. A plan and estimate have been drawn up, and the works entrusted to the committee to carry out. They have not exerted themselves, and nothing has yet been done.

*Ramjibunpore.*—This is a municipal dispensary in class II. Its affairs are considered at the municipal meetings Thrice visited by the sub-divisional officer, once by the Municipal Commissioners, and twice by the Civil Surgeon. A civil hospital assistant was in charge throughout the year. His salary was paid entirely by the municipality. There were treated 2,709 out-patients with a daily average of 29. Two major and 67 minor operations were performed by the hospital assistant. The total expenditure was Rs. 695, whereof Rs. 348 represent the cost of establishment, Rs. 170 of Europe medicines, Rs. 30 of bazar medicines, and Rs. 145 of miscellaneous items. Government supplied forms and registers, the value of which was Rs. 11; municipality paid Rs. 684. The Civil Surgeon states that this town and its vicinity in former years have suffered severely from malarial fever. It is healthier now, but the bulk of the population is cachectic. Ninety per cent. of the attendance consists of fever cases and spleen or other sequelæ.

*Khirpye.*—This is a class II out-door dispensary under the management of the local municipality. The affairs of the dispensary are considered at the municipal meetings, of which there were 14 during the year. Visited once each by the Magistrate and the sub-divisional officer. The Commissioners are said to have visited frequently, but they left no record. Twice inspected by the Civil Surgeon. A civil hospital assistant was in charge throughout the year. His entire pay was paid by the municipality. There were 3,638 out-patients treated with a daily average of 41. Two hundred and seven minor operations were performed: no major operations. The total expenditure was Rs. 793, whereof Rs 389-8 represent the cost of establishment, Rs. 220 of Europe medicines, and Rs. 14 of country medicines; the expenditure on buildings was Rs. 10, and on miscellaneous charges Rs. 159. Government supplied forms and registers, the value of which was Rs. 11. Municipality paid Rs. 770, and subscriptions from natives amounted to Rs 11. There was no cash balance at the end of the year.

**Hooghly District.** The Civil Surgeon has submitted a complete report. The public health of the district during the year 1884 was, on the whole better than during the preceding year. The total number of registered deaths was 13,475 against 14,204 in 1883. The total number of dispensaries in the district was four. Two of these were in class IIIA and two in class IIIB. The dispensaries are said to be appreciated by the people, and the managing bodies take considerable interest in their affairs. With regard to Jehanabad dispensary, however, the Assistant Surgeon reports that "it was fairly appreciated by the poor."

*Emambarah Hospital.*—This is a class IIIA institution under the management of a committee consisting of the *mutualee*, the local agents, and the Civil Surgeon. No regular committee meetings are held, but the accounts are checked monthly in the local agent's office. Visited occasionally by the Magistrate and his subordinates to take the depositions and dying declarations of wounded patients, &c., sent to the hospital by the police. The Civil Surgeon visited it daily. There were treated 731 in and 11,524 out-door patients against 667 and 11,951 in 1883. The daily average numbers were 25 and 51 against 22 and 57 respectively. There were 166 deaths against 112 in 1883. The large number of deaths was, it is stated, owing to moribund cases sent to the hospital by the police. Fifty-two major and 568 minor operations were performed. The total expenditure was Rs. 7,099, whereof Rs. 3,587 represent the cost of establishment. Government paid Rs. 8-10 in registers and forms The costs of Europe and bazar medicines were Rs. 940 and Rs. 127 respectively, of diet Rs. 822, on buildings Rs. 104, and on miscellaneous items Rs. 1,517. European medicines were purchased from private dealers.

*Jehanabad.*—This dispensary is in class IIIB, and is managed by a local committee (appointed by Government), which held eight meetings during the year. Visited once by the Commissioner of the Division, once by the District Magistrate and once by the sub-divisional officer. The Civil Surgeon inspected it once, the place being difficult of access. A third grade Assistant Surgeon was in charge. The total number of patients treated was 11 in and 2,833 out against 2,889 out-door only, in 1883. The daily average was ·21 in and 18·75 out against 22 out-door only in the previous year. There were two deaths

among the in-door patients. These were the moribund cases sent to the dispensary by the police. Nine major and 101 minor operations were performed. The total expenditure was Rs. 1,637, whereof Government paid only Rs. 2 as registers and forms. Rs. 1,230 were obtained from municipal funds, Rs. 28 from local or other funds, and Rs. 364 as subscriptions from natives. Establishment cost Rs. 1,363. European medicines, which were purchased from private druggists, cost Rs. 106 and bazar medicines Rs. 25. The expenditure on diet was Rs. 13, on miscellaneous items Rs. 44, and on buildings and repairs Rs. 84. There was a closing balance of Rs. 19.

*Behary Lall Charitable Dispensary, Boinchee.*—It is a class IIIA dispensary, managed by a committee consisting of the District Collector, the Deputy Inspector of Schools, and the Civil Surgeon. Visited once by the District Collector and twice by the Civil Surgeon. An Assistant Surgeon was in charge. There were treated 53 in and 3,535 out-door patients against 3,590 (out-door only) in 1883, with a daily average of 1·74 in and 26 66 out-door against 25 out-door only. Out of 53 in-door patients eight died. One hundred and seventy-five minor operations were performed. The total expenditure was Rs. 2,195, of which Rs. 1,470 was the cost of establishment. Government contributed Rs. 2 as cost of forms. European medicines, which were purchased from Calcutta, cost Rs. 356, bazar medicines Rs. 32, miscellaneous items Rs. 280, and diet Rs. 56. The cash balance at the end of the year was Rs. 693.

*Dwarbassiny.*—A class IIIB dispensary. It is managed by a Committee which held 12 meetings during the year. Visited once by the Joint-Magistrate of Hooghly, and twice by the Civil Surgeon. There were treated 4,152 out-patients against 3,802 in 1883, the daily average number of sick was 21·4 against 20·5 in the previous year. Minor operations numbered 205. No major operations. The total expenditure was Rs. 717, whereof establishment cost Rs. 438. Europe medicines, which were purchased from Government stores, cost Rs. 103, bazar medicines Rs. 22, and miscellaneous items Rs. 13. Government contributed Rs. 122, viz., Rs. 120 for half the salary of the civil hospital assistant, and Rs. 2 as cost of registers and forms. Rs. 13 were obtained as interest on investments, Rs. 103 were withdrawn from invested capital. Rs. 480 were received as subscriptions from natives. There was no closing cash balance, but Rs 141 were invested.

**Serampore sub-division.**

The public health of the sub-division was fair, but not quite so good as in the previous year, neither was it so good as the average standard of health gauged by the mortality of the preceding quinquennial period. Fever and small-pox were the most prevalent diseases in the sub-division. Cholera was less during the year. There were four dispensaries at work at the end of the year; three were in class II, managed by municipalities, and one in class IIIB, aided by Government. All these were in charge of civil hospital assistants. Of these, Serampore hospital treated both in and out-door patients; the rest out-door patients only. The number of patients treated was 526 in and 14,049 out against 445 and 14,588 in 1883. The daily average numbers were 17·27 in and 103·19 against 16 and 106 respectively. All these are useful institutions, and receive a fair share of attention from the governing bodies, and are appreciated by the people.

*Serampore.*—It is a municipal dispensary, and is in class II. Visited five times by the sub-divisional officer, and almost daily by the civil medical officer. The Municipal Commissioners held 11 meetings during the year. The civil hospital assistant is substantively attached to the dispensary, and is paid Rs. 25 per mensem from the municipal fund. The number of patients treated was 526 in and 4,860 out against 445 and 4,312 in the preceding year. The daily average numbers were 17·27 and 38·84 against 16 and 35·9 respectively. The number of deaths was 128, or 24·33 per cent., against 111, or 24 9 in 1883. The majority of these deaths were among the beggars, pilgrims or coolies. Thirty-seven major operations were performed. Minor operations numbered 409. The total expenditure was Rs. 2,871, whereof Government contributed Rs. 26, viz. Rs. 7 as cost of forms, and Rs. 19 for dieting of police cases. The cost of establishment was Rs. 981, of Europe medicines Rs. 114, and of bazar medicines Rs. 65. Diet cost Rs. 653. The expenditure on buildings and repairs was Rs. 795, and on miscellaneous items Rs. 262 Municipality paid Rs. 1,069, and subscriptions from Europeans were Rs 915, and from natives Rs. 211.

*Rishra.*—A class II institution under the management of Serampore municipality, who hold monthly meetings and oftener when required. There were 11 meetings in 1884. Once visited by the sub-divisional officer, who recorded no remarks. The civil medical officer visited it five times. It was in charge of a civil hospital assistant. Out-patients numbered 2,491 against 3,877 in 1883, and the daily average was 13 against 20. Two hundred and twenty-nine minor operations were performed No major operations. The total expenditure was Rs. 591, of which Government contributed Re. 1 only as cost of forms and registers. Rs. 498 were spent on establishment, Rs. 40 on English medicines, and Rs. 19 on country medicines. The expenditure on miscellaneous items was Rs 33, Municipality paid Rs. 155 and subscriptions from Europeans and natives were Rs. 280 and Rs. 35 respectively. There was no cash balance at the end of the year.

*Boidyabati.*—A municipal dispensary in class II. The Municipal Commissioners held 12 meetings during the year. Visited twice by the sub-divisional officer, and three times by the civil medical officer. A civil hospital assistant was in charge. The number of out-door patients treated was 4,470 against 4,175 in 1883, the daily average being 31·95 and 30 respectively. There were no major operations. Minor

operations numbered 284. The total expenditure was Rs. 611, of which Government paid Rs 3 as cost of forms. The cost of establishment was Rs. 505. European medicines obtained from Government stores cost Rs. 43, and bazar medicines Rs. 27. Rs. 36 were spent on miscellaneous items. Rs. 33 were obtained as interest on investments, Rs. 145 and Rs. 6 as subscriptions from Europeans and Natives respectively.

*Bundipora.*—It is a class IIIB dispensary, supported by a single individual, aided by Government and managed by a local committee nominated by the founder of the institution, who held 11 meetings during the year. It was visited twice by the sub-divisional officer of Serampore, and once by the civil medical officer. A civil hospital assistant was in charge. There were 2,228 out-patients treated with a daily average of 19 against 2,224 and 20 in 1883. No in-patients. Minor operations numbered 96. No major operations. The total expenditure amounted to Rs. 692, whereof Government contributed Rs. 121, viz., Rs. 120 as salary of the medical subordinate and Re. 1 as cost of forms. The cost of establishment was Rs. 300. Europe medicines, bought from Government stores, cost Rs. 73 against Rs. 117 in 1883. Bazar medicines cost Rs. 33, and Rs. 19 were paid for miscellaneous items. Subscriptions from natives amounted to Rs. 480, and Rs. 69 were obtained by withdrawal of deposits, and Rs. 22 as interest on investments. Rs. 267 were invested during the year.

Howrah District.

*Ooterparah.*—It is a municipal dispensary, and is in class II. Government contributes the entire salary of a third grade Assistant Surgeon. It is under the management of the Ooterparah Municipality. Visited twice by the Civil Surgeon. The number of patients treated was 254 in and 3,618 out against 280 and 3,534 in 1883. The daily averages were 12 and 23 against 10·9 and 25 respectively. There were 44 deaths, or a rate of 15·7 per cent. Twenty-four major (chiefly setting of fractures) and 426 minor operations were performed. The total expenditure was Rs. 2,917, of which Rs. 1,903 represent the cost of establishment. The cost of Europe medicines was Rs. 85, of bazar medicines Rs. 55, and of diet Rs. 479. The outlay on buildings was Rs. 233 and on miscellaneous items Rs. 161. Government paid Rs. 1,200, the entire pay of the medical officer. The amount of European and native subscriptions was Rs. 120 and Rs. 1,650 respectively. Municipality paid nothing.

*Ooloobariah.*—It is a class IIIA dispensary. The institution was established and sanctioned by Government order No. 1221, dated 24th October 1883, and managed by a committee, which held six meetings during the year. Once visited by the Civil Surgeon. The Assistant Surgeon of the sub-division was in charge. There were treated 75 in and 2,516 out-patients, the daily averages being 2 and 38 respectively. There were seven deaths among in-patients, or a rate of nine per cent. Eighteen major and 185 minor operations were performed. No deaths resulted after operation The total expenditure was Rs. 1,101, whereof Rs. 407 represent the cost of establishment, Rs. 19 of Europe medicines, and Rs. 21 of bazar medicines. The expenditure on diet was Rs. 42, on buildings Rs. 394, and on miscellaneous items Rs. 216. Rs. 35 were obtained from local funds. Subscriptions from Europeans and natives were Rs. 140 and Rs. 501 respectively.

## Presidency Division.

District of 24-Pergunnahs.

Dr. Jackson has submitted a full and complete report containing criticisms on all matters of importance on the working of the dispensaries in the district. The public health of the district during the year 1884 is stated to have been generally good, though isolated cases of cholera and small-pox were reported from some parts of it.

There were in all 16 dispensaries working in the district at the end of the year under report. No dispensary was opened, nor any closed during the year. Six were in class II, four in class IIIA, being entirely under private management, and six in class IIIB, being under private management, but aided by Government. Four were in charge of Assistant Surgeons, and twelve under that of Civil Hospital Assistants. The North Suburban Hospital and the dispensaries at Barisha, Diamond Harbour, Russapagla, Baraset, and Gobardanga, treated both in-door and out-door patients; the rest are only out-door institutions. There were treated 834 in and 57,714 out-patients as compared with 936 and 55,341 in 1883; the daily averages were 42 and 476 against 43 and 468 respectively. There was thus a decrease of 102 in-door and an increase of 2,373 out-door patients in 1884. The Civil Surgeon says that "no means have been taken to verify the figures: it is not possible to do so in detail. It is less possible now than formerly when the residence of each patient was inserted in the register. This custom has been abolished, and enquiry, even if attempted, would be impossible. The civil surgeon has the fullest confidence on the records of the North and South Suburban Hospitals, Bhowanipore, Russapagla, Harinavi, Goberdanga, Naihati, and Baraset dispensaries. Those of the North and South Barrackpore dispensaries, he believes, are also reliable. The Deputy Magistrate of Diamond Harbour takes an interest in his dispensary, and its returns are doubtless true but insignificant. With regard to the interest shown by the managing bodies towards these institutions, Dr. Jackson says: "the best dispensaries in this district are Bhowanipore, North Suburban, Russa, Barisha, Harinavi, Naihati, and Goberdanga. The first is under the municipality, but no interest whatever is displayed by the members of the municipality on its working.

The North Suburban has an active and interested and hardworking Secretary in Dr. Waldie, but the Committee rarely meet or visit the dispensary. Russa is almost never visited, but excellent work is done there. At Harinavi and Naihati the local Municipal Commissioners do interest themselves in the institutions. Goberdanga thrives well under the eye of the zemindar, who supports it, and whose house is close by." The Civil Surgeon says that he does not think "that dispensaries are so well attended *by the poor* as they were. There is always some local feud among the headmen of the little towns in which the dispensaries lie, and it is not easy for the hospital assistant to keep aloof. If he joins one party, the others are against him, and abuse him. If he is independent and impartial *all* abuse him. If he is really attentive to his duties and looks after the poor, he is unpopular, and anonymous petitions come in against him. If, on the other hand, he neglects the poor, and is very attentive to the members of the local committee and their families, he is what is called "very popular," and is much praised. I believe that on the whole the dispensaries thrive best, and are most efficient where they are let alone, or visited by a civil officer occasionally. It is certainly the case with the dispensaries in this district."

*North Suburban Hospital.*—This institution belongs to class IIIB, and is managed by a committee composed of Europeans and natives, of which Dr. Waldie, the Honorary Secretary, is said to take great interest in all matters affecting the dispensary. There were four meetings. The Civil Surgeon inspected it once. Assistant Surgeon Jadub Kristo Sircar returned from leave on the 1st of July 1884, and continued in charge throughout the rest of the year. Assistant Surgeon Nemai Churn Chatterjee having been in charge from the beginning of the year up to the end of June. As regards their fitness, the Civil Surgeon says that "Assistant Surgeon Jadub Kristo Sircar is an efficient and attentive officer. He is a good Surgeon, and interested in his work. His conduct has been in all respects satisfactory, and as a practitioner he is much above the average." Government has agreed to bear one-half of the salary of the Assistant Surgeon in charge of the dispensary (B. G. No. 302, dated 30th January 1884, Medical), and the Government aid of Rs. 100 per month as such was thus reduced to Rs. 50 from February 1884. The other half is met from the dispensary fund. There were treated 464 in and 4,305 out patients against 500 and 4,207 in 1883: the daily averages were 26 and 38 against 25 and 36 respectively. The year was a healthier one. There was no epidemic of any disease, the usual outbreak of cholera at Chitpore was wanting this year. There were 34 deaths, or a rate of 7·3 per cent. of the patients treated against 84 and 6·8 in the previous year. Ten deaths occurred among patients admitted in a moribund condition against six in 1883. One hundred and twelve cases of major operations were treated during the year, of which 109 were new, or 27 more than the number of 1883. There was no death after major operations Minor operations numbered 509 against 498 in 1883. The total expenditure was Rs. 4,185, of which Government contributed Rs. 738, viz. Rs. 697 as salary of the medical subordinate, Rs. 33 as diet of police cases, and Rs. 8 as cost of registers and forms. The cost of establishment was Rs. 2,255, of Europe medicines Rs. 195, and of bazar medicines Rs. 131. Dieting articles cost Rs. 1,147, and Rs. 384 were expended on miscellaneous items. The expenditure on buildings and repairs was Rs. 71. Besides the Government contribution, the income from local sources amounted to Rs. 4,846. The financial condition of the dispensary is said to have improved year by year. Excluding the cash balance, and the invested money on 1st January 1884, the dispensary had an income of Rs. 5,584 from different sources, and an expenditure of Rs. 4,185, thus leaving a surplus of Rs. 1,399. There is an invested capital of Rs. 17,500. The dispensary had Rs. 3,393 in cash at the end of the year 1884.

*Barisha.*—A class IIIB institution, managed by the South Suburban Municipality. It has not yet been formally vested in it. There is no Dispensary Committee now, but the Secretary of the defunct Dispensary Committee is still retained. No visit by any civil officer is recorded. The Civil Surgeon inspected it once. A civil hospital assistant was in charge throughout the year, who was paid Rs. 55 per month by the municipality. There were treated 92 in and 4,918 out patients, against 74 and 5,245 in 1883; the daily averages were 1·82 and 37·13, against 1·9 and 33 in the previous year. In 1884 there were seven deaths, or a rate of 7·60, against 12 and 16·2 in 1883. The general health was better in 1884 than in the preceding year. Neither fever nor cholera prevailed in an epidemic form. The former appeared here and there, and in a very few cases proved fatal. Fifty major and 379 minor operations were performed. One death resulted after operation. The total expenditure was Rs. 1,330, whereof Rs. 1,003 represent the cost of establishment. The cost of Europe medicines was Rs. 166, and of bazar medicines Rs. 25. Rs. 68 were spent for diet of patients. The expenditure on miscellaneous items was Rs. 68. Government contributed Rs. 3 for forms and registers. Municipality paid Rs. 1,328.

*Bhowanipore.*—A municipal dispensary in class II managed by the Suburban Municipality. The Civil Surgeon inspected the dispensary four times. Third grade Assistant Surgeon Rammoy Roy was in charge throughout the year. The municipality having agreed to pay the full salary, Rs. 100 per month, of the Assistant Surgeon in charge, the Government grant of Rs. 50 per month was discontinued from June 1884 (Bengal Government No. 641T—M, dated 21st May 1884). The Assistant Surgeon is reported to be an exceptionally able practitioner; very punctual and attentive; a good surgeon; and kind to the poor:

equal to a much more important charge. There were treated 12,221 out-patients with a daily average of 89, against 11,010 and 86 in 1883: no in-patients. The general health was not so good as in 1883. Cholera and fever were present almost throughout the year: small-pox was also prevalent in 1884. One hundred and twelve major and 1,434 minor operations were performed. The total expenditure was Rs. 1,762, whereof Government contributed Rs. 313, viz. Rs. 300 as half salary of the medical subordinate and Rs. 13 as cost of forms and registers. The cost of establishment was Rs. 1,548. Rs. 96 were spent on Europe medicines, namely, Rs. 66 as cost of cinchona febrifuge purchased from Government Quinologist, and Rs. 30 of medicines obtained from private dealers, Rs. 49 on bazar medicines, and Rs. 69 on miscellaneous items. Municipality paid Rs. 1,195. Interest on investments amounted to Rs. 244, and Rs. 9 were obtained from other sources. The dispensary had an invested capital of Rs. 5,800 in Government promissory notes at the end of the year.

*Agarparah or Khurdah.*—A (class II) municipal institution. There is a managing committee which met 12 times; visited once by the District Magistrate, and three times by the Cantonment Magistrate of Barrackpore. The Civil Surgeon paid no visits during the year. A civil hospital assistant was in charge throughout the year, who received Rs. 30 per mensem from the municipality. It is an out-door institution. The number of patients treated was 1,760 with a daily average of 19, against 1,598 and 19 in 1883. One hundred and forty-six minor operations were performed: no major operations. The total expenditure was Rs. 599, of which Rs. 432 represent the cost of establishment, Rs. 117 of Europe medicines, and Rs. 7 of bazar medicines. The expenditure on miscellaneous items amounted to Rs. 29, and on buildings Rs. 13. Government supplied forms and registers, the cost of which was Rs. 2. Municipality paid Rs. 596.

*Nawabgunge.*—This is a class IIIB out-door institution managed by the North Barrackpore Municipality, but not yet formally vested in it. There is a separate dispensary committee which met 12 times during the year. The Cantonment Magistrate of Barrackpore visited the dispensary 12 times, but did not record his remarks, except on the 4th December last. The Civil Surgeon paid no visits. A civil hospital assistant was in charge, who was paid Rs. 35 per mensem by the municipality. There were treated 1,813 out-patients, against 1,689 in 1883, the daily average being 16 and 17 respectively. One hundred and twenty-five minor operations were performed: no major operation. The total expenditure was Rs. 587, whereof Rs. 492 represent the cost of establishment. The cost of Europe medicines was Rs. 41, and of bazar medicines Rs. 19. The amount expended on miscellaneous items was Rs. 35. The cost of forms and registers obtained from Government was Rs. 2. Municipality paid Rs. 584.

*Diamond Harbour.*—It is a class IIIA sub-divisional dispensary managed by a Committee which held six meetings during the year. Visited frequently by the sub-divisional officer. The civil hospital assistant of the sub-division was in charge up to 30th April 1884, who was succeeded by a third grade Assistant Surgeon. This arrangement was made in accordance with the orders contained in Government of Bengal resolution dated 7th February 1884, in which a third grade Assistant Surgeon was sanctioned for the sub-division. The civil hospital assistant received Rs. 10, and the Assistant Surgeon Rs. 20 from the dispensary fund. There were treated 18 in and 1,256 out patients, against 45 and 1,263 in 1883. The daily averages were ·52 and seven, against one and eight respectively. Most of the in-door patients were sent up by the police. There were three deaths, or a rate of 16·6 per cent. of total treated, against two, or 4·4 in the previous year. Eighty-five minor operations were performed: no major operation. The financial condition of the dispensary has improved this year. The total expenditure was Rs. 1,701, whereof Rs. 296 represent the cost of establishment. The cost of Europe medicines was Rs. 72, of bazar medicines Rs. 15, and of diet Rs. 7. The expenditure on miscellaneous items was Rs. 12, and on building Rs. 30. Government contributed Rs. 9, namely Rs. 2 as cost of forms and registers, and Rs. 7 for diet of police cases. Rs. 1,419 were obtained from local or other funds. In order to meet the deficiency, the Government has sanctioned (Bengal Government No. 1204, dated 27th November 1884) to invest one-half of a sum of Rs. 1,569 collected for the construction of a dispensary building, and to use the interest accruing therefrom. The balance will be used for erecting the building. Subscriptions from Europeans and natives were Rs. 8 and Rs. 266 respectively, and Rs. 16 were received as interest on investments. Rs. 1,269 were invested during the year.

*Canning Town.*—A class IIIA dispensary managed by a private committee which met 12 times during the year. Visited once by the Deputy Magistrate of 24-Pergunnahs. A civil hospital assistant was in charge, whose entire pay was paid from the dispensary fund. There were treated 923 out-patients with a daily average of nine, against 934 and nine in 1883. Sixty-six minor operations were performed: no major operations. The total expenditure was Rs. 548, of which Rs. 384 were the cost of establishment, Rs. 113 of Europe medicines, and Rs. 15 of country medicines. Rs. 17 were spent on miscellaneous items. Government contributed forms and registers, the cost of which was nominal, namely, annas eleven only. The income of the dispensary was Rs. 555, including annas eleven contributed by Government. Subscriptions from natives and Europeans were Rs. 260 and Rs. 220 respectively, Rs. 35 were withdrawn from the savings bank, and interest on investments was Rs. 18. The dispensary had a deposit of Rs. 488 in the savings bank at the end of the year.

*Naihati.*—It is a class IIIB institution supported and managed by the local municipality, but has not yet been formally vested in it. The District Magistrate and the Deputy Sanitary Commissioner each paid a visit to the dispensary. The Civil Surgeon paid no visit. A civil hospital assistant was in charge, who received Rs. 50 per mensem from the municipality. There were treated 4,742 out-patients, with a daily average of 36, against 3 960 and 30 in 1883. No in-patients. Four major and 199 minor operations were performed. No deaths resulted after operation. The total expenditure was Rs. 1,237, of which Rs. 818 were the cost of establishment, Rs. 181 of Europe medicines, and Rs. 20 of bazar medicines. The expenditure on buildings was Rs. 192, and on miscellaneous items Rs. 25. Government contributed forms and registers, the cost of which was Rs. 3. Beside Government contribution the total income was Rs. 1,234 which consisted of Rs. 100 realized as subscriptions from natives, Rs. 96 obtained from other sources, Rs. 374 paid by the municipality, and of Rs 664 cash balance in hand on the 1st January 1884. There was no cash balance at the end of the year.

*Russapagla.*—It is a class IIIA dispensary supported by private endowments and managed by a Committee. Only one meeting was held in 1884. Visited thrice by the District Judge and twice by the district treasury officer, and several times by the District Engineer. The Civil Surgeon inspected the dispensary four times. An Assistant Surgeon was in charge, who received Rs. 100 per month from Prince Gholam Mahomed's Trust Fund on account of the dispensary and Rs. 50 from Political Pensions Department on account of the Mysore family dispensary. There were treated 156 in and 6,253 out patients against, 208 and 6,214 in 1883 : the daily averages were eight and 60, against eight and 58. There were 21 deaths, or 13·46 per cent. of treated, against 21 and 10·09 in the previous year. Eighty two major and 441 minor operations were performed. The total expenditure was Rs. 3,880, whereof Rs. 2,159 represent the cost of establishment. The cost of Europe medicines, obtained from the Government store was Rs. 457, of bazar medicines Rs. 68, and of diet Rs. 492. The expenditure on buildings was Rs. 470, and on miscellaneous items Rs. 233. Government contributed registers and forms, the cost of which was Rs. 8. The dispensary is entirely supported from interests of endowments of the late Prince Gholam Mahomed. The trust fund is under the management of Government. The dispensary had Rs. 1,32,000 in Government promissory notes at 4 per cent. interest, and a cash balance of Rs. 8,589 in hand on 31st December 1884.

*Harinavi.*—A municipal institution in class II managed by the Rajpore Municipality. Neither the civil officers of the division or district nor the Civil Surgeon visited the dispensary. A civil hospital assistant was in charge who received his entire pay from the municipality. There were treated 6,047 out-patient with a daily average of 39, against 6,507 and 41 in 1883 : no in-patients. Six major and 316 minor operations were performed. The total expenditure was Rs. 968, of which Rs 567 represent the cost of establishment. Rs. 359 were paid for Europe medicines during the year, namely Rs. 200 to Government for medicines obtained in 1883, and Rs. 159 to private dealers for medicines purchased during the year. Bazar medicines cost Rs. 20, and Rs. 21 were spent on miscellaneous items. Government contributed Rs 7 for forms and registers. Subscriptions from natives were Rs. 255 : municipality paid Rs. 634.

*Baraset.*—A dispensary in class II managed by the local municipality, but the former Dispensary Committee was also retained. There were nine meetings of the committee during the year. Visited once by the District Magistrate and thrice by the sub-divisional officer. The Civil Surgeon inspected it once. A second grade Assistant Surgeon was in charge up to 24th October 1884, when he retired on pension, and was succeeded by a third class civil hospital assistant, agreeably to Bengal Government resolution dated 7th February 1884, which provided a civil hospital assistant for the Baraset sub-division. The Assistant Surgeon received Rs. 25 per month from the dispensary fund on account of the dispensary, Rs. 125 from Government on account of the sub-division, and Rs. 20 from Government as Deputy Superintendent of the sub-jail. The civil hospital assistant received Rs. 10 per month from the dispensary fund on account of the dispensary, Rs. 25 from Government on account of the sub-division, and Rs. 10 from Government for executive charge of the sub-jail. There were treated 99 in and 3,856 out patients, against 98 and 4,076 in 1883. The daily averages were four and 29, against five and 33 respectively. There were 17 deaths, or a rate of 17·17 per cent., against four and 4·08 in the previous year. Thirty-six major and 356 minor operations were performed. The total expenditure was Rs. 962, of which Rs. 555 were the cost of establishment, and Rs. 116 of Europe medicines. Bazar medicines cost Rs. 58. The expenditure on diet was Rs 180, on buildings Rs. 6, and on miscellaneous items Rs. 45. Government contributed nothing. No forms and registers were received in 1884. The income of the dispensary was Rs. 962, namely, Rs. 305 as subscriptions from natives and Rs. 45 as interest on investments. Municipality paid Rs. 610. The dispensary had an invested capital of Rs. 1,140 at the end of the year.

*Tara Sankar Chowdhuri's dispensary at Taki.*—A class IIIB dispensary maintained by the local zemindar and aided by the municipality. It is managed by a committee, which held 12 meetings during the year. Visited once by the District Magistrate. The Civil Surgeon paid no visits. A civil hospital assistant was in charge, who received Rs. 40 per month—half from municipal and half from dispensary funds. The number of outpatients treated was 911, against 984 in 1883, the daily averages being 12 and 16 respectively.

Seven major and 121 minor operations were performed. The total expenditure was Rs. 800, of which Rs. 663 represent the cost of establishment, Rs. 72 of Europe medicines, and Rs. 8 of bazar medicines. The amount expended on miscellaneous items was Rs. 36 inclusive of the value of forms and registers supplied by Government, which was Rs. 5. The total income was Rs. 923. On the 31st December 1884 the dispensary had a cash balance of Rs. 123 and an invested capital of Rs. 1,070, viz. Rs. 500 in Government promissory notes and Rs. 570 in savings bank.

*Basirhat.*—A class IIIB dispensary aided by the local municipality, in which it has not yet been formally vested. The committee met five times during the year. It was visited once by the District Magistrate, and several times by the sub-divisional officer, but the latter did not record his remarks. The sub-divisional civil hospital assistant was in charge and received Rs. 10 from the municipality, Rs. 25 from Government for sub-division, and Rs 10 for executive charge of the sub-jail. There were treated 1,313 out-patients with a daily average of 11, against 1,041 and 10 in 1883. No in-patients. Three major and 77 minor operations were performed. The total expenditure was Rs. 283, of which Rs. 150 were the cost of establishment, Rs. 80 of Europe medicines, namely Rs. 55 as part payment of medicines purchased from private dealers, and Rs. 25 paid to Government for cinchona febrifuge. Rs. 14 were expended on bazar medicines, Rs. 20 on buildings, and Rs. 18 on miscellaneous items, which includes the cost (Rs. 3) of forms and registers supplied by Government. Municipality paid Rs. 280.

*Goberdanga.*—This is a class IIIA dispensary managed by its proprietor Baboo Girija Prosonno Mookerjee, the local zemindar. There is no committee. Visited once by the District Magistrate. No visits were paid by the Civil Surgeon. A civil hospital assistant was in charge, whose entire pay was paid from the estate of the proprietor. There were treated five in and 3,886 out patients, against 11 and 4,523 in 1883. The daily averages were 0·28 and 30, against ·8 and 35 respectively. There were two deaths, or a rate of 40 per cent. of the total treated. Twenty major and 404 minor operations were performed. The total expenditure was Rs. 2,010, of which Rs. 777 represent the cost of establishment, Rs. 159 of Europe medicines, viz. Rs. 110 paid to Government for medical stores received in 1883 and Rs. 49 paid for cinchona febrifuge received in 1884. The cost of bazar medicines was Rs. 16. The expenditure on diet was Rs. 3, on miscellaneous items Rs. 28, and on buildings Rs. 1,025. Government supplied forms and registers the cost of which was Rs. 6.

*Barripore.*—It is a municipal dispensary in class II managed by the local municipality. Visited once each by the Joint-Magistrate and Chairman of the Barripore Municipality and the Officiating Superintendent of Vaccination. A civil hospital assistant was in charge, who received Rs. 25 monthly from the municipality. Two thousand four hundred and ninety-five out-patients were treated with a daily average of 27, against 1,087 and 24 in the previous year. Seventy-two minor operations were performed: no major operation. The total expenditure was Rs. 640, of which Rs. 467 represent the cost of establishment, Rs. 115 of Europe medicines, and Rs. 12 of bazar medicines. The expenditure on miscellaneous items was Rs. 44. Government contributed Rs. 3 in forms and registers; municipality paid Rs. 482; subscriptions from natives were Rs. 152.

*Baduria.*—This is a municipal dispensary in class II managed by the local municipality. Visited once by the District Magistrate. The Civil Surgeon paid no visits. A civil hospital assistant was in charge, who received Rs. 25 per month from the municipality. There were treated 1,015 out-patients with a daily average of nine against 1,003 and six in 1883. Thirty-seven minor operations were performed: no major operation. The total expenditure was Rs. 1,075, whereof Rs. 432 represent the cost of establishment, Rs. 188 of Europe medicines purchased from private druggists, and Rs. 7 of bazar medicines. The expenditure on buildings was Rs. 348, and on miscellaneous items Rs. 100. Government contributed Rs. 4 in forms and registers. Municipality paid all the expenses.

Khoolna district.

The report has been submitted by Assistant Surgeon Khurgeshur Bose, who was in civil medical charge of the district from July 1884. It has been forwarded by the Commissioner of the division with useful remarks on the working of the institutions. The year under report has been stated to have been an unhealthy one, and this fact is corroborated by the mortuary returns, the total number of recorded deaths being 26,689, against 23,025 in 1883, or 24·71, against 21·31 per 1,000 of population. The total number of dispensaries working in the district at the end of the year was five. Of these one was in class II, two in class IIIA, and two in class IIIB. The dispensaries at Khoolna, Satkhira, and Bagirhat received both in-door and out-door patients; the other two only out-door patients. All the institutions were in charge of civil hospital assistants. The total number of patients treated was 139 in and 7,773 out, against 153 and 7,532 in 1883, the daily averages being five and 71, against five and 75 respectively. With regard to these, the civil medical officer says that the figures of the Khoolna dispensary are correct, and those of Bagirhat, Satkhira, and Dowlutpore are reliable; but regarding those of Shamnugger, the civil medical officer could not pass any opinion as he has not had any opportunity to inspect the dispensary. The managing bodies, with the exception of a few individual members, took no interest for the welfare of the institutions. The meetings were generally not well attended, nor the well-to-do people were willing to help the institutions with subscriptions. In fact every one of the dispensaries of this district owed its existence to some individual energies,

and not to any combined effort, notwithstanding the fact that the Municipal Commissioners of Satkhira visited their dispensary from time to time. The civil medical officer says that no dispensary does one quarter of the good that it has the power to do, and which it might be expected to do. People will not go to dispensary for medicine or advice, except in very occasional cases.

*Khoolna.*—This is a class II dispensary managed by a committee presided over by the District Magistrate. Eight meetings were held during the year. Mr. Clay, the President of the committee, took a great interest in its welfare, and had the dispensary building thoroughly repaired at a considerable expense of his own. Visited once by the Commissioner of the division, and constantly by the Magistrate; but no remarks were made in the visitors' book. The Assistant Surgeon in charge of the civil station visited the dispensary every morning, and sometimes twice a day. A civil hospital assistant was in charge, who received Rs. 10 only from the dispensary fund and his grade pay from Government. There were treated 29 in and 2,709 out patients, against 2,648 out-patients in 1883; the daily averages were one and 18, against 19 only in the preceding year. There were two deaths among in-patients. Five major and 107 minor operations were performed. One death resulted after operation. The total expenditure was Rs 533, whereof Government contributed Rs. 17, viz. Rs. 5 for forms and registers and Rs. 12 for diet of police cases. The cost of establishment was Rs. 263, of Europe medicines, obtained from private druggists, Rs. 73, and of bazar medicines Rs. 39. The amount expended on diet was Rs. 24, on buildings Rs. 42, and on miscellaneous items Rs. 34. The subscriptions amounted to Rs. 335; Rs. 96 were obtained from local funds; Rs. 55 were invested during the year.

*Satkhira.*—This is a class IIIB dispensary aided and managed by the local municipality in which it has not yet been formally vested. It was visited twice by the District Magistrate, twice by the sub-divisional officer, and 10 times by the Municipal Commissioners. The civil medical officer inspected it twice during the year. The sub-divisional civil hospital assistant was in charge, who received Rs. 40 from the dispensary fund. There were treated 75 in and 1 987 out patients, against 108 and 1,995 in 1883. The daily averages were two and 15, against three and 10 respectively. There were 13 deaths, or a rate of 17·3 per cent. of the total treated, against six and 5·5 in the previous year. Five major operations, with one death, were performed : minor operations numbered 100. The total expenditure was Rs. 977, whereof Government contributed Rs. 14, namely Rs. 9 as cost of registers and forms and Rs. 5 for diet of police cases, Rs. 591 represent the cost of establishment, Rs. 202 of Europe medicines purchased from private dealers, and Rs. 41 of bazar medicines. The expenditure on diet was Rs. 77, on buildings Rs. 3, and on miscellaneous items Rs. 62. Municipality paid Rs. 922. Rs. 40 were obtained as interest on investments : the dispensary had an invested capital of Rs. 1,000 on the 31st December 1884.

*Bagirhat.*—This is a class IIIA dispensary managed by a local committee, which met five times during the year under report. Visited twice by the civil medical officer. No visits were paid by the Commissioner and the District Magistrate during the year. A second class civil hospital assistant attached to the sub-division is in charge, who gets Rs. 20 from the dispensary fund under a special order of Government, as the new sub-divisional scheme provides only a third class hospital assistant for the sub-division. There were treated 35 in and 1,153 out patients, against 45 and 946 in 1883, the daily averages being ·82 and seven, against one and six respectively. There was only one death during the year. Forty-seven minor operations were performed : no major operation. The total expenditure was Rs. 474, whereof Government paid Rs. 3 for forms and registers. Rs. 9 were paid for the dieting of patients, and Rs. 74 represent the cost of Europe medicinies, which were obtained from private druggists. The cost of establishment was Rs 344 and of bazar medicines Rs. 13. The outlay on buildings was Rs. 11, and on miscellaneous items Rs. 12.

*Dowlutpore.*—It is a class IIIB dispensary managed by a committee which met 11 times during the year. Visited once by the District Magistrate and twice by the civil medical officer. A civil hospital assistant was in charge, whose entire pay Rs. 35 was paid by Government. The number of out-patients treated was 1,325, against 1,176 in 1883 : the daily average was the same as in the previous year, viz. 15. One hundred and seventy-two minor operations were performed : no major operation. The total expenditure was Rs. 2,391, whereof Rs. 478 represent the cost of establishment. Government contribution amounted to Rs. 409, viz. Rs. 406 as salaries of the medical subordinate, and Rs. 3 as cost of forms and registers. The cost of Europe medicines was Rs. 105, and of bazar medicines Rs. 10. The expenditure on miscellaneous items was Rs 483. The income of the dispensary from local or other funds was Rs. 820. Subscriptions from natives were Rs. 55, and interest on investments Rs. 33. At a meeting during the year the managing committee have written off Rs. 463 from the account, as the amount was considered irrecoverable, having been lapsed to Government from the old criminal deposits at the Jessore treasury. Rs. 1,314 were invested during the year. There was a cash balance of Rs. 21 on the 31st December 1884.

*Shamnaggur.*—This is a class IIIA dispensary supported entirely by Sreemutty Nistariny Dabya, and managed by a private committee, which held 12 meetings during the year. No visits were paid by civil officers, nor by the Assistant Surgeon in medical charge of the civil station. A civil hospital assistant was in charge, who received Rs. 25 a month from the dispensary fund. The number of patients treated

was 599 out-door, against 767 in 1883, the daily average being 14·94, against 21. There were no in-patients. Thirty-four minor operations were performed: no major operation. The total expenditure was Rs. 524, whereof Rs. 465 represent the cost of establishment. Government paid Rs. 3 as cost of forms and registers. The cost of European medicines obtained from private druggists was Rs. 29 and of bazar medicines Rs. 11. The expenditure on miscellaneous items was Rs. 19. Subscriptions amounted to Rs. 600. There was a cash balance of Rs. 546 at the end of the year.

Nuddea district.

The report of the Civil Surgeon has been forwarded by the Commissioner of the division with his usual remarks on the working of the dispensaries. The public health of the district, says the Civil Surgeon, was not so good as in 1883, but somewhat better than in 1882 as was apparent from the mortuary returns, the death-rate among the general population being 39, against 36 and 40 respectively. There were six dispensaries in the district at the end of the year. Of these, the dispensary at Kooshtea was under the supervision of the civil medical officer of Goalundo, who has submitted a separate report. All the dispensaries in this district are under municipalities and in class II. The dispensary at Kishnaghur was under the charge of an Assistant Surgeon; the rest were under that of civil hospital assistants. Those at Kishnaghur, Ranaghat, and Meherpore received both in-door and out-door patients; the rest out-door patients only. The total number of patients treated at these dispensaries including the one at Kooshtea was 239 in and 12,481 out, against 249 and 13,864 in the previous year. The daily averages were 11 and 127, against 10 and 140 in 1883 respectively. These figures, says the Civil Surgeon, are reliable. The local municipalities at Kishnaghur, Santipore, and Meherpore are said to take creditable amount of interest in their institutions. "The institutions," Dr. Russell says, "seem well appreciated by the people in the larger towns; less so perhaps in the smaller ones, such as Ula."

*Kishnaghur.*—This is a municipal dispensary in class II. There is a sub-committee to administer the affairs of the institution. This committee held 12 meetings. Visited once by the Commissioner of the division, twice each by the Magistrate and Judge of the district. The Civil Surgeon inspected it frequently during the year. An Assistant Surgeon was in charge, who received Rs. 100 a month from the municipality, and an allowance of Rs. 50 from Government for attendance on the Kishnaghur College. There were treated 205 in and 5,261 out patients, against 232 and 5,843 in 1883, the daily averages being nine and 51, against 10 and 50 respectively. There were 28 deaths, or a rate of 13 per cent., against 28 and 12·06 in 1883 Twenty-eight major and 419 minor operations were performed. One death resulted after operation. The total expenditure was Rs. 2,745, whereof Rs. 1,578 represent the cost of establishment. Europe medicines, which were obtained from private druggists, cost Rs. 399; bazar medicines Rs. 27. Government contributed Rs. 11 for registers and forms. Rs. 322 were spent for dieting of patients, Rs. 71 on buildings, and Rs. 347 on miscellaneous items. The municipality paid Rs. 2,423, and subscriptions from Europeans and natives amounted to Rs. 137 and Rs. 173 respectively.

*Ranaghat.*—It is a municipal dispensary in class II. There is a managing municipal sub-committee which met 12 times during the year. Visited once by the Commissioner of the division, twice by the Magistrate of the district, three times by the Civil Surgeon, and four times by the sub-divisional officer. A civil hospital assistant is in charge. He gets his grade pay from Government for sub-division and Rs. 10 from the municipality for dispensary. There were treated 31 in and 1,871 out patients, against 14 and 1,445 in 1883. The daily averages were one and 22, against ·12 and 19 respectively. There were seven deaths among the in-patients, against four in 1883. One hundred and twenty-four minor operations were performed: no major operation. The total expenditure was Rs. 580, of which Government paid Rs. 4 in forms and registers. Rs. 340 represent the cost of establishment, Rs. 92 of Europe medicines, which were obtained from private dealers. Bazar medicines cost Rs. 9. Rs. 115 were expended on buildings, and Rs. 12 on miscellaneous items. The expense for dieting of patients was Rs. 11. Municipality contributed Rs. 561, against Rs. 458 in 1883. The dispensary had an invested capital of Rs. 405 at the end of the year, which was deposited in the district savings bank.

*Santipore.*—This is a municipal dispensary, and is in class II. Managed by a municipal Sub-Committee during the early portion of the year. Latterly the dispensary affairs were transacted at ordinary municipal meetings. The sub-committee held two meetings during the year. Visited once by the District Magistrate and twice by the Civil Surgeon. A civil hospital assistant was in charge, who received Rs. 30 per mensem from the municipality. There were treated 1,400 out-patients with a daily average of 18, against 1,399 and 22 in 1883 No in-patients. One hundred and one minor operations were performed: no major operation. The total expenditure was Rs. 775, of which Government paid Rs. 3 in forms and registers. Rs. 552 represent the cost of establishment. Rs. 52 were spent on Europe medicines, which were obtained from private druggists, Rs. 23 on bazar medicines, Rs. 84 on buildings, and Rs. 64 on miscellaneous items. Municipality paid Rs. 636, and Rs. 135 were obtained as interest on investment. The dispensary had an invested capital of Rs. 3,378 at the end of the year, deposited in the savings bank.

*Ula*—Is under the local municipality, and therefore in class II. Its business is transacted at ordinary municipal meetings. Visited once by the District Magistrate. The Civil Surgeon paid three visits and the sub-divisional officer one. A civil hospital assistant is in charge, who

gets Rs. 30 per mensem from the municipality. The number of out-patients treated was 1,297 with a daily average of 11, against 1,837 and 21 in 1883. This shews considerable falling off in total numbers, and more so in daily average. The civil hospital assistant ascribes this to migration of inhabitants owing to scarcity and high prices of food stuffs. No in-patients. One hundred and four minor operations were performed: no major operation. The total expenditure was Rs. 639, of which Rs. 398 represent the cost of establishment. Government contributed Rs. 2 as cost of forms and registers. The price of Europe medicines, obtained from private druggists, was Rs. 221. The cost of bazar medicines was Rs. 3. Rs 15 represent expenses under miscellaneous items. Municipal contribution amounted to Rs. 330, and Rs 62 were obtained as interest on investments. Native subscriptions amounted to Rs. 39. The invested capital at the end of the year was Rs. 1,652.

*Meherpore.*—It is under the local municipality, and is therefore in class II. Six meetings were held. Visited once by the Commissioner of the division, thrice by the District Magistrate, and four times by the Civil Surgeon. The civil hospital assistant in charge of the sub-division is in charge of the institution, for which he gets Rs. 10 from the municipality. The number of patients treated was three in and 1,824 out, against three and 2,607 in 1883. The daily averages were ·13 and 15, against ·09 and 20 respectively. There was no death. One major and 115 minor operations were performed. The total expenditure was Rs. 415. Government contributed Rs. 3-7-6, namely, Rs. 3 as cost of forms and registers, and annas 7-6 for dieting of police cases. Europe medicines cost Rs. 86; and bazar medicines Rs. 6. Rs. 300 represent the cost of establishment. The expenditure on miscellaneous items was Rs. 23. Municipality paid Rs. 411.

*Kooshtea*—This is a municipal dispensary in class II. The affairs of the dispensary are brought under review at the monthly meetings of the commissioners. Visited once by the Commissioner of the division. The civil medical officer of Goalundo, the Superintendent of the dispensary, paid three visits. He has submitted the report. The civil hospital assistant of the sub-division is in charge, and receives Rs 15 per mensem from the dispensary funds. There were treated 828 out-patients with a daily average of six, against 733 and six in 1883. Fifty-seven minor operations were performed: no major operation. The total expenditure was Rs. 413, of which Rs. 299 represent the cost of establishment, Rs. 6 of bazar medicines, and Rs. 88 of Europe medicines. The expenditure on buildings was Rs. 11, and on miscellaneous items Rs. 8. Government contributed Re. 1 as cost of forms and registers. Municipality contributed Rs. 196. Subscriptions from Europeans and natives amounted to Rs. 201 and Rs. 11 were obtained as interest on investments. The dispensary had an invested capital of Rs. 244 at the end of the year.

**Jessore district.**

The report of the Civil Surgeon is full and complete. It has been forwarded with useful remarks by the Magistrate and Commissioner. The year 1884 is reported to have been an unhealthy one compared with the previous year. The total number of recorded deaths was 53,165, against 47,765, shewing an increase of 5,400 over the previous year. This is said to be mainly due to the great increase in the number of deaths from cholera and fever. There were six dispensaries at the end of the year. Of these, one was under the local municipality, and therefore in class II; and five in class IIIA. Two received both in and out door patients, the rest only out-door patients One was in charge of an Assistant Surgeon, and the others were in charge of civil hospital assistants The total number of patients treated was 417 in and 18,013 out, against 310 and 16,138 in 1883, the daily averages being 15 and 119, against 10 and 106 respectively. The managing Committees of the several dispensaries are said to take great interest in the working of their dispensaries, except at Chandra and Jessore. The Civil Surgeon says that at "Chandra there appears to be very little interest taken by either the secretary or the members of the committee. At Jessore, with the exception of the Vice-Chairman, none of the municipal commissioners visited the dispensary. The subscriptions are much in arrears, and no sub-committee has been formed for the regular inspection and supervision of the working of the dispensary."

*Jessore.*—This is a class II dispensary under the local municipality. Its affairs were considered at the municipal meetings. Visited once by the Hon'ble the Lieutenant-Governor of Bengal, once by the Commissioner of the division, five times by the District Magistrates, four times by the Vice-Chairman of the municipality, and daily by the Civil Surgeon. An Assistant Surgeon was in charge, who received Rs. 100 a month from the municipality. There were treated 399 in and 6,878 out patients, against 295 and 5,661 in the previous year. The daily averages were 14 and 34, against 10 and 33 respectively. There were 24 deaths, against 25 in 1883. Fifty-four major and 512 minor operations were performed. Two deaths resulted after operation. The total expenditure was Rs. 3,095, whereof Rs. 1,548 was the cost of establishment. Government contributed Rs. 149, of which Rs. 147 were for diet of police cases, and Rs. 2 in registers and forms. The cost of Europe medicines was Rs. 343, but of this amount Rs. 281 was the price of medicines supplied during 1883, which was not paid for in that year. Bazar medicines cost Rs. 232 (including Rs. 85, the cost of cinchona febrifuge purchased from Government). The expenditure on diet was Rs. 456, on buildings Rs. 344, and on miscellaneous items Rs. 171. Municipality paid Rs. 2,236. Subscriptions from Europeans was Rs. 120, from natives Rs. 489, and interest on investments was Rs 22. Rs. 59 were obtained from local funds. There was an invested capital of Rs. 1,806 at the end of the year.

*Jhenidah.*—It is a sub-divisional dispensary in class IIIA under the management of a local committee, which met seven times during the year. Visited once by the District Magistrate, and three times by the Civil Surgeon. The sub-divisional hospital assistant, who receives his grade pay from Government, was in charge of the institution, and received Rs. 10 from the dispensary funds. There were treated 2,102 out-patients with a daily average of 15, against 1,548 and 10 in 1883. No in-patients. Two major and 55 minor operations were performed during the year. The total expenditure was Rs. 475, whereof Government contributed Rs. 6, namely Rs. 3 as cost of forms and registers, and Rs. 3 for diet of police cases. Rs. 233 represent the cost of establishment, Rs. 99 of Europe medicines, and Rs. 15 of bazar medicines. Rs. 59 were expended on buildings and Rs. 69 on miscellaneous items. The dispensary was maintained by subscriptions from Europeans and natives, which amounted to Rs. 110 and Rs. 247 respectively. Rs. 100 were obtained by withdrawal of deposits, and Rs. 12 as interest on investments. The dispensary had an invested capital of Rs. 300 at the end of the year.

*Magura.*—A sub-divisional dispensary in class IIIA under the management of a committee which met eight times during the year. Visited once by the District Magistrate and three times by the Civil Surgeon. A civil hospital assistant is in charge, who receives his grade pay from Government for the sub-division, and Rs. 10 from the dispensary fund as an extra allowance. There were treated 18 in and 2,187 out patients, against 15 and 2,472 in 1883. The daily averages were ·64 and 11, against ·33 and 11 respectively. There were three deaths, against four in the previous year. Forty-eight minor operations were performed: no major operation. The total expenditure was Rs 495, whereof Rs 348 represent the cost of establishment, Rs. 46 of Europe, and Rs. 15 of bazar medicines. The cost of diet was Rs. 5. The expenditure on buildings was Rs. 42, and on miscellaneous items Rs. 15. Government paid Rs. 2-8, viz. 9 annas 6 pies as cost of forms and registers, and Rs. 1-14-6 for diet of police cases. The income from European and native subscriptions was Rs. 31 and Rs. 263 respectively. Rs. 20 were obtained as interest on investments and Rs. 174 from local or other funds. The dispensary had a cash balance of Rs. 117 in hand and an invested capital of Rs. 570 in the district savings bank at the end of the year.

*Narail.*—A sub-divisional dispensary in class IIIA managed by a committee which held 10 meetings during the year. Visited once by the District Magistrate and twice by the Civil Surgeon. A second class civil hospital assistant was in charge, who received Rs. 25 for charge of the sub-division since July last, when the Government order appointing a third class civil hospital assistant to the sub-division came into force, he has received Rs. 25 from the dispensary fund, and some gentlemen living in the place have raised a monthly subscription of Rs. 10 with a view to retain his services. His emoluments have therefore been Rs. 60 per month. The number of uot-patients treated was 2,133, with a daily average of 18, against 1,434 and 14 in the previous year. No in-patients. Seventy-two minor operations were performed: no major operation. The total expenditure was Rs. 651, whereof Rs. 387 represent the cost of establishment, Rs 182 of Europe medicines, and Rs. 11 of bazar medicines. The expenditure on buildings was Rs. 10, and on miscellaneous items Rs. 60. Government contributed forms, the cost of which was Rs. 2. Subscriptions from natives were Rs. 480 and Rs. 6 were obtained from local funds. The dispensary had a cash balance of Rs. 17 at the end of the year.

*Sreedhurpore.*—It is a class IIIA dispensary under the management of a committee which met 12 times during the year. Visited once by the sub-divisional officer of Narail. The Civil Surgeon inspected it twice. A civil hospital assistant is in charge whose entire pay is paid from the dispensary fund. The number of out-door patients treated was 2,131, with a daily average of 23, against 1,978 and 18 in 1883. No in-patients. One major and 67 minor operations were performed. The total expenditure was Rs. 734, whereof Rs 567 represent the cost of establishment Rs. 90 of Europe medicines, and Rs. 9 of bazar medicines. The expendiure on buildigs was Rs. 15, and on miscellaneous items Rs. 24. Government contributed forms and registers, the cost of which was Rs. 2-10-5 Rs. 124 were obtained from local funds, and Rs. 51 as interest on investments. Subscriptions from natives were Rs. 120. The dispensary had a cash balance of Rs. 644 and an invested capital of Rs. 1,366 at the end of the year.

*Chandra.*—A class IIIA dispensary managed by a committee which held no meetings during the year. No visits were paid by any of the civil officers. It was twice inspected by the Civil Surgeon A civil hospital assistant was in charge. The total number of out-door patients treated was 2,582, with a daily average of 16, against 3,045 and 19 in 1883. No in-patients. One hundred and twenty-six minor operations were performed. The total expenditure was Rs 704, whereof Government paid Rs. 2-10-5 as cost of forms and registers. Establishment cost Rs. 456, Europe medicines Rs. 111, and bazar medicines Rs. 26. Rs. 31 were expended on miscellaneous items. Rs. 80 were obtained as interest on investments. Subscriptions from natives were Rs. 480. The dispensary had a cash balance of Rs. 1,094 and an invested capital of Rs. 2,223 at the end of the year.

**Moorsheda-bad district.** The report of the Civil Surgeon is full and complete. It has been forwarded by the Commissioner of the division with interesting remarks on the working of the institutions. The Civil Surgeon says that the public health of the district during the year under report did not on the whole compare favourably with that of the previous year, the

number of recorded deaths being 33,100, against 30,267 in 1883. The prevalence of fever was less than it has been for years past, and the mortality caused by it was proportionately less also. Unfortunately cholera prevailed in certain portions of the year to an unusual extent, and more than counterbalanced the reduced death-rate caused by fever. The total number of dispensaries at the close of the year was six, against five in 1883. During the year one dispensary was opened at Jeagunge, which was sanctioned under Government of Bengal letter No. 1060T—M, dated 27th August 1883. Under the present system of classification five dispensaries were in class II and one in class IIIA. Of the six dispensaries, five were in charge of Assistant Surgeons, and the sixth under a graduate of the Medical College, formerly in Government employ. All the dispensaries received both in-door and out-door patients There were treated in all the dispensaries 1,250 in and 39,067 out patients, against 1,076 and 34,009 in 1883, the daily averages being 67 and 293, against 59 and 241 respectively. These figures, says the Civil Surgeon, deserve every confidence. Of the six dispensaries, five were under municipalities, and one in charge of a private manager. The managing bodies of all the institutions are said to take a fair amount of interest in them, and there is no doubt that they are appreciated by the people who resort to them for treatment.

*Berhampore.*—This is a class II dispensary, under the management of the municipality. Visited once by the Commissioner of the division, and often by the Magistrate of the district. The Civil Surgeon visited it almost daily. An Assistant Surgeon was in charge, who received his pay, Rs 120 per month, from the municipality. The total number of patients treated during the year was 412 in and 7,661 out, against 393 and 8,011 in 1883, the daily averages being 28 and 48, against 23 and 50 in the previous year. There were 47 deaths, or a rate of 11·4 per cent., against 53 and 13·49 in the previous year. The decrease in the mortality was due to the healthiness of the locality. Twenty-seven major and 465 minor operations were performed. The total expenditure amounted to Rs. 3,719, whereof Government contributed Rs. 36, namely Rs. 17 as cost of forms and registers, and Rs. 19 for diet of police cases. Rs. 1,978 represent the cost of establishment, Rs. 61 of bazar medicines, and Rs. 202 of Europe medicines which were obtained from private druggists. The expenditure on diet was Rs. 835, on buildings Rs. 500, and on miscellaneous items Rs. 142. Municipality paid Rs. 656, against Rs. 469 in 1883. Subscriptions from Europeans and natives were Rs. 207 and Rs. 487 respectively. Interest on investments was Rs. 1,863. Rs. 470 were withdrawn from savings bank. The dispensary had Rs. 45,000 invested in Government securities and Rs. 1,180 in deposit in savings bank at the end of the year.

*City Moorshedabad.*—This is also a municipal dispensary in class II, under the management of Lalbagh Municipality, which considered its affairs at its monthly meetings. There was a sub-committee appointed during the year for the purpose of examining the accounts, and inspecting the internal management of the dispensary. Visited once each by the Commissioner of the division and the District Magistrate, and often by the sub-divisional officer. The Civil Surgeon paid monthly visits. An Assistant Surgeon was in charge, who received his whole pay form the municipality. The cost of minor establishment was Rs. 49 per month. The total number of patients treated was 334 in and 10,738 out, against 300 and 9,519 in 1883, the daily averages being 18 and 60, against 17 and 58 respectively. Thirteen midwifery cases were treated, against six in the previous year. There were 43 deaths, or a rate of 12·87 per cent., against 38 and 12·66 in 1883. Forty-three major and 347 minor operations were performed. The total expenditure was Rs. 3,149, whereof Rs. 1,902 were expended on establishment, Rs. 305 on Europe medicines, which were obtained from private druggists, and Rs. 108 on bazar medicines. Dieting articles cost Rs. 602, and Rs. 230 were spent on miscellaneous items. Government contributed Rs. 25, viz. Rs. 11 in registers and forms, and Rs. 14 for diet of police cases. Municipality contributed Rs 2,070 Rs. 244 were received as interest, and Rs. 14 and Rs. 745 as subscriptions from Europeans and natives. The invested capital at the end of the year was Rs. 3,787.

*Jungipore.*—This is a class II dispensary under the management of the municipality. Visited once by the District Magistrate and three times by the Civil Surgeon. A third grade Assistant Surgeon was in charge, who received Rs. 120 per mensem from the municipality. The total number of patients treated was 91 in and 5,350 out, against 102 and 5,661 in 1883, the daily averages being six and 38, against eight and 43 in the previous year. The number of deaths was 12, or a rate of 13·18 per cent., against eight and 7·8 in 1883. Fever was the most prevalent disease. Eight major and 345 minor operations were performed. The total expenditure was Rs. 2,474, whereof Rs. 1,762 were expended on establishment, Rs. 225 on Europe medicines obtained from private druggists, and Rs. 55 on bazar medicines. Dieting articles cost Rs. 158. Rs. 150 were spent on buildings. The expenditure on miscellaneous items was Rs. 123. Government paid Rs. 9 as cost of forms and registers. Municipality contributed Rs. 2,066, against Rs. 1,963 in 1883. Rs. 24 were received as interest on investments. Subscriptions from Europeans and natives were Rs. 55 and Rs. 319 respectively. The dispensary has an invested capital of Rs. 1,156, viz. Rs. 500 in Government paper and Rs. 656 as deposit in savings bank at the end of the year.

*Kandi.*—It is a class II municipal dispensary. Visited once by the Commissioner of the division and twice by the District Magistrate. The Civil Surgeon inspected the

institution twice. A second grade Assistant Surgeon is in charge, who receives his grade pay from the municipality. There were treated 214 in and 7,203 out-patients, against 189 and 6,395 in 1883; the daily averages were seven and 63, against four and 58 respectively. There were 13 deaths, or a rate of 6·07 per cent., against 19 and 13·6 in the previous year. Fifteen major and 215 minor operations were performed. The total expenditure was Rs. 2,732, whereof Government contributed Rs 18 as cost of forms. Rs. 2,137 represent the cost of establishment, Rs. 203 of Europe medicines, which were obtained from private druggists, and Rs. 83 of bazar medicines. The expenditure on buildings was Rs. 28, and on miscellaneous items Rs. 58. Dieting articles cost Rs. 223. Municipality paid Rs. 1,650, against Rs. 1,629 in 1883. Subscriptions from natives were Rs. 975, and Rs. 89 were received as interest on investments. The dispensary had an invested capital of Rs. 2,389 in savings bank at the end of the year.

*Lalgola.*—This is a class IIIA institution entirely supported by Rao Jogendro Narain Roy, the local zemindar. There is no committee of management. The zemindar who is the sole supporter of the institution, looks after all its requirements personally. It was visited by the sub-divisional officer of Jungipore more than once. The Civil Surgeon paid two visits during the year. A graduate of the Calcutta Medical College, not in service of Government, is in charge, and receives Rs. 100 per mensem. There were treated 142 in and 4,112 out patients, against 142 and 4,423 in 1883, the daily averages being five and 28, against five and 29 respectively. The total number of deaths was eight, or a rate of 5·63 per cent., against five and 3·5 in the previous year. Nine major and 148 minor operations were performed during the year. The total expenditure was Rs. 2,160, whereof Rs. 1,584 represent the cost of establishment, and Rs. 8 of bazar medicines. Europe medicines, which were obtained from private druggists, cost Rs. 283. The expenditure on dieting articles was Rs. 200, and Rs. 84 were spent on miscellaneous items. Government contributed Rs. 9 in forms and registers.

*Jeagunge.*—This is a class II municipal dispensary. It was opened on the 9th February 1884 by the Lallbagh Municipality. Owing to the want of necessary arrangements, out-door patients only were treated up to June, after which a certain number of in door patients were received. There is, howeve, no accommodation for female patients of this class, the admissions were therefore restricted to male patients. Visited three times by the sub-divisional officer of Lallbagh, and the Civil Surgeon visited it frequently. An Assistant Surgeon was in charge, who received his grade pay, Rs. 100 per mensem, from the municipality. The minor establishment cost Rs. 31, viz. a compounder on Rs. 10, a dresser on Rs. 7, cook on Rs. 4-8, a servant on Rs. 4-8, and a sweeper on Rs. 5. There were treated 57 in and 4,003 out patients with a daily average of two and 53. There were four deaths, or a rate of 7·01 per cent. Eleven major and 279 minor operations were performed. No death after operation. The total expenditure was Rs. 2,287, whereof Rs. 1,446 represent the cost of establishment, Rs. 472 of Europe medicines, obtained from private druggists, and Rs. 77 of bazar medicines. The expenditure on diet was Rs. 62, on buildings Rs. 40, and on miscellaneous items Rs. 189. Government contributed Rs. 18, namely Rs. 12 as cost of forms and registers, and Rs. 6 for diet of police cases. Municipality paid Rs. 2,160. Subscriptions from natives were Rs. 109.

## RAJSHAHYE AND COOCH BEHAR DIVISION.

**Dinagepore district.**

The public health of the district during the year under report was on the whole much better than during 1883, the number of recorded deaths being 26,697, against 28,800. No epidemic appeared in any part of the district. There were five dispensaries in the district as in previous year. One was in class II under the management of the local municipality, and four in class IIIA under private committees. The sudder dispensary received both in-door and out-door patients. The rest out-door patients only. All the dispensaries were in charge of civil hospital assistants. The total number of patients treated including in and out door, was 10,247, against 9,101 in 1883. The daily average was 95, against 85 in the previous year. The means adopted during the year under report to verify the figures returned by the civil hospital assistants, says the civil medical officer, were just the same as in other years. The managing bodies of the dispensaries at Dinagepore, Raigunge, and Chooramun are reported to take interest in their institutions: those of the rest shew little or no interest

*Dinagepore.*—A municipal dispensary in class II. There is a sub-committee of the Municipal Commissioners to check its accounts. Visited seven times by the civil officers. The civil medical officer visited it almost daily. A civil hospital assistant was in charge, whose entire pay was paid by the municipality. The total number of patients treated was 295 in and 3,904 out door, against 261 and 3,210 in 1883. The daily averages were eight and 31, against 10 and 25 respectively. This increase in the total number of both in and out door patients is said to be due evidently to increased popularity of the institution. There were 49 deaths, against 43 in the previous year. Five major and 55 minor operations were performed. The total expenditure was Rs 2,018, of which Government contributed Rs. 59, viz. Rs. 16 as cost of forms and registers and Rs. 43 for diet of police cases. The cost of establishment was Rs. 1,184, of bazar medicines Rs. 40, of Europe medicines, which were purchased from private druggists, Rs. 212. Dieting articles cost Rs. 294. Rs. 80 were spent on miscellaneous items, and Rs. 205 on buildings. Municipality

paid Rs. 1,132. Rs. 80 were obtained as interest on investments Subscriptions from Europeans and natives were Rs. 160 and Rs. 495 respectively. The dispensary has a capital of Rs. 2,000 invested in Government securities.

*Raigunge.*—It is a class IIIA institution managed by a committee which held thirteen meetings during the year. No visits were paid by civil officers. Visited twice by the civil medical officer. A second grade civil hospital assistant is in charge, who gets his entire pay from the dispensary fund. There were 1.873 out-door patients treated, against 1,660 in 1883, the daily average being 23 against 21. Minor operations numbered 76. The total expenditure was Rs. 585, whereof Rs. 403 represent the cost of establishment. Rs. 62 were expended on Europe medicines, and Rs. 3 on bazar medicines. Government contributed Rs. 2-12-6 in forms and registers. The expenditure on miscellaneous items was Rs 29, and on buildings Rs. 78. Rs. 9 were obtained as interest on investments. Subscriptions from natives amounted to Rs. 480.

*Mohadebpore.*—This is a class IIIA dispensary under the management of a Committee which held four meetings. Visited once by the District Magistrate and twice by the civil medical officer. A civil hospital assistant was in charge, who received his whole pay from the dispensary fund. There were treated 1,075 out-patients with a daily average of six, against 1,059 and four in 1883. Twenty minor operations were performed. The total expenditure was Rs. 578, whereof Rs. 358 represent the cost of establishment. Rs. 85 of Europe medicines, which were obtained from private dealers, and Rs. 9 of bazar medicines. Government paid Rs. 2-12-6 for forms and registers. The dispensary had a deposit of Rs. 253 in savings bank, and a cash balance of Rs. 29 at the end of the year.

*Chooraman.*—It is a class IIIA dispensary supported by an estate under the Court of Wards, and managed by a committee which held 12 meetings during the year. Visited twice each by the Magistrate and the civil medical officer. A civil hospital assistant is in charge who gets his entire pay from the dispensary fund There were 2,112 out-door patients, treated with a daily average of 14, against 1,721 and 13 in the previous year. One hundred and twenty-three minor operations were performed. The total expenditure was Rs. 563. Government contributed Rs. 2-12-6 in forms and registers. Rs. 436 represent the cost of establishment. The cost of Europe medicines was Rs. 48, and of bazar medicines Rs. 9. Rs. 68 were spent on miscellaneous items. Native subscriptions amounted to Rs. 480. Rs. 6 were received as interest on investments. The dispensary had a cash balance of Rs. 239 at the end of the year.

*Baloorghat.*—It is a class IIIA institution supported by an estate under the Court of Wards, and managed by a committee which held no meetings during the year. Visited once by the District Magistrate and twice by the civil medical officer. A civil hospital assistant was in charge, who received his entire pay from the dispensary fund. There were treated 988 outpatients, with a daily average of 10, against 1,190 and 10 in 1883. Twenty-five minor operations were performed: no major operation. The total expenditure was Rs. 729, of which Government contributed Rs. 2-11-6 in forms and registers. The cost of establishment was Rs. 440. Europe medicines obtained from private druggists, cost Rs. 205. The expenditure on bazar medicines was Rs. 16, on buildings Rs. 10, and on miscellaneous items Rs. 57. Subscriptions from natives amounted to Rs 570. Rs. 205 were obtained from local funds. The dispensary has a deposit of Rs. 258 in the Government savings bank, and a cash balance of Rs. 181.

Rajshahye district.

The year 1884 is said to have been somewhat more unhealthy than the previous year. The mortuary statistics gave a mortality of 36·41 per 1,000, against 32·5 in 1883. Cholera caused three times as many deaths as it did in the previous year. Fever caused almost the same mortality as in 1883. At the close of the year there were seven dispensaries in the district. Of these, one was in class II, and the other six in class IIIA. One was under an Assistant Surgeon, five under civil hospital assistants in Government service, and the seventh under the charge of a private medical subordinate, who is a licentiate of the Campbell Medical School. The dispensaries at Beauleah and Nattore received both in and out door patients; the rest out-door patients only. The total number of patients treated was 397 in and 22,570 out, against 340 and 21,855 in 1883; the daily averages were 14 and 193, against 13·9 and 222 respectively. The in-door cases and their daily average were greater than in 1883. The out-door cases again were more, but the daily attendance was less by 29. This, in the opinion of the Civil Surgeon, is due to cases of fever and its results being less grave on the whole than during 1883. The figures of Beauleah dispensary, says the Civil Surgeon, may be depended on. The Civil Surgeon has no faith in the accuracy of the figures of Lalpore Dispensary. With regard to the rest of the dispensaries, the Civil Surgeon says, that he has no positive proof of accuracy to give, beyond finding their returns correct according to their book entries. Excepting the two proprietors, namely Raja Kristender Rai of Bolihar and Baboo Raj Coomar Sarkar of Karrachmaria, the Civil Surgeon cannot name any other who take interest in the working of their dispensaries. The Committee of the Kosimpore dispensary takes a good deal of interest in that institution. As regards the others, except Beauleah, which the Civil Surgeon daily supervises, no interest whatever is shewn.

*Beauleah*—This is a class II municipal dispensary. It is supported by the Prossono Nath Fund, with a contribution of Rs. 175 per mensem from the local municipality, and managed by a committee which met once during the year. The dispensary was visited once by the Commissioner and twice by the District Magistrate, who recorded no remarks. The

Civil Surgeon inspected it almost daily. A third grade Assistant Surgeon was in charge, who received Rs. 100 per mensem from the Prossono Nath Rai Fund, for the dispensary and an additional allowance of Rs. 20 for the madrassa, and Rs. 50 for the college from Government. There were treated 297 in and 6,789 out door patients, against 239 and 6,670 in 1883, the daily averages being 10 and 43, against 10 and 55. The deaths were 61, or 20·5 per cent. against 32 and 13·3 in 1883 The great increase of deaths, the Civil Surgeon says, is due to the excessive number of moribund cases brought in by the police. Sixty-six major and 395 minor operations were performed : no deaths resulted after operation. The total expenditure was Rs. 2,465, whereof Rs 1,565 represent the cost of establishment, Rs. 209 of Europe medicines, and Rs. 81 of bazar medicines. The cost of diet was Rs 264 The amount expended on buildings was Rs. 222, and on miscellaneous items Rs. 121. Government paid Rs. 9 as cost of forms and registers.

*Nattore.*—It is a class IIIA dispensary supported by the Prosonno Nath Fund, and managed by a committee, which held one meeting during the year. It was visited twice by the District Magistrate and once by the sub-divisional officer. The Civil Surgeon inspected it three times. A first class civil hospital assistant was in charge, who was absent on sick leave from 17th March 1884. A third class hospital assistant officiated, who received Rs. 45 per mensem from Prosonno Nath Rai Fund, Government paying him Rs. 25 monthly for charge of the sub-division and Rs 10 for executive charge of the sub-jail. There were treated 100 in and 3,697 out patients, against 101 and 3,655 in 1883. The daily averages were three and 25, against three and 34 respectively. There were 23 deaths, or 23 per cent. of treated, against 26 and 25·7 in the previous year. Five major and 300 minor operations were performed. The total expenditure was Rs. 1,429, whereof Rs. 918 represent the cost of establishment, Rs. 187 of Europe medicines, and Rs. 31 of bazar medicines. The cost of diet was Rs. 64. The amount expended on miscellaneous items was Rs. 64, and on buildings Rs. 164 Government contributed Rs. 9 as cost of forms and registers. The Civil Surgeon says that "endeavours were made to get the municipality to give a contribution towards the support of the institution. They could not do so at the time, but promised to do so in the future."

*Pooteah.*—A dispensary in class IIIA entirely supported by Ranee Monmohiney Debya. There is no committee. No interest is shewn by any of the Ranee's employés in the institution. Visited twice by the Magistrate. The Civil Surgeon paid no visits. A hospital assistant was in charge. The number of out-patients treated was 4,187, with a daily average of 30, against 4,371 and 29 in 1883. Fever was somewhat less prevalent in the neighbourhood than during 1883. Cholera on the other hand was more fatal. No in-patients. Four major and 229 minor operations were performed. The total expenditure was Rs. 1,109, of which Rs. 900 were the cost of establishment, Rs. 168 of Europe medicines, and Rs. 16 of bazar medicines. The amount expended on miscellaneous items was Rs. 24. The cost of forms and registers obtained from Government was Rs. 9.

*Lallpore.*—It is a class IIIA dispensary entirely supported by Maharanee Shurut Soondary. No committee. No supervision whatever is exercised over it on the part of the Moharanee. Visited twice by the Magistrate of the district and once by the Civil Surgeon. A civil hospital assistant is in charge, who gets Rs. 60 from the dispensary fund. No in-patients The number of out-door patients treated was 3,106, with a daily average of 25 against 2,196 and 24 in 1883. Two major and 115 minor operations were performed. The total expenditure was Rs. 1,094, of which Rs. 885 were the cost of establishment, Rs. 107 of Europe medicines, and Rs. 37 of bazar medicines. Rs. 50 were spent on buildings, and Rs. 15 on miscellaneous items. Government contributed Rs. 9 as cost of forms and registers.

*Kurruchmaria.*—A dispensary in class IIIA supported by Baboo Raj Kumar Sarkar, the local zemindar, who took a warm interest in its working There was no committee. A civil hospital assistant was in charge, who was paid Rs 25 per mensem. The dispensary was inspected once by the Civil Surgeon. There were treated 1,457 out-patients with a daily average of 22, against 1,796 and 30 in 1883. No in-patients. Minor operations numbered 28: no major operations. The total expenditure was Rs. 495, of which Rs. 321 represent the cost of establishment. Europe medicines cost Rs. 119, and Rs. 27 were spent on bazar medicines. The amount expended on miscellaneous items was Rs. 28. Government contributed Rs 8 as cost of forms and registers.

*Kassimpore.*—A dispensary in class IIIA supported and managed by a private committee, which met eight times during the year. Visited once each by the Magistrate and sub-divisional officer. The Civil Surgeon inspected it once during the year. A civil hospital assistant was in charge, who received Rs. 40 per mensem. There were treated 1,597 out-patients, with daily average of 24, against 1,372 and 26 in 1883. No in-patients. Fifty-one minor operations were performed. The total expenditure was Rs. 726, where of Rs. 607 were the cost of establishment. Europe medicines cost Rs. 66, and bazar medicines Rs. 22. Rs. 30 were spent on miscellaneous items. Government contributed Rs. 8 as cost of forms.

*Bullihar.*—A class IIIA dispensary entirely supported by Rajah Kristendar Roy of Bullihar, who is reported to take a lively and continuous interest in the working of the institution, but maintains it on a very expensive scale. There is no committee. It was visited once by the Magistrate of the district, once by the Magistrate of Dinagepore, and

once by the sub-divisional officer The Civil Surgeon inspected it twice during the year. A native doctor is in charge, who is paid Rs. 60 per mensem. No in-patients. There were treated 1,737 out-patients with a daily average of 21, against 1,795 and 20 in 1883. No major operation: minor operations numbered 97. The total expenditure was Rs. 1,365, of which Rs. 864 represent the cost of establishment. Europe medicines were bought at a cost of Rs. 426. These medicines have always been freely used here. Bazar medicines cost Rs. 40. The expenditure on buildings was Rs. 5, and Rs. 29 were spent on miscellaneous items. Cost of forms and registers obtained from Government was Rs. 8.

Rungpore district.

The health of the district during 1884 was not better than during the previous year. The total number of registered deaths was 39,568, against 38,058. The bulk of the deaths were caused by fever and its sequelæ. Cholera was less prevalent than in the year before. There were 13 dispensaries at the close of the year, against 12 of the preceding year. The dispensary at Kishoregunge having been opened on the 5th March 1884 (Bengal Government letter No. 1142, dated 6th September 1883). Of these 13 dispensaries, four belonged to class IIIB and nine to class IIIA. Two were under the management of Rungpore Municipality, four under local Committees, and the rest under private managers. The managing bodies, says the Civil Surgeon, take interest for the welfare of the institutions under them. Two of these treated both in and out patients: the others out-door patients only. All the dispensaries were in charge of civil hospital assistants. The total number of patients treated was 280 in and 65,648 out patients, against 342 and 56,984 in 1883. The daily averages were 10 and 259, against 13 and 235 respectively. The Civil Surgeon also says that "when the medical officer in charge takes interest in his works and treats the sick poor kindly, the institution becomes popular."

*Rungpore.*—This is a class IIIB dispensary. The local municipality considers its affairs at the general meeting. Visited once by the Commissioner of the division, and almost daily by the Civil Surgeon. A civil hospital assistant was in charge, who received Rs. 55 per mensem from the municipality. There were treated 227 in and 8,462 out patients, against 306 and 7,993 in 1883. The daily averages were 6 and 22 against 10 and 22 respectively. The decrease in the number and attendance of in-patients was due to the more discrimination used in the selection of cases for admission into the hospital. The death-rate was 13·65 per cent. as compared with 17·3 in 1883. Eight major and 82 minor operations were performed. One death resulted after operation. The total expenditure was Rs. 2,133, whereof Rs. 1,193 represent the cost of establishment. The expenditure on Europe medicines obtained from Government stores was Rs. 145, and on bazar medicines Rs. 155. Diet cost Rs. 268. Rs. 189 were spent on buildings, and Rs. 183 on miscellaneous items. Government contributed Rs. 4 in forms and registers. Municipality paid Rs. 855. Interest on investments amounted too Rs. 667. European and native subscriptions were Rs. 135 and Rs. 466 respectively. The dispensary had an invested capital of Rs. 16,300.

*Mahigunge.*—This is a class IIIB dispensary aided and managed by the Rungpore Municipality. It was twice visited by the Civil Surgeon. A civil hospital assistant was in charge. There were treated 7,420 out-patients, with a daily average of 27, against 5,873 and 17 in 1883 These figures, the Civil Surgeon says, do not claim much confidence The diseases prevalent were fever, enlarged spleen, goitre, &c. One hundred and twenty-eight minor operations were performed: no major operation The total expenditure was Rs. 649, whereof Rs. 418 represent the cost of establishment, Rs. 72 of Europe medicines obtained from Government stores, and Rs 109 of bazar medicines. The expenditure on miscellaneous items was Rs. 49. Government contributed forms and registers, the cost of which was Rs 4. Municipality paid Rs 289, and Rs. 356 were obtained as subscriptions from natives.

*Ulipore.*—A class IIIA dispensary under the management of the agent of Moharanee Surnomoyee, who supports it entirely. There was no dispensary committee. It was visited by the Civil Surgeon three times during the year. A civil hospital assistant was in charge, who received Rs. 70 per mensem from the dispensary fund. There were treated 53 in and 5,732 out patients, against 36 and 7,418 in the previous year. The daily averages were three and 50, against three and 63 respectively. The cause of diminution in the attendance of out-door patients is attributed by the civil hospital assistant to the exclusion of the represented cases from the daily attendance, which was not observed in the preceding year. But this explanation, the Civil Surgeon says, does not account for the diminished number of out-door patients treated. There were eight deaths, or a rate of 15·09 per cent., against five and 13·8 in 1883. One hundred and thirty-one minor operations were performed: no major operation. The total expenditure was Rs. 2,615, whereof Rs. 1,167 were expended on establishment, Rs. 988 on Europe medicines obtained from private druggists, and Rs. 85 on bazar medicines. Dieting articles cost Rs 212, and Rs. 162 were spent on miscellaneous items. Government paid Rs. 4 on account of registers and forms. Native subscriptions amounted to Rs. 2,611.

*Kakina.*—It is a class IIIA out-door dispensary supported and managed by the local zemindar Baboo Mohima Runjun Roy. No committee. It was visited four times by the Civil Surgeon during the year. A civil hospital assistant was in charge, who received Rs. 40 per mensem from the dispensary fund. There were treated 8,075 out-patients, with a daily average of 13, against 7,126 and 11 in 1883. This increase is attributed to greater prevalence of fever during the year than in 1883. Two major and 141 minor operations were performed. One death resulted after operation (large iliac abscess). The total expenditure was Rs. 952, of which Rs. 665 represent the cost of establishment. Europe medicines were obtained

from private sources at a cost of Rs. 164, and bazar medicines cost Rs. 37. The expenditure on miscellaneous items was Rs. 86. The cost of forms supplied by Government was Rs. 3. The dispensary is supported by native subscriptions, which amounted to Rs. 948.

*Tushbunder.*—This is a class IIIA out door dispensary, managed and supported by Rai Romoni Mohun Chowdhery Bahadoor, the local zemindar. No dispensary committee. Visited four times by the Civil Surgeon. A native doctor was in charge, who was not in Government service. There were treated 6,877 out-patients, with a daily average of 21 against 7,361 and 23 in 1883. This falling off is attributed by the native doctor to the non-prevalence of any epidemic during the year. Sixty-seven minor operations were performed: no major operation. The total expenditure was Rs. 931, of which Rs. 636 represent the cost of establishment. The cost of English medicines obtained from private sources was Rs. 195, and of bazar medicines Rs. 45. The expenditure on buildings was Rs. 15, and on miscellaneous charges Rs. 39. Government contributed Rs. 3 on account of forms and registers.

*Battashim.*—It is a class IIIA out-door institution, entirely supported by Baboo Luchmiput Sing Bahadoor. Visited twice by the Civil Surgeon. A hospital assistant was in charge, who was paid Rs. 35 per mensem by the supporter. There were treated 2,410 out-patients, with a daily average of 15 against 3,338 and 19 in 1883. Sixty-nine minor operations were performed: no major operation. The total expenditure was Rs. 833, of which Rs. 572 represent the cost of establishment, Rs. 129 of Europe medicines, which were obtained from private druggists; bazar medicines cost Rs. 43; miscellaneous expenses amounted to Rs. 88; Government contributed Rs. 3 for forms and registers.

*Dimla.*—It is a class IIIA out-door dispensary supported by Baboo Janokee Bullhub Sen, a local zemindar, and managed by a committee, which held four meetings during the year. It was visited twice by the Civil Surgeon. A civil hospital assistant was in charge, who was paid Rs. 35 monthly by the supporter. There were treated 3,224 out-patients, with a daily average of 15 against 2,583 and 14 in 1883. Thirty-five minor operations were performed: no major operation. The total expenditure was Rs. 601, of which Rs. 102 were spent on English medicines obtained from private dealers, and Rs. 456 on establishment. The expenditure on bazar medicines was Rs. 23, and on miscellaneous items Rs. 20. Government paid Rs. 3 as cost of forms.

*Kurigram.*—It is a class IIIA out-door institution situated at the head quarters of the Kurigram sub-division, and managed by a local committee presided over by the sub-divisional officer. Four meetings were held. It was visited three times by the Civil Surgeon. A civil hospital assistant was in charge, who received his grade pay Rs. 35 per mensem from Government for the sub-division, Rs. 10 for executive charge of the sub-jail, and Rs 10 from the dispensary funds. There were treated 7,787 out-patients, with a daily average of 21 against 5,551 and nine in 1883. Two major and 28 minor operations were performed. The total expenditure was Rs. 563, of which Rs. 305 represent the cost of establishment. Europe medicines were obtained from private druggists at a cost of Rs. 113 as compared with Rs. 158 in 1883. Rs. 17 were spent on bazar medicines. The expenditure on buildings was Rs. 59, and on miscellaneous items Rs. 39. Government paid Rs 61, namely Rs. 58 as special allowance towards arrears of pay of the civil hospital assistant up to 25th June 1884 at Rs. 10 per mensem, and Rs 3 as cost of forms and registers. Rs. 29 were obtained as interest on investments, and Rs. 200 by withdrawal of deposits. Subscriptions from natives amounted to Rs. 320. The dispensary had an invested capital of Rs. 1,027 and a cash balance of Rs. 55 on the 31st December 1884.

*Saptana.*—It is a class IIIA dispensary supported out of the estate of late Rai Annada Prosad Chowdhery of Kassim Bazar, and managed by his agent. It was visited three times by the Civil Surgeon during the year. A civil hospital assistant was in charge, who was paid Rs. 30 monthly. The total number of out-patients treated was 2,986, with a daily average of 12, against 2,115 and 11 in 1883. The increase in the number of patients is said to have been due to greater prevalence of fever. Twenty-four minor operations were performed: no major operation. The total expenditure was Rs. 744, of which Rs. 432 represent the cost of establishment, Rs. 213 of English medicines, which were obtained from private sources, and Rs. 27 of bazar medicines. Buildings and repairs cost Rs. 50, and Rs. 22 were spent on miscellaneous items. Government paid Rs. 3 in forms and registers. The income from native subscriptions was Rs. 741.

*Dinhatta.*—It is a class IIIB dispensary supported from the estate of late Baboo Jogendro Narain Rai Chowdhery, and managed by a committee which met once during the year. It was visited three times by the Civil Surgeon. A civil hospital assistant was in charge, half of whose pay was paid by Government. There were treated 3,735 out-patients, with a daily average of 19 against 4,084 and 20 in 1883. Minor operations numbered 43; no major operation. The total expenditure was Rs. 736, of which Rs. 394 represent the cost of establishment. Government paid Rs. 166, viz. Rs. 163 as pay of the hospital assistant and Rs. 3 on account of forms and registers. Europe medicines were obtained from private dealers at a cost of Rs. 175, and Rs. 29 were spent on bazar medicines. The expenditure on miscellaneous items was Rs. 22. Besides a cash balance of Rs. 115. Rs. 114 were invested during the year.

*Gayabunda.*—It is a class IIIB sub-divisional dispensary supported by local fund and managed by a committee, which met three times during the year. The Civil Surgeon inspected it, but the number of times is not stated. A civil hospital assistant was in charge, who

received Rs. 10 from Government for it. There were treated 3 867 out-patients, with a daily average of 15 against 2,439 and 12 in 1883. This increase is stated to be probably due to greater prevalence of fever. One major—a reduction of dislocation—and 36 minor operations were performed. The total expenditure was Rs. 787, whereof Rs. 288 was the cost of establishment. Europe medicines, obtained from private druggists, cost Rs. 116, bazar medicines Rs. 12, and Rs. 323 were spent on buildings, and Rs 22 on miscellaneous items. Government paid Rs 123, viz. Rs. 120 as allowance, at Rs. 10 per mensem, to the civil hospital assistant, and Rs. 3 as cost of forms and registers. There was a cash balance of Rs. 1,176 at the end of the year, and Rs. 26 were invested.

*Nelphamaree.*—This is a class IIIA dispensary managed by a local committee, of which the sub-divisional officer is the President The dispensary has been removed to the new building completed during the year. There were eight meetings of the Committee. The Civil Surgeon visited it three times. The civil hospital assistant in charge of the sub-division was in charge, who received Rs. 10 for it from the dispensary fund. The number of patients treated was 3,090 out-door, with a daily average of 12, against 1,103 and 10 in 1883. This shews an increase over the past year, which, it is said, was due to the continuance of dispensary work throughout the whole year; whereas in the preceding year it existed only for five months, having been opened in the month of August 1883. No in-door patients. Forty-five minor operations were performed: no major operation. The total expenditure was Rs. 1,382, whereof Rs. 330 represent the cost of establishment, Rs. 214 of Europe medicines, which were obtained from private druggists. and Rs. 10 of bazar medicines. The expenditure on miscellaneous items was Rs. 58, and on buildings Rs. 448. Government paid Rs. 4 for forms and registers. The dispensary had an invested capital of Rs. 2,259 at the end of the year.

*Kishoregunge.*—This is a class IIIA dispensary. It was opened on the 5th March 1884 (sanctioned under Government order No. 1142T—M, dated 6th September 1883). It is supported and managed by Kumaree Bibi, a wealthy merchant of Kishoregunge, in the Nelphamaree sub-division. No committee. Visited once by the Civil Surgeon. A civil hospital assistant was in charge, who received Rs. 30 per mensem from the supporter of the institution. The minor establishment consists of a compounder on Rs. 7 and a peon on Rs 3 per month. The number of patients treated since its opening was 2,483, and the daily average was 12. No in-door patients. Forty-eight minor operations were performed. The total expenditure was Rs. 836, whereof Rs. 381 represent the cost of establishment, Rs. 260 of Europe medicines, which were obtained from private druggists, and Rs. 13 of bazar medicines. The expenditure on miscellaneous items was Rs 5. Government contributed Rs. 3 in forms and registers. Rs. 177 were invested during the year.

**Bogra district.**

The general health of the district during the year under report was not so good as it had been in 1881 and 1883, but almost similar to that in 1882. The number of the registered deaths was 18,341, against 15,887 in 1883, 17,662 in 1882, and 15,349 in 1881. Both the Civil Surgeon and the Magistrate agree in saying that this increase in mortality is due to the greater unhealthiness of the year and improved registration of deaths. There were three dispensaries in the district at the end of the year; two of these were in class II, and the third in class IIIA. The dispensary at Bogra treated both in-door and out-door patients, and those at Nowkhilla and Sherepore only out-door patients. All the dispensaries were in charge of civil hospital assistants. The total number of patients treated was 115 in and 9,271 out, against 103 and 8,110 in 1883, the daily averages being three and 76 against four and 69 respectively. The Civil Surgeon examined the registers and returns of the institutions in his inspection, and is of opinion that the figures are more likely correct than otherwise. The managing bodies of all the dispensaries are reported to take a lively interest in them, and the institutions are appreciated by the people.

*Bogra.*—It is a municipal dispensary in class II governed by the municipal committee, which held 12 meetings during the year. Visited once by the Commissioner of the division in company with the Magistrate of the district, who visited it twice. Municipal commissioners visited it 11 times, and the Civil Surgeon daily. A civil hospital assistant was in charge, who received Rs. 60 per mensem from municipal funds. There were treated 115 in and 6,121 out patients, against 103 and 5,375 in 1883, the daily averages being three and 40, against three and 42 respectively. The increase in the number of out-patients is attributed to the general prevalence of fever and owing to the popularity of the institution. The increase in the number of in-patients was due to the admissions of many up-country men, who, on their return journey from Serajgunge and Mymensingh, fell sick on their way, and took shelter in the hospital. Moreover, a few cholera cases were also admitted into the hospital during the year. There were 39 deaths, or a rate of 33·91 per cent., against 20 and 19 4 in 1883. The highest death-rate was attributable to the admission of cholera and moribund cases. Twenty-two major and 126 minor operations were performed: no deaths resulted after operation. The total expenditure was Rs. 1,291, of which Rs. 984 were the cost of establishment. English medicines were obtained from Government stores at a cost of Rs. 103, and Rs. 29 were spent on bazar medicines. Dieting articles cost Rs. 63. The expenditure on buildings was Rs 52, and on miscellaneous items Rs. 59. Government contributed Rs. 21, viz. Rs. 4 for forms and registers and Rs. 17 for diet of police cases. Of the total income of Rs. 1,291, municipality paid Rs. 452. Rs. 135 were derived as

interest on investments. Subscriptions from Europeans and natives were Rs. 129 and Rs. 491 respectively. The dispensary had an invested capital of Rs. 3,000 at the end of the year.

*Nowkhilla.*—A class IIIA dispensary wholly supported by late Raja Promatha Nath Roy, Rai Bahadoor, of Dighapatiah, and managed by a private committee, which met six times during the year. The Civil Surgeon visited it thrice. A civil hospital assistant was in charge, who was paid Rs. 50 from the dispensary fund. There were treated 1,926 out-patients, with a daily average of 26 against 1,501 and 18 in 1883. This increase in the number of attendance is ascribed to the general unhealthiness of the place, as also to the fact that the institution is growing in favour among the people. One major and 142 minor operations are said to have been performed. The total expenditure was Rs. 835, whereof Rs. 775 represent the cost of establishment. The cost of English medicines obtained from Government Medical Stores was Rs. 26, and Rs. 13 were spent on bazar medicines. The amount expended on miscellaneous items was Rs. 21. Government supplied forms and registers, the cost of which was Rs. 3.

*Sherepore.*—A class II municipal institution managed by the municipal committee, which held 11 meetings during the year. Visited twice by the Magistrate of the district and four times by the Civil Surgeon. It was visited only once by the municipal commissioners. A civil hospital assistant was in charge, who received Rs. 25 from the municipality. There were treated 1,224 out-patients, with a daily average of nine against five in and 1,234 out patients and ·38 and nine in the previous year. Sixteen minor operations were performed: no major operation. The total expenditure was Rs. 592, of which Rs. 384 represent the cost of establishment, Rs. 15 of Europe medicines obtained from Government stores, and Rs 5 of bazar medicines. Rs. 165 were spent on buildings, and Rs. 22 on miscellaneous items. Government supplied forms and registers, the value of which was nominal, viz. one anna and nine pie. Of the total income of Rs. 592, municipality paid Rs. 116. Interest on investment was Rs. 56. European and native subscriptions amounted to Rs. 162. Rs. 6 were obtained from local funds, and Rs. 170 by withdrawal of deposits.

Pubna district.

The general health of the district during the year under review was worse than that of the four preceding years as evidenced by the mortuary returns, the number of recorded deaths being 42,546, against 32,148 in 1883, 30,627 in 1882, 17,943 in 1881, and 10,794 in 1880. A part of this increase was likely due, the Civil Surgeon says, to the improvement in registration, but not to the extraordinary rise in the mortality, which the figures indicate. Those causes which have rendered the neighbouring district of Nuddea unhealthy have been recently in operation in this district. Malarious fever and cholera were the most prevalent diseases. A temporary epidemic dispensary for out-door patients was opened on the 28th July in the fever-stricken village at Bara Demra in thana Shahzadpore under the sanction of Government in their letter No. 1334T – M, dated 2nd September 1884. On the abatement of fever the dispensary was closed on the 20th August 1884. A similar dispensary was also opened at Sara in thana Pubna on the 28th March on the outbreak of severe form of cholera under the sanction of Government in letter No. 220T—M, dated 13th April 1884. The dispensary was kept moving on in the affected part of the district in accordance with the movements of the disease. It was closed on the 6th of May 1884. There were two dispensaries as in 1883. Both of these were in class II, and received in-door and out-door patients. The dispensary at Serajgunge was under the charge of an Assistant Surgeon, and the other at Pubna under that of a civil hospital assistant. The total number of patients treated was 496 in and 11,188 out door, against 333 and 7,415 in 1883. The daily averages were 16 and 101, against 13 and 77 respectively. These figures, says the Civil Surgeon, were tested in his inspections and in his office, and are reliable. The Civil Surgeon also says that he has not included the number of cases treated in the temporary dispensaries, as he found their record unreliable. The municipal commissioners of both the localities, (Pubna and Serajgunge) are said to take much interest in these institutions. The European residents, official and non-official, of Serajgunge take active interest in their institutions. Success in surgery have rendered both these institutions more popular than before.

*Pubna.*—It is a municipal dispensary in class II under the management of the municipal Committee, who discussed dispensary matters along with other business in their monthly meetings. Ten meetings were held during the year. Visited once by the Commissioner of the division, and thrice by the Magistrate of the district. The Civil Surgeon visited it daily. A civil hospital assistant was in charge, who was paid Rs. 55 per mensem by the municipality. There were treated 186 in and 3,232 out patients against 158 and 3,010 in 1883. The daily averages were six and 30, against six and 36 respectively. The number of in-door patients was greater than in the preceding year, and this, notwithstanding careful selection of cases fit for in-door relief, and the exclusion of petty police and venereal cases. Several patients in "well-to-do" circumstances, who had undergone surgical operations, and were detained in the hospital, paid for their food. The death-rate was 14·51 per cent. against 11·3 in 1883. Forty-three major and 173 minor operations were performed. The total expenditure was Rs. 1,532, of which Government contributed Rs. 11, namely Rs. 6 for forms and registers and Rs. 5 for diet of police cases. Rs. 928 represent the cost of establishment, Rs. 173 of English medicines, obtained partly from Government stores and partly from private druggists, and Rs. 62 of bazar medicines. Dieting articles cost Rs. 146. The expenditure on buildings was Rs. 108, and on

miscellaneous items Rs. 115. Municipality paid Rs. 1,428. Subscriptions from Europeans and natives, were Rs. 15 and Rs. 78 respectively.

*Serajgunge.*—A municipal dispensary in class II. Visited once by the Commissioner of the division, and once by the Magistrate of the district. The sub-divisional officer visited weekly. The Civil Surgeon paid one visit, but could not pay a second visit in the latter part of the year for excessive prevalence of cholera and fever in the sudder station. A second grade Assistant Surgeon was in charge, who received Rs. 100 from Government for the sub-division, and Rs. 50 from the municipality for the dispensary. There were treated 310 in and 7,956 out patients against 175 and 4,405 in 1883 The daily averages were nine and 71 against seven and 41 respectively. The increase in the number of patients is ascribed to the excessive sickness that prevailed in the town. The death-rate among in-patients was 13 2 per cent. against 16 in the previous year. Thirty-one major and 337 minor operations were performed against 22 and 239 in 1883. The total expenditure was Rs. 3,059, of which Rs. 1,769 represent the cost of establishment. The cost of Europe medicines, obtained from private druggists, was Rs. 406 against Rs. 328 in 1883. The expenditure on bazar medicines was Rs. 79, on diet Rs. 367, and on miscellaneous items Rs. 89. Rs. 348 were spent towards buildings. Government paid Rs. 72, viz. Rs. 6 for forms and registers, and Rs. 66 for diet of police cases. Municipality paid Rs. 1,905, and subscriptions from Europeans and natives were Rs. 708 and Rs. 373 respectively.

**Darjeeling district.**

The Civil Surgeon reports that the general health of the district during the year under report was exceptionally good. There were no epidemics. Only 27 deaths from cholera are reported to have occurred throughout the district, and no deaths from small-pox. There were five dispensaries at the end of the year against four in 1883; the one at Nuxulbari in the Terai having been opened on the 8th September 1884, under the orders of Government conveyed in its letter No. 1119T—M, dated 28th July 1884. One of those belonged to class II, being amunicipal institution, and one in class I, being entirely supported by Government, the two to class IIIA, and the fifth to class IIIB, supported by municipal and local funds. The dispensaries at Silligoree and Nuxulbari are paid for out of tne one-anna cess fund levied in the Terai for sanitary, local, and general improvements. All the dispensaries were in charge of civil hospital assistants. The dispensaries at Darjeeling, Kurseong, and Silligoree treated both in-door and out-door patients throughout the year. Kalimpong and Nuxulbari dispensaries only out-door patients. The total number of patients treated was 313 in and 9,903 out, against 291 and 9,317 in 1883, the daily averages being 18 and 42, against 15 and 42 respectively. These figures are reported to be accurate. There are no special dispensary committees or private managers. With the exception of Nuxulbari dispensary, all seem to be fairly well appreciated by the people. As regards Nuxulbari dispensary the Civil Surgeon says, that "it has not yet had an opportunity of allowing me to judge whether it is likely to be appreciated."

*Darjeeling.*—A class IIIB dispensary supported entirely by the local municipality. There is no special dispensary committee. It is managed by a sub-committee of the municipal commissioners, to whom the affairs of the dispensary are assigned. It was visited once by the Commissioner of the division. The Civil Surgeon visited it daily. A civil hospital assistant was in charge, who received Rs. 65 per mensem, his grade pay, including the hill allowance of Rs. 10 from the municipality, and Rs. 25 monthly from Government for subordinate charge of civil station and police hospital, besides, other allowances for extra charges. The total number of patients treated was 186 in and 5,382 out, against 248 and 4,912, the daily averages being 13 and 19 against 11 and 17 in 1883. The number of deaths during the year was 36 against 56 in the preceding year. The decrease in the number of deaths was mainly due to there having been no mortality during the year from small-pox. Eight major and 162 minor operations were performed. No deaths resulted from operation. The total expenditure was Rs. 2,754, of which Rs. 1,444 represent the cost of establishment. Rs. 124 were paid for English medicines obtained from Government stores, and Rs. 118 for bazar medicines. Dieting articles cost Rs. 626. The expenditure on miscellaneous items was Rs. 442. Government paid Rs. 24, viz. Rs. 5 for forms and registers and Rs. 19 for diet of police cases. Municipality paid Rs. 1,698. Subscriptions from Europeans was Rs. 837 and from natives Rs. 145.

*Kurseong.*—A municipal dispensary in class II entirely supported by the municipality. There is no Committee. The Assistant Commissioner in charge of the sub-division visits the dispensary very frequently, as does also the civil medical officer, Dr. Morris, and his assistant, Dr. Haydon. It was visited twice by the Deputy Commissioner. The Civil Surgeon of Darjeeling visited this dispensary, and made a regular inspection on two occasions during the year. A civil hospital assistant was in charge, who received his grade pay of Rs. 25 and hill allowance of Rs. 10 per mensem from the municipality and Rs. 20 from Government on account of special allowance for attending on Government servants and for sub-jail. There were treated 47 in and 1,069 out-patients against 35 and 860 in 1883. The daily averages were two and eight against one and six respectively. The increase in the number of in and out patients is said to be due to the increased popularity of the civil hospital assistant, and the fact that the position of the dispensary has been better known. It was removed from the bazar to the present site in 1882. The number of deaths was 13, against 10 in

1883. Fourteen major and fifteen minor operations were performed. The total expenditure was Rs. 858, whereof Rs 570 were expended on establishment. The cost of English medicines, obtained from Government stores, was Rs. 173; bazar medicines cost Rs. 9. The expenditure on diet was Rs. 48. and miscellaneous items Rs. 57. Government paid Rs. 22, viz. Rs. 3 for forms and registers, and Rs. 19 for diet of police cases. Municipality paid Rs. 836, against Rs. 889 in 1883.

*Kalimpong.*—It is a class I dispensary entirely supported by Government. It is situated at a police outpost in the hill tracts. There is no Committee The Deputy Commissioner visited the dispensary three times, and the Civil Surgeon once during the year. A civil hospital assistant was in charge, who received Rs. 40, viz. grade pay for sub-division Rs. ,20, hill allowance of Rs. 10, and dispensary allowance Rs. 10 per mensem from Government. No in-patients. There were treated 2,625 out-patients, with a daily average of seven, against 2,275 and six in 1883. There were no surgical operations. The total expenditure was Rs 484, of which Rs. 384 represent the cost of establishment.

*Silligoree.*—It is a class IIIA dispensary. It was formerly supported out of the "Estates Improvement Fund:" but is now kept up by the "One Anna Cess Fund." The dispensary came on this latter fund from the 1st April 188?. The Estates Improvement Fund was abolished in April 1882, but it was not till November 1883 that it was decided that the maintenance of the dispensary should be borne by the "One Anna Cess Fund." Between April 1882 and November 1883 the dispensary was supported by Government, but it was notified by the Deputy Commissioner of Darjeeling that the dispensary had under the orders of Government been retransferred to the local fund for its maintenance. The Government in making this transfer, ordered that the expenses of working the dispensary from April 1882 to the date of transfer were to be refunded. This has been done. The dispensary is therefore, and has been throughout the year, supported by local funds. There is no Committee of management. It was visited once by the Commissioner of the division and once by the Deputy Commissioner of Darjeeling. The Assistant Commissioner of Kurseong also visited it. The civil medical officer visited it twice, and the Civil Surgeon of Darjeeling paid two visits during the year. A civil hospital assistant was in charge, who received Rs. 25 for the sub-division, and Rs. 10 for sub-jail from Government, and Rs. 10 for the dispensary from local funds. There were treated 80 in and 809 out patients against eight and 1,270 in 1883. The daily averages were 3 and 6 against 2 and 12 respectively. The decrease in the number of out-patients is attributed by the civil hospital assistant to the Terai having been generally healthier than in former years. Two major and 18 minor operations were performed. The total expenditure was Rs. 1,048, whereof Government contributed Rs. 4 as cost of forms and registers. Establishment cost Rs. 382. Nothing was paid for Europe medicines obtained from Government stores during the year. The expenditure on diet was Rs. 122, on bazar medicines Rs. 25, on buildings Rs. 340, and on miscellaneous items Rs. 179. The income during the year was Rs. 1,069 received from local funds.
